

The Nebraska Democrat

ESTABLISHED 1884

WAYNE, WAYNE COUNTY, NEBRASKA, THURSDAY, JUNE 25, 1925.

\$1.50 PER YEAR

CITY BUYS NEW CHEMICAL TRUCK

Council Orders American LaFrance Chemical Truck at Cost of \$3,650. Due Here in 60 Days.

At an adjourned meeting of the city council Tuesday evening bids were opened from a half-dozen competing concerns for an auto truck and chemical engine for use of the fire department. Four or five representatives of the different firms were present to tell the merits of what they had to offer. The range of prices was from \$2,747.50 to \$5,000, differing with the various machines offered, and in fact, most of the bidders submitted two different weight, capacity or style outfits at different prices.

After considering all the offerings, the council voted to order an American-LaFrance, 3-tank chemical truck, to be finished according to certain specifications that are considered best suited to our needs. These outfits are manufactured at Elmira, New York, and it is expected to be finished and shipped within 60 days. The price is to be \$3,650. With it, hoses may be bought with less damage to property not burned than with water—and it may also be taken to the country beyond the city limits, or to places within the city which could not be reached by hose, of which there may be a few; and places where but one line of hose could be laid.

OBITUARY

Ota G. Alger, was born at Iowa City, Iowa, April 22, 1853, and died at her home in Wayne, Nebraska, June 20, 1925, at the age of seventy-two years. She came to Nebraska with other members of her family in 1855.

Miss Alger united with the Methodist Episcopal church in Wayne, under the ministry of the Rev. William Gorst, on May 15, 1890, and remained a faithful member of the church till her death.

The deceased had been ill with rheumatism for about a year preceding her death. She leaves three sisters to mourn her departure: Mrs. Mary A. K. Fisher, of Wayne, and with whom she made her home during the latter years; Mrs. Hudsonson, of Waterloo, Iowa, and Mrs. Dickerson, of Omaha.

The funeral services were conducted at her home by her pastor, Rev. John Grant Shick, the afternoon of June 23 and interment was made in the Wayne cemetery.

OUR BLOOMFIELD BOOSTERS

Monday, Wayne people were visited by an hundred visitors from Bloomfield, more than half of whom were members of the band, and nine-tenths of the band were juveniles. Now, after listening to that band play several selections, one need not think it necessary to offer any apologies. Those who heard first from a distance, could scarcely realize as they came near enough to see the members—and that they were boys and girls who were making the music of a band of adults. Harmony and time were well near perfect. They were generous with their music, playing many selections, and tarrying after the official spieler had told of the attractions to be seen at Bloomfield, to give the appreciative crowd another selection.

The Legion lads at Bloomfield are staging one of the great celebrations of this corner of the state, when they will have three great days with base ball, free acts, street parade, band concerts, dancing, street sports such as racing by foot and by car, and a battle royal. The Bloomfield Legion boys and the people are a bunch of jolly good fellows, and when they tell you that there is a good time assured, they are going to deliver the goods.

SHERIFF STEPHENS PICKS UP LEONARD LACROIX

Since some time in March or early April, Sheriff Stephens has been looking for the men suspected of owning and preparing to operate a large still not far from Hoskins. Saturday morning the sheriff arrested Leonard Lacroix, one of the suspects and put him in jail here. In the afternoon he was given a hearing and released on bond of \$1,000 for his appearance at the district court in October. Lacroix, who has been in hiding, or at least not stopping about here, was captured in bed at Carroll. The other suspect is still at large, but no one can say that he will long be at liberty.

CHAS. B. TOWER DEAD

The morning paper tells that Chas. B. Tower, formerly of Wayne, whose he still has relatives and friends, is dead, evidently by his own act. Mr. Tower was 57 years of age, and had been for twenty years in the real estate business at Papillion. The report tells that he laid down on the rails of the Union Pacific road near his home town, in front of an approaching train, and was instantly killed. Ten years ago, the report said, Tower attempted to kill himself by shooting. Ill health is the cause assigned in both instances.

He is survived by wife and a son, Wm. R. The body was taken to Omaha while funeral arrangements were being made.

One of his early day friends today volunteered the information that Mr. Tower was a most generous, kindhearted man, and that no one asked a favor of him that was not granted if in his power to comply with the request.

AND THE RAIN CAME

Some people who have lived many years in this county seem to persist in worrying about rain, feeling that if it does not rain just when they believe it should not even threaten dry weather. If they will study the history of this corner of Nebraska, they will know that the big crop losses here have been more from too much rather than too little rain. The rain which came Monday night was a good example of how it always rains here at least a day before we are ruined by drought. So it was this time. We have had less than normal rainfall this spring, but all crops look well, except that cold weather and a little lack of moisture made pastures and first crop alfalfa a little short, but corn has never looked as well at this season of the year. It is clean as never before, thrifty and of good color.

Monday night and early Tuesday morning there was a gentle rain of 7 of an inch—falling so gently we do not think a barrel of the rain did other than be taken in by the soil where it fell. Then in the afternoon 45 of an inch more came giving a total of about 1.15 inches, and all absorbed.

Lawns, pastures, meadows and oats responded. The potatoes that were not nipped by late frosts will now surely have moisture to carry them to full size, as the general belief. The reports are that the rain was quite general over the state. It came at a time and in a manner that all appreciated, and it can truly be called a "million dollar rain."

CAR SOMERSAULTS

GOING DOWN HILL

Ponca, Nebraska, June 23.—S. Mahoney, 26, barely escaped with his life in a freakish accident which took place between here and Newcastle when the wheels of the automobile he was driving locked as the machine was going down hill at a high rate of speed, throwing the car in the air and turning it over three times. The young man remained in the car until it turned over the third time when he was thrown head first into the road several feet away, escaping with a few scratches and bruises. The automobile was turned completely about and headed up the hill. Every spoke in one of the rear wheels was broken out and the steering wheel was broken in such a way that the rim was left whole.

DEATH OF MRS. OLSON

Mrs. Ole Olson of Carroll, died last week at a Norfolk hospital, and the body was taken to Carroll for funeral and burial. The service was from the Methodist church of that place and interment was in the cemetery there.

Maren Dorteia Hansen was born in Denmark in 1868, and came to America and Nebraska in 1903 where she was married in April that year to Ole Olson, and lived on a farm near Carroll. Four daughters survive her. She was ill but a month, and died following an operation at the Norfolk hospital.

TO GRAVEL HIGHWAY

The Western Bridge and Construction company will soon start graveling twelve miles of highway south of Wayne, and plan to finish by the middle of September. This will be done when finished and packed, but meantime drive carefully while the work is progressing. Loose gravel is treacherous and often hard to hold a car in place when loose and in places.

DANIEL GONDER—SOLDIER 1846-8

Sunday World-Herald Tells of Oldest Survivor of War With Mexico. Bunt Fleetwood Knows Him

"Unless some have died just recently, there are alive in the United States nineteen veterans of the war with Mexico, according to pension bureau records.

"Very aged men they are and the eldest of all is Daniel Gonder, 100 last January 5, who since 1884 has dwelt in or near Rippey, Iowa, a sleepy village of 4 hundred persons, about 135 miles northeast of Omaha as the crow flies.

"For the last eighteen years he has lived in a little old-fashioned house in Rippey with his eldest child, Mrs. Harriett Littell, a lass of 73, who is herself a great grandmother. He has three other children living, out of nine. There are twenty grandchildren, sixty great grandchildren and nineteen great great grandchildren scattered throughout the country.

"A World-Herald reporter, who sought out this relic of long ago, found him enjoying a life of wild adventure and romance, conjured out of the dim past. He was seated in his old rocker, lustily chewing on a large quid of tobacco. From his white-bearded face small blue eyes snapped and twinkled. On a thick shock of white hair an old slouch hat was cocked at rakish angle."

When we saw the name of Rippey, Iowa, given as the home of this veteran, we resolved to interview the Hon. E. E. Fleetwood, who spent his boyhood days in that sleepy town. Did you know the old soldier? was asked. The reply was that he certainly did—that he had attended church and heard him preach, for he was preacher and for many years pastor of a little church near Rippey, of which the Fleetwoods were members. "I have eaten most as many Sunday dinners in boyhood days at the Gonder home as at my own," said Bunt, and say, "Mother Gonder was a real cook—an English woman who knew what tickled the appetite of a growing lad—and in fact any one else, with any appetite" commented this lad who used to listen to his preaching and his stories of war and adventure.

The Fleetwood family had lived neighbor to the Gonders in Illinois, before settling in the same community in Iowa, and it was but natural that when they attended the country church, that they stopped at the parsonage next door and broke bread with the family. Bunt says he can close his eyes now and see the parlor, which was opened for company, its old "whatnot", built of spools, that stood in the corner of the room, its shelves filled with many relics of earlier days, and some of the modern inventions. It was here that he saw the first electric light globe he ever saw. Mrs. Gonder had knitted a net about it of colored yarn, and it was suspended, like a small balloon, above the top shelf of the whatnot. A set of chairs, covered with what was called "horsehair" cloth were rare pieces of furniture, the memory of which clings to him yet. It was a typical parlor of those good old days.

Mr. Fleetwood tells that the preacher's eyes would light up and sparkle as he related stories of pioneer life and of war, and told them in a manner that fascinated the boys. Bunt says that it was here that he also received his religious training and conceptions of right which has made him such a good boy. The veteran is now living in comfort, waiting to answer the final roll call when ever it shall come, but hoping to be the last to be called of the army which fought in old Mexico eighty years ago.

Slowly but surely, the prohibition law is commanding the attention of foe as well as friend. One of the latest moves in the middle west is in South Dakota where the law now gives the right to padlock buildings used for the illegal sale and storage of intoxicating liquors. At Sioux Falls the Barringer pool hall has been closed for year, the state locking it and carrying the key. Similar action is in courts concerning other places in that city. When the buildings are closed for a year, the good buildings will not be leased for such business, and the shacks give poor chance to hide or mask the outlawed business in such manner as will make it a real temptation for the average person to care to be seen about the place.

JUNE WEDDINGS MANY THIS YEAR

Many Surprise Weddings Taking Place in the Merry Month of June. Others to Follow.

Moran-Gildersleeve

In a wedding ceremony which came as a distinct surprise to their many friends in the Hartington community Miss Isabel Moran, oldest daughter of Mr. and Mrs. E. R. Moran of Hartington, was united in marriage to Ted Gildersleeve of Wayne, at Yankton on Monday afternoon, June 22, 1925. The young couple, accompanied by Miss Eunice Moran a sister of the bride, and Axel Johnson, drove to Yankton in the afternoon, secured the license, and were married at the Congregational parsonage, by Rev. H. H. Lindeman, pastor of the Yankton Congregational church. The ceremony occurred about 4 o'clock.

The bride wore a gown of brown crepe de chine, with hat to match, and the bridesmaid wore a red crepe de chine dress.

No wedding reception was held after the ceremony, as the young people wished to keep the marriage as secret as possible. They returned to Hartington and spent the night and next morning here, leaving Tuesday afternoon for Ericson, Nebraska, where the groom is employed.

The bride is popularly known at Hartington. She is a graduate of the Hartington high school with the class of 1922. After spending two years at home, she taught in one of the rural schools of the county last year, having a successful year. The groom is the youngest son of Mr. and Mrs. Gene Gildersleeve of Wayne, and enjoys a wide acquaintance at Hartington. He has visited here on a number of occasions, and for a time was employed here. He is a member of the National Guard company at Hartington. At present he is employed as the traveling representative of a magazine company, and Mrs. Gildersleeve will accompany him, on his trips over the state. Cedar County News.

