

# The Nebraska Democrat

ESTABLISHED 1884

WAYNE, WAYNE COUNTY, NEBRASKA, THURSDAY, SEPTEMBER 27, 1928.

\$1.50 PER YEAR

## FREE FOOTBALL HERE TOMORROW

High School Opens Season With Pilger at College Field Here Tomorrow Afternoon.

## BOARD-MEMBER SPONSORS GAME

A free football game is scheduled for tomorrow when the local high school and Pilger elevens will meet on the college field. A prominent member of the board of education is sponsoring the event and everyone is invited to take advantage of this opportunity to come out and help the local team start the season.

The Wayne team is very light, and is handicapped in having no second team to use for target practice.

With the exception of three or four men they are all very small and the new coach, Ray Holder, is developing a number of trick plays which he hopes the light squad will be able to use to an advantage.

They face a hard schedule and prospects are rather gloomy for followers. However the little fellows are game and may fool a lot of pessimists, who don't give them much chance to win.

## Lecture Course

The opening number of the lecture course will be given October 8, by the Brown Meneley Musical Company. This is the first number to be given this year, and is reported to be very high class.

Tickets for the season will be placed on sale next week. Three numbers are to be given, the last in January.

## MR. AND MRS. JOHN KATE VISITING FORMER HOME

A few months ago, John Kate was ill, and at a hospital, and now he is better—improving day by day, and he that he would rather visit this good town where he spent so many busy years than any other spot on earth that he knew of, so they are here for a while, guests at the John Huffard home.

Mr. Kate is loud in his praise of the progress which Wayne has made in the past few years in new and improved buildings. But he regrets to see that the square about the city hall, which he was active in securing when mayor of the city, is not beautified with flowers and shade trees, as he had in mind when the place was secured. Now that the new hotel is just opposite this spot, he hopes that next season will see the work well started. In his opinion the space now given to parking along the east side should be made into a garden of flowers. Such a beauty spot in front of the hotel would be an attraction that visitors here would not forget. Let's try it.

## A FELLOWSHIP MISSIONARY CONFERENCE AT YANKTON

A program handed up by E. B. Young tells that there is to be a conference and school of instruction at Yankton, beginning October 4 of the missionaries of the American Sunday School Union. While not actively engaged in their missionary work now, Mr. Young was for many years very active in the work in this part of Nebraska. This is to be conference of the workers for that organization of members from Nebraska, Iowa and South Dakota. Mr. Young has a place on the program, and expects to enjoy the gathering where he will meet many of his co-workers of other days.

## CLEARWATER YOUTH HURT WHEN STRUCK BY MOWER

Dewey True, Clearwater, was seriously injured when he was struck by a mower, drawn by a runaway team, last week.

He had finished mowing a field of hay and was returning to his home. While opening a gate the team became frightened and began to run, and before the lad could get out of the path of the mower, he was caught on the sickle bar, and dragged down the lane.

The team broke loose when the mower struck a post and two other youths who were with him succeeded in pulling him loose and rushing him home. Although seriously hurt he is reported to be recovering.

## CRADLE

RICHARDSON—To Allen W. Richardson and wife, of Dixon, a son at the Wayne hospital, Tuesday, September 25, 1928.

## MODERNIZING FARM HOME

Sam Barley informs the Democrat that he is busy now days at the Carl Erxleben farm home near Altona, and that Mr. and Mrs. Erxleben, already having a splendid farm home, have decided to make it larger and better, a most complete modern home. The first move was to erect a substantial addition to the older house, and that is now practically completed, and this will be the family home for a month or more while the complete re-arranging of the old house is under way. The plans call for changing of partitions both below and on the second floor. Equipment for a new heating plant, a modern system of water and sewer connection, and many other conveniences to add to the comfort and beauty of a completely modern country home.

## REV. KRUEGER GOES TO JACKSONVILLE

Pastor of English Lutheran Church Accepts Pastorate of Florida Church.

Rev. C. F. H. Krueger, who for the past year has been pastor of the St. Paul Lutheran church here, left Monday for Jacksonville, Florida, where he has been elected to a pastorate of one of the two churches of that denomination in that city.

