**DEBATE**

National, Chicago, July 2  
Let us face the fact that all nations are headed for one world government, or they will perish together.

Why necessary to a nation in its infancy good to itself at the expense of its neighbors? It is to be hoped that she will take advantage of opportunities.

George A. Beckwith, the author of the book "The World Government," has written a book which is a study of the world government in the past and the future.

Providence has seen to it that a nation of free men and free women with the right to elect their own representatives and to elect their own officers should be a part of the world government.

From the pages of the book "The World Government," we learn that the world government is a part of the world government.