Bliss-Jones

At Buffalo Gap, South Dakota, on Saturday, June 20, 1925, at the home of the bride's parents, Mr. and Mrs. F. H. Bliss, occurred the marriage of their daughter, Hildred Mae and Mr. Herschel E. Jones, of Merna, Nebraska, where they will make their home.

The bride has a few acquaintances here and many at Wakefield, where the family made their home for a year or two, several years ago, he being in charge of the flouring mill at that city before it burned. Miss Hildred graduated from the high school at Merna, and has since been a successful teacher. May life still retain the "Bliss" of her girlhood days.

Ehlers-Eickhoff

Mr. Fritz K. H. Eickhoff and Miss Grace Ehlers were married at Omaha Wednesday afternoon, June 24, 1925, at the home of her parents. Miss Ehlers is the daughter of Mr. and Mrs. W. A. Ehlers of Omaha, and Mr. Eickhoff is the son of Mr. and Mrs. Fred Eickhoff of Wayne and is a Delco-Light dealer.

After a wedding trip to Yellowstone National park, the young couple will return to Wayne where they will make their home.

Baker-Sederstrom

At Winner, South Dakota, Saturday, June 13, 1925, the report says, Mr. Ernest Sederstrom, son of Mr. and Mrs. Frank Sederstrom, was united in marriage to Miss Edith Baker, of Long Pffe. Mr. Sederstrom is employed as a railway mail clerk, and for some years Long Pffe was one terminal of his regular run, but he has recently transferred to a position in the service with headquarters at Omaha.

Anderson-Ruhlow

At Madison, Monday, June 22, 1925, Mr. Leo Ruhlow and Miss Edith Anderson, both of Hoskins, were married, judge Recker performing the ceremony. The groom is son of Mr. and Mrs. August Ruhlow, and the bride daughter of Mr. and Mrs. C. W. Anderson. Miss Alice Anderson was bridesmaid and Harry Roesel best man. The young folks are to live at Hartington.

SPECIAL AT HAMILTONS BAKERY
Coffee Cakes, fresh daily, each...15c
Cookies, home made, per doz...15c
Bread, always fresh, 3 large loaves 25c
Froak Milk and Cream twice daily.

WINNER BOOSTERS VISIT WAYNE

A band and some cowboys and Indians who are advertising the big rodeo celebration to be held at Winner, S. D., July 2, 3, 4 paid Wayne a visit Monday. Their band played and the cowboy twirled the rope and the Indians gave a few steps of a war dance. They announce a mighty good time coming, and no doubt they will have one of the real shows of the kind—for that is the reputation they have won up in that line of entertainment on other occasions. They spare no expense to make the show go, and have plenty of material right at hand for talent in that sort of a show.

TELEPHONE RATES HOP UP

As the result of a lot of sparring back and forth over telephone rates, the matter finally came to a hearing before Federal Judge Munger at Lincoln who entered an order authorizing the company to file its own schedule of rates. This they proceeded immediately to do, and the morning papers tell that the new rates show an advance of from 10 to 15 per cent effective July 1st.

Local Manager Randall tells us that as yet he has nothing as to the rates at Wayne to give out; but that he might have for Friday.

According to the morning paper towns in about the same class as Wayne are having a rate on business phones quoted showing a raise of an old rate of \$3.50 to \$4.75 for the new rate; and residence phones from \$2.00 to \$2.75. Of course, there may be appeals from this, we cannot say.

CLEANED THIS MORNING

President Coolidge talked for economy just before leaving on his vacation but he signed not long since, an appropriation bill increasing the salary to congressman about 33 per cent.

It looks like big tariff fight when congress convenes, with the big money interests whooping it up for a big tariff reduction; joining forces with the free-traders already in the saddle. A lower tariff brings more revenue, and thus they can also whoop'er up for lower income and surtax on big incomes.

A verbal kick came in this morning because of lack of what was claimed uniform enforcement of traffic regulations in this good town referring in particular to the arrest of one of two people or cars accused of speeding and not the other. The county attorney, the claim was, heard the story of the one on whom notice was served, and would not prosecute. As we understood this protest, it was not especially referring to the case cited, but more of a general protest against permitting cars to run without lights, with cutouts open, and what looked to the visitor like partiality in making some do what others were let alone for. These kicks are not given publicly in the spirit of fault-finding, but that the public and the officers may know how different people view different matters.

LOOKING FOR MORE BUSINESS

That was what C. O. Mitchell told the editor this morning when he stopped at the Wayne Monument Works.

We said, tell the people—and he said, "You tell 'em." Glad to do so. Mr. M. said that their spring business had left them with a shortage of finished pieces on the floor, of the show room, but that that fault was being remedied as fast as possible from the several car loads of granites in the rough. We overheard him giv'ing measurements for a big base, and learned that it was to be prepared at once for the reception of a large, handsome die of Scotch granite, a valuable piece, which with others is now in Philadelphia where they leave the ship for train to Wayne. This, they tell us, is to be one of the very finest and best large monuments ever offered the public at Wayne. A lot of us will want to see it when it is finished.

NEW RACE TRACK GRADED

The grading of the track at the fair ground is finished for the present and the rain of Tuesday was fine with it. Next will come the fencing and leveling and filling in the places that have settled low. City light and water will be available over all the grounds.

Later the new building for the school exhibit will soon be started, that it may be ready for the fall fair.

SENATORS LADD AND LAFOLLETTE

Senator Ladd of North Dakota is Claimed by Death. Statesman Goes

In the death of Senator Edwin F. Ladd, of North Dakota, the people of the nation lose an honest, able champion. He stood shoulder to shoulder with the late Robert La Follette in some of the great battles for human rights that have been waged in the senate chamber in recent years. We count it to his honor that he followed such a course as he did in the late election, proving true to the sentiment of the people who asked him to be their representative. His election was due to the support of the progressive republicans and the members of that organization in that state who placed character and principle of a candidate above party label. No better or more able men, we believe could have been named to serve the interests of that state than were named by those who forgot party lines on election day and drafted Ladd and Frazier for the senate.

To the voters of Wisconsin and North Dakota the progressives of the nation should look to name worthy successors to these able, honest men.

Senator Ladd's Career

Edwin Fremont Ladd was a native of Maine and was successively chemistry professor, college president and United States senator. He was graduated from the University of Maine. He had made chemistry a special study.

Soon after leaving the university, he became assistant chemist in the New York state experiment station. In 1887 he became chief of the station, a position he continued to hold until in 1890 he became a member of the faculty of the newly formed North Dakota Agricultural college.

Later he was appointed dean and chief chemist of the school, as well as being offered the office of state chemist and food commissioner.

During the world war, Dr. Ladd served as federal food administrator of North Dakota.

As a result of his service to the agricultural colleges, Dr. Ladd was chosen president of the school, serving from 1918 until his election to the senate in 1920.

Senator Ladd's election thus him forward on the political stage as a strong proponent of the non-partisan league and a factor in the farm bloc in congress.

Senator Ladd's alliance with the late Senator La Follette, and his connection with the farm bloc, made him an important member of the LaFollette forces, with Senators Frazier, North Dakota; Norris, Nebraska; Shipstead of Minnesota, and others.

In 1924 Senator Ladd became chairman of the senate oil investigating committee through the resignation of the chairmanship by Senator Lenroot of Wisconsin.

For many years, Senator Ladd published the North Dakota Farmer and wrote many works on chemistry and agriculture. He was a fellow of the A. A. S., and a member of the American Chemical society, the Society for the Promotion of Agricultural Science, and of the Society of Chemical Industries of London.

WILL OPEN REAL ESTATE OFFICE

Wm. Assenheimer tells us that he is planning to embark in the real estate business in the near future, and will have his office for a short time in the Johnson & Hawkins office. Mr. Assenheimer plans to handle farm lands here and perhaps in the west, mostly. He has long been identified with the farm conditions of this county, and should be able to tell a prospective buyer a lot about any lands he has listed.

HIT THE GRAVEL TOO HARD

Pilger, Nebraska, June 23, Saturday evening, while he was going to Wisner, a car, driven by Mike Dienes of Stanton turned over with a load of young people. The car was going pretty fast when it struck a pile of gravel and turned over. Orville Wehbold of Stanton suffered internal injuries, while the Dienes boy received a fracture of the arm. Margaret Meyers and Opal Wax of Pilger, and Leonard Wagner of Stanton were uninjured. The car was wrecked quite badly. Other cars coming by brought the young people to town.

George Portner was a passenger to Omaha Wednesday on a business mission.

If you are going to use Ice Cream for July 4th please let us have your order as early as possible.

Community Creamery Co.
Phone 28

LOCAL AND PERSONAL

Former wants poultry and eggs.
Mrs. L. B. Palmer of Hubbard was a Wayne visitor between trains Monday.

Mrs. Geo. Crossland is reported quite seriously ill at her home in this city.

Dr. Young's Dental Office, over the First National Bank, Phone 307.—Adv. 29-11.

The gasoline tax collected by the state in May is estimated to total \$225,000, while that collected in April was about \$200,000.

Winside paving is open to the public, and Mrs. Harry Tidrick claims the honor of being the first to drive over the new way.

Ice cream tonight at Ferd Schmiedeskamp home on East 8th St., the ladies of the St. Mary's Guild serving. An ideal feast.—adv.

Mrs. Park of Kirkland, Illinois, who has been spending some weeks here at the home of her son, Prof. Park and wife, left for her home last Saturday.

Carl Madsen departed Tuesday afternoon for Omaha where he will attend the convention of the Disabled American veterans being held there this week.

FOR RENT—For 6 or 8 weeks after July 18. 5 room house furnished conveniently located for persons attending college. Phone 5244. J. J. Gildersleeve.

Mr. and Mrs. Ed. Radatz, and children, who spent a few days visiting with Mr. and Mrs. Anton Granquist departed Monday morning for their home at Lodgopole.

Kelly Gossard, who has been living at Sioux City for the past two or more years, has moved to Norfolk. He is traveling for a wholesale grocery, and his territory is in this corner of Nebraska.

HOUSE FOR RENT—Apply to Geo. Bush, Phone 326—adv. M6-11.

Von Williams of Carroll was a Wayne visitor between trains Friday. They are beginning sewer work at Pilger this week, about 15 men being on the job.

Miss Mamie Wallace came from Omaha Monday evening, for the summer vacation.

If you need any ditching, vault, cistern or cellar digging, see Ellis Miner, Phone 2561.—adv. J4-5tpd

Miss Ella Lokin came out from Sioux City Tuesday morning to visit for a short time with Miss Mildred Waller.

Mrs. T. F. Ball, who spent a few days visiting with Mrs. Roscoe Jones departed Friday for her home at Kansas City.

The ladies of the St. Mary's Guild will serve ice cream and cake this evening, at the Ferd Schmiedeskamp home, and invite the public.—adv.

Mr. and Mrs. S. Ickler were visitors at Sioux City Saturday, going to visit friends for the day, and while there Mr. S. Will consult a physician with whom he is treating.

HOUSEHOLD FURNITURE FOR SALE—Oak dining table, white sewing machine, dresser and commode. Call afternoons.—Mrs. C. O. Mitchell—phone 441.—adv. J25-11.