Rev. Krueger, came here from Colorado about a year ago, and during his short pastorate here became well liked and gained a wide friendship.

He resigned from the local church and accepted the offer from the southern church because of his health. He found that the extremely warm climates fits him better than the cold winters of this territory.

Planning to make the trip overland, Rev. and Mrs. Krueger left here Monday morning. They planned to stop at the home of his parents in the southern part of the state, where all the children will gather for a family reunion.

His father, who has been confined for seven years suffering from an injury to his spine caused by a fall, has been quite poorly recently.

The local church have not chosen their next pastor, and probably will be without one for several weeks. They hope to have visiting ministers here from time to time until one is elected for the vacancy.

## STOCK SHIPMENTS

Among the recent shipments, the record shows that Gildersleeve & Noakes sent two cars of fat cattle to Omaha last week; Berris & Bergt had two cars of cattle on the Sioux City market and Jack Denbeck sent one car to Sioux City, and Jas. Grier shipped six car loads of cattle during that time, all going to the Chicago market, the two cars were first billed to Sioux City, but rebilled to Chicago.

A. Carlson, Jas. Grier and Mr. Echtenkamp each shipped a car of hogs to Sioux City. The comparatively few hogs shipped to market by train now is due to the fact that many are taken to market by truck, for while the cost of trucking may be more, if hired, many of the farmers have trucks, and do a part of their own work—and besides, when they have the truck loaded, they often think it a saving in shrink to go direct to the city and unload. It may be easier on the swine.

Wm. Whaler went to Omaha Tuesday with a load of 900 pound yearlings.

## NOTICE TO BIDDERS

Sealed bids will be received by the City Clerk of the City of Wayne, Nebraska, until 7:30 o'clock P. M., October 6th, 1928, for the painting of the City's water tower.

Bidder to furnish all materials for thoroughly cleaning and painting same with two coats. Bids will be received on both Blue Lead and Graphite and oil.

The Council reserves the right to reject any and all bids.

W. S. BRESSLER,  
City Clerk.

## STOCK EXODUS FROM HOLT COUNTY

Because of short corn crop, 2,500 head of live stock was shipped from Atkinson last week, being about equally divided in number between hogs and cattle, with several car loads of horses.

## Legion Executive Committee Member Appeals For Aid of Tornado Victims

Letter Sent to All Legion Posts of District Explaining Plight of Veterans.

## TEN TO FIFTEEN IN NEED OF AID

An appeal to the American Legion posts of northeast Nebraska, in behalf of the World War veterans who were struck by the tornado two weeks ago, was sent out by E. A. Welch, local post adjutant and member of the state executive committee, the first of the week.

"The tornado," according to the letter which was addressed to the commanders of the various Legion posts of this corner of the state, "completely wiped out the belongings of from ten to fifteen of our buddies in the vicinity of Pender, Walthill, Winnebago, Homer and Dakota City."

"These men," it says, "were stripped of all their worldly possessions except the clothes on their backs, and in some cases even those."

The plight of these veterans was discovered by Mr. Welch while visiting the storm area, and he believed that all Legionnaires of this district would wish to come to the aid of their fellow veterans, and he took the matter up with district headquarters. Twenty-five dollars from each post in the district, is the goal set, and will be enough to afford temporary relief, it is believed. The letter also asks for spare clothes, kitchen utensils, beddings, etc.

## INJURED NORMAL SCHOOL MAN IS AWARDED \$905.00

Lincoln, Nebraska, September 24.—The state normal board today ordered the payment of \$905 to J. E. Dennis, of Wayne, for injuries suffered when he fell down a flight of stairs while in the employment of the Wayne normal. This represented the compromise settlement of his compensation claim. The board contested the \$14 a week compensation for life which the state labor commission had awarded him.

## FOUR FLIGHTS IN WAYNE GOLF MEET

Morgan and Canning Low Qualifiers of Thirty-two Who Are Competing.

Morgan with a score of 78, and Canning with an 81, were the two low qualifiers in the city championship meet now under way, with thirty-two of the local enthusiasts competing.

Many of the qualifiers played in windy weather of last week, which accounts for many making a poor showing.

According to the pairings, which have been completed for the first round of match play, there will be eight players in each of the four flights.

