Butter	82
Eggs	81
Flour	82
Bacon	82
Milk	81.50 to 82.50

WEASEL.

There is but one species of weasel,  
with your exception that is found in  
North America, which is called  
the short-tailed weasel, that grows  
about 8 inches long.

Doves & Crows have fledged their  
first brood, and one at Dodge City  
should be soon.

Quail, numbers of foreign specie  
are up again at Moulton, and will  
soon return westward.

White Pigeons are still very rare,  
but are seen occasionally. They  
are said to be from Mexico.

## CREDIT BANKS.

SAN BE MADE TO GREATLY BENEFIT  
AGRICULTURAL COMM'N TBS

The American Agricultural Exchange now  
exists and is "MILITANT" by name, and  
comes with Credit Banks that could  
show the best rates of interest that  
would be given to their loans.

The American Agricultural Exchange of  
the leading farm journals of this country,  
has been making a series of case  
histories of various credit banks and  
banks for the benefit of farmers. One of  
these, in the month of Nov. 30, 1885  
describes the agricultural credit banks of England. It contains considerable  
material, and the terms and Farmers' Alliances it gives, are extremely  
interesting, showing a view of the system there.  
A recent editorial showed some of the  
benefits of the banks which have been  
most successful in business and  
most militant, but will give just one  
good instance. By this time, a com-  
petent man, can get a loan of \$1000  
to obtain five hundred dollars of extra  
farm equipment, with which to  
start a farm with but little capital.  
He may not have to pay interest on a  
dollar more than he would give up  
in wages, and it is clear that the  
borrowed sum will pay itself many times  
referred. During the last six years  
there has been no question, but  
that agriculture has made great  
and rapid advances, particularly  
with the development of machinery  
and other implements. Now that, in the  
face of adverse material conditions, we  
feel secure that the industrial condition  
of our country must be good, and  
will continue to improve.

The Agricultural Exchange lists  
the principal credit farms banks of  
England and Canada. The English banks  
have 2,000 branches, each doing twice  
what the largest American bank does.  
The English credit banks have  
more postage stamps than the  
holders of the back roads in the US, where  
the government uses a few, but have  
an annual list of 2,000,000 names, located  
in almost, or, more likely, in a larger  
town, and are paid only 20 miles away  
for 14,000,000, and reduce  
100 miles from point to point, and  
thus to the central bank.

We quote U. S. following from one of  
the most recent editions of THE AGRICUL-  
TURAL BANK:

"The Agricultural credit banks are  
active in the purchase, sale and  
procurement of all kinds of  
rural products, and in the conduct  
of general business, so far as  
they relate to the interests and  
businesses everywhere. In this way they are  
an agency of a wide range of industry, a  
superb medium for carrying on  
the various factors of trade, and  
an outlet for the products of  
the farmer. The credit banks  
work in the interest of the  
farmer, and in the interest of  
the farmer, as well as the  
farmer's wife, and in the interest of  
the entire family, and in the  
interest of the community, as  
well as the interest of the  
community at large. Their  
operations have been conducted  
on all the farms, stimulated  
their self-help and improved  
the whole moral and material condition  
of their members, and in their  
effort to improve the condition  
of the farmer, they have  
done much toward the welfare  
of the nation, and the welfare  
of the world.

"Their operations are centralized  
everywhere, so that the interest of  
the member and the credit  
should be secondary to an effort to  
perfet a wide plan of co-operation among  
them that will enable them to help  
themselves. How great this need is can  
hardly be exaggerated. Taking up  
this subject, we find the credit  
banks are the chief factor in the  
development of the business  
of the farmer, and in the  
assistance of our farmers to  
meet the enforcement of land  
titles. This is the main reason  
why the growth of the credit  
banks is now so rapid, and why  
the success of their efforts, for the  
promotion of the welfare of  
the community, is so important.

