TORRID WAVE-BREAKS RECORD

Cooler Weather and Just a Little Rain Wednesday Brings Relief From Hot Wind.

The weather man is making now peak records these days. The report in the Tuesday papers were that Nor-folk endured a heat of 106 Monday, Lincoln and Omaha were reported at 102, and it was the fifth day of sweltering heat, and no tain promised just at that time except possible local thunder showers. Only once before during the present season has the heat been nearly so intense. July 1, it reached the 101 mark in some places, but the colder weather gave immediate relief. Very few heat prostrations have been reported in this

Crop Conditions

part of the state.

Reports vary as to how the corn is standing the heat and drouth, and most of them, wondering at the way it stands up, agree that relief in the drouth appears to have been more response at roll call was near 100 severe than here, except in few places ber cont.

The day was rather warm, but the

One man from Winside said that they had a little sprinkle at his place the other day, and the cloud looked as the Wayne vicinity was getting heavy shower, but where that shower struck was hard to find, wet so little territory. So, from here it has look ed like rain all about, at times, but except well to the south of us there appears to have been very slight rains. The following is the report from the south part of the state.

who drove into the country during the hottest hours of Monday afternoon, when the thermometer was hovering around 100, reported that the corn was standing the heat very well. Some fields near the city showed the effects of the heat, but out where the rains have been a little heavier the stalks were standing up well and the leaves had the deep, dark green that marks good

The farmers said that the corn in some cases was being held back by heat and dry weather, but the same thing happens every summer, usually everything turns out to be all right. The people in town were suffering a great deal more from the heat than those in the country. It was not a moist heat, however, and those who kept their minds on their work did not experience much dis-

BUILDING THE NEW BOAD

Contracts have been let for roo welve miles of road from the west A line of the county to near Winside. and work has commenced. der who did not quite get the con-all of whom were at the funeral held to go to the expense of gradien for \$20 per cubic yard, tells us that the charge of the Old Fellows, of which bids were all low, which is some order he was a member have to pay the bill in gasoline tax, direct tax or indirect tax for the part Uncle Sain puts up when we match dollars with him.

This proposed twelve miles of road

should have the eastern extension located and work commenced there on early as possible. As the con tract now stands, it looks more like Wayne county building a road to Norpart of the Grainiand Highway, it officiating Members of I. O. O. at this time for the patronne of the Following the hustness and social past, and hope to deserve its continsessions, refreshments were served to ance in the future. M. E. WAY OIL CO., Wayne, Nebraska -- adv.

BAND CONCERT PLEASES MANY

The Wednesday evening band cou cert was greatly enjoyed—the cooler Corn, the reports indicate, is still atmosphere, the stillness of the night enabled hundred of families in the Loup, for trapping and seining fish north and west part of the city to catch much of the corn in tassel, remain at home and hear the music, fined as much as \$15 each. Perhaps dence, from the number of cars park ed all about. The program was good, it is time. We mand varied, including a bit of vocal Jenkins at the helm, work which was encored, Homer Lina. But speaking of the

being the singer, Wednesday evenings are getting to be popular at Wayne; but some ay the band concerts could be made more popular by a bit of police reg;inext the hand stand. Too much need less driving forth and back along the along that street; but in mos there could wait until the band is quiet as there is always a short selection, when they might come in who attend church to enter and seek a and to many, an interruption to the sweet tones of a band is as annoying drawing attention from

GREATER WAYNE CLUB MEETING

Tuesday evening there was a calldaughter Clara. Those from out of ed meeting of the members of the town were: Mr. and Mrs. Harold Greater Wayne Club, and but the braved the weather condition and attended, even tho it was too hot to and John Archie Mears of Sioux City; sleep elsewhere. The time of the session was given over to discussing road problems of the county, and the gasoline tax question. Any candi-date for the legislature should get his to the ground if he wants thu support of the bunch out at this gathering. The division of the tax money seems to be the main question and it was evident that those present were not in full accord, one with the sent gas tax distribution fully understood. At any rate, it will be sub ject for consideration at Lincoln next

The matter of the local use of the road plans for the next few years was finally delegated to the committee on-highways, subject to the approva

The trouble seems to be, that the county has ten miles of roadway for every mile they have fund enough to out in proper shape and maintain in that condition. The road builders a good road unless some provision ear be made for its maintenance. So it is the policy to first put the direct main highways in condition be with available funds and for the choice of driving a little further to their destination or traveling over a road that is not as good as the best be interested in the best possible soluand that means that the voter should study these problems, and make good suggestions which they are will ing to pay to have put into use.

MRS. YOUNG AT CONFERENCE Vesterday Mrs. E. B. Young left

day or two with friends and workers then continue her journey east to into the long discussed project of wip-Ponnsylvania, where she takes part in ing out national debts by making a a conference of Christian workers at Koswick, not far from Philade phia. After the close of this conference. she will go to Portland, Maine, to assist in a series of meetings for some time. She will then return to Vernillion, Ohio, and take a leading par n another conference of workers be

returning hom Miss Esther Christensen, who is in Ausgreen the such work, and is well known here, will accompany Mrs. Young as far as Pennsylvania, and ears who have learned to respect and possibly may go beyond that place. Mrs. Young has made a very close study of such work, and has a con tantly increasing field to which she is asked to take leading parts movements of national scope.

PARCEL DELIVERY

An additional man has been pu on at the postomee, O.T. Conger, who houses. More service and no more postage to pay.

FISH AND GAME

Farmers and City Folks Join in At-Due to Walton League Activities Fish tendance. Band Making and Game Law Violators Pay Rand Progress. the Frice.

Just now the fish are being pro-tected, the game wardens having ar-rested ten alleged violators along the well the law enforcement will still be in filled with men, women and children operation when it comes time for the Omaha sports to go out and harvest the chicken crop before the law says it is time. We may need another

> But speaking of the penalties fine for wilful violation of law is a farce. That, too is one trouble with the law enforcement the state over. Of course as the fond purent used to say when punishing the wayward child, "It hurts the hand that smiles as much as it hurts the spot smitten'
> —and so in giving fall sentences—the community has to pay the bill for board and keeping. For that reason, there should be a "hard labor" clause attached to a jail sentence, and make lot of the violators would consider a disgrace to have to work and that will really punish.

JUST HERE AND THERE

Out in Buffalo county the authori ties are consistly prosecuting those whether in towns or country. They so includes the speeders, are entitled to some prefection, and as a safety measure they are not permitting speeding to go unreported and unmo-

MILLION DOLLAR RAIN WANTED

Last week a number of our farme riends asked the Democrat to ehec the heat wave and distribute a mil lion dollar rain. Got busy at once -in fact had suggested such a weathe change before any one asked us to do such a thing. Got the change in tem-perature Tuesday hight, late, so that ome people had a bit of comfortable leep. Then turned on a sprinkle bout noon, which kept sifting out ittle moisture for the next two o three hours. Not enough to wet ver deep, but a good start. We are hop now delivers parcels to the business ing at this writing that our efforts will prove successful-for we need the million, or at least, our part of it.

WARDENS ACTIVE More than 20 cars of stock were shipped from Wayne this week, mostly to Sloux City and Omaha. Hogs and fat cattle made up the shipment from here; but many cars of mix'd stuff, cows and young stock have been oming down the branch from sections is gone, due to unds, so that they drouth and hot winds. had no feed, nor were likely to hav any until another season comes.

WAYNE HIGH SCHOOL ALUMNI MEET WAS A BIG SUCCESS

A large group of loyal alumnia and their botter halves, and in some cases guests, turned out for the annual Seventy were served at a fine chickdinner at the Alaskan quarters of the Gem Cafe.

A clever toast program was enjoyed with Henry Ley as master of ceres monies. Mrs. R. W. Ley lead off with the first letter in the word "Alaska", the general theme of the evening's decoration and entertainment.

In presenting her subject, the Alumni Tobbogan, she discribed and gave clever remembrances of the memhers of her class, that of 1897, telling where the members now and passing out photographs taken of her classmates at the time of thou graduation. It was a novel mode of

Mrs. Huntemer, presenting the subject Loyalty, made her points effective and her jokes very entertaining almost too warm for some of the recipient.-

Mrs. Hobert Auker presented novel and entertaining poem for her subject, Association. It was clever subject, Association. and showed workmanship. She spoke for the class of 1916.