## Finish Tuesday

The first round must be played before next Tuesday, and a number of interesting and close matches are slated for this round.

Dale and Morgan will tangle in the opening round on the first flight. Both of these men have held the trophy, the former winning it last year.

Lewis, who also has won the cup, will meet Canning in the opening round, of this flight. Jim Ahern will play Beckenhauer and Carl Wright will meet Hunter.

Second flight pairings: Cavanaugh vs. Davis; Brittain vs. Chinn, Mines vs. Hahn, Fisher vs. D. Larson.

Third flight pairings: Conn vs. Craven, Hendrickson vs. McClure, McDonald vs. M. Wright, Hickman vs. Kemp.

Fourth flight: R. Larson vs. Horney, Casper vs. Parks, F. Berry vs. Kearns Nuss vs. Fred Blair.

## HENRY VLOPP DEAD AT BLOOMFIELD

Report from Bloomfield is that Henry Vlopp, a former resident here, but for many years in business at that place, hung himself at his home Monday afternoon.

A number of relatives and friends from here went to Bloomfield today to attend the funeral.

Read the advertisements.

## NEW "GAY" THEATRE WILL OPEN SUNDAY

Clara Bow in "The Fleet's In" Scheduled for the Opening Program Here Sunday.

## COMPLETE BUILDING THIS WEEK

The work on the construction of Wayne's new show house will be completed this week and the first showing in the new theatre will be given Sunday, according to announcements of Mr. Gailey.

Clara Bow, in "The Fleet's In" is booked for the opening performance in the new show house, and a large attendance is expected for the opening of this new attraction for Wayne. A number of other attractions are also to be offered, it is said.

## Modern Theatre

This new theatre is said to be the very finest in a city the size of Wayne in this corner of the state, and is one which theatre goers generally will appreciate.

Mr. Gailey has spared no effort nor expense in making the new show house modern and up-to-the-minute in every detail. Many features were built into the plant to make it comfortable and as safe as possible.

## Two Rentals

Two attractive rentals face main street one on each side of the theatre entrance, which have been leased to Milo Kremke and the ladies of the Wayne Shoppa. These will be occupied within a few days, it is reported, and will give them a modern home for their respective businesses.

## MEXICAN PRESIDENT NAMED

Emilio Portes Gil has been selected by the Mexican congress to the presidency of that republic, taking his seat with the expiration of the term of President Calles, and holding until an election is held in 1930. The new president is pledged to continue the policies of the present chief executive.

## JIM REED TALK IS POSTPONED

Popular Senator Cannot Be Here Saturday, but May Come to Wayne Later.

J. H. Kemp, Wayne county committeeman, is in receipt of information from the democratic headquarters which state that it will be impossible for Jim Reed, Missouri senator, to be in Wayne Saturday, but that he may be here later.

The reasons for the postponement of this talk were not given, but instructions from national headquarters stated that he could not be here at this time.

They hold hope that Mr. Reed will be able to come to Nebraska at a later date, and assure the local committeeman that if he does come to this state a date will be reserved for Wayne.

This announcement of change came as a great disappointment to Wayne people who were anxious to hear this prominent speaker.

## McLEAN BANK CLOSED

The McLean bank closed its doors last week to check up and learn where they are at following the robbery of the Beemer bank (from the inside) last week as they seem to have held some of the paper which may be no good from the Wupper forces at Beemer. It is hoped that when the checkup is finished, the McLean bank may see a way to resume business. When a lad it was fun to set up a row of blocks a short distance apart and topple the first block over, and watch the entire string go down. There is too much similarity to that sport when banks begin to cave in.

Dr. T. B. Heckert, accompanied by S. D., Relyea were at Miller, South Dakota, where Mr. Heckert has a farm, which he wanted to meet again. The crops are not the best up that way, and we suppose that the owner realizes that some manner the farm relief is needed. Dr. Heckert purchased the land some twenty years ago. Mr. Relyea tells that he enjoyed the trip very much, a 500 mile ride, mostly thru interesting scenery, and pretty cities and villages.