C. A. Chage was called to Omaha this week by the serious illness of his brother-in-law, Chas. McLeod of Stanton, who is taking treatment at the St. Joseph hospital in Omaha.

Mrs. H. J. Theobald, and daughter Helen, who spent a week visiting at the homes of Horace Theobald and wife and with Mr. and Mrs. S. R. Theobald departed Monday morning for her home at Lincoln.

Mrs. W. J. Moore, who was visiting with her husband at the East State Hospital at Kearney, came to Wayne Monday afternoon and visited her sister Mrs. O. J. Olson, leaving Tuesday for her home at Laurel.

Mrs. Mark Stringer from Deahoff, North Dakota, came Saturday to visit here and at Winside, where she was to meet her brother, Dick Chapin, and with others interested, look after a settlement of the estate of her father, A. W. Chapin.

Robert Stambaugh returned Monday from Fremont, where he had been for a few days attending the sessions of the Lutheran conference. He reports that they had some heavy rains in that vicinity, as much as four inches of rainfall being reported.

Omaha's streets are gaily decorated with flags and banners, and its sidewalks and public buildings are thronged with the thousands of veterans who are in the city this week attending the 55th annual national convention of the Disabled American Veterans of the World War.

"WANTED"—Vacancy now offered to handle Ward's Reliable Products in Wayne County. Gentlemanly, steady hustler desired. Previous experience not necessary. Particulars forwarded on request. Dr. Ward's Medical Co., Winona, Minn.—ota. Established 1856.—M28-31.

Earl Hays of the Chicago Daily Journal of Chicago, was here Sunday, for train to Omaha. He had been at Coleridge the day before to attend the annual meeting of the Farmer Elevator organization at that place. He was accompanied by Mr. Redlund of Omaha, who was on his way home from that same place on a like mission. J. B. Hassman, manager of the Coleridge local organization and his two sons accompanied them as far as this place.

Former wants your Cream, Poultry, and Eggs.

Ted Perry has been wrestling with a bit of sciatic rheumatism.

Fritz Mildner has been visiting and seeing the sights at Omaha a few days this week.

Lawrence Brown spent Saturday visiting at Sioux City, going over on the morning train.

Mrs. Claire Hamilton went to Norfolk Monday evening to spend the night with relatives.

Carroll has a band that gives a concert at that place Wednesday evenings, if it does not storm.

Mrs. Radaker came from Newport Friday and spent a few days visiting with her parents Mr. and Mrs. W. H. Gildersleeve, returning Saturday evening.

Misses Rena Gibson and Alice Shearer from Coleridge, former students at the Normal, were here for homecoming and to visit a few days with their numerous Wayne friends.

Mr. and Mrs. W. E. Hoag came from Miami, Florida, Tuesday afternoon to visit their granddaughter Miss Lola Smith, who is visiting at the Walter Taylor home. She is from Kennard.

H. M. Stallsmith left Monday morning for Excelsior Spring, Missouri, where he hopes to have the rheumatism boiled out, if possible. He is expecting to be absent about three weeks.

The S. Y. A. highway from York eastward to the Seward county line is now being graded and the county supervisors have voted to gravel the highway west to the Hamilton county line this fall.

Our farm loan rates are reduced. The actual expense is less than four and three-fourths per cent per annum. The more loans we write the less the cost to all borrowers. Write, phone or call personally. John H. Roper, Dodge, Nebraska.—adv. J4-4.

In South Dakota the last legislature, among other things and places created, provided for a state printing estimator, and G. J. Kiel of Sioux Falls has just been appointed to the office. If capable and honest, a man in that position should be able to save some money to the state.

Editor of the Carroll Index intimates that himself and others of that town object to their few blocks of paved street being used for a race track. Take the law to them, and let them build the school fund a hundred dollars or two. If they are sporty let them pay for the fun.

Mr. and Mrs. Glenn Gildersleeve, who are here visiting from the south, went to Creighton Monday to spend a few days visiting friends and relatives of Mrs. Gildersleeve. They plan to leave for New York within a few days, where they will spend some weeks attending a school of music.

The head work, the speculation and the spreading of information to the public thru the press is moving forward toward the adoption of a new calendar. Some have it all figured out times. Some have it all figured out just when they would have a holiday, and what would be done with the odd day each year and the extra day for leap year.

At Pierce they are getting "hard boiled" and their commercial club is asking that citizens, quit donating to beggars and traveling agents unless they have been to the proper committee of their commercial club and established their identity, and that they are worthy of public sympathy and aid. We imagine that would be pretty hard for the most of them to do. Some of them might have to go to work for a living if every place would make and enforce such regulations.

The Randolph people are just coming into the use of a golf course, which has been the object of wish for some time. The Times tells that the course is now ready, and was perhaps available early this week. The interested ones are planning to hold a qualifying round of the members in the near future. Nor are they going to be content with a golf course, are contemplating the building of a swimming pool. The size they are planning for will have an estimated cost of about \$4,500. Such a place is an asset to any community.

Wm. Assenheimer, of the Spanish-American war, has been granted a pension on the basis of 60 percent disability from causes of army ofline, while serving in the Philippines a quarter of a century ago. He suffered sunstroke and was stricken with fever, as well as dysentery so common to the white people in the tropics. He not only pays the veteran of that war \$30 per month for total disability, so Mr. Assenheimer will draw \$18 on the disability rating he is given. His application was made soon after his discharge, and he was shutacked, probably, until recently when called up for consideration. So far as we know, there is no other soldier of that war living at Wayne, but Mike Coloman, now of Pender, went into service from this county.

Harry Barnett is said to be on the sick list. Rheumatism.

Robert Henkle, who spent a few days visiting at Chicago returned home Tuesday morning.

Mrs. Mary Jones from St. Louis, who was here visiting at the home of her daughter, Mrs. Louis Schmitt, left for her home Saturday morning.

Nebraska held second place among all states in 1924 in the production of hay, third in winter wheat and corn; fourth in all wheat; seventh in oats; ninth in rye and tenth in barley, according to the year book of the Price Current-Gain Reporter.

Mrs. Roy Fox, from Los Angeles, who has been visiting relatives at Randolph and Wayne, left Saturday for Sioux City where she will visit her sister. Here she was a guest at the home of her aunt, Mrs. J. J. Williams, and at the home of S. C. Fox and wife, uncle and aunt to Mr. Fox.

Mrs. Fred Graves and her daughter Miss Margaret, came the last of the week from Excelsior Springs to visit at the home of her parents, Mr. and Mrs. John Morgan, and with her brother and sister, Frank S. Morgan and Mrs. Roscoe Jones. Mrs. Graves lives at Harlan, Iowa, when at home, but had spent several months at Excelsior Springs in an effort to get relief from a rheumatism which has afflicted her for several years. She came this way, while on her way home, to visit for a time with her parents.

The Rev. and Mrs. H. L. Buthman, and their two small sons were weekend guests at the Methodist parsonage. Mr. Buthman is pastor of the Mandell Methodist Episcopal church in Chicago. Mrs. Buthman is a niece of the Rev. John Grant Shick. They drove thru from Chicago by auto and went on to Neligh Sunday afternoon; planning to return to Wayne for a brief visit the first of the week. From here they go to Arthur, Iowa to visit a brother of Mr. Buthman, who is pastor of the Methodist church at that place. They will return to Chicago next week.

Former wants poultry and eggs.

COUNTY SCHOOL NEWS

OF MUCH INTEREST

Tho it is vacation time, matters pertaining to our schools, both rural and city should have a place in the local paper each issue. This week Miss Sewall, the county superintendent, provides us with a little news that is important:

School Exhibit Building Fund
Up to this time \$773.88 has been paid in toward the Fair Building Fund by the schools of the county.

Just recently districts 77, 48, 86, 13, 66, 41, 15, 25, 82, 74, 2 and Rev. Borneman's Parochial school and Mr. Germeroth's Parochial school at Altona each turped in \$10.

Districts 33, 36 and the Sholes Consolidated each gave \$15 and the Hoskins district gave \$20.

Opportune Spelling Contest
In a spelling contest conducted throughout the year in the rural schools of the county the following named pupils were the prize winners: Those earning the highest averages were: First Louise Kai of district 4, aged 13, with an average of 100 per cent.

Hilda Koeb of district 29, aged 13, and Louise Beckenhauer of district 1, aged 10 tied for second place, each having an average of 99 per cent.

Viola Radford of district 21, aged 11, and Doc Surber of district 71, aged 13 tied for third prize, each having an average of 98 3-4 per cent.

All of these pupils were eighth graders except Louis Beckenhauer who was a sixth grader.

Prizes were also given to the five who made the highest per centages of improvement. They were:

First, Edna Olson of district 11, aged 14, percent of improvement 42 3-8.

Second, Ralph Austin of district 75, aged 11, percent of improvement 42.

Third, Mildred Soden of district 19, aged 10, per cent of improvement 39 3-4.

Fourth, Rudolph Lorenzen of district 13, aged 13, per cent of improvement 39 1-4.

Fifth, Louise Ehlers of district 77, aged 11, per cent of improvement 35.

Mildred Soden and Louise Ehlers were sixth graders, the other three were seventh graders.

Each of the ten pupils received a medal.

IS CANCER PREVENTABLE?

It is, according to an article appearing in the Dearborn Independent, written by an eminent English physician, who has long made a study of the dread disease. He tells that it is a matter of diet and prevention rather than a cure, the cases not too far developed may be checked by proper food, and the elimination of foods on which the disease feeds. His rule is a diet of whole wheat bread rather than white flour, the use of raw fruits and vegetables, and the practical elimination of meats, and a reasonable amount of exercise. Accord-

ing to statistics, unless there is some check in the disease as it has been running, no less than ten million of the people now living in the United State, are doomed to a death from this dread disease. That is, practically one in every 15 people. The claim is that the percentage is larger in England than here, and that at least five million in that little country are to pass from earth by that route unless it can be checked by changing food habits.

WHAT IS THE BEST FARM INVESTMENT—WHO CAN TELL?

Naturally there will be a diversity of opinions, if our readers should attempt to reply to that question; but we have one reader who answered the question before we asked, and he is showing by his works that he has faith in his words. Frank M. Weber, one of the successful farmers, dairymen and stock raisers, in a modest way, in all these parts says without a stammer that it is the silo. A few years ago, Mr. Weber thought as he does now, but was perhaps not so positive about it then as now. So at that time he backed his judgment by putting up a good stave silo, and he liked it and the feed it conserved. This spring, when it was practically empty, the wind nearly blew it down. So himself and son finished the job, and took the staves, and piled them up for flooring in a barn they plan to build; and says that it will make as good flooring for the barn as any lumber he could buy for that purpose, and that it cost him less when he put it into a silo than it would cost now for new lumber. So he claims he has had the benefit of a thor test of silage as a feed and the saving that it has been to feed silage, for the little work it took to build the silo a few years ago—not to exceed fifty dollars.

Will Build Tile Silo

As evidence that he shoots as he talks, and believes in what he says, Mr. Weber told us that he would begin as soon as material arrives the erection of a tile silo 14x35, which will have a capacity of nearly 100 tons of feed. In his opinion, and it should be good, for he has studied the

matter for several years at least, it is not possible in any other way to store as much feed for all kinds of live stock as economically as in a silo—and then to that he added, "nor is there any other food that is of so much value for any and all occasions for any and all kinds of stock." Mr. Weber tells us that he is confident that the cost of the new silo will not exceed \$800, and that will be less than he could in any other manner put up storage for 100 tons of feed for the live stock for the next 50 years, for he can see no good reason why such a silo should not be good for 100 years, tho he is not planning to use it to exceed half that time.