Supt. Hook gave an impressive talk on Skees, our support on the snow during our trip to Alaska and He made us see the practical iced of help and co-operation in the journey of life.

Maurice Wright of the new class to be attained preserved in the battle are a convenience, but health and

J. H. Kemp closed the toast program with an apeal to for better moive in-life: clean living and purpose fut ideals. His subject was Aluska the goal of life. He stressed home and family with happiness prejing that as the ideal objective of life.

The retiring president of the as-ociation. Ed Reynolds then called a brief business session during which years. the following officers were leeted for the next year:

Mrs. Elmer Gailey, president; Maurice Wright, vice president; Ronold Reed, secretary; Pearl Sewell treasurer.

The meeting was then adjourned to was enjoyed. This meeting had the best turnout of members in years, and all reported an entertaining evening. All are looking forward to the nex annual meeting when we hope to have 125 present at our rounion. those present at this meeting will want to miss another session in the future says one who was there.

ATTENDED BY MANY

Rev. S. X. Cross, who went to Ohio last week with the body of Prefessor J. M. Martin, returned Saturday evening. He tells us that the pleasant men imaginable and had funeral sermon was preached in his many friends on whom he had to old home town of McArthur, Ohio, call and who he turn enjoyed his by an aged Presbyterion minister short visits," says a friend. past 90 years of age, and one who had known the deceased since his boyhe church the Masons took charge of the burial, and the body was laid away in the family lot of the cemeery at McArthur, with Masonic fun-

BUBAL SCHOOL CHILDREN LOCATE BARBERRY RUSHES

Rural school teachers in many disgrowing States are instructing their principles involved in the Government's campaign against the common barberry bush, says F. E. Kempton in charge of Barberry Eradication United States Department of Agriculture. By instructing the pupils in a practical mehod of preventing the spread of stem rust to small grains these teachers have not only aroused interest in the scientific study of plant life, but have materially aided in a project conducted for the benefit of

August Schwichtenberg

announces his candidacy for the office of

State Senator

on the Republican ticket for the 11th District. comprising Pierce, Madison and Wayne Counties

Mr. Schwichtenberg is one of the pioneers of this terri tory, having lived ten years in Wayne County and 45 years in Pierce County. During these years he served the community in which he lived as school director for 51 years, and also held the office of County Commissioner for Pierce County for two consecutive terms, and always took an active part in the af-fairs of the Republican party. He was engaged all his life in farming and stock raising and only last fall turned his fart over to his boys who are now looking after his interests. H is well qualified for the office of State Senator and asks the voters of this District to endorse his candidacy on the Primary Election, August 10, 1926.

United States. Apparently the most interesting of the discussions was that concerned with, education and the farm home, When the committee formed for the in its relation to education, found the items could be classified. under three headings; the curriculum.
the teaching personnel, and the agencies for education—schools, libraries, and the like. Farm women ark ing staff for country schools and of a to farm children wider opportunities o prepare for life-life in the counwherever their vocational astes and abilities may lead them.

Beside the need for better educa ion for farm children, discussion a deep appreciation of the necessity for better educational oppor-unities for adults and a realization of the fact that happiness and conten ment in farm life depend on spiritual ore than on satisfactor values even m conomic conditions.

FOR STATE ADVERTISING

J. H. Sweet of Nebraska City, ames E. Lawrence of Lincoln and Joy Hackler of Omaha of the state publicity bureau chosen by Governor McMullen met Tuesday at the gover nor's hearing room in the capitol to discuss the selection of a publicity man, plans for raising funds to adtertainment of the national editorial ussociation which meets in Omaha next year and which will spend one day in the city of Lincoln.

M. A. Brown of Kearney, oldest publisher in Nebraska, and Ole Buck; ecretary of the state editorial asse ciation will meet with the committee.

J. E. Ha Hayes of Omaha, head of an agency. arrived at the apito) Tuesday, accompanied by his alle west of Newcastle, 40 sprouting brother, D. W. Haynes, theatrical manager of Washington, D. C. Mr. Hayes of Omaha has been working on A. M. Luebben, 41/2 miles east and plans for advertising Nebraska and will present his views to the commit-P. J. Bennett, 31/2 miles south and

The committee has received man suggestions from all sorts of sources n regard to advertising the state.

"God in the home, should be the said one caller at the cari tol. To put God in every home would be the best advertising the state could have."

There are no state funds available for paying a state publicity agent The next legislature may be asked to make an appropriation for this put pose, with restrictions that would pre vent the proposed publicity burea from being made a political footbal by some future state administration

No reports have been received never from Squad Leaders Kiltz and SENATOR BORAH, AUGUSTA, SCORES WETS MOTIVE

According to the newspaper report rom Augusta, Georgia, Senator, Boral rom Idaho, called spades spades, and the proposed plans of the wets t vade law, "nullification"

"Augusta, Georgia, July 19. arning that constituted government is faced by an almost worldwide attack was given here today by Senator Florah, (rep.,/Ida.) who said its enemy in this country was openly. preached nullification of the prohibi

Italy, military dictatorship in Poland and nullification in the United States," he asserted, 'are whelps from the thing constitutional government.

"Speaking under auspices of the Protestant Ministers association, the hidden away there since the dawn of Idaho senator said that referenduns on the prohibition question, such as that to be held in New York state were for the purpose of undermining through nutlification, and there has never been a time when men should stand so firm in defense of law and order. "Most Important Issue"

When the debate on the liquor problem opened a few months ago the question did not seem particular ly important," he asserted: "The con troversy had not proceeded far, how ver, until the most important issue Is now effered by t. M. Owen a that a self governing people can ever new six-room modern bungalo, ready be called upon to consider forged its for occupancy August 1st. You are way to the front.

stead of non-intoxicating liquor in de FOR CONFERENCE fiance of the constitution.

"The same leaders who asked in

the beginning for modification within the constitution now declare that they will have intoxicating liquor constitution, Volstead act or no Vol-The discussions centered stead act. This is the issue that we now have to meet.

"It may be that it is within the of the liquor interests amend the constitution, a thing which and asserting, and without fear of the future, that it is not within the power of the liquor interests to nutlify the constitution.

A SHELTER FOR SHARPERS (Milwaukee Journal)

Use of liquor to put over business deals since the coming of prohibition is not unknown. But according to Commissioners Thompson and Nugent,, it remained for the complacen majority of the federal trade coming on this kind of commercial brisbery. These commissioners asesr that there was direct evdence contracts following lavish entertainment, in which large quantities of liquor were distributed Someone who did not think this kind of thing was fair and square competiion, and who apparently believed in lving up to the prohibition laws, took is troubles to the commission. But the record shows what the dissent ing commissioners say it does, he knows now that if he wants business he has got to start distributing

The federal trade commission wa established because men who wanted to be decent in business found that they didn't have a chance to keep oing against the shady practices of ess scrupulous competitors. So the rovernment was asked to help them. But the commission got to hitting some mighty big heads in its investi gations, and powerful interest after its scalp. We still have the commission, but it has been mad over by President Coolidge's appoint nents into a sanctuary for those wh get caught at sharp practices. Fo by the rule made by the majority, if a man will confess his guilt and promise to reform, the commission wil hide his identity. He escapes punishment of publicity, and he can go about among honest dealers with iis head high.

If a man caught defrauding inveors by false representations confess d his guilt and was turned free t a court on his promise that he would more, public indignation would run high. Yet that is what the rule of the Coolidge commissioner amounts to. Case after case is heard in which the grossest kind of com mercial trickery is proved, but identi-ties are suppressed and honest dealers go unprotected. For the busines hyster knows that if he gets caught he can get out of it by confessing and promising to be good-and he has his ill-gotten profits

TRUTH AND OTHER THINGS

pessimist. Yes, I know the early orn has been damaged just a little bit by the hot winds, but quickly my spirit of optimism arises to tell me that most of the corn was planted late and that the rain which will come tonight will make the late corn good as new, even though the leaves have curled a little.

Senator Cummins says Presiden Coolidge will not ask for a third term Bascom Slemp says the nomination in the republican convention will go to Coolidge on the first ballot. rule I do not agree often with Senator right. Teddy Roosevelt was the mo popular personality in States. Even Teddy could not over come the opposition of the people to a third-term candidate for president opposition. He will not be a candi date for another term. Coolidge b not as much of a dumbell as some folks say he is.

