WAYNE REPUBLICAN.
A. GOVERNMENTAL - Editor and Publisher.
 Keokuk at the Postoffice at Wayne, Nebraska,
 on subscription notice, March 10, 1885.

Readers of our columns are acquainted with the fact that many of the mills are being compelled to close because of a lack of orders and that the immediate future is very uncertain.

The best sugar crop of all Europe in 1878 was only 1,423,000 tons and this year it will reach over 3,000,000 tons, a decrease of over 50 per cent. The bumper yield by the governments of Europe last year amounted to over \$20,000,000. The United States and Great Britain are more than double the number of pounds of sugar of any other country, each one over the other produce.

The prediction that the sugar crop is increasing would seem with the wonderful supply of the bicycle to point in the best future to the almost abandonment of the horse for road purposes. It will be too slow for the walking and riding of the bicycle and it will also be too slow for the electric cars, which are being introduced in the large cities. The bicycle and the electric cars have almost displaced the horse in the large cities, and on the road machines are being used in the rural districts.

The Sultan of Turkey is getting well along in years and he is probably well along in his official position, and in the present office his official duties are to be done. His position is not so often broken that we have any real danger in this, and the European powers are almost equally in demand that the same delicate and delicate position be adapted to the Sultan. The American position is going to be settled without a general war.—Herald City Journal.

The administration is repeatedly confronted with a deficit in the treasury being insufficient to meet the current expenses of the government. It has been estimated by the most careful and reliable sources that the treasury must be increased by the amount of \$200,000,000 to \$300,000,000 per annum to meet the current expenses of the government.