Mr. Weber had some very good ideas of farming and farm lands. In his opinion, the man who leaves the good country like this for lower priced lands that does not have quality, is making a mistake. It is far better to take less of good land and farm it better and more intensively than to try to spread out over many acres of inferior land and fail to produce enough to pay interest and taxes. On the good land, one has a chance to produce so as to leave some margin for his labor instead of having it all taken for overhead expenses; and then, possibly have to get out and make up a deficit in some other manner.

Mr. Weber has long been a close observer, and appears to have a faculty of seeing the leaks in the farming as it is done; and for many of them can suggest a remedy.

Fortner wants your Cream, Poultry, and Eggs.

LA FOLLETTE

The first quarter of the twentieth century produced in this country three statesmen noted for the strength of the love and the violence of the hate which they inspired. Roosevelt and Wilson are long gone. The last of the three is now with them.

Because he was so hated at one end of the economic scale and so loved at the other, there will be no pleasing many with a dispassionate review of the life and conduct of Robert M. La Follette. Nor can so extraordinary a career be even glimpsed in the space of one brief article. La Follette has been on the firing line in American politics for a quarter of a century. His path as a Wisconsin reformer and then as a challenger of the interests and elements dominant in national politics is a long and hard albeit straight one. He is secure of a place in history. Just what the place is to be depends on the rightness or wrongness of his course as revealed by time.

La Follette's political career consisted of one steady resistance to the pressure of centralized economic interests upon the life and laws of his time. If time proves it best that the people be not governed too autocratically by centralized business powers, then La Follette will have high position in his country's history. Should the decision be otherwise, he will be remembered merely as a persistent and able leader of a lost cause.

Of some of the charges of his opponents La Follette can even now, however, be acquitted. He was not a demagogue. Demagogues do not fight for twenty-five years thru weather fair and foul on one unswerving course. He was not disloyal. His economic and political nonconformity gave his love of country a turn not always understandable by men of different mind.

He served in the senate twenty years and died poor. A pretty good evidence, that, of loyalty to country in the highest sense. Nor was La Follette a socialist. Quite the contrary. He dominated the government of Wisconsin for twenty-five years, and Wisconsin is a less socialistic state today than the Massachusetts of Calvin Coolidge.

America has no statesman like him. He was that rare specimen, a fighting radical who fights with hard won facts. As such he was one of the most effective men who ever sat in the American senate. And a man who sat in the senate twenty years without once compromising with a shady cause or once winking at powerful graft must be put down; even by his sharpest critics, as one not without usefulness to his country.—State Journal.

OBITUARY

Marion Leif Olson was born August 15, 1907 at Hoskins, Nebraska, and died June 17, 1925 at her home in Wayne, Nebraska; at the age of 18 years, nine months and seventeen days. She had been ill for about a year with tuberculosis.

Besides her mother she leaves three sisters, Florentine, Lillian and Margaret, and one brother, Marvin to mourn her departure. Her father, and two sisters died some years ago.

The funeral was conducted at the Beckenhauer Undertaker's parlors by Rev. John Grant Shick last Saturday afternoon and burial took place in the Swedish Cemetery, near Hoskins.

SHERIFF'S SALE

By virtue of an Order of Sale to me directed, issued by the Clerk of the District Court of Wayne County, Nebraska, upon a decree rendered therein at the March 1925 term thereof, in an action pending in said court wherein Daniel B. Cropsey was plaintiff and Roy A. Carter, et al were defendants, I will, on the 20th day of July, 1925 at 10 o'clock a. m. at the door of the office of the Clerk of said Court, in the court house in

Wayne, in said county, sell to the highest bidder for cash, the following described real estate, to-wit: Lot Eight (8) in Block Eight (8) of Original Town of Carroll, in Wayne County, Nebraska, to satisfy the aforesaid decree, the amount due thereon being \$4000.00 with interest at 10 per cent from August 9th, 1924, and costs and accruing costs.

Dated at Wayne, Nebraska this 16th day of June 1925.

A. W. STEPHENS,

318-56 Sheriff.

Figure recently published show that 1924 food prices were 51 per cent higher than the 1913 level. But they are silent as to whether or not the farmer, who produces the bulk of the food of the land, got his share of the increase, or was it swallowed up by the fellows who place themselves for speculative purposes, between producer and consumer? Then, too, the same fellows who want to pass the food stuff out are often in the line wanting to pass what this producer buys back to the producer; and that would be all right, if they did not want the top pay each way. It would be more just if they would make a cent of nearly a half while standing in line for passing two ways instead of one.

NEW TUITION LAW BRINGS HIGH SCHOOL EDUCATION TO MORE FARM CHILDREN

County Superintendent Alice Hall, of Madison county, is of the opinion that the new law now effective, for all practical purposes, which provides that the cost of paying the high school tuition of children from the farms of the state, shall be paid by the entire county, will mean a new era in rural education and open the doors of the high schools to a much larger number from the farms.

The present law requires each district that sends children to a high school located outside its boundaries, shall include \$108 a year for each one, in its annual budget and levy, who has registered in advance for high school work. In small districts this has meant as much money for this purpose as has been raised for all other purposes. The tendency was for farmers to keep their children at home from high school because of the cost to them in school taxes.

Another factor that has operated to discourage rural attendance at high schools has been the attitude of farm owners who rent their lands. In a number of instances they have been picking their tenants with an eye to the number that might possibly be wanting to go to high school, and thus would raise the landlord's taxes. If this possibility presented itself they turned down men who wanted to rent.

The burden on each district will not be so large under the new rule, for the reason that not all districts send children to high schools, but this fact will have the tendency to increase the total number from the county. The high school districts are exempted from the tax.

It will be necessary for all children going to high school under these conditions to register with the county superintendent before July 1 in order that the cost may be computed and put in the regular levy made next month.

NIORRARA EDITOR CALLS GOVERNMENT EVIDENCE "BUNK"

The editor of The Tribune returned Saturday evening from Minneapolis where he had been called as witness in the identification case of Arthur Frazier. It took three weeks and finally the jury came in with a finding that it was not Frazier.

The jury was instructed by the judge that the burden of proof must lie with Frazier. The government was armed with all kinds of questionable testimony. Perhaps the writer was prejudiced in Frazier's favor, but right here let it be known that the Meyer and Snyder evidence was "bunk"—and that of the Mexican and Oklahoma ranchmen pure fiction by the admission of the government's best witness—Dr. Hamilton.

The flinger's testimony, given by experts from the army, navy and department of justice, was all one-sided. A casual conversation with Mr. Kaye of the army got away from the professional side when he declared that "that boy never was in the army nor carried a gun." The writer replied that his prejudice for the government was just as strong as the editor's prejudice for Frazier and one opinion was just as good as the other.

Many side lights were in evidence to the writer's satisfaction and believes that a new trial would settle it in Frazier's favor.—Ed. Fry in Niorrara Tribune.

BANKERS TO TELL FARMERS

"Somebody ought to tell the farmers of this state who do not know what operations are profitable and what are not," said Dan V. Stephens of Fremont, officiating as toastmaster Monday evening at the banquet held

in connection with the short course in agriculture now being given 200 bankers of the state at the college of agriculture. "The demonstrations we have been privileged to witness and the lectures that have been given us today," he said, "are intensely practical in their character. The bankers of this state are charged with the business of financing agriculture in Nebraska. We have just emerged from a dark chapter in banking history in this state. The men who failed were the men who did not know their business, and if there had been more of us who knew our business we could have stopped a lot of the wild specres put on.

"This state has no other resources than those dug out of the soil. The banker ought to know farming by heart. The college has studied the fundamentals of the business, and knows what is profitable to do and what is not. Many farmers, know these things; many do not. It ought to be our job to tell those who do not.

Mr. Stephens suggested that the state association should employ a field man, and have him call next time farmers ought to be brought along to these schools to get the message given the bankers. Make a county day of each day.

Wanted—Good Farms

Do you have a good farm you want to sell. We are preparing a printed list for general distribution and if you want to sell your land list it now, so we can get it on this new and up to date list. We want a large and complete list as we have formed connections with other dealers to work with us and send us buyers. Write us or see us and get your land described on this list.

Kohl Land Company

Wayne, Nebraska

LARGEST HORSE IN THE WORLD

When they speak of large horses most people think of Belgian or England or some other country of Europe as the home of large horses. But do you know that the largest horse in the world is in Nebraska and is a Nebraska product. The town of Wisner about forty miles southeast of Belden is the home of this large horse. Dr. Person and A. E. Ponton of Wisner purchased the horse from C. F. Mitchell of Spencer. Here is what the Omaha Sunday Bee says:

"Nebraska boasts of many world records among its livestock products, but none are more important than the record claimed by C. F. Mitchell of Spencer, who owned the 5 year old

gelding "Lubber," the largest horse in the world on record.

This Gelding was raised by Geo. Maller of Redbird, Nebraska. He is cross bred, his dam being a purebred Percheron and the sire was a Belgian and Shire. He stands 20 hands high (80 inches) weighs 3,000 pounds and Mitchell says he will easily weigh 3,500 by the time of the livestock exposition in December.

Mitchell bought him about a year ago and put him on feed to "grow him out." During the last year he has grown 4 inches in height and has added 800 pounds of weight and is still growing and gaining in weight. He is a dark bay with black points. His conformation is almost perfect."

The Polarine Chart

a rule and guide to
Protective Lubrication

Look for the Polarine sign

CAREFUL study and tests are behind all lubrication recommendations on the Polarine Chart. Nothing was left to guesswork. The speed of the motor, its lubrication system, normal operating heat, clearance in bearings and cylinders and many other factors were carefully studied by automotive experts. Use the Polarine Chart as your guide for the lubrication of your automobile and you are giving it the fullest protection that scientific lubrication can afford.

"Plain Facts About Modern Motor Fuel and Motor Oil" Page 16

BECAUSE motor oil is a small item in the cost of operating an automobile, it is often bought carelessly. But it has a lot to do with the performance of your motor and the size of your repair bills.

Unless it is the grade best suited to your motor it cannot protect it against wear or get the most power or biggest mileage from gasoline. If it is allowed to get heavily diluted with gasoline and dirt, it can't do its work properly.

After 500 miles of operation the oil in your crankcase has lost its best characteristics as a lubricant and is contaminated with carbon and road dust. It is an abrasive mixture that quickly wears out your motor.

How to secure protective lubrication is clearly outlined in our booklet, "Plain Facts About Motor Fuel and Motor Oil." A copy will gladly be sent to you on request.

Polarine is made in six grades—Light, Medium, Heavy, Special Heavy, Extra Heavy and a special grade for Ford cars and trucks only—Polarine "F."

Use the grade of Polarine indicated on the Polarine Chart as best suited to your motor. Change the oil regularly every 500 miles. Keep it up to the level recommended by the manufacturer.

Buy Polarine at the Red Crown Service Station where you buy Red Crown—the balanced gasoline.

Uncle Sam has lost in the case before the federal court which was brought to cancel the Teapot Dome oil leases on the grounds that fraud and conspiracy had been used in securing the lease, but the judge says such was not the case. The government will appeal the case to a higher court. In the opinion of the judge, T. Blake Kennedy, if there was any fraud or conspiracy, it was not proven.