EDGAR HOWARD

EDITORIAL MEET

Not all of the good things of life for the newspaper men are to these who could and did make the trip with the national association of newspaper Northeast Nebraska association is invited to be the guest of the city of Homer, and the Editor of its paper, the Star, and before the homecoming drive to Winnehago and partake of the hospitality of the Indians, in Pow Wow assembly. We venture the big show had nothing surpassing this. Friday and Saturday will be given over to the meeting and the encettainment. A banquet will be held Friday evening. A splendid program is presented. Much good should come from the gathering as well as much enjoyment. Then the first of th for their old home at Crawdfordsville Indiana, which will make them close to a 3,000 mile drive for one way. Mr. Teed said that his relatives from the west reported a good season there with plenty of water for irrigation.

really too had that ed to go begging with only one candidate filed for certain offices. It is really a knock on the primary law when such a thing happens and would never occur under the old convention system. We have in the past and still favor the primary law as a improvement over the old system, but it must be admitted that it has a tendency to retard party organiza tion. It is too bad that the demo-crats of this county could not have

persuaded a good able fettow to file for clerk, and this is said with no disparagement to the republican cau-didate and present clerk. It is also true of the other offices where but one candidate is in the running. The old parties should get busy be fore primary day and see that this is emedica by concentrating forces and writing in the names of suitable candidates so there would be some competition. AN OPTIMIST

Monday morning, after three ho lays and the opening of another, the editor asked a young farmer about the corn condition. He said it was good, but that we could stand rain most any time now, if not too much. But corn was doing fine, rolling son during the day, but unrolling at night for a fresh roll of it came hot the next day-bnt it was his opinion, a expressed, that if we get rain her during the week from that time, bouncer corn crop would surely be eady for harvest.

This, when most of the farmers vere having their corn crop ruined by the drouth the first loss of the by brive it destroyed several times b harvest, and then have to pile it on the ground for want of crit We hope he the young farmer.

A landlord in this county said vould like to know what kind of God or religion his tenant has, one who is farming his place and not do ing any apparent worrying over the corn crop this kind of weather. The land owner thinks he would sleep better perhaps, if he could enjoy the phylosophy which enables the tenant to sleep well in such critical times for a crop.

He asks for the customary second term, and submits his record as proof of merit. He is a veteran of the World war.

MILL-WHEEL THAT THE MILLER KNOWETH NOT OF.

"Much water goeth by the mill-wheel that the miller knoweth not merchants, much business gets by his store that he knoweth not of.

A good hen lays an egg every day and every day "tells the world" about it. The farmer appreciates and seeks knows where to find a perfectly good egg and appreciates the service.

The farmer also appreciates seeks the store that is constantly advertising good merchandise, because he is bennefitted and knows where to find good goods.

Store-news bulletins should be worded so as to impress the farmer that you are more anxious to give tilin values and service, than to morely sell

Get the spirit in advertising, place yourself in the consumer's position, study his desires and needs, appeal to him from his point of vie type of customer you wish to reachthe farmer, the artisan, the business man, the professional man, are all distinct types.

This eppeal to the human side, or "perspective" manner of advertising can soon be acquired by a little prac-tice and application. This is modern advertising and is the science that the large mail-order concerns employ to secure the business.

There is constant daily need for merchandise; therefore a constant daily need to advertise.

The millions and hundreds of mil lions of dollars that get by the morchants of the country each your through mail-order buying, is like the water that leaks by the mill-wheel. This lost business should be furnishing power and energy for the up building of our communities and for promoting the progress and prospertly of our smaller cities, towns and villages. -- Ex.

opp

Creighton should be the Mecca for Odd Fellows from all over this part of the state on Thursday, July 29, for on that date there will be some hig "three link" doings in that city. Present plans include a ball game, races and sports, a big public program, a grand parade, exemplification of the first degree by the crack Bloomfield degree team and a hig Muscovito ceremonial in which about lifty can-didates will be "fed to the bear". Incidentally there will be two big cities in 57 hours 47 minutes. He suppers—features not to be snorted in was officially checked out at Los-Auby any means, says an exchange.

The degree team from Sloux Falls, South Dakota, who had charge of the big Muscovite doings here last May will confer the work and there will be Muscovites there from all over this section of the country.

We understand that it is planned at this time to take steps looking towards the staging of a big I. O. O. F. picnic each summer under auspices of the Niobrara Valley Odd Fellows association. Everything luring the day and the conferring of the first degree at night will be open to all Odd Fellows. The only thing from which they will be barred will be the Muscovite ceremonial and they can get in on this by signing on the dot-

ed into the mysteries of the Lady Muscovites and a team from Sloux Falls will be there to confer the This ceremonial will be put on at the Odd Fellows hall, while the Muscovite ceremonial is to be staged at the municipal building.

SHERIFF'S SALE

By virture of an Order of Sale, to me directed, issued by the Clerk of the District Court of Wayne County, Nebraska, upon a decree rendered therein at the April 1926 term thereof, in an action pending in said court wherein The Equitable Life Assurance of the United Stat

poration was plaintiff and Grace B. Lewis formerly Grace B. Jones, El-wood T. Lewis, husband of Grace B. the age of 14 years and Hayden Claire Jones, a minor upder the age of 14 years were defendants, I will, on the 24th day of July 1826 at 10 o'clock a. m., at the door of the office of the Clerk of said Court in the court house in Wayne, in said county, sell to the highest bidder for cash, the following described real estate to-wit; All that part of the Southeast Quarter of Section Thirty-five (35) Township Twenty seven (27) North, Range Two (2) Dast of the 6th P. M. in Wayne County; they form a part of the plan of Na Nebraska, lying north of the right of way of the Chicago, St. Paul, Minneapolis & Omaha Rallway Company, containing ninety (90) nores, more of less to satisfy the aforesaid decree, the amount due thereon being \$4500,00 with interest at 10 per cent from ordered society. MUCH WATER. COETH BY THE REGULARITY IN FEEDING MORE IMPORTANT THAN IN MILKING

Of all dairy operations, milking of most farms takes the greatest amount of time, and to many persons is the Likewise, with non-advertising most irksome task. It has commonly been assumed that cows should not only be milked regularly but also by the same man each time. Doubtless taste many persons have for dairy given at Tucson, Arizona. work.

Experiments by the United State Department of Agriculture at the experimental farm of the Bureau of Dairying at Beltsville, Maryland, show that with cows that are average to good, milking may take place at irregular hours without any marked offeet upon production. Whether very high producers would show similar

results has not been determined. It was found, however, that when irregular milking was accompanied by irregular feeding the production was lessened about 5 per cent. Apparently cows are more sensitive to tion, who is now carrying on her in-

to variations in the hours of milking. The conclusion is not to be drawn from these experiments that regularity in doing the dairy work is a matter of little importance, but rather that cows can occasionally be milked earlier or later than usual if there is something else to which the dairyman desires to give his time.

always by the same person, the practice in many large where there are several milkers it to milk the cows as they come, rather than to reserve certain cows for each man. At plants can be grown without intense the bureau's experimental farm, 12 methods of irrigation. cows were divided into three groups found in the so-called latex or 'milk' of four cows each, and each group of the plant. was milked reguarly by the same man for 40 days. The 12 cows were then milked by the same three men in such a way that no cow was milked This means, according to Dr. Long twice in succession by the same man. After 40 days the cows were changed The results show an increase of only about 0.05 per cent in the milk-and butter fat through steady milking by Long says, 'commercial production the same man. This is so little-us to of rubber-would only be possible from be almost negligible.

WATCH THE CHEVROLET ROLL

tween the Pacific coast and Omaha by approximately two hours, Mason Jurgensen, age 21, of 141 West 82nd street, Los Angeles, drove a Chevrolet roudster 2020 miles between the two geles and in the Nebraska metropolis by Western Union executives. This feat establishes an automobile record from the Pacific coast to Omaha. Jurgeson stopped only to eat, take on fuel and change one tire on the way. He picked up a nail on the New Mexico desert, that being the only mishap experienced on the entire trip. record time as given above in cludes all stops en route. The young pilot was accompanied on his dash two-thirds of the way across the United States by Joe Rolley of 941 West 41st street, Los Angeles.

