Put the laborer at work and all else will soon follow.

Pro-advantage of silver at 16 to 1 is the "booming" any gambler games the chance are all in favor of the "hubs" and the other fellow is almost dead sure to lose his money.

Employment for men will not come in circulation, raise prices. It is the only way to get the rights, therefore that is the country's prospect.

It is very safe to assume that the vote of the majority will be the vote of the majority. It is the only way to get the rights, therefore that is the country's prospect.

Do you want to sell your produce and your labor at American and Japanese prices? They are low and undervalued against countries where the farmer and the laborer live to the dollar of the United States.

Gold and silver cash in circulation and sold each as good as the other, and sold here about the people of the United States.

A "price of our nation" is considered as such by all with its ability to hold out. What is that? It is the Republican man with it. The world respects a man for what he does. It is not his title to give up, and not for what he will do.

Mexico has such good property as the five other most good have or better, why do the people of the United States not own the five other most good have or better?

The Republican party will take the hard and shoulder and side and lead the whole and square in the extreme gold bug and silver man for and in the making of the people of the United States.

It will be necessary to do this. The Republican party will take the hard and shoulder and side and lead the whole and square in the extreme gold bug and silver man for and in the making of the people of the United States.

George W. Miller, the Hamilton, post, orator and all around gentleman, is not to receive the nomination for representative from the district composed of Platte and Cedar.

Mr. Young will represent the district in the upper house of the legislature to a creditable manner in the district.

"Christian and tariff reform" was the rallying cry of democracy in '90, it carried the day and every man, woman and child knew the result. Today it is the cry and will bring us a ratio of 10 times as much silver in a silver dollar as gold in a gold dollar. The first was an experiment that brought a terrible demagoguery, the other will be an experiment that will afford to try.

Present Tribune: I belong to all the interests of the town to which you are all in your home. Speak well of it to others. Have any possible political enterprise? Do what you can to make it more attractive. It always pays. Plans for an exhibit. It speaks so well for you. Did you ever think how naturally we associate a place with its people and their business, with a family of the best, generous impulses and kindly deeds?

The democracy is the border and western issues are not falling in line with the rest of the world. It is the only way to get the rights, therefore that is the country's prospect.

**fail**

Stand close to a high fence and try to leap over. You fail. Walk back a few steps, get a good start. The fence is easily cleared. Neglect your weight, never mind your loss in courage, and when consumption takes you, your strength may not be sufficient to carry you over the dangerous. If you could only go back a few weeks and make a good start, you might win.

**Scott's Emulsion**

Codd-Jiver Oil with Hypophosphites is for you even if you are only a little thin.

SCOTT'S EMULSION has been endorsed by the medical profession for twenty years. Ask your doctor. That is because it is almost painless—always works—always restores the patient to health—always contains the purest Norwegian Cod-Liver Oil and Hypophosphites. If you go to any other drug store, the small size may be enough to cure your cough or your baby.

## WORK OF OUR NATIONAL LAW-MAKERS.

### A Week's Proceedings in the House of Congress—Important Measures Discussed and Acted Upon—An Epitome of the Results.

The National Police Bill, which was passed by the House of Representatives on June 10, is one of the most important measures of the session. It provides for a national police force and for the appointment of a national police chief. The bill is expected to be passed by the Senate in the near future.

# AN ELECTRICAL FETTER

## FRANZ SCHUBERT'S THEORY OF ELECTRICITY

The theory of electricity, as proposed by Franz Schubert, is a departure from the conventional view. It suggests that electricity is not a force, but a state of matter. This theory has attracted considerable attention and is being tested in various experiments.

The cream of currents is a collection of news items and commentary. It includes reports on the latest in science, politics, and culture. The tone is light and humorous, providing a quick overview of current events.

The photograph captures the extent of the damage caused by the tornado. The once-thriving city is now a wasteland of rubble. The scale of the destruction is staggering, with entire blocks of buildings reduced to piles of bricks and mortar.

The people of St. Louis are beginning to pick up the pieces. They are working to clear the debris and rebuild their homes and businesses. The spirit of the city is one of resilience and hope.

The damage to the city's infrastructure is also being assessed. The railroad tracks and other major thoroughfares have been severely damaged, and it will take time to get them back in working order.

The storm has also caused significant damage to the surrounding countryside. Farms and small towns have been hit hard, and many people have lost their homes and livelihoods.

The House of Representatives has also passed several other important bills, including a bill to improve the postal service and a bill to reform the courts.

The Senate has also been busy, with several bills being introduced and debated. The session is expected to continue through the end of the year.

The House of Representatives has also passed a bill to provide for the relief of the people of the storm-stricken areas. This bill provides for the distribution of food and clothing to those in need.
