The above cut is an exact reproduction of the No. 1 grinder, for grinding all kinds of grain or corn on the cob. We furnish this mill with two sets of burrs, both coarse and fine grinding. These sweep mills have as large a capacity as a geared mill on account of their extra large cones and will work a horse lighter on account of there being no friction taken up by gears. On these burrs we give you a written guarantee for five years from the factory which, if there are any defective burrs, they will replace within that time free of charge. We also have the No. 2 in this same make with a greater capacity for corn on the cob. This mill has an extra crushing capacity which prepares the corn for the flax. It also has a larger hopper. This mill will grind as fine as any burr mill and with less draft than any geared mill made. Those who are thinking of getting a feed grinder it will pay you to get the

for it has all the points that any geared mill has. Call at the office and get one of the Grain King memorandum books free of charge.

Getting Thin

Is all right, if you are too fat; all wrong, if you thin already. Fat, enough for your habit, is healthy a little more, or less, is no great harm.

There are many causes of getting too thin; they all come under these two heads: over-work and under-digestion. Step over-work, if you can't, whether you can or not, take Scott's Emulsion of Cod Liver Oil, to balance yourself up to your work.