## WAYNE CATTLE BRING BIG PRICE

Last week James Grier had two cars of finished cattle from his farm feed lots that sold at the near wartime top, bringing \$18.00 per cwt. There seemed to be more demand for animals of that class, and he immediately decided not to sell a couple of loads he had to Sioux City at the price of \$16.00 offered, and to send same to Chicago. So he hastened home from Sioux City Monday morning and loaded out two more loads of his fat ones for the Chicago market, and thus had four car loads on that city market Wednesday. Mr. Grier, who is one of the heavy feeders of this county, has several other loads practically finished for shipment. He was also in the range country about ten days ago looking for good feeders, and perhaps purchased a number of cars for early delivery this fall.

## MRS. LUCY ROSA PASSES TUESDAY

Aunt of Mrs. C. T. Ingham Dies at the Ingham Home Following Short Illness.

Mrs. Lucy Rosa, aunt of Mrs. C. T. Ingham, with whom she had made her home for more than a year and where she had lived much of the time since the death of her husband 15 years ago, died quiet suddenly Tuesday morning following an attack of bronchial pneumonia.

Mrs. Rosa, would have celebrated her 88th birthday next Monday, October 1, and had always enjoyed very good health. She suffered an attack five days before she passed, and Sunday her condition became grave, the end coming two days later.

Since the death of her husband, Harrison Rosa, who for many years was general sales manager for the J. B. Farlow Company of Chicago, Mrs. Rosa had lived with the Inghams and with a cousin, Mrs. Chas. Carlyle of Kansas City. She was well acquainted here, having spent a great deal of the past fifteen years in Wayne.

Surviving are two sons, Frank of Conneaut, Ohio, and W. L. of Pasadena, California. The latter arrived here this morning to attend the final rites for his mother.

Funeral services will be held here tomorrow with Rev. W. W. Whitman in charge. The body will be taken to Montecello, Iowa, where it will rest beside that of her husband.

Besides her husband a daughter, Mrs. Chas. Loree of Lake Charles, Iowa, preceded her in death.

## SOLDIERS HOME FROM DENVER

Jack Hyatt and R. P. Williams, who were delegates to the national reunion of the G. A. R. arrived home Saturday, and both of these veterans reported that they had a good time, and were given splendid entertainment. Mr. Williams, who attended the meeting at Denver 23 years ago, said that Denver had been growing and improving much since his previous visit. While Mr. Hyatt had no previous visit from which to make comparisons, said it is a fine city. He spoke of the city park and the new museum. Jack said they appeared to have practically every manner of animal and fish caged up there except a mermaid, and look as faithfully as he could, not one of them could he discover. Jack intimated that he always had a desire to see one of those alleged beauties, and see if they are really as handsome as they are pictured.

They were discovered while in the city by a former Wayne citizen, Chet Witter, who was pleased to see some one from his old home, and he helped them greatly to see the places of interest in the city, and extended the hospitality of his home to them, and did much to make their stay in the city pleasant. Mr. W. is doing a commission business, they said, and also doing a bit of buying and selling of city property.

Of their meeting and parade, they said they did not come up to those of other years in numbers in attendance. Two of the New England states had but two members from each state present—they thought they were New Hampshire and Rhode Island, but were not sure that they were the states. It was estimated that nearly 2,000 were in the parade, most of them marching; tho a few were in automobiles, lacking the strength to march the three-fourths of a mile laid out as the time of march.

## GRID SEASON OPENS WITH YANKTON HERE

Local Mentor Hunts for Speed to Offset Lack of Weighty Material.

## LIGHT SCRIMMAGE THIS WEEK

Because his fifty candidates are decidedly lacking in weighty material Hickman is making an exhaustive search for those who are able to flash some real speed.

As light scrimmage was introduced this week the Mentor's old battle cry of "more speed," which was the foundation for his winning cage quintet last winter, began to crack through the air.

## New Style of Play

An entirely new style of game is in the making according to the introductory plays being worked out. Apparently the new tutor hopes to get the jump on the opposing elevens in every play, and in that way to make up for the lack in size.

Whether Wayne comes out on top will depend largely upon the success he has in drilling this snap and fight into his proteges.

## Saving His Men

Apparently Mr. Hickman anticipates a need of a lot of men when he lines them up for the opening game with Yankton here next Friday, October 5. He is exercising every precaution not to lose any of them through the injury route.