On the return journey to the coas Jurgesen added further glamour to his driving achievement by lowering the Omaha-Denver mark from 15 hours, 31 minutes to 14 hours flat. Harold Beyers, an Omaha boy, was assenger and relief driver on the way back, Rolley remaining at Omic

The youth's demonstration is more than a stunt. It is proof that transontinental touring has become practical for the average motorist: Road: are good and danger has been eliminated as a factor. The young pliqt spoke in high terms of his Chevrole mount, giving it a clean bill in the matter of speed, power and road worthiness.

Transcontinental touring is a mer fide around the block in these days of high-powered light cars and won lerful roads," Jurgenson declared.

C. M. T. C.

Omaha, Nebraska, July 20, 1926, General Poore announced today that over six thousand applications-have men received to date for the citizens military training camps to be held in August, at Fort Snelling, Fort Des Moines, and Fort Leavenworth. The Seventh Corps Area quota for Jeffer son Barracks, which opened July 8th was 500, but over 600 boys reported and nearly all were accepted

General Poore states that the came re woluntary and require no future military obligation. Because of their benefits, as well as the fact that tional defense, they are indorsed by national and state officials.

President Coolidge says, "These They promote obedience to law and respect for the institutions of a well-January 1st, 1928, and cost and accrue ed to physical health, mental vigor and moral excellence. Social under this dist standing democracy, and reverence for the flag are developed. Courteey there, in act, sympathy in teeling, and toter, sherin, ance in thought are the ideals.

THE DESPISED MILKWEED

The Cloverdale Weekly, a St. Pau Minnesota publication, gives an inter stinf article from Dr. Frances 1 Long about the possibilities of utilizing the common milk weed to pro duce, a substitute for rubber. Dr. Loug is a daughter of Dr. and Mrs. F. A. Long of Madison and grew un The interview had in Madison. this has had much to do with the dist brought the following response was

"The lowly milkweed, despised for centuries as a useless weed, may some day be one of the most important

"It would became so today were in not for the abundance of cheap labo. on the present rubber plantations "For the milkweed plant contains rubber and nothing but the difference in labor costs in the United States commercial production of rubber from

the milkweed.
"This is the conclusion of Dr. Fran ces L. Longe of the Carnegie institu

'Dr. Long, in company with Dr. H. of plants in the western United ed rubber and that 16 contained it in sufficient quantities to warrant further investigation.

"Now Dr. Long is most enthusiastic Though it is generally believed that about the desert milkweed, known to cow will produce more when milked botanists y the scientific name. As about the desert milkweed, known to clepias Subulato.

> "The desert milkweed grows well in the arid parts of the southwest, where none of the present profitable

> "Analysis shows that these plants range from two to six and half per cent rubber content by dry weight that one plant may frequently con tain the equivalent of \$5 worth of rabber at the present prices

> " Due to the high cost of labor held as compared with the tropics, Mr. Long says, 'commercial production his plant if suitable by-products also could be manufactured.

> Our experience show that the plant also contains waxes and resing for which commercial use probably could be found. Drugs might also be made as a by-product.

> "'In addition, we find that an ex cellent grade of paper can be made from the plant fiber."

To Hugh W. Edwards and Effic Bonta: You are hereby notified that or

the 30th day of April, 1924, one A. R. Kelly bought at a tax sale from the County Treasurer, of Wayne County, Nebraska, lot four and the south one-half of lot five in Jones Addition to Carroll, Nebraska, for the taxes on said lots for the year: 1920, 1921, and 1922, amounting to \$102-78; said lots being offered and sold as by law required. That thereafter on the 30th day of April, 1924; the said A. R. Kelly paid as subsequent tax for the year 1923 on the described lots the sum of That thereafter on the 2d day of May, 1924, for a valuable consideration, the said A. R. Kelly duly sold, assigned and transferred sale Treasurer's certificates of sale of said lots as hereinbefore describ ed to one M. E. Rowe and all right, title and interest in and to said certi ficates of tax sale, and the subsequent taxes paid on the above described real estate. n the 4th day of April, 1925, the said M. E. Rowe paid as a subsequent tax for 1924 on the above described lots, the sum of \$21.69 and there after on the 16th day of October. 1924, the said M. E. First County Is Freed of Scrubs

Kentucky Community Sends Last Grade Bull to Shambles.

(Prepared by the United States Department Pure bred bulls, 140; grade bulls, 0;

scrub bulls, 0.

This is the official bull count for Union county, Ky, as reported to the United States Department of Agriculture by County Agent R. O. Wilson and Wayland Rhoads, field agent in animal husbandry, University of Kentucky.

Sent Him to Shambles.

On April 22, 1926, the last farmer in Union county owning a grade bull Mr. Rhoads has informed the Depart-sent him to the shambles and replaced ment of Agriculture that the number

raised, and who are following breeding methods leading to still further improvement. The results were achieved by persistent and systematic work by the county agent and influential citizens in co-operation with the State College of Agriculture and the United States Department of Ag-

riculture.
One of the means of stimulating interest in live-stock improvement was the publication in July, 1924, of special edition of the local paper, devoted entirely to the better-sires campaign and educational articles and illustrations showing the value of better-bred live stock. The cattle industry of the county is largely devoted to beef production, thus making the achievement especially timely, in view of current federal-state plans to improve the quality of meat.

Campbell County Striving.

Campbell county, Kentucky, is now striving for the same achievement. Mr. Rhoads has informed the Depart-

ast Grade Bull in Union County Was Sent to the Stock Yard and Replaced by a Pure Bred Men in the Picture Are (left) R. O lison, County Agent and (right) Wayland Rhoads, Field Agent in Animal Husbandry, University of Kentucky.

him with a pure ared. The accomplishment marks a culmination of a systematic drive begun more than five years ago by L. C. Brewer, formerly scrub bulls in Campbell county. On years ago by L. C. Brewer, formerly scrub bulls in January 1 of the Serberg of 1826 the county had disposed of all of its scrub bulls, and all furt four grades, but not until April 22 was the last grade bull disposed of. So far as the records or information of the United States Department of Agriculture show. Union county, Ky., is the first in the United States to reach a 100 per cent pure-bred bull goal.

Besides the accomplishment mentioned, Union county is third on the county honor list in the "Better-Sires"—Better-Stock campaign, fostered by the bureau of animal Industry and various states. This county has 550 live stock owners who are using pure-bred sires for all classes of live stock.

January 1 of this year the number had been reduced to 48, and the last report, late in April, showed a further reduction to 22 beest campaign plans indicate that Campbell county will have none but pure-bred bulls in the fall of this year. The two factors that are chiefly re-

sponsible for the wider use of pure-bred sires, live-stock specialists of the Department of Agriculture assert, are educational work and economic pres-sure Persons raising inferior live sqre. Persons raising inferior live stock can not compete long with their neighbors who are raising animals of superior quality which, in most class-es of stock, mature earlier and bring

Cattle Grubs and Means of Control

Young Stock Show Higher Degree-of-Infestation.

(Prepared by the United States Department of Agriculture.)

Few people connect the cattle grubs found under the skin on the backs of cattle with the adult insects known as heel flies or warble flies. These in sects, which are responsible for considerable loss because of reduced milk flow and "grubby" hides, cause great annoyance to cattle, particular-ly when laying their eggs on the legs of the animals. From this point, the larvae, which are batched in from and a half to six days, burrow into the leg. After a journey of several months up the leg and through the body they reach a situation just underneath the skin on the back from which they emerge as fully matured grubs. These grubs, after burrowing into the soil or under loose material some thirty to sixty days later develop into files. The foregoing facts are brought out in Department Bulletin No. 1869-D, "The Cattle Grub or Ox Warbles, Their Biologies and Suggestions for Control," just issued by the United States Department of Agricul-

The extent of infestation with the age of cattle, young stock, particularly animals from one to three years old, aimost always showing a n than animals. Different breeds show no difference in susceptibility. Housing of the herd during the pe

of fly activity has been known greatly to reduce the infestations. The bulletin gives detailed informa the bulletin gives detaned into matter to this insect, its distribution, effect upon cattle and man, sconomic importance, control, and possibilities of eradication. Growing Strawberries

ture. Washington, D. C.

The easiest way to grow strawber-ries is the matted row system. Set the plants in rows three to four feet apart, and then about two feet apart in the rows. Cultivation should be given so as to keep all weeds killed all the time. As the runners start to an the time. As the runners start to grow train them to keep in rows, and if you have some of the kinds which send out very many runners, it will pay to keep some of them cut of.