So far as we can see, the militaryists are not having any better encouragement or prospect of success now than they had in their attempt to build Armistice Day into defense day. The 4th of July is Independence Day, and we doubt much if any considerable number of Americans will consent to convert July 4, the national birthday into "Must" day when every man, woman and child shall stand up and be counted and rated as to the military value to be placed upon him. It may be all right to have a muster day, but not on a national birthday, we say.

The fellows who flew at the north pole failed to find all science, blight and happy there. Of course they missed their mark by an hundred and fifty miles; stuck in a snow bank and froze in; spent the greater part of four weeks digging their air boat out of the frozen fields of ice and snow. They found no land, and therefore could make no claims for territory. Next an American expedition is going to try to anchor their air ship to the north pole and tell us whether or not there is any good farm land to be had in that vicinity. The men just returning from the trip are well and relate many wonderful stories of that great waste of snow. Most people in this part of Nebraska are looking for a warmer place to winter than here and a lot of them have a good chance of finding that place.

The very rich and highly prosperous are not satisfied with the tax rate they are assessed under the income tax and the surtax. They assume to feel that they are not paying as much as they should. They want their rate lowered that they may do more business and thus pay more

taxes than at present. Perhaps they are right. We raised passenger rates and boosted the automobile carrying trade to the loss of the railroads both in volume of business and cash returns. We have boosted postal clerk salaries and increased the postage rate to meet the increased cost, but the early reports are that the new and higher rate is decreasing business at a rate that is more than taking up the money coming in from increased price. We do not yet know how the increased pay is to be met—but then they can provide for a deficit, we suppose.

The powers that be in government—and those who want to be—are competing in the matter of figures as to who is going to make the greatest tax reduction; if given the change. The people are more interested in getting value received for their taxes, and having the tax go to government, than in any paltry reduction which might be promised. It is estimated that for every dollar of tariff tax paid to the government, not less than eight dollars are collected and pocketed in excess prices by the beneficiaries of a protective tariff. That is what taxes the people. This is especially true as to agriculture, the market price of its product being fixed in the world market while the price of what the agriculturist must buy is hoisted a liberal percentage behind the tariff wall. It is the proud boast of this country that we can produce most manufactured articles cheaper than any other people—but they do not give the home folks a benefit of their superior ability. Why? A tariff and a combine.

It is here. That announced national democratic weekly news and views paper. It is published by the National Democrat Company, Inc. from Washington, the very hub of the political wheel. W. J. Jamison, formerly a country newspaper publisher of Shenandoah, Iowa, and once a congressman from the 8th congressional district of Iowa, sliding in one time when P. W. Hephurn was not in good standing with the people. Jamison has been in some political position much of the time since his term in congress expired. Frederick W. Steekman is the editor, and we do not yet know what he stands for. Wm. A. Oldfield is chairman of the advisory board. The price is \$3.00 per year. Just where it will stand in the great questions which will come up within the next two years, is not known. If it can be independent of corporation influence and give the readers the true inwardness of things political, it can do a great work in the nation, if it can and will establish a circulation of about two million and spread itself fairly evenly over the land. If it prove progressive it can aid the farmer and the consumer to better times. If the monied corporations own and control it, it may do the cause of the people more harm than good.

NEW HARNESS STOLEN

Last night Larson Bros. of near Carroll reported the loss of a new harness. The sheriff was placed on the trail, and followed it as far as Beldon, where the trail was lost.

If you need any ditching, vault, eastern or collar digging, see Ellis Miner, Phone 256j.—adv. J4-51pd

SOCIAL NOTES

Dr. T. F. Cook of Ames, Iowa, for twelve years, director of the Epworth League Institute at Clear Lake, in that state, where young people have received much inspiration, has consented to come to Wayne for a few days to conduct a series of open-air Vesper meetings giving helpful addresses on Life Adjustment themes to which all old and young are cordially invited. This series of unique addresses will be in an enclosed space on Nebraska street between 7th and 8th and some good things will be provided for out of town students desiring to get the benefit as an over the 4th treat. The series will begin on June 26th continuing over 4th of July.

The Country club social had their regular meeting Tuesday afternoon at the Community house. The afternoon was spent with bridge and kensington. At the close of the afternoon refreshments were served by a committee. Mrs. John Harrington, Mrs. J. T. Bressler, Mrs. R. L. Larson, Mrs. Wm. Von Seggern, Mrs. C. M. Craven and Mrs. L. B. McClure were on the committee.

Mrs. E. H. Young led the lesson study at the home of Mrs. J. W. Zeigler Tuesday afternoon when the Bible Study Circle held their regular session. Prayer was offered for many objects and a good time of fellowship enjoyed. The next meeting will be with Mrs. J. E. West in the east part of town.

The Harmony club met for their regular meeting Wednesday afternoon at the home of Mrs. Jewell Killien. The time was passed socially. At the close of the afternoon the hostess served refreshments. There were three guests, Mrs. Killien, Miss Johnson and Miss Carlson. The next meeting will be in three weeks at the home of Mrs. Curtis Foster.

The Rural Home society are having their regular meeting this afternoon at the home of Mrs. A. T. Claycomb. Roll call was responded to with Current Events. The afternoon was spent socially after which the hostess served refreshments.

The Alpha Woman's club have their annual picnic Friday at the Bressler park. The members and their families are invited.

The Rebekahs will have their regular meeting Friday evening. They will have installation of officers.

WITH THE WAYNE CHURCHES

Methodist Episcopal Church
 John Grant Shick, Pastor
 Sunday school at 10 a. m., Conrad Jacobson, superintendent.

Epworth League at 7:00 p. m.
 Miss Ruth Rennick, leader.
 Public worship at 11 a. m., with sermon by pastor.

The Boy Scouts will be our guests at the morning service next Sunday. The pastor will speak on "What the Flag Means" and a United States flag and a Troup flag will be presented to the patrol. We are anticipating an interesting service.

Two babies that could not be present on children's day will be presented by their parents for baptism next Sunday morning. Any other parents having babies to be baptized are invited to be present with them.

No evening service on account of the union service at the Library lawn at 8 o'clock.

Prof. and Mrs. Glenn Gildersleeve sang to the great delight of all present at our morning service last Sunday.

First Baptist Church
 Francis K. Allen, Pastor.
 Sunday school at 10 a. m.
 Public worship at 11 a. m.

Union meeting on the lawn of the public library at 8 p. m.
 Rev. Dan Burross, graduate of Grand Island College and of Kansas City Theological seminary, a former member of this church and now pastor at Whiting, Kansas, will preach at the morning service.

Members of the young people society will go to Wakefield Saturday morning on the train and walk back in the afternoon. Those planning to go will take lunch with them and meet at the depot.

The young people will put on a program Sunday evening with the young people at Carroll. There will be no meeting of the society here.

The women's missionary society will meet at the home of Mrs. Kopp on Thursday afternoon.

St. Paul Lutheran Church
 Coy L. Stager, Pastor
 10:00 children school with the lesson study. There is a class for you.

11:00 Morning Worship. Subject theme: "Three Marked Men."
 8:00 Union Service on Lawn of Public Library. The Rev. Mr. Shick, speaker.

Thursday afternoon June 25, the Ladies Aid Society will meet at the

A Chiropractic Discovery

Chiropractic again leads in the greatest step forward in the Science of Health today! Invented and perfected at the Palmer Schools of Chiropractic, Davenport, Iowa, the Neurocalometer is leased to Chiropractors ONLY.

The Neurocalometer

What It Can Do

- 1-Picks the nerve causing your ailment when applied to the Spinal Nerves.
- 2-Records the points of nerve pressure on a Dial which is visible.
- 3-Registers ZERO when NORMAL. If abnormal, registers nerve pressure in points of 1-100th of a degree.

You

- 1-Can very frequently feel the changes in the affected part immediately after an adjustment is given.
- 2-Get results briefly and, owing to constant re-check with this instrument, in a short time are well.

SEEING IS BELIEVING, Bring your friends and see this instrument. Watch this dial register exact nerve pressure. You do not have to take adjustments. COME IN AND SEE FOR YOURSELF.

Ora Martin, who has been working at Allen, is home for a visit, and may stay several weeks.

Madison boosters are to be out this week hooping it up for celebration at their town on the 4th. Wayne is not on their list.

THRASHING MACHINE TANK FOR SALE—Tank and pump, complete. Apply to L. M. Owen, phone 212, Wayne.—adv.

Mrs. Albert Sals departed Wednesday morning for Sioux City where she spent the day visiting with her husband, who is in the hospital at that place.

D. E. Melton came from Long Beach, California, Wednesday morning and will visit for a short time with Mr. and Mrs. Irvin Larson, his daughter.

Marjorie Benson, who spent about two weeks visiting at the home of Dr. and Mrs. G. J. Hess, her aunt returned to her home at Norfolk Wednesday morning.

Mrs. Fred Eickhoff went to Omaha Wednesday morning where she attended the wedding of her son Fritz Eickhoff, who was married at that place Wednesday afternoon.

R. J. Fox and family from Pierce were here Sunday, driving over to visit at the home of his parents, S. C. Fox and wife. Mrs. C. E. Van Slack from Randolph was also a guest at the Fox home.

J. C. Ness, F. S. Morgan, R. B. Judson and Father Kearns left the first of the week by auto to attend the national Kiwanis meet at St. Paul, the two first named being delegates from the Wayne organization.

Wm. Loburg of Carroll came home Wednesday evening from Sioux City, where he went the first of the week with a car of 1200 pound cattle that were good enough to bring \$10.75 on the market Tuesday morning.

W. A. Hiscox and wife came home Tuesday night from their trip in Iowa and Minnesota. Mr. H. reports a very good time, and lots of fishing. He thinks Iowa, the parts he visited at least, had the poorest outlook for crop. Looks good in most of Minnesota as well as in this state. They ran into some rather muddy roads on the last lap of the home trip.

Fortner wants poultry and eggs. Dr. T. T. Jones is at Rochester this week, going in charge of a patient from Randolph and is expected home the last of the week.

Miss Anna Renz, of Hot Springs, South Dakota, came out from Sioux City the first of the week and is assisting at the Jeffries beauty parlor.

Mr. and Mrs. Homer Seave were visitors at Crystal Lake the first of the week, and were accompanied by their nephews Clyde and Harold Everette from Carroll.

Mr. and Mrs. Harm Weyerts came by auto Wednesday afternoon from Sterling, to spend a short time visiting at the home of Mr. and Mrs. Henry Kugler their daughter.

Mrs. Nola Johnson, who spent a couple of days visiting with her daughter Mrs. Wm. Robinson and husband returned to her home at Pender Wednesday afternoon.

Mr. and Mrs. Johnson, Mr. and Mrs. Wayne Brisben of Wisner, Miss Florence Baird and John Brisben of Wayne went to Homewood park Saturday and spent Sunday at that place, on an outing.

Mrs. George Salter came from Carthage, South Dakota, Wednesday to visit for a short time at the home of Mr. and Mrs. P. G. Philleo, her sister and with Judge and Mrs. A. A. Welch, her brother.

Mrs. S. M. Swanson, who spent a couple of days visiting with her sister Mrs. I. C. Traumbauer, who has been seriously ill, returned to her home at Emerson this morning. Mrs. Traumbauer is getting along very nicely.

Miss Fannie Brittel came home Sunday morning from West Bend, Wisconsin, where she has been teaching for several years. After spending the summer vacation with home folks she returns to that state, but to a larger place.

