It is not a fact that it is the intent of the bill to bar the holder (instead of that of the bill).

If the advocates of many of our popular friends believe that the present bill of the United States is a good bill, why do they not say so?

Do you believe in silver, friend, that the doctrine you today advocate would, if put into effect, raise the price of gold to the millions?

Do you believe in silver, friend, that the doctrine you today advocate would, if put into effect, raise the price of gold to the millions?

In December, 1891, just following the election of Cleveland to the presidency, when silver still came for sale in Chicago, the lowest price for silver was 70 cents per ounce.

We understand that the silver and gold coins are to be minted in the amount of \$100,000,000 in the next year.

Are the silver notes of the United States issued by the treasury people? This is a question that many ask.

Will the Omaha World-Herald be troubled enough to tell the readers that the great fall in the price of silver...

...and at the same time reproduce the views of the advocates of the bill...

...less than \$100,000,000 will be required to meet the demand...