Let Peaches Grow Until They Come Into Bearing

Let young peach trees grow as much as they will until they come into bear-ing, is the advice from the New York College of Agriculture at Ithaca. Fruit men at the college say that the well-known custom of pruning back the wood following after the season's first

owth is not wise. Such pruning, they say, delays bear ing and may cause too late and ten-der growth. This, of course, increases danger of winter-killing.

The open-head system seems best as it allows a more complete renewal than do other methods. It provides new, healthy wood farther down on the main branches. The center should be kept open at the top, and the pranches may be cut back to prevent them from getting too tall, but other wise little needs to be done until the trees start to bear.

Young trees are usually pruned to a whip when they are set, or if the side branches are strong they are often left and cuf back to three buds. Buds which are not wanted for future branches may be rubbed off during the first summer, and trees that get this kind of treatment usually grow large

FARM FACTS

Sumac is one of the best varieties

Train tomatoes to a trellis, prun

ing off all but one stem Lime, legumes, and live stock will ring almost any farm up to producbring almost any

tiveness, and do it cheaply. Water only when the plants need it badly and then soak the ground thoroughly. Sprinkling does more harm than good.

The locust tree is a member of the legume family, and as such it has nodules on its roots just as do the nodules on various clovers.

The farm that maintains the proper balance between cultivated, legume and small grain crops will have a real crop rotation, which in turn will do much to maintain a productive soil.

A sharp pencil is a good farm tool One farmer says that two of his sever cows will be disposed of because a year's record showed them to be about 200 pounds under the top pro-

FIGHT LICE AND -MITES IN SUMMER

more than any other one thing on the average farm for fighting the lice and average farm for fighting the lice and mites found in the poultry house. It is sudden death and very satisfactory except for one thing: evaporation is rather rapid and a new spraying or other method of treatment is required in a short time. It being always on hand is a real advantage. Mixed half and half with waste machine oil or crank-case oil, kerosene is much superior to use alone and will remain effective much longer. Some people report extremely satisfactory

people report extremely satisfactory results by mixing kerosene and commercial fly spray for poultry use. This will often last two or three months or the commercial fly spray for poultry use. This will often last two or three months or the figure of the naces of many people and also use for hog dip, is very effective in com bating lice and mites

Probably the most effective of all he spray preparations that can be used is a coal-tar wood preservative that can be purchased at most lumber yards and drug stores. A poultry house sprayed with this should not be further troubled with mites or life for another year. It is highly denisable in using this spray to be very careful to get every part coved. Alge-care should be used to put it on rath-er thinly, especially around the nest and perches. It will stick to the feet of the hens and when carried to the nests get on the eggs and injure their quality both for market and for hatching. The season of rapid multiplica-tion of lice and mites comes with the warmer weather of spring and effec tive eradication is more easily accom plished then than later, as well as saving the drain upon the flock.

Build Complete Machine

for Production of Eggs Don't omit feeding because the fowls are on the range or running through the feed lots.

nrough the feed lots.

No matter how fine the breeding, how careful the brooding, how long the pedigree, unless the chicks and young stock are kept growing uniformly and continuously through the growing season, they cannot develop to the fullest extent of which they fore canally could walk and the control of the canally could walk and the control of the canally could walk and the control of the canally could be season. are capable. Only well-grown hens lay their best; only well-grown males make the best breeders. It is not so much a question of getting maturity for the fall and early winter shows as securing a complete machine for the egg factory.

Both young and old should have access to the feed hopper all the time; the old stock for feather-making material, the your for frame, ment and feathers

Various Mixtures Used for Feeding the Ducks

Where only a few ducks are raised it is satisfactory to use the same feed for the ducks as is used for the chick ous mixtures are used. A common for use during the first three we is made of equal parts of corn meal bran, low-grade flour, with 5 per cen meat scrap and a little oyster shel and grit. This is fed five times a day in amounts so that the ducklings will clean it up rapidly. After the duck are three weeks old a mixture of two parts corn meal, one part bran, one part middlings and 10 per cent meat scraps, with some oyster shell and finely cut green stuff makes up a satisfactory ration.

Poultry Notes

Chickens need sunlight to prevent rickets.

All diseased birds should be burned Clean drinking water is essential.

For details or suggestions us to poultry-house construction or fixtures apply to your county agricultura

If you want good egg production next winter, see that your pullets are properly red and cared for during the summer months.

added to every hundred pounds mash will be good for your bens

Chicks making a normal rate of growth will, at the end of 12 weeks weigh 25 times as much as fley did at hatching time.

Sodium fluoride or blue continent have proven effective when applied to the birds for lice. Painting the roost and nests or spraying the coops with a mixture of waste crank-case oil and kerosene will "get" the roltes.

Bggs being porous quickly abs ways be stored in clean places.

The free use of kerosene or crucks oil on the roost and in the cracks in your poultry house will help to extenminate mites.

If eggs are kept over three days to a place where the temperature is above 70 degrees, even it intentite they are graded as seconds, seem them to a cool from all markets.

THE CHEETAH

"The other name I have," said the

"The other name Thave," said the Cheetah, "which Isn't as difficult to say, and which is easier to understand too, is the name of Hunting Leopard. "I received that name because in India, where some of my family live, we are trained to hunt with the native people there, but it is a cruel story and I don't care to tell it. "I would rather tell you that I am happy in the zoo, really and truly and honestly happy.

happy in the zoo, really and truly and honestly happy.

"I like to be petted and handled and I will not hurt the keeper.

"The keeper is good to me and I am nice to him. We are friendly and that is the way I like it to be.

"It is the way the keeper likes it to be.

too, so you see we are both sat!

iled and pleased.
"Any other way would not suit elther of us....

"As you see, I have a little head and a thin body with long legs.

"Of course you understand, and you see that the long legs are on the thin body or, rather, attached to it.

"They aren't on my legs.
"Or, rather, I mean to say, my legs aren't on my little head.
"Of course that is absurd even to "Of course that is absurd even to think about, but I expressed myself in such an odd way at first when I said, all-jumbled-together, that I had a little head and atthin body with long legs—that you might not know just where the legs belonged.

"I am not a usual animal, such as the require legant, the said and such as the require legant, the said and such as the require legant, the said and said a

the regular leopard.

Some of my family come from Asia and some from Africa, but I'm such nice, good-natured animal and so dif-ferent from the real leopard that it seems a pity there aren't more of us

"But although hunting leopard is an easier name to say than Cheetan, please call me Cheetan, for hunting is what I was taught to do, and not what I did of my own tree will and accord.

"I would so much rather be a pet, h. so much, much, much, much

"Let's forget about those days when a hunting leopard, and let us just think about how glad I am to be

"Oh, I am just as glad as ever I can be, and it makes me so happy that

the keeper likesime "It makes me happy that I like him too, for you know it does make you

"I Like the Visitors."

when you like creatures and

people.

"When you feel hatred for others you're not happy I know all about that, too.

"I like the visitors who come to the

zoo and I wish everyone who comes to the zoo a polite good morning, good afternoon or whatever the time of

day may be.
"They may not all understand me, but that is what I wish them, just the

Antique Treachery

By MARTHA McC, WILLIAMS

OU goin' to the party with the Crickers?" asked Mrs. Mallow. Her daughter, Ann, nodded, saying dully: 'If I go at all. Don't see any other way."

mer way.
"To tlink of you bein' beholden to ich upstarts! Lordy!" Mrs. Mallow such upstarts! Lordy!" Mrs. Mallow sighed—then shrugged, got up and took from a wax box on the table something gay, colorful, frilly beyond something gay, colorful, frilly beyond expression, and much creased. As she spread it, many of the creases broke into long rents. She groaned at the sight. "This was pretty—when I wore it." she said. "Hoped I could fix it over somehow for you." she went on. "But don't seem. I can."
"But I can." Ann cried shaking out the frilled frock, so full it swirled about her in a cup of color. "The show you what I'm going to do-be

show you what I'm going to do be a heap easier than telling."

despair. The party at Sunset, the show place of Mish creek, was her one chance of dancing to her heart's desire. When she stepped upon the ballroom noor in clouds of creamy ballroom floor in clouds of creamy gause, underlaid with vivid pink satin, she knew herself, apparently, subliniely well dressed. The satin-hadbeen hard to handle-yet, thanks to dabs of paste, bits of artistic darning it showed fair and firm against. its backing of old net curtains. Her mother's wedding slippers, as creamy as her draperies, fitted exactly and were so far from the mode they seemed of new fashion. Ordinarily she was hardly even pretty, but the the glow and sparkle of triumph she outbloomed the fairest rose. Young Wilton the helr to Sunset, claimed all the dances a host decently could before he let her pass. Then his cousin, Cecil Verdray, comrade of the grand tour just ended, tall, dark, mergrand tour just ended, tall, dark, mer-ry eyed, but with a satiric twist to his lips, laid claim to the ilon's share of what was left. Inevitably, since men are given to cover what other men desire, every dance was cut in. more than once.