A news report tells that harvesting of wheat has begun in Buffalo county, with crop estimated at 15 bushel per acre. Another news report from Lincoln sets up the claim that much of Nebraska wheat is so poor that it is that it will hardly pay for threshing.

O. L. Randall, local manager of the Bell telephone at this place returned Sunday morning from near Hamilton, Ohio, where he spent his vacation with home folks. His father not being in the best of health, he timed his vacation so that he might visit him at this time.

Wm. and Chas. Buetow and C. P. Crockett came home the last of last week from a bit of a fishing trip to Lake Andes, in South Dakota. They claim only moderate success in their casting for fish, and report their total catch at about 140, little and big. Not a big lot for three days fishing.

J. S. Horney and wife and daughter and Miss Ruth Bufford of Keapney are home from a trip to his old home in central Ohio, where they visited relatives for a short time. Mr. H. tells us that things seem about normal in Ohio, and much the same, we suppose, as in the rest of the country.

Mrs. Thomas Bell and daughter Adaline, who spent several days visiting with Wayne friends departed Wednesday morning for Randolph where she will visit with other friends. Mrs. Bell formerly lived at Wayne and is now a resident of Elgin, North Dakota. She has been spending nearly a month among friends in this part of the state.

Road traveling between Pilger and Wisner is to go forward with a double shift, working day and night, with sixteen trucks hauling. The gravel will be from a pit near Pilger. If some fellow could trade a forty acres of our fertile loam land for an equal number of acres of good gravel close to Wayne it might prove more profitable than the richer soil. Lack of sand and gravel is one of the drawbacks of a good country.

Last evening a Madison county car bumped into a Wayne county car that was parked in front of the Methodist church, breaking a wheel of the home car, and driving it over the curb, and bending the rear fender. Just what damage was done to the car with the Madison county number, we do not know; but it was taken to the car hospital by an auto ambulance. So far as we could learn, no one was seriously injured, in fact, we think the parked car was without occupant.

Fred Heftl from Russell, Minnesota, came Wednesday evening to visit his mother, brother and sister at this place. Mr. Heftl was a citizen here until about twelve years ago, when he went to Minnesota. He said that crops had seemed a little slow because of the drought, but as they received much the same wetting as we had, he believed that crops would come under the wire in proper shape. He tells that Minnesota has the gasoline tax, and that building and graveling roads is one of the chief industries there this year.

LOCAL AND PERSONAL

Fortner wants your Cream, Poultry, and Eggs.
Ben McEachen was a passenger on Sioux City Tuesday morning.
Mrs. Carl Wasmuth went to Emerson this morning to spend a few days visiting with relatives.
LOST—From car in Wayne, Wednesday evening, Ford Balloon tire and rim. Finder leave at Democrat, or phone 68.
Miss Edith Porter returned to her Norfolk home Monday evening, following a visit here with her sister, Mrs. Claude Wright.
Mrs. E. N. German and daughter Jean departed Wednesday afternoon for Council Bluffs, where she will visit for a short time with her parents.
Mrs. W. H. Gildersleeve and daughter Mrs. Mae Young and Mrs. Anna Gamble Johnson went to Sioux City Wednesday morning and spent the day.
Word comes from C. E. Belford and wife formerly of Carroll, but now at Central City, that they are getting established nicely in their new location.

Mr. and Mrs. John Kate, who have been spending a fortnight here, will leave today for Sioux City to visit a day or two at the home of their son Charles Kate, and then to their Lincoln home, taking their grand children with them. In the course of his conversation, Mr. Kate said that he had patented a new incubator, which he thinks will prove better in many ways than the X-Ray he worked out and patented some fifteen or more years ago. He says that the selling of live chicks is just now hurting the incubator business for there are a lot of good American people who will not take the trouble to hatch eggs if they can buy the little birds already out of the shell.
Early Saturday morning last, a party of twelve packed up picnic supplies and hit the trail for Homewood Park, near Wynot, wondering if they could not have a good time, why not? In the party were Mr. and Mrs. C. E. Miller, Mr. and Mrs. Rollie Miller and babies, Miss Martha Adamson from Fullerton, a sister of Mrs. Rollie Miller, Mr. and Mrs. Wilbur Spahr, Mrs. Silas Mellick, Forrest McNut and Hattie Morton. They had a busy time with bites while angling at Homewood park but mostly mosquito bites, and a jolly hour or two bathing. The party finally knew when they had bites enough, and voted unanimously to adjourn to Yankton where they spent Sunday sight-seeing, attending church, and driving about, arriving home Sunday evening.

Fortner wants your Cream, Poultry, and Eggs.
Some one captured a badger near Newcastle last week, an animal not common in these parts. They are guessing that it weighed 20 pounds. Wm. Elk captured the animal.
Mrs. H. W. Whitaker and children Helen, Mildred and Harry, came from Omaha Saturday and are visiting at the home of Mrs. Peter Coyle, her mother and with other relatives.
Early potatoes—that is what V. A. Senter calls his. Thinks he is among the first to harvest spuds in this vicinity. Whispered to us that they had 'em from their garden for dinner Sunday—two hills making a mess of a dozen fair sized ones. Vic said the only way he could account for it was that he sort of hovered them those frosty night. By the way, since the rain there has been less worry about the spud crop. Now comes to us a story of new potatoes from a Wayne garden that put the spuds on the table two weeks earlier.
The state dairy law provides as follows: "No person shall sell, offer, or expose for sale, exchange or deliver any milk, or cream, to be used for human consumption, which has been obtained from any animal not examined and tuberculin tested, within one year immediately prior thereto by a duly licensed and authorized veterinarian and certified by him to be free from disease; provided when such animal is part of a herd located within an area established and maintained for the inspection, examination and testing of cattle for tuberculosis only at such time or interval as may be required by the Department of Agriculture."
The department has been sufficiently liberal in warning many violators, and has given ample time for the provisions of the state dairy law to be complied with. It is the intent to cause this law to be operative and those who continue in violation will be subject to the penalty provided, and complaints will be entered as these violations are found. The owner of cattle, whether it be one cow or many cows, should immediately proceed to have the test applied if such cattle have not been tested within the prescribed time limit, and their use under the state law requires that a test be made. This public communication must be taken as sufficient warning, as it is not required of the Department to make special warning to any individual.
Very respectfully,
H. J. McLaughlin,
Department of Agriculture.

of the business to be transacted by said corporation is the manufacturing and selling of incubators and brooders and other poultry house equipment. Said corporation shall commence business when its articles of incorporation are filed and recorded in the office of the County Clerk of Wayne County, Nebraska, and filed in the office of the Secretary of State of Nebraska, and said corporation shall continue until August 1, 1950. The affairs of the corporation are to be conducted by a board of four directors, and by a president, secretary, vice-president and treasurer.
Witness our hands at Wayne, Nebraska this 24th day of June, 1925.

PERSONAL PROPERTY VALUATIONS FOR YEAR 1925

The following named individuals, firms, corporations, or copartnerships have been assessed in the precincts as herein shown and the amounts set opposite their names are the valuations fixed by the Assessor, and are as they appear from the assessment record and also are the totals upon which the tax for the year 1925 will be computed unless changed by either the County or State Board of Equalization. Bear in mind that these are the actual valuations as all levies are now based on actual instead of assessed values.

DENOMINATIONALISM, OR THE TRUTH?

A group of Northern Baptist ministers, meeting at Denver, adopted a resolution declaring that "the injection of modernist theories into the Baptist church will lead to denominational suicide." What of it? If the dogma or creed on which any sort of denominationalism rests will not be able to undergo a thorough and minute inspection, then it will not only die, but it deserves to die. What is the purpose of the church—to keep alive and active the dogmatic and arbitrary differences in creeds, or to harmonize all beliefs, and unite mankind on a single platform?

In Judea a great teacher wrought to little end, because He was not orthodox in His beliefs. He expressed Himself as not to destroy, but to fulfill the law. Yet priests and leaders of the church rejected what was so plainly taught to them, and what seems so easy to understand. It was strange doctrine tending to subvert the denominationalism of the day. Heretical, leading to schism, and therefore to be extirpated. Finally, the menace became so strong that sentence of death was passed and executed upon the teacher. That did not check the truth.

One creed after another has held sway, many modifications of the original doctrine have influenced men's minds, but the great central truth, on which all must rest, has not altered. God reigns, and His prophets, an almost innumerable company throughout the ages, have taught that majestic truth. Denominationalism has never advanced the cause of true religion. It has caused interminable strife among the people from the earliest times to now. Why then, should the thought of denominational suicide terrify any, unless it be those who prefer the keeping of it alive to developing the truth? The presence of Harry Emerson Fosdick in a pulpit is a menace only to dogma. True religion will suffer nothing for if he is wrong his error will manifest itself. And the mind of man will ever go searching for and continually discover some portion of Eternal Truth.—Omaha Bee.

REINHART, THE PAINTER

Joachim Christian Reinhart, German etcher and painter, was born at Hof, in Bavaria in 1701 and studied under Oeser at Leipzig and under Klingel at Dresden, in Saxony. In 1789 he went to Rome, where he became a follower of the classicist German painters, Carstens and Koch. He devoted himself more particularly to landscape painting and to engraving. Examples of his landscapes are to be found at most German galleries, notably at Frankfurt, Munich, Leipzig and Gotha.

NOTICE TO CREDITORS

The State of Nebraska Wayne County, ss.

In the Matter of the Estate of Dona Weiher, deceased.

To the Creditors of Said Estate: You are Hereby Notified, That I will sit at the County Court Room in Wayne, in said County, on the 3rd day of July and on the 3rd day of October, 1925, at 10 o'clock a. m., each day to receive and examine all claims against said Estate, with a view to their adjustment, and allowance. The time limited for the presentation of claims against said Estate is three months from the 3rd day of July, 1925, and the time limited for payment of debts is One Year from said 3rd day of July, 1925.

WITNESS my hand and the seal of said County Court, this 5th day of June, 1925.

(Seal) J. M. CHERRY, County Judge.

COMMISSIONERS PROCEEDINGS

Wayne, Nebraska, June 15th, 1925.

Board met in regular session. All members present. Minutes of meeting held June 3rd, 1925, read and approved. This being the day for the opening of bids on steel and concrete work for the fiscal year 1925. Bids were opened at 1:30 o'clock P. M., and on motion action on said bids was deferred until June 23rd, 1925.

The following claims are on motion audited and allowed and warrants ordered drawn on the respective funds as herein shown. Warrants to be available June 26th, 1925.

EFFECTIVE STRATEGY (Argonaut)

As the sailor approached the customs officer he assumed that expression of preternaturaluteness that usually sits so transparently on the faces of those who go down to the sea in ships.

"Say," he said, "if I bring off a few bits of lace and things tomorrow, will it be all right? I'll make it all right with you."

"Sure," said the officer, "what o'clock will it be? I want to be here myself to see you through."

"Make it 2 o'clock," said the sailor.

Next day at 2 o'clock along came the sailor, glancing furtively from side to side. As he approached the gate the officer and two others held him up and searched him. Not an atom of contraband could they find.

"You thought better of it," suggested the officer.

"Naw," said the sailor, "I was taking it out yesterday when we met."

CHAS. W. REYNOLDS, Clerk

Daddy's Evening Fairy Tale

By Mary Graham Donner

DUCK HAWK

The Duck Hawk stood upon a great ledge. Below him, far, far below him, was the flat and even earth. But he could look down without feeling dizzy.