No doubt many of his men will be offered an opportunity to show what they can do. If he has any idea of his starting lineup, or who will compose the first team, he is keeping it a secret.

Local followers are watching procedure with a great deal of interest, and are anxious for the first test. The Dakotans have been hard competition for the local teams in past seasons, and the result of the opening contest will mean a lot.

## SOME OF US CAN REMEMBER THEM

One of the curiosities of the Wayne county fair this year was a horse and buggy, perhaps the only vehicle of that kind seen at the fair this year, amid hundreds of gas wagons. Sam Barnes and his well trained family nag, the blind, was in evidence. The harness and vehicle in excellent state of preservation and repair were no longer new. We venture to say that if one ask Mr. Barnes about the date when he got the harness and the buggy he can tell you, and we doubt if his reply would indicate less than forty years of possession. His horse is younger. Not many years ago Sam was telling of a spring wagon, of the style, we think, that used to be called a democrat wagon, that was then said to have been in use more than a half century.

Mr. Barnes is a great horseman, and for many years has handled horses—all kinds of horses when he was younger, and it is to be hoped that while he is drawing near to the 90 year age, he may never fail to have a horse to take him about, for the auto would not suit Sam.

Speaking of the disappearing horse in many places, the writer spent a day at Omaha a fortnight ago, and saw and dodged thousands of buzz wagons, but cannot recall that he saw any horse drawn vehicle on the street of that city. One must go to the farm to see horses, and then he may find a tractor harnessed to the machinery.

## COMMERCIAL AND GEOGRAPHY DEPARTMENTS HAVE MOVED

(From The Goldenrod)

Some of the departments have changed location on the campus.

Mr. Costerisan who succeeds Professor Orr in the psychology department holds his classes on the first floor of the Art building in the room formerly occupied by the commercial department.

Miss Stephens has moved her class work to the third floor of the Art building.

Mr. Dale of the geography department has moved to the room formerly occupied by Mr. Orr.

Miss Ramsey who has English and Expression has her classes in the room formerly occupied by the geography department.

Mrs. August H. Basler drove to Hoskins Tuesday for a short visit with her parents, Mr. and Mrs. Win Beckner.

**LOCAL AND PERSONAL**

Warren Shulteis received two cars of feeders Tuesday morning, and they will soon make three or four cars to send out.

Miss Allegra Baltzell returned to her home at Madison, after a week visit with her sister Mrs. R. F. Jacobs and friends.

Dr. Young's Dental Office over the Aberli's store. Phone 307.—adv. 1f.

Miss Sella Libengood left Tuesday to join her brother Lawrence at Great Falls, Montana, where he is employed, and where he has a place for his sister upon her arrival.

A benefit ball game was held at Pender, Sunday, and thousands of tickets are reported to have been sold. The Oakland and Sloan, Iowa, nines were matched and the proceeds were turned over to the benefit fund for the storm victims.

**Hart Schaffner & Marx suits cheapest in the end at Gamble's.**

At Sturat they are holding a Tri-County Improvement association this week, and one of the features now talked of is a milking contest—in recognition of increasing dairy interests in that vicinity, where they have co-operatives creameries.

Mr. and Mrs. Guss Jacobs and Miss Virginia Mesnard of Pukwana, South Dakota arrived last Saturday for a week visit with their son R. F. Jacobs and wife. From here they will go on to Winner, South Dakota, Friday to visit with another son and family.

Address West Point, Nebr.—adv. S27-34

Mr. and Mrs. E. C. Rhoades and children were passengers to Blair Saturday, called there by the death of Mr. Rhoades' grandmother, Mrs. Ellen Rhoades, who died following a stroke of paralysis, a week before her death. At the age of 86 years, she had been active, and hale until a week before the end came. Mrs. Rhoades was one of the early settlers of Blair vicinity. Mr. Rhoades tells us that the funeral of their grandmother was an event which called all members together for the first time in a number of years so great was their love and respect for her.

Mrs. Anna Ulrich and her son Frank went to Omaha to visit daughter and sister, Mrs. Robert Meagher of that city.