Ann, taken to supper by Verdray, with Wilton hovering not far off, was supremely happy, sitting at ease in shaded light, with soft outer airs refreshing her. She was not tred-indeed, she felt that she could go on dancing forever. It was intoxicating to have Verdrey leaning down to say.

to have Verdray leaning down to say very low: "I wonder if ever I shall feel as happy as you look right now." "I hope so! It's nice to be happy. You may have part of my happiness indeed, it belongs to you-

"How do you make that out?" he interrupted artfully.

Ann laughed softly, asking hardly above breath: "Wouldn't it thrill you

to know every other man was envy-

"Hadn't thought of it-but it doe "Hadn't thought of it—but it does:
You see— I'm having so much keener
thrills," Verdray began. The music
cut him short. "That's too good to
be wasted," he said. As they came into full light. Tom

my Cricker, a crude lad of nineteen, cried loudly: "My Lord, Ann! Some feller's been treatin you rough. Danced, so hard you're all witch stirrups' crost the back and under the

Verdray's face was murderous glance at Ann showed him the piteous truth. What with dampness and crushing the gauze of her frock was all in wispy strings, above shreds of treacherous satin, violently misplaced. Beth Cricker, whose eyes had been among the very greenest rushed for ward to say to Tommy, still in toars of laughter: "Hush your noise," and then to Ann: "You'd better go to the dressing room—maybe the maid can fix you half way. If she can't, you stay here until mother wants to so home. The engaged three deep for go home. I'm engaged three deep for every dance." Then with a maticious single to Verdräy: "You lost your chance by waiting until after supper."

For answer, he swept Am away, saying no word, until she was saying no word, until she was sayin the dressing room. There he made her turn stowly about, looking the while critically at the wreck of her trock. Wrapping her in somebody's evening cloak, he said musterfully: You stay right here and rest unti I come back.

She could do nothing else. It was hard to sit alone, with hands clenching knowing how the story of her missidventure was being rolled a sweet ongues of girls women, who were so much more for-tunate they might well have pitied her. But she did not cry. Now and then a dry sob swelled and choked her but she made no sound. It ner, but sine made no sound. It seemed that she sat through years, but at last the time ended. The room was empty. Mrs. Wilton came in, prepelled by Verdray through the door. Her hands overrain with something

oft, rich colored, richly fringed.
Patting Ann's shoulder kindly she sald: "Stand up, my child. I know how tricky antiques can be. But this will cover more sins than charity. will cover more sins than challty."
As she spoke she draped the fringed length of rich embroiders about Ann. In such fashion as to hide everything When it was fast, she bade Ann. Towder your nose and run along—cecil, my pet nephew, won't be comfortable until he sees you. I have something thousen to tell him. something, though, to tell him-just this; A girl who can stand such luck as this gallantly as you have done will be welcome in the family. Gossip Made Easy

By H. IRVING KING

perfectly outrageous I call it.

HY he is old enough to be her father!" cried Lucinda Wig gins, "That he is," replied Amanda Cross

The gossips were discussing the love affairs of Roberta Ireton, the widow Ireton's exceedingly pretty daughter. Roberta had been seen much of late in the company of Carter Chilson, a wealthy bachelor of the town, and that had started something. Chilson was forty-five if he was a day, and Roberts. was scarcely twenty. Several unmar-ried women of his own age, or there-abouts, in town would gladly have married Chilson—if he had only asked them.

there's some money coming into the family. They say she's had a hard Ime getting along since Ireton died.

He left her scarcely anything."

"It's her own fault," responded Lucinda Wiggins, "she ought to have married Jacob Spurgeon—he wanted her bad enough when she was Kate

"Do you suppose old Jacob would marry her now?" suggested Lucinds.
"He might," replied Amanda, "if she got Roberta off her hands. Old Jacob is mighty near, and he won't take up with any woman that has a daughter like Roberta Roberta's awful extravagant. She goes to Boston to get her hats. But they do say that since Carrer Chilson has been going with the daughter, Jacob has been round several times to see the

"It will be something of a blow to that young Maldon who was so taken with Roberta last summer when he was boarding here, won't it?" said

Lucinda.

"Bah," was the reply. "I don't believe there was anything in that. Still,

there might be. Somebody ought to write and tell him how Roberta is carrying on, anyway."
It was a fact that Carter Chilson had been seen much of late in the company of Roberta Treton. Sometimes Mrs. Ireton would be along, ap parently acting as chaperon, but often they were alone. When the affair became complicated

by the rumor that Jacob Spurgeon was going to marry the widow Ireton, Lu-cinda Wiggins, unable to restrain herself longer, put the question to the old miser plumply: "Jacob, are you goin' to marry Mrs. Ireton or not?" and Jacob replied: "Maybe I am and maybe I'm not. One thing's sure, I'm not goin to marry you, Lucindy." Amanda, selzing an opportunity, re-marked to Mrs. Ireton, "I hear your daughter is going to marry Carter

"Well?" asked the widow coldly.
"Oh, nothing," said Amanda, "only
There goes Mr. Spurgeon. They

say he's got lots of money."
"I don't know about that," replied the widow. "I only know that Mr. Spurgeon is an exceedingly kind man."
And she broke away. That settled it. The minds of all the gossips reverted it once to "DOT Maldon Robert." verted at once to-Tom Maldon, Rober verten at once to—Pom mandon, Rober-ta's constant attendant of the pre-ceding summer, who was away at the Boston Institute of Technology, and he received three separate letters—un-signed—telling him that Roberta was

going to marry Chilson and her moth er Jacob Spurgeon.

Tom Malden should have known better than to pay any attention to anonymous letters; but he was a young man and he was very much in love with Roberta. A man sufreing from youth, complicated by love, can scarcely be expected to act quite rationally. He and Roberta were engaged, she wrote him regularly, and she had seen him not long before when she had been in Boston to buy that hat which had caused the green to be the started the startes the startes and startes. the gossips to fasten the stigma of extravagance upon her. Nevertheless, when he got those three letters, al in the same mull. Tom fretted and worried, could not keep his mind on his studies all that day; and the next

morning took an early train for Roberta's town.

Entering the sitting-room in the Ireton home be found assembled there Roberta and Chilson, Mrs. Ireton and Jacob Spurgeon. They had evidently been engaged in earnest conference Tom stood for a second or two sliently glaring at all four of them. The anonymous letters had but stated the truth, then! The idea of Mrs. Ire-ton—whom he much admired—being married to that old skinflint, Spur-geon, was distasteful to him, though a minor matter. But that Roberts had thrown him over for Chilson that was agony!

"Oh, Tom," cried Roberta, starting up. "I am so glad. You have arrived first in the nick of fime. Mother and Mr. Chilson were married this morn -a tunaway match --- over Brockton. The flighty young things And what do you think! Mr. Spurgeon has insisted upon giving mother the mortgage he had on the house as dowry. Isn't he the dear old ng?" And she went over and kissed

old Jacob on the forehead.

Such was the reaction of Tom's feelings that he laughed hysterically. "And when are we going to be married, Roberta?" he asked.
"Why, any time you say dear,

plied Roberta—and she gave him a klas which was no more sincere, but altogether different, somehow, from the kiss she had given old Jacob.

Apple Blotch Easy to Cure by Sprays

Bordeaux Mixture or Lime Sulphur Favored.

(Prepared by the United States Department of Agriculture.)

Applie blotch, a destructive fungous disease attacking many of the leading varieties of apples, may be controlled by spraying with bordeaux mixture or lime-sulphur solution, according to the United States Depart-ment of Agriculture. Trees of sus-ceptible varieties, unless system-atically sprayed, are frequently killed by repeated attacks by the blotch on twigs and leaves, and nursery stock is often seriously damaged, says the department.