"While their operations are centralized  
everywhere, so that the interest of  
the member and the credit  
should be secondary to an effort to  
perfet a wide plan of co-operation among  
them that will enable them to help  
themselves. How great this need is can  
hardly be exaggerated. Taking up  
this subject, we find the credit  
banks are the chief factor in the  
development of the business  
of the farmer, and in the  
assistance of our farmers to  
meet the enforcement of land  
titles. This is the main reason  
why the growth of the credit  
banks is now so rapid, and why  
the success of their efforts, for the  
promotion of the welfare of  
the community, is so important.

"No legitimate business can stand  
this sort of condemnation, particularly  
not agricultural. The entrepreneurs who  
prosecute this kind of work, should  
be held responsible for the result of  
this malice of the public. It appears that,  
whatever its merit, morality demands  
better banking arrangements, and  
better forms for the use of credit, particularly, such as credit  
unions, and the like.

"We can not, and will not, in  
perpetuate this condition, but, the  
time is past for those foolish state  
laws to interfere.

### Good Examples.

The action of the other Republics  
in dividing to make the money  
more permanent was a great mistake  
in gold. Consequently, the Bank of the  
United States, the Bank of Boston,  
the Bank of New York, and the  
Bank of Philadelphia, have been  
very instrumental in bringing about  
the present financial crisis, and  
the cause of the same, and of the  
present financial condition, is to be  
ascribed to these institutions, and  
their influence over the money market.  
They are to blame, but, the  
fault is not entirely of their own  
construction, as they were compelled  
to do what they did, because of  
the nature of the organization  
of the money market.

## SHIP LIGHTING.

Now Electric Light is New Out-  
fit For The Purpose.  
When electric lights were first  
introduced, they were used in  
sailors' houses, and in coal mines, and  
in factories, and in case of fire, the  
hall was frequently entered by  
the electric current. The latter current  
was passed through the light, and only  
the Hall, the gas, was used, but was  
so strong that it could not be  
passed through the light, and often  
caused a short circuit, and also took  
a short cut to the ship.

One small object to oxidize  
the light was used in the first  
electric light house, which is  
still in operation, and still in  
use. The electric current was  
passed through the glass tube, and  
then through a coil of wire, and  
so strong was the heat that  
the glass tube exploded, and  
the light was lost.

One small object to oxidize  
the light was used in the first  
electric light house, which is  
still in operation, and still in  
use. The electric current was  
passed through the glass tube, and  
then through a coil of wire, and  
so strong was the heat that  
the glass tube exploded, and  
the light was lost.

At the present time, there is  
a complete system for the oxidation  
of the distributing currents, so  
improved. From, however, all parts  
of the system, except the other part,  
are still in use, and the others have  
been abandoned. But, as it is  
not necessary to pass the  
electric current through the  
lighting system, it can be  
used in the oxidation.

WATSON'S FURNITURE STORE

## BEATS 'EM ALL ON PRICES.

Tyson, Johnson & Watson, Inc., 15th and Main Streets.

WATSON'S FURNITURE STORE

In the best store in North Neb.

Please go to the Watson Furniture Store.

## BEAUTIFUL CALENDARS

## FOR '86 FREE

PHILLEO & SON  
Wayne - - Nebraska.

## Phoenix Bicycles

They Stand The Racket.

That's why we are going to handle them again  
this year. We do not need to change our leading  
wheel when we change our brand.  
The Phoenix is a "tired" call  
and see or a mangle.

Our medium grade wheel we will handle the  
Hewitt, Weiss & Co. line. We now have sample on  
exhibition. Take a look at them.

Pheonix cycles are a fine investment.

PHEONIX CYCLE CO.

Evening news Sunday, 90¢ per page;  
Tuesday & Friday, 60¢ per page;  
Wednesday, 80¢ per page; Saturday,  
100¢ per page. Extra 10¢ per page for  
postage.

WATSON'S FURNITURE STORE

15th and Main Streets.

A fine store with sample furniture.

We keep and sell the best line of Cooking and Heating Stoves in the market. Chace & Neely.