A Sunday dinner was served at the Charley Pierson home near Wakefield in honor of the 3d birthday of their little son, Dean, at which Miss Mamie Prince and Mr. and Mrs. Guernsey of Winside and Mr. and Mrs. Roy Pierson and son Kenneth and Miss Pearl Sewell and Edna Jeffrey from Wayne were guests.

Platte county supervisors went on record, at a recent meeting, as favoring a state tax of two cents per package on cigarettes. The revenue to be used for school purposes. It is claimed that such a tax would produce a revenue amounting to \$1,000,000 annually, and would lessen the real estate and personal tax burden that much.

WANTED—Hear from owner good farm for sale. Cash price, particulars. D. F. Bush, Minneapolis, Minneapolis. —adv. S29-31.

Engineers have started a survey of the proposed railroad connecting Norfolk and Yankton, South Dakota. This with other substantial data will be presented to contractors, for an estimate of the cost of construction. There is much agitation in favor of the road in the two terminal cities, and a number of places along the route through which it would lead, according to reports.

Frank Schulte has been visiting relatives and friends at Lorton, in the south part of the state, and when he returned he was accompanied by his cousins. Mr. and Mrs. Wm. Siepelmeier and their daughter, Miss Mina, returned with him for a visit here. They like the country here, except that this year the corn crop is not nearly equal here to their corn condition in Otoe county.

**For better underwear try Munsing at Frank Gamble's.**

John Gaertner came out from Sioux City Sunday evening, and spent Monday morning closing up some business matters here, concerning the sale of their Wayne home, which was purchased by C. C. Peterson and possession taken about three weeks ago. Mr. Gaertner tells that Mrs. Gaertner is slowly improving and gaining strength—but is still annoyed by pains in the head. They are making their home with their daughter at Sioux City. Their daughter, Mrs. Jennie Davis and her son have returned to Arizona, where Mrs. Davis is in school work at Safford, where she taught several years. Mrs. Davis and son drove thru to that place, and have sent word back of their arrival there without any mishaps in the en-the distance, about 2,000 miles. She was fortunate in finding friends going to or just beyond her destination just before they reached the mountain roads, which she had been rather dreading, because not accustomed to driving them, thus the company was very welcome.

For milk or cream for daily delivery or for special occasions call phone 417-F-2 the Logan Valley Dairy. We are always on the job.—adv. M18-1f.

Dr. S. A. Lutgen, M. D. All calls promptly answered.

Wm. Assenheimer left Tuesday evening to visit at Hot Springs, South Dakota, where he has a few soldier friends in the soldier home at that place. He may take in a bit of the scenery in that famous region before the limit on these tickets comes. A very reasonable rate is made for the round trip, as the railroad adv tells.

**HELEN, CHARLES AND CLARE STALLSMITH**

Miss Helen Stallsmith, who left Wayne nine years ago with her brothers, Charles and Clare, has been visiting Wayne relatives and friends for a week. Left orphans at an early age the three have made good in the life struggle that is often especially hard for those left homeless by death of both parents. From Miss Helen we gleaned a bit of their struggles and success.

Of Charles, she says he has a good position at Los Angeles, California. Clare entered the army and served a three year term, taking up the radio sending as his line, and is now Sargt. Clare Stallsmith, instructor in radio at the barracks at Jefferson City, Missouri, and as a part of his duties he attends the encampments of the national guards of that state instructing them in the important work of sending reports from the field to headquarters and receiving orders from headquarters as to what to do, when and how, and also what other forces are doing with whom they are supposed to co-operate.

Of her own experience she had been acquiring education and teaching, in different states, and is now taking a bit of vacation after a number of years of constant work, and came from New York to this place, where she is a guest of Mrs. Hattie Stallsmith, and is visiting among the friends of her girlhood days.

Of Wayne she notes a fine growth in improvements both public and private; but seemed to forget that while she had been growing up, other her schoolmates and had been keeping pace with her, and it seemed hard to realize that so many of them had married and some have families of their own—and that nine or ten years of life embracing the years from about 12 or 15 years of ages, makes perhaps the most marked change of any like period of life. Miss Stallsmith is planning as a part of her vacation trip to visit Los Angeles, with stops at some of the points and cities of interest.