The disease, which is most severe in southern and middle-western or-chards, was given the name "blotch" because it describes the characteristic spots appearing upon the fruit. As the disease progresses there is a running together of several spots and a change in color to a deep brown or black. A cracking of the fruit, usu-ally in three directions from a central point, is very common. Small, nearly white spots and dark, sunken, oval areas appear on the leaves, but only under extremely favorable condi-tions does blotch become a serious foliage disease.
Thorough s

Thorough sprinkling of thick, husby trees is difficult or impossible, and these should be pruned before treatment. The spray is most benetreatment. The spray is most beneficial when applied as a fine mist-rather than a coarse stream. The latter is likely to injure both fruit and foliage, especially in the spring. Where blotch is only a minor disease the department recommends the use of lime-sulphur solution diluted at the rate of 1½ gallons to 50 gallons of water. However, if a fruit loss of more than 10 per cent has been caused by blotch during the previous year, the application of bordeaux hixture is gdysable. tion of bordeaux mixture is advisable

Farmers' Bulletin 1479-F. "Apple Blotch," just issued, contains much valuable information relative to the nature, economic importance and treatment of this disease. A copy of the publication may be had free, while the supply lasts, upon application to the United States Department of Ag riculture, Washington, D. C.

Good Whitewash Recipe for General Farm Work

Numerous inquiries are received by the extension division of the North Carolina State college about the best whitewash to use for the henhouse or other outbuildings. The requests are particularly numerous during the sum-The following directions may

give an effective whitewash.

"Slack a half bushel of quicklime or lump lime with boiling water, keeping it covered during the process. Strain this and add a peck of salt dissolved in warm water, three pounds of ground rice boiled in water until it is a thin paste, a hair pound of Spanish whiting and a pound of clear blue dissolved in warm water. Mix these together well and let the mixture stand for several days. Heat it and apply as quickly as possible with a whitewash brush.

wash brush:

"Alum added to whitewash will make it stick better. Use an ounce to a gallon. Molasses makes the lime more soluble and makes it penetrate the wood or plaster more deeply. Use a pint of molasses to a gallon of whitewash. A pound of cheap bar soap dissolved in a gallon of boiling water and added to five gallons of flick whitewash will impart a gloss like that of oil paint." like that of oil paint."

Don't Neglect to Paint

Various Farm Buildings There is probably no one other thing that the average farmer neglects more than the judicious use of paint. The idea seems to be prevalent that paint is used primarily to heautify. Its use is regarded as a luxury rather than as a necessity Paint does, of course, improve the Tooks of farm buildings, but it is far more useful as a means of protection, says the Indiana Carmer's Guide. Paint and varnish, while beautifying the home will at the same time length on the life of a valuable piece of

property.
Pulnt is an economic necessity. It has been said that the life of a frame building will be lengthened from two to four times by constant painting An inherited property, whose worth is beyond valuation, or a house that cost much to build may be pre definitely, if it is properly painted It may easily get beyond the painter's ability to save. Plasterers, carpenters and labovers, will cost nine times the price of the first "stitch," and in the end the painter will have to follow

Eradicate Burdock With - Waste Crank Case Oil

The proper use of the waste crank case oil will soon rid a farm of bur-dock. The oil is cheap and may be secured in abundance from neighbor hood garages. It is a real pleasure to watch this persistent pest give way to treatment with the waste oil. Any time before the hard stalk forms, the dock leaves should be shaved off even with the ground with a sharp hoe
On the stub, pour a little of the waste
oil from a teapor of other suitable container. One application seems to kill and rot the roots of the plant.
Those who have had a lot of trouble keeping the burdock down ought to enjoy using the waste oil.

BALANCED RATIONS FOR LAYING HENS

In making up rations it is necesseary to adhere to standards within certain limits, but some feeds may be substituted for others, as barley, wheat, and oats for corn. However, meat scrap and other animal protein feeds cannot be replaced by high vegetable-protein feeds. All changes should be made gradually, as sudden changes may decrease egg production. A great many poultrymen and live-stock feeders now believe that if the animal has a free choice it will select the ration that is nost suitable. At the government farm at

if the animal has a free choice it will select the ration that is most suitable. At the government farm at Beltsville, Md., the following mash was made up by keeping account of the amounts of the different feeds a laying flock consumed:

16 pounds corn meal 614 pounds meat scrap

1 pound bran 1 pound middlings Scratch Mixture.

cent of the mash:

Here is a simple ration that has given very good results with Leghorns, but that has proved too fattening for Rocks and Wyandottes. Meat scrap, it will be seen, makes up over 25 per

Mash.

pounds corn meal pound meat scrap Scratch Mixture. pounds cracked corn pound oats

For birds that are made too fat by the preceding ration, the following, containing only 16 per cent of meat scrap, but having considerable protein in other teeds, has been found a good

pound corn meal pound bran pound meat scrap pound middlings

Scratch Mixture. pound parley

Poultrymen resort to every possible leans to get their hens to eat a great enl of feed, especially in the winter vhen the days are short. One when the days are short. One way is to cut the morning scratch feed to about half. The hungry bird then goes to the mash trough and gorges on the dry mash. Then to increase the consumption of mash, some of it is fed wet at noon and the hens will eat it when they would take no more of it dry. of It dry.

Provide Separate Pens

for Males for Breeding The breeder who carries over only the males he nords in his own pensual let them in with the flock as the easlest way for himself, it not the best. But the man who carries surplus males for breeding must provide warned a unaters for them. separate quarters for them. Preventable accidents and injuries are the ones that the breeder troubles, over. It is madelening to teel that a valuable young male has been lost for lack of shutting up the pugnacious old cock. Or fullus to search

old cock; or fullure to separate two cockerels that are suffering from in-compatibility of temperament. The cockerel house needs small pens and a good outside run. A coop that will house three hens is about right for one male. Too small a coop in height and width will damage feathin height and width will guides about ers and comb Movable coops about the size of a good shipping coop or a double exhibition coop are very satisfactory since they are easily moved to fresh grass, and in winter-can be gathered under one roof with

Value of Green Feed

separate runs

Value of Green Feed
The general practice of allowing the chicks to run outdoors, where they flave access to direct sunlight, green plant-food and soil, is well founded. From the results of this investigation if appears that green plant-tissue will not prevent leg weakness and that the chick of the own necord will not eat enough green clover to prevent to treen feed undoubtedly is of value in the ration of a chick; but the Ohio folks do not believe it can be fed in sufficient quantities to act as the sole. sufficient quantities to act as source of the antirachitic factor.

Cause of Leg Weakness

weakness condition brought about by different causes. It may be due to overfeeding of a force ing ration, or to an excess of bottom heat, or a deficiency of mineral ele-ments in the feed. Sometimes less weakness is caused by disease, but there is no mistaking the ter weak-ness of a chick that is otherwise well, and the leg weakness of a sick chick. The disease may be cured when the cause is found out. If the ration is faulty correct it.

Roosts for Chicks

A good rainy day job is to provide rovsting space for the growing chicks. Whether raised with or without hens. all too often the providing of roosts is delayed to the detriment of the chicks. It is not always practical to clean the floor of the coop or broode house each day during the summer To compel the chicks to spend night after night huddled among the door pings of previous nights is the best invitation for lice, unthrittiess and disease to attack the fock. e to attack the fock.

LEGION CHIEF ASK RESPECT FOR BASIC LAW

Lincoln, Nebraska, July 19. constitution of the United States must be upheld to thwart efforts of 'parlor bolsheviks and misguided internation-

the present time," he declared.
"We have within the confines of our

national boundries considerable num- away. bers of people who have neither love cident felt that the driver was reck nor respect for the constitution. They rail against and decry America and America's form of government. Some of them even try to go so far as to try to belittle more than a century of intellecual achievements as the orld never before experienced.
"Has Stood the Test"

"That old instrument has stood the test for more than a century. It has seen us through stress, trial and bloodshed; through years of prosperity and times of adversity; through wars and then more wars. And did it ever occur to us that no serious effort was ever made to amend the constitution while a war was dn?
"True, It may be necessary from

time to time to amend it to meet the changed conditions of an age of steam, electricity, gasoline and radio, but when changes are made, let them company for the first six be after careful study and thorough 1926 was \$55,917,345. In but when changes are made, let them consideration."