People who climbed great heights might feel dizzy but not the Duck Hawk, nor any member of his family.

He was standing right on the very edge too. He knew he would not fall. He knew even if he felt like going off that ledge that he could simply spread his great wings and fly.

Then, too, his feet were so splendid and strong. He had great, enormous feet. And he was very proud of it. He didn't try to squeeze his feet or cover them up or hide them. Outspread were his feet, and so proud of them was he that he liked the name often given to the family beside that of Duck Hawk.

Many called him the Great-footed Hawk, and he was pleased with that name.

He felt that it made him seem so powerful. People might wear shoes and so try to make their feet look smaller than they were.

Or maybe they weren't foolish enough to pinch their feet, but perhaps they didn't show them off.

He wouldn't have worn shoes on his great feet. Not he. Nor would any bird or creature of the out-of-doors. He had heard of children who went bare-footed in the summer time, and he thought they were sensible.

He had heard of children, too, who were proud when they did not take small sizes of shoes.

Oh, how proud he was of his feet. He stood now upon a great ledge-looking very handsome. He was a huge, enormous big fellow.

On either side of his mouth or throat was a black patch which he called his mustache. It did look as though he wore a mustache.

His waistcoat was of white with shadings of buff and speckled with

Right on the Very Edge.

smart, stylish black touches. His coat was of slate blue.

It was a gorgeous coat, and his cap matched his coat, but was of a slightly darker shade.

If was not so very long since he had been a young fellow with a suitable suit of brown and tan and black. It was not well for a young fellow to dress too magnificently. That was for an older bird.

And before that he had been an egg of buff color, decorated with brown. He had been told about that. He had not remembered anything before the time he had hatched out of his shell—and he had remembered that hardly at all.

He had always liked ledges, though. It came to him naturally as even before he had been hatched forth he had been put upon a ledge without any need to speak of it at all.

His family was not one for soft, easy nests. His family liked a rugged, hard, wild, free life without cares and without responsibilities.

He had always been fearless and had always been brave.

He was like all of his family.

And he liked to fly over great stretches of splendid country. "I'm fond of the North and the West," he said. "It's so much more free and big and open, to my way of thinking. And I love the great rocks I find and the great cliffs."

He had been standing still long enough. Now he must go forth and seek his prey.

No one would get the better of him! He would get the better of any one! He would not be afraid of any one. They would be afraid of him!

He would sail forth into the splendid air, and how quickly he would fly.

No one could fly any more quickly than he could fly. Certainly not the ducks he would go after.

Not the most rapid flyer among them could get ahead of him!

He was Duck Hawk, the great, wild, splendid bird.

Any one who knew him would know that this was so.

Conundrums
Why is a poor fellow better than a rich one?
Because a friend in need is a friend indeed.

Why is the wick of a candle like the city of Athens?
Because it is in the midst of Greece.

When does a stick slip up and run?
When it is chased.

SIMPLE HOMES IN CENTRAL AMERICA

Peons Satisfied With Primitive Abodes.

The peons' houses are made of poles. The poles are covered with a kind of palm leaf called Yaguas. These are laid like shingles on the roof and sides and tied with narrow strips of the same leaf, which when dampened is very flexible, enough so as to tie it into knots, but which upon drying will shrink enough to draw the big leaves tight against the poles. This makes a strong hut with water-tight roof and a good protection against the wind. There are generally two doors, back and front, but no windows.

The floor is in some instances made of the outside slabs cut from a palm tree, split out from four to six inches wide, the length being cut with a machete before the wood gets too dry. These slabs are held in place on the floor-poles by a few nails, and the upper side of the floor slabs is often brought to almost a piano polish by the constant rubbing of dirty clothes, grease and other things, for it is not the custom ever to wash the floor.

In many instances the entire family sleeps on the floor with nothing to soften the hardness thereof—and no covering, other than the clothes they wear during the day. The household tools, such as tables and chairs, in some instances, were not necessary, as the floor acted in the capacity for both.

The other things include a cast-iron kettle of 12-inch diameter by 5 inches deep, called caldero, in which the coffee beans are roasted. The roasted beans are then crushed by being pounded in a wooden mortar, called a mortero, which is made by hollowing out the end of a hardwood log some 15 inches in diameter by 3 feet high, to a depth of a foot, by the application of fire and then scraped to a smooth surface by a machete.

The pestle, called a majadera de mortero, is also of very hard wood, shaped by patiently chipping it into shape with a machete. The kettle referred to above is also used for making a stew, called sancocho. To this stew they add roots and leaves, to suit the taste. The boiling of green plantains called platanos is done in this very useful household tool; the platanos are used in place of our potatoes.

The man of the house always wears a machete, a sword-knife hung from some kind of belt around the waist (in countries where the laws do not forbid such weapons), and with this knife he cuts the cane, firewood, brush and grass and defends his family and himself from enemies. The edge of his machete is kept very keen, as it is his proudest possession, and some of the peons are experts in the use of it.

A very important item in the lives of these people is the tobacco they use for chewing, which is called tabaco hilado, pronounced by the native as if spelled tar-bar-ko-olow. Both the men and women chew this. It is very strong; is made into ropes and sold by the vara—about 32 inches. I tried this tobacco once, and was perfectly satisfied that the kind made in the United States of America suited me much better.—By Mr. Emerson, Adventure Magazine.

Miners' Gas Masks

Danger of mine deaths through smothering by poisonous gases is being reduced in the Illinois coal fields by equipping the workers with "self-rescuers," tested and approved by the federal bureau of mines. They are designed to give the wearer half an hour or more after the gas surrounds him before he is overcome, and consist of a pinch clamp for the nostrils attached to a small can with a mouth-piece. The device is worn in the pocket or on the belt and is enclosed in a sort of brass case that may be ripped open by hand. When the fumes arise, the breathing apparatus is quickly adjusted and, by inhaling and exhaling through the mouth into the can, the miner is protected from the poison for at least half an hour, and has a chance to seek escape.

Golf Ball Kills Crab

Many stories emanate from the various clubs about Detroit. Birds have been killed by flying golf balls, rabbits have been slain and numerous and sundry other unique incidents have been reported. The latest one is told by Dr. W. C. Melvin, Hamilton avenue dentist, who claims to have killed a lobster-sized crab with his white pill. Doctor Melvin says that he was driving from the eighth to at Meadowbrook Country club when his ball hit something and stopped dead. He says he found that the ball hit a huge crab which had wandered onto the fairway from a nearby creek. And that's one more for the boys to shoot at.—Detroit News.

Home, Sweet Home

The approach of a storm, one hot summer afternoon, was being eagerly watched by a mother and her children. Little Johnny manifested considerable fright. "Maybe, children," said the mother, "seeking to appease the little boy, 'I wish I could come to the moon and take us all to heaven.' Her words seemed only to aggravate Johnny's fear and he began to cry. "What is the matter, Johnny?" asked one of the older children. Peewee says, the little fellow answered, "I don't want to leave home, and I'm in business with wings besides."—Indianapolis News.

A No Quorum Night

By L. A. LEONARD

(Copyright)

ANY one who belonged to the old Lyceum would be sure to preserve a vivid recollection of the gatherings of that famous body, and above all, of the genial presiding officer.

That dignitary, Mr. Matt Spencer, was an old man in those days—a little rising seventy, but he was as jolly as the most youthful, and enjoyed a good story as thoroughly as did any of the young men.

Usually our meetings were so well attended as to leave little time for any save the serious objects for which the Lyceum existed. So it was an extraordinary occasion when, one night, a driving storm kept away so many of the faithful that the customary quorum failed to show up. That the dozen present, however, must have embraced some pretty good material, I feel sure, for as I look back, I remember that they included a future United States senator, two or three able lawyers, one or two future successful newspaper and literary men, and one man who has since held half a dozen prominent positions in his state.

Naturally, with such a gathering, even a "no quorum" meeting couldn't prove tame. And though the regular program was out of the question—a discussion of Shakespeare's intention concerning the character of Iago was to have been in order—it was unanimously voted to devote the evening to story telling.

After various yarn-spinnings—whose subjects don't matter here—some one turned to Mr. Spencer with a request for one of his famous tales.

A look of serious intentness deepened the lines in the old man's face as he glanced around to see if the rest of us were equally anxious for a story from him. He began:

"This is the one ghost story," said he, "which is duly authenticated and certified to by the records of a court. I heard my father tell it, and he heard it direct from his father, who was alive when the incidents happened and the case was tried. In those days the county of Talbot embraced the entire peninsular part of Maryland, and although the legal matters took place in Easton, the Osborns lived in that part of the state which now forms the county of Kent.

Mr. Osborn was a highly respected Englishman, who had come to this country with his five boys, for the purpose of bettering his fortunes. The sons had grown up, and by their united efforts the family had become large land owners. His extensive estate was divided into two parts—Glenham and Willow Crest, which lay some six miles apart. Both were excellent properties in colonial days, but Glenham was the more valuable of the two. Mr. Osborn died, and Peter, the eldest son, attempted in the county court to establish a verbal will by which Glenham was to be left to him, and Willow Crest to be divided among the other sons. The will was a very unfair one, as we regard things today, but under the English idea of primogeniture, which was firmly fixed in the people's minds, such an arrangement was not unusual in those days. So, though in a mild way Peter's brothers resisted his efforts to establish the will, no great bitterness was shown on either side, and the indications were that Peter would win his case and secure possession of Glenham. But the case was postponed from week to week until, finally, Peter came to court one Tuesday morning with a look of consternation on his face, avowing his purpose of withdrawing from the effort to establish the will. When court opened, he said he was there with some witnesses to prove a most extraordinary incident, and that he desired to withdraw the noncupative will which he had attempted to set up, and to ask his father's estate be equally divided among the children. Then he told the following remarkable story, and established the truth of it by witnesses, whom he had brought along:

"While at work in the field the other day, two neighbors were walking along with me towards the turning row. We were discussing the will and the probabilities of my success. As we approached the end of the row my father suddenly appeared at the side of the fence. He said to me, in a clear and distinct voice, 'Peter, don't do that. Don't try to rob your brothers in that way. You know I never intended that it should be done.'"

"While he spoke, my two neighbors, Mr. Hale and Mr. Cressup, heard the voice and understood every word that he said. When he ceased speaking, he laid his hand on the top rail of the fence, and we all saw the smoke arise from it. A moment later he was gone—but the print of the forefinger and thumb were distinctly burned into the rail. I have brought the rail with me, that the judges may examine it, and Mr. Hale and Mr. Cressup are both ready to testify to the truth of what I have said."

"It is recorded that the judges examined the rail and heard the testimony of the two witnesses, both of whom testified to having heard the voice, although neither of them saw the figure of Squire Osborn, as did Peter. And furthermore, when this case was being recorded by the clerk of the court, a drop of blood fell upon the book as the last word was written, and this drop of blood may be examined today on the oldest record book of this county."

The DAIRY

DAIRY PROFITABLE WITH SMALL HERDS

Many creameries at the present time are losing money because they cannot get enough cream for the farmers in their territory to pay their overhead expenses. The volume of butterfat necessary to put these plants on a profitable basis is not likely to be secured until a large number of farmers begin to appreciate the value of the income from a few cows.

In the opinion of Prof. J. P. LaMaster, chief of the dairy division at Clemson college, the creamery development must depend on farmers who will milk from four to six good cows, and there is no doubt a place for such a number of cows on every farm which is operated by its owner living on the land. These few cows can be milked and cared for in a very few minutes before and after working hours each day. No extra hired labor is necessary.