The Democrat, in common with many Wayne people who knew and felt an interest in these three young folks is glad to receive such encouraging report of their success thus far in making good in the battle.

**ALICE FORSBERG, FORMER STUDENT, WRITES OF AFRICA**

(From The Goldenrod)  
Miss Alice Forsberg, a student at Wayne State Teachers college for the last three years, submits for the readers of the Goldenrod the following letter from her sister, Helen, who is a missionary in Africa. Miss Helen Forsberg was a former Wayne student. The letter was received at Laurel, Nebraska, the week of May 27.

Lisala Congo Belge, Africa, March 22, 1928.

Dear Alice:  
There has been great excitement in our village this evening. One of my boys came running home from the spring with the news that a boa-constrictor had been killed near by. Of course the other boys and I set out immediately to see it. We didn't loiter along the way either, because I was afraid they would have it cut up before I could get there.

One youngster ran ahead to tell them to leave it until I had seen it and the rest of us ran down the path as fast as we could and across a burned sobi field and into a newly cut garden.

And there the creature lay! Such a large one—all of fifteen feet long. They tell me it could easily have swallowed a goat or pig or anything equally large.

This was the first large snake I have seen in Africa. There are many smaller ones some of which are very poisonous. I have often asked the natives if they did not know of a very large snake. "Yes", they would answer, "we have seen them, but they hid so carefully that they are very hard to see." For some reason this one had come out of the forest and crossed this burned sobi field and as the village folks were going to their gardens the ever watchful eyes of one of the children had caught sight of the narrow peculiar trail a boa leaves. Calling the other folks they had followed the trail down past the spring and into an old garden and there it had crawled into an old hollow log. They had to smoke it out of the log, and as it came out they cut it with their knives. This was kept up until it was killed. One lad, telling of it, said "Oh, but it was a big war." I asked to buy the skin—and they promised it to me, but I have an idea that promise won't be kept. When

telling them I wanted it skinned they made some peculiar exclamations and I heard them reminding each other how delicious even the skin was to eat. A promise doesn't mean much to them, as we have learned by sad experience long ere this, and now especially when they remind each other how good it really is to eat and why should the "Madamo" have it only to send it away, it seems especially doubtful it will be kept.

Yes, they will really eat even a snake. Doesn't it sound awful? Our black friends also eat rats, white ants during a certain season, a certain kind of grasshopper, other big bugs, and what I think even worse a nasty caterpillar horrid sort or worm, that I can't find words to describe, which they fry in oil or roast in the fire. They claim they are very delicious and seem greatly amused when the very sight of them is too much for my comfort. But all these are only especial delicacies. Their main food is corn, pounded into meal and cooked, and plantains. They also grow bananas, pineapples, peanuts, different squashes, manioc, and sugar cane. They also gather leaves and roots in the forest to help make up their meals.

But you will think there are no animals here in the forest. And certainly as far as seeing them—well, as one of the boys said when asked where the animals were, "Their eyes are very sharp and strong. 'Tis very hard to see them and harder yet to kill them." But there are great numbers of them. Just lately a very large elephant was killed by one of the natives of Tandalas village. I saw neither it nor the ivory points, but rumors are they were very large. Nowadays when a native kills an elephant he takes the points to the State and they weigh it and set the price. In this way they are treated fairly. Before, the traders would cheat the natives dreadfully at times. Saturday Tandalas and Gowi, who killed the elephant were up here to show off their new clothes, because who ever heard of a native keeping any money. Oh, no, it is spent very quickly, and oh, how they do like a lot of clothes. They will even wear a big heavy overcoat, no matter how warm it is, just to show how much they can own.

There are great numbers of buffaloes here, but they are treacherous beasts. Just a week ago word came that a relative of one of our work men had been killed by one. Many of the natives are afraid to hunt them. We also have leopards, antelopes, wild pigs, and other animals which I haven't been able to find names for in our language, just from the native description. But I have not seen any of the larger animals. One early morning on the path we passed a place where a herd of buffaloes had slept during the night. And I was glad they had left before we came and not waited to greet us. But as a general thing we hardly know we are in

## Winside News

Rev. and Mrs. L. R. Keckler and daughter visited the Rev. W. O. Rominger and family at Carroll Sunday afternoon.

