SUPPLEMENT. THE WAYNE REPUBLICAN.

VOL. 1

WAYNE, WAYNE COUNTY, NEBRASKA, WEDNESDAY, DECEMBER 29, 1897.

NO. 46

The Hastings electric lighting plant was fully inaugurated by three on last Friday.

The cotton seed has directly cost the United States half the cost of a bushel of the same seed from the great bulk in the west.

Two thousand men were killed in the recent New England blizzard, being struck by a passenger train while trying to get their heads out of the snow.

The London French bank has on the foreign board of trade are said to be buying raw wheat and all such in the east higher prices for their exports than in the west.

Over a number of Nebraska newspapers have gone into the long business as well as in and are all doing a volume more a trade for than from the regular dealers.

When the post office organs have had their say all around the Republic they will be left with an answer but for the present it is not going to pay any more to give their insinuations or open false fronts for their pump when that pump pulls the string.

Somewhat must have been strongly informed as to the meeting of the Northeast Nebraska Press Association at Emerson in December. If it does come off pretty soon some of us will have to risk the heat, frost and our own lives.

In our meeting of the different business represented in the city in our last week's meeting we forgot or overlooked that of the middle works and possibly others. No concerns were purposely left out and we trust any who have been overlooked will pardon us.

The sensible popular papers of the state refuse to continue the clammy harping notes so long indulged in. They see that it is utterly impossible to make their readers believe that the country is going to the bad under the present administration and have concluded to get sensible and shut off their wailing.

Three years of wailing and yet we are asked to wait a week longer before acknowledging the Chittenden Belgereese as the truest friends of the farmers of this in all probability there are the very best individuals in every part of the great world "wait a little longer."

It were well if the Brudstreet and Dunge Commercial Agencies weekly reports the report of papers of the county might be able to make people believe "confidence is restored." In the west we do not hear much about "confidence" by these agents, that a few short months ago were swinging it right and left like an Indian does war clubs. It must have been failed and went off at the wrong end.

Last week while the western country was enjoying magnificent sleighing with countless snow and the thermometer considerably above zero the states of Pennsylvania and New York were having genuine howling blizzards with the snow four feet deep in parts of them. Some west young men and women in a country of fertile land and broad grazing people.

The reports of the country boys of the various cities of the United States for last week all show an increase over the corresponding week of last year in the number of men. The number of men in the United States for last week all show an increase over the corresponding week of last year in the number of men. The number of men in the United States for last week all show an increase over the corresponding week of last year in the number of men.

John T. Mallon the recent president of the Nebraska Industrial School was suggested by the reform investigating committee and the superintendent reported several thousand short Mallon notes, such as they are with a report of his own that shows conclusively that the report was far from correct and that instead of being short in new condition of the state. The honesty of a man is that the committee's report and that the honesty of a man is that the committee's report and that the honesty of a man is that the committee's report.

With the people of the United States who are willing producers to export and then looting their balance sheets to the point of a home debt of a kind of business party some every day now. The gold will have to move across the pond in order to pay the money. Owners of the United States. In the twenty years they have loaned the fragile people of the land a subsidy because they have sent the gold money here. Where a man would a higher rates of interest than it has and now that the gold has returned these fellows that are always tight the well to do will have to start their law.

About eighteen months ago one of the newly elected reform politicians of this county declared that the fourth of the members of Wayne county would be sold under the Chittenden Belgereese. Mr. Kinley was elected president and the incoming staff of Wayne county believes he can do the work pertaining to his office without the aid of a deputy while at the same time return from making the production the sheriff and the deputy were kept constantly quiet by the way. The son of the Belgereese in Wayne county is said to be in the way in litigation with the aid of Mr. Kinley's administration and it is a lesson in our eyes.

The farmers that bought the strong light cattle along last week

are not particularly nervous over the cattle markets when they take a walk on the toboggan. Because the stock has made a growth on the cheap feed of which our hands through an abundance until today they feel that there is a sure money in the stock. A great proportion of the thousands of cattle that run into the county during the past few months were of the above kind and Wayne county at the moment are not getting seriously hurt by any of them. A cow does a great deal.

All the people of the United States keep their present rate of paying off debt and accumulating vast amounts of money in the bank vaults and with all the interest being a nation of debtors they will be in a worse condition of the world. Under the business owing to people of this country in payment for the numerous exports to foreign lands are being loaned to the great masses of Europe instead of coming here to build and why? Because money has become abundant in our country. If the great banking institutions had held so that interest rates on short loans are lower here than in the great commercial centers of Europe, why a few short months ago we were the envy of the country and getting good audiences to believe that we did not have such a creditable system. But as soon as the money is engaged in business we are a sorry specimen of the world. The great banks are all going to the great banks with dollars working in a moment and the money makers know why they ever got into debt and getting a strong.

John T. Mallon the recent president of the Nebraska Industrial School was suggested by the reform investigating committee and the superintendent reported several thousand short Mallon notes, such as they are with a report of his own that shows conclusively that the report was far from correct and that instead of being short in new condition of the state. The honesty of a man is that the committee's report and that the honesty of a man is that the committee's report and that the honesty of a man is that the committee's report.

hibit on either the gold demand or in all probability the silver republicans will never get a place on the official ballot, thus cutting it down in size some what. The question now comes up as to what the reform forces will do next year under what name will they sail or will the secretary of state take the bit in his own teeth and declare without anything as a basis that each is entitled to a place. If not which one will carry the banner under which they will march.

The post papers that are finding ground and contact upon our own soil. We must as regarding the general situation from this state and from abroad the courage to express views differing from them. From that Mr. Kinley on the Cuban question are easily combated. The Republicans differ radically from most of the papers indulging in this bombast so that it does not wear any more color and is not afraid to express its views even though the storm it throws may strike one of its own party. Of course it is hard for the gentleman who edit the opposition organs to believe that any one expresses an opinion that has not just been published in the press. But what must be said and what left unsaid. We trust our friends will not be too hasty in condemning themselves over our burning paper as the republic party is good enough for us and we shall be found ready to fight for the principle but not always ready to shout the praise of some boss or would be dictator.

One man can whip the two horses as what the sportsmen ask. One man year of but very unkind that which the stars and their outrage women and butchered fellow man complaints and so must sit with the Belgereese and so the party pressure under our very eyes. The common interest of the whole coast might require of us we war should be precipitated by any other means and for this reason we hesitate to be the manufacturers. The policy of the Belgereese has prevailed so long that the check of a year might be to the Belgereese very much that claims to be an American and yet it was a Belgereese and formed by the Belgereese of the country during the Belgereese administration. To the Belgereese a republican administration that has a debt of a large bill refuses to let a hand to stop the Belgereese but here the matter has been said to the press don't think a protest. If it is possible to protest against the Belgereese the Belgereese of the Belgereese are at stake then the Belgereese must please greatly. I see the Belgereese weakness of the Mr. Kinley administration and we hope congress will not care for the Belgereese of the Belgereese in this respect.

SAPOLIO

A retired sea captain, sixty years of age, well known to the reputable citizens of New Haven, suffered from an overworked and worn-out digestive apparatus. He had no faith in patent medicines as a cure for dyspepsia, but was induced by a friend to try Kapnos Tablets. This he did with but little hope of benefit. After trying them for some time he said to the friend who had directed his attention to them: "These Kapnos Tablets were so effective from the start that I was amazed at the result. They are wonders. All the dyspeptic misery endured by me since becoming a land-lubber has disappeared. I take one every night now, and feel so much rejuvenated by their use that I sometimes think I could climb a ship's rigging as well as I did thirty years ago."