The feed which these cows need and which the farmer saves for them, and the pasture they consume, would yield no income for him if he did not have the dairy cows. When a farmer gets many more cows than is indicated above, says Professor LaMaster, the labor problem becomes important, as does also the feed problem. The dairy herd then becomes a major project on the farm and requires sufficient time and labor to make it interfere with the other plans of operation. It is often just large enough to be burdensome and yet not large enough to be profitable.

There is very little place for herds between six or eight and twenty cows for cream production. Many a farmer has made money and has been satisfied while milking four or five cows, but when he increased his herd to twelve or fourteen cows, he did not make as much money in proportion and was dissatisfied with the results. A large number of farmers with four or five cows each will make dairying profitable.

Beans Fail to Improve Silage for Dairy Cows

Comparisons of corn silage and corn and soy bean silage for dairy cows at the Iowa station fail to show much advantage for the corn and bean silage. In the first two trials, the cows produced about 2 per cent more milk and butterfat when on the corn and bean silage ration as compared with their production of corn silage, the grain and hay rations being kept constant. In this trial the returns over feed cost were nearly 4 per cent greater when the cows were on the mixed silage.

In a second trial, however, there was a slight advantage for corn silage in weight of the cows and production of milk and butterfat when on the corn silage ration. The dairy husbandry authorities concluded that there is little, if any, difference in the usefulness of the two kinds of silage, so far as feeding to dairy cows is concerned. No apparent differences in palatability were noted and the differences in production were not consistently in favor of either brand of silage.

Soy Beans for Protein Balanced Ration for Cow

The average dairyman finds it necessary to buy some feed rich in protein in order to feed a ration properly balanced. And protein feeds are the highest in price of any he can buy, therefore it is good business for him to grow something to take the place of cottonseed meal, linseed oilmeal, or whatever he has been purchasing.

Soy beans come nearer being suited to every dairyman's needs than any other crop. On soil too thin for clover or alfalfa, several varieties of soy beans do well. On a rich soil they make a great amount of feed. If threshed, the seed may be cracked and fed in place of cottonseed or linseed oilmeal with equal results. Or if the hay is used, the cows will digest the grain fairly well.

Dairy Notes

It takes only 12 minutes to tell whether or not a dairy herd is profitable.

None but high-producing cows are profitable, and the use of pure-bred sires is the shortest road.

Care of good, well-fed dairy stock covers many items, such as handling, breeding, housing, grooming, etc. In short, the dairyman must provide all the necessary conditions for good production.

Missing windows in the dairy barn mean missing dollars in your milk check.

A cow that has to use her energy warming the ice cold water she drinks can't use that energy to make milk.

Butter making begins with the production of good, clean-flavored cream. To obtain practically all the cream from the milk and have it in the best condition requires the use of a cream separator.

COLORADO CALLED RIVER OF MAGIC

Easily Most Dramatic of American Waters.

The Colorado is the most dramatic of American rivers—perhaps, if you put prophecy ahead of history, of all rivers. Given time, which railroads and the swift advance of population have denied, it might have produced a civilization as different from that of its neighbor, the Mississippi, as that of the Mississippi is from the cultures of the Danube and the Rhine.

From its inception, 14,000 feet above the sea, through its flaming mile-deep canyons and along its swollen delta, where it has laid down 800 feet of fabulously rich soil, it is a stream with a pulse and personality peculiar to itself. It is the product of a region of abrupt contrasts of flowing water in an arid land, of monumental rocks and plunging chasms, of flashing futuristic colors. It has none of the classicism of the Hudson or the Potomac; it was carved and painted long ago by some Society of Independent Artists who did not work by precedent. The magic is not wholly out of it even now. Even now it may be capable, despite the transcontinental railways and highways, which send travel across the river valleys instead of up and down them; despite, also, the motion picture, the radio and the popular magazine, of laying a spell upon the race of men. It may give a new rhythm to their dances, a new cadence to their songs, a new boldness of line and color to their arts. For one cannot think of a population in the valley of the Colorado as serving purely materialistic gods, as sentencing themselves to a dour puritanism.

The Colorado is capricious and full of a wild humor. Its average flow, below the Grand canyon, is about 20,000 second-feet, yet there is good evidence that in time of flood it has sent down as much as 500,000 second-feet—an increase of 2,500 per cent. When a flood of even a third of this volume emerges upon the delta, augmented by the waters of the Gila, the ranchers in the Imperial, the Coachella and the Palo Verde have cause to tremble. Throughout its lower course the river bestrides a great hogback of silt, which it is raising at the rate of a foot a year and which is now nearly 80 feet above the sea level and from 100 to 300 feet above the level of the Imperial valley. In 1905 it broke through a temporary irrigation intake and flowed for eighteen months into the Salton sea. Had the deluge continued, or if it were to recur, the river would drown out, probably for the life of this generation, 90 per cent of the Imperial's 850,000 acres of cultivated land. "It is a great devil fish," said one Californian, testifying last year before a congressional committee, "reaching over into the Imperial valley and trying every way to get there." It slips a jocosse tentacle and wipes out the life work of thousands of human ants. In ten, fifteen or twenty-five years, according to chance and the temperament of the engineer who makes the estimate, it will again emerge from its bed and menace the valley lands. This is one reason, and the most imminent one, for the proposals now pending in congress for a comprehensive development of the whole of the lower basin.—Robert L. Duffus, in the New Republic.

Met Natural Death

Two dead whales floating off the northern California coast were not victims of bombardment by the guns of the battleships in the "battle" of Hawaii, as first believed. The whales were killed and mutilated by a school of orca, or killer whales, otherwise known as wolves-of-the-sea. Swimming in droves these killers attack the largest whale much the same as wolves surround and bring down a moose or deer. The orca, which are usually more voracious in the Far North, were attracted south to the California and Oregon coasts by the presence of fur seals now on the regular pilgrimage to rookeries on the Pribilof Islands.

Claims American Fortune

Mrs. Mary O'Connor Tinsdale of 30 Duffin street, London, who has been shelling peas in Covent Garden in London for 20 years, and claims the world's championship for that art, has put in claim for the fortune of John O'Connor, the reclusive shoemaker of Hastings, Neb., who died 12 years ago, leaving a fortune of \$150,000. However, she is but one of 500 O'Connors from all over the world who have put in claims for the fortune. Mrs. Tinsdale thinks she is the late reclusive's sister.

A Cow and Her Horn

Paul, age four, was making his first visit in the country and was introduced to the cow. The animal's horns interested him most as his only experience with horns had been with those of tin, campaign variety. Later, while at dinner, Paul heard the cow baw and called out: "Oh, mamma, listen to that cow blowing her horn."

Dawgone It

Zac Sanderson, Universal's most persistent office seeker, has an Alfrede and when Lee Jacobson ventured to burst into song one day, the dog joined in, lustily.

"Come on, pup!" pleaded Zac, "don't waste your time singing duets with that bird, he can make racket enough by himself."

Mystery of the Black Roses

By ANNA McCLURE SHOLL

(Copyright)

THE bareness of the lofty frescoed room had been relieved by hangings of ancient tapestry where was portrayed in dim green tints, as of sea depths, the story of Circe.

In a high carved armchair by the open wood fire a woman sat, listening and waiting.

They had lived in the villa already three months, she and her husband, yet in that time they had visited the beautiful city but once. He was absorbed in his chemical experiments and she was absorbed in him.

She heard his step now in the corridor, and her heart leaped with expectancy.

For a moment she could not see what he carried in his arms, but she divined from his air of exaltation that his latest experiment had been successful. As she crossed the room, a graceful figure in her long white draperies, he held out to her his precious burden, twelve coal-black roses. She gave a cry of delight.

"Oh, how beautiful! Basil, how did you do it?"

He smiled as he watched her caress the ebony petals with her white fingertips and brush their soft blackness against the pale oval of her cheek.

"That I cannot tell any one—even you! You wished for a black rose. Your husband is a magician, he went on playfully, "and you have your heart's desire!"

She sank into the armchair by the fire, the roses on her lap, a dark mass against the delicate tissues of her robe.

"What are they like?" she cried, holding one against her face. "They are witch flowers now, uncanny midnight things. Ah! I know. They are like the soul of Lucrezia Borgia!"

Her husband adjusted the black fur mantle about her shoulders.

"No, no, you must not call them ugly names, sweetheart, for I mean them to personify you. You are a dark rose—with your midnight hair and eyes."

"Du bist wie eine Blume? Ah, the poet never thought of such a flower, I'm sure. They misnamed me who called me Rosamond. But tell me, Basil, did you have to mingle a great many poisons to produce this effect?"

"Yes, a great many. But they have annulled each other, though they destroyed the rose perfume in the process."

"The loss is slight. I love them, these black roses. They fascinate me. Suppose I should decorate the wayside shrine with them at the garden gate!"

"The peasants would stone you for a witch, I fear. No, Rosamond, keep them in your bed chamber."

"I shall put them by my bed now and ring Santuzza to take away these other flowers. I want my black roses to reign alone."

She crossed the room and from an inlaid cabinet took out a fantastically carved vase of rich green malachite. In this she arranged the roses.

"How heavy they are! One would think they were overburdened. How well they suit the vase! They shall give me rare dreams! You are not going back to the laboratory? It is past midnight. Isn't this achievement enough for one day?"

"Dearest, I have another experiment still uncompleted. Go to your rest and dream of your roses."

He kissed her and went away, his footsteps echoing along the stone corridors that led to the laboratory. She stretched herself upon the bed and lay for a long time between sleeping and waking, the light from a swinging lamp falling across her face, one heavy black rose just brushing the pure whiteness of her cheek.

Her husband worked in his laboratory until the morning sun was gilding the domes and towers of Florence. Tired out at last by a prolonged and unsuccessful experiment, he left his work to go to his bedroom. As he passed his wife's room he saw that the door was ajar. He reached out a hand to close it, but the morning sounds through the house should disturb her; but in the act he caught a glimpse of something by her bed which made him turn faint. The roses in the malachite vase had become white again, and were gleaming ghostly in the pale radiance of the swinging lamp. Knowing the nature of the poisons imprisoned—he had thought for ever in the black roses—a terrible fear possessed him. In making their escape from those petals, now of innocent pallor, where had they gone?

"Rosamond!" His voice shook as he called her name.

There was no answer.

"Rosamond! Rosamond!"

His tones were now loud and terrified. No answer came from the dark shadow of the bed. He drew nearer, cold with apprehension. Something very black was outlined against the whiteness of the linen. A great horror sickened him. For an instant he paused, shaking as with ague. He dared not go nearer, dared not look. What was this in the bed? By a supreme effort he reached the window curtain and pulled it aside. The morning light streamed in, revealing the form of his wife, quite dead and black as if carved out of ebony.

Special Care for Children

Buenos Aires has four summer play schools free to delicate children who spend the day out of doors and are provided with nourishing meals and rest.—Science Service.

PERSONAL PROPERTY VALUATION FOR YEAR 1925

The following named individuals, firms, corporations, or copartnerships have been assessed in the precincts as herein shown and the amounts set opposite their names are the valuations fixed by the Assessor, and are as they appear for the assessment record and also are the totals upon which the tax for the year 1925 will be computed unless changed by either the County or State Board of Equalization. Bear in mind that these are the actual valuations as all levies are now based on actual instead of assessed values.