There never was a time in American history when law and order needpresent, Commander McQuigg avowed. Today the law making abiding citizen in some communities is less ccure in his person than he was in

were committed in America last year wished, pay a dividend of more than foruteen times as many \$12. The established_rate is \$9 on as were committed in Great Britain, spaces of one hundred dailors par eleven ties as many as were commit value, which, however, have been selt-ted in Japan and five times as many ing for much more for a long time on as were committed in Canada—Mc-Quigg challenged men and women to careful thought of the law and order

"We have just such laws and just such law enforcement as the majority of Americans Insist upon", he continu-"If law enforcement is weak it is because of an indifference or selfish attitude on the part of the major ity of the people.

"When I speak of law enforcement I am not referring to the Righteenth amendment any more than I am to all

"Too Many Escape

the past several years there has been a letting flown in the morale of the American people Our courts and juries are allowing too many criminals to escape. "The feeling is growing that law

administration is not impurities; that the parent. There would be there is one law for the rich and ground then for the indiana B another, for the page. That is not other subsidiaries to insist. true, but the oncome of numerous trials throughout the country only serves to engender and stimulate this

"The American Legion propos "The American Logist proposes in company, and all are controlled softs as it can assist, to see to it that the way might even be opened its members, as well as all others reduction in present charges.

A BILL NYE STORY

(The Open Road)
James Whitcomb Bliev and Bill Nye used to go about the country together lecturing. Once when they were traveling by train, Bill Nye, who was ery fond of playing jokes on his friend, happened to spy Mr. Riley's ticket protruding from his coat pock-

et. He reached over and removed It without Edley's knowledge.

When the conductor entered the car for fares, Bill Nye remarked, innocently: "Here comes the conductor. Get out your ticket."

Mr. Riley searched first in one pocket, then another, but with no success. . At length he turned to his friend and explained that he had lost his ticket, and asked him for a loan as he had spent all of his money in huying the ticket. But Bill Nye pro-fessed to be bankrupt also.

The conductor was fast nearing their seat, the situation was become ing acute, when Bill-Nye innocently suggested a way out.

"I tell you what, Riley," he said "just crawl down under the seat and I'll put my coat over you and he'll never know you are there

Riley was a small man and the situation was desperate, the conduc-tor almost on them. Hurriedly, he followed Nye's suggestion.

When the conductor reached their seat Bill Nye held out both their tickets.

"Two fares" asked the conductor in doubt.

"Yes," solemnly answered the wicked Bill Nye. "Two." repeated the train official looking around, "who's the other one

With a mischievous twinkle in his eye, Bill Nye bent over, lifted the

oat from his friend and said: "It's for my friend here, but he's a little queer. He prefers to ride under the seat.

THE QUEST

By Mabel Smith Brooks am looking for a wife, sir; Can you find me one today, With a sort of homy set-up And a bit of wifely way? For wherever I am roaming And I see a girl I know, I have in my mind a picture Of a woman mixing dough,

The girls today are witty And I like their frank appeal. But somehow I always wonder Could they get a decent meal? And back my fancy wanders To a kitchen long ago. And a picture of my mother As she stood there mixing dough I see a little cottage With curtains blowing white,

and my magazines and papers And a room by evening light. And a little fellow coming.

With unsteady steps and slow And my wife says, "Take the baby, For my hands are in the dough.

Will the flapper fit my picture And when I come at night, Will I find this homy mixture In the soft and mellow light? Or will auto, movie, dance hall Be the way I have to go. With no Baby, but to jazz While the bakers mix the dough?

But somehow I hate to spare This picture that for many years And I think I'll keep on looking, For I sort o' think I know | 1591,594.40 I'd never be quite happy. | If wife couldn't mix the dough

I am just a working fellow.

HUMEROUS?

Some very humerous savings come inexpectedly to people at times, and if one had the ability to put them on the printed page so that others might see them as they appeared who heard, a fortune might be made.

It is a fact that the deaf, as a rule

see that which often escapes the eye of those who can depend as much on their ears as their eyes to learn things and draw conclusions. The other morning the writer was passed on the walk by two young ladies clad in the scanty manner which this torrid weather seems to demand in the interest of comfort. At the same time-they were passing a deaf man. and he pointed to the ladies as he "Gosh, if some one would give it (the dress) a jerk, they would bot have a blessed thing on " Then the writer looked, and had to agree in the main with the declaration.

WHY:

Waterfowls Can So Essily Keep Afloat

The feathers of aquatic hirds serve both as air cushions and as a hear insulator. Prof. Joseph Barcroft of King's college, Cambridge, in a Royal Institute lecture recently said that the reason waterfow do not sink like cother ordinary vertebrates in water is on account of the air retained in their feathers. The water does not work into the interstices between the frills of the feathers because they are so completely olled that they never get

wet even on the surface.

The air imprisoned in the feathers also serves to keep the bird warm.

The hardihood of water birds in this

The hardthood of water birds in the respect is fairly manifested by the fairly manifested by the fairling sight of ducks swimming in the fee-bound spaces of lakes and there apparently enjoying themselves.

"It is not that the separation of a surface of cold water by an inch or so of air from the bedy of the birdwould keep it warm," said Professor Barcroft. "bul convection currents would be set up which would rapidly cool the bird." Caught up, however, in the fine meshwork of feathers, the air is almost motionless and, being a very poor conductor, the body wargeth very poor conductor, the body warmth is all retained."

Why Sleeping Person Seldom Is Quite Still

Seldom is Quite Still
Although in sleep we lose what we call consciousness—the active direction of the mind—all our body and at least a part of the brain are still awake and working. Our beathing, our heart action, our digestlye processes are still "carrying on," though at a reduced rate, and there is a bit of our brain still active.

In our sleep we may unconsciously take up a position leading to cramp or other discomfort our digestion may be giving us trouble or the temperature of the room may have changed

ture of the room may have and the bed to be too hot or too cold. In any such event, the active part of the brain orders the body to do its best to remedy affairs. find that we have turned over.

Why Called "Pair" of Pants

The primary meaning of "pair" is two objects or things joined or in two objects or things joined or in some way related. Thus we say pair of stockings, pair of gloves, pair of stockings, pair of gloves, pair of scissors, pair of doves, and so on. In the case of "pair of scissors," the idea is of a single thing having two like or corresponding parts dependent on each other. "Pair of pants" and "pair of trousers" are holdovers from early times when trousers consisted of two separate, long hose-like garments—one for each leg.—Pathfinder Magn. one for each leg. Pathfinder Maga-

How to Blacken Brass

The usual method of obtaining a dull black finishing brass for interior camera fittings is to mix fine tamp-black with lacquer and apply with a brush. The actual quantities are arrived at by trial and error, and by painting a piece of waste material first until the requisite dull surface is obtained. If the finish is too shiny a little more lampblack should be added. If the result shows a tendency to rub off a little more lamper to come, we will be added. ency to rub off a little more lacquer should be added.

Why the Eyelids Twitch

This condition is frequently asso-clated with overwork and particularly overstudy. There may be associated errors in refraction, causing eyestrain and when this condition exists, it may be relieved by glasses. Twitching of the eyelids may also be due to inflammations of the eye and will cease when the condition is cured.

Why Sun Changes Look

The sun looks larger sometimes than others at sunrise and sunset because the conditions of the atmosphere change. The magnifying power of the blanket of atmosphere through which the rays of light pass to reach the earth depends on the amount of molsture in the air, and other conditions

Why Lawyers Are "Solons

Why Lawyers Are Souths
They are so called because Solon
was a famous Athenian lawgiver. He
became archon and improved the conditions of debtors, divided the populatibn into four classes, reorganized the boule, the popular assemblage, and the

Why Foam Appears White

pears white is due to its being com-posed of tiny bubbles which reflect the light from their surfaces. When white light, such as sunlight, shines upon them, they therefore naturally appear white

Why People "Stretch"

ssity or desire to stretch comes because certain parts of the body are not receiving the proper amount of blood circulation and body are not receiving the **Droper** amount of blood circulation and stretching is an instinctive action to accelerate the circulation.

Why Some Mice "Waltz"

The balancing apparatus of the in-cer car of the mouse is imperfect, causing the animal to turn constantly, in short circles. This defect is strong-ly fixed and transmitted with regularity to the young.

Why Called "Arctic"

The word Arctic is derived from the Greek "Arktos," a hear, the reference being to the constellation of the Great