Mrs. Wm. Schrupf of Wayne visited relatives here Sunday and Monday and Etta Perrin entertained for Sunday dinner, that day William and Miss Gertrude Bayes, Mrs. Wm. Schrupf and Mr. and Mrs. John Bayes, and the same people were guests Monday evening at the Lloyd Prince home.

Mr. and Mrs. Walter Gaebler drove to Omaha to spend the week end with the former's brother.

Robert Morrow, who had an operation on his eye at the Lutheran hospital last week, was able to return home on Sunday and is getting along nicely.

Mr. and Mrs. George K. Moore and daughter Margaret, Mrs. George Lewis, Mrs. Gurney Benshoof and son Merwin, and Rev. and Mrs. L. R. Keckler and daughter Leona, attended

the county Sunday school convention at Carroll Friday.

Mrs. Mae Huffaker and Mrs. A. H. Carter spent the week end with relatives at Sergeant Bluffs and Sioux City, visiting relatives.

Mr. and Mrs. W. H. A. Wittler were Sunday evening guests of Mr. and Mrs. Fred Neiman and they had spent Sunday at the Florenz Neiman home.

Mrs. George Wittler was surprised on Thursday evening by a number of the neighbors and friends on her 26th birthday.

Mr. and Mrs. George Sweigard left Monday for a visit with the latter's sister in Iowa.

The Glenn, John and Frank Hamm families were visiting at Laurel Sunday.

The Eastern Star lodge met on Monday night with eleven members present. Only the usual routine business was transacted.

Mr. and Mrs. Chris Hansen and Mrs. Lean Lambrecht were at Pender and Walthill Sunday to visit the tornado territory.

Wylie and Harry McCluskey were in town the first of the week looking after business interests and visiting old friends. Wylie will go to Mayo Bros. clinic at Rochester, before returning to his home in California.

Dr. and Mrs. C. O. Ring and children of Pierce were visiting at the H. H. Tangeman home on Sunday.

Mr. and Mrs. Chris Eckman and Mr. and Mrs. Fred Eckman of Huron, South Dakota, were dinner guests at Chas. Schellenbergs Monday.

W. C. Lowry went to Bloomfield Saturday to spend the week end with his niece.

Mrs. Bessie Garing and daughter of Grand Island visited over Sunday at the Ed and Bert Hornby homes.

Mr. and Mrs. Max Kneische of Herman, Missouri, left Saturday after a short visit with relatives.

Word has been received here that Mrs. Henry Glassmeyer of Hemingford, who was a former resident of this community, suffered a paralytic stroke last week.

Mrs. Linn McClure and Mrs. Wm. Hiscox of Wayne visited at the Wilson Miller home Friday.

Raymond Wylie who is a patient at the Lutheran hospital in Norfolk is reported as getting along nicely and expects to return home this week.

The Odd Fellow's lodge met Monday night with twelve members present, only the usual routine business was transacted.

Mr. and Mrs. Chris Jensen of Piller were guests Sunday evening at Lauritz Hansen's.

Mr. and Mrs. Henry Bartlett of Carroll were guests of Mr. and Mrs.

Ludwig Schomberg, Sunday.

Henry Swendt was knocked down Saturday night and his head cut in striking the pavement and otherwise bruised and shaken up when a car driven by Wm. Carsten's struck him in backing up from the curb. Mr. Schwendt was standing behind the car so the driver could not see him.

In the ball game here Thursday between the locals and the Wisner team the locals were beaten by a score of 10 to 0. The second game of the series that is to decide the last half of the season between Wisner and Winside was played on Tuesday of this week on the Wisner grounds.

Mrs. Walter Gaebler and Mrs. Frank Wilson entertained nine tables at a bridge luncheon Wednesday afternoon at the Gaebler home. Instead of the usual prizes, the lady having the high score at each table received a prize.

Mrs. I. F. Gaebler and son Walter were in Omaha Sunday to visit an aunt who is seriously ill.

Mrs. V. L. Siman had an imbedded tooth removed at a Norfolk hospital Friday.

Louis Mittelstadt left the first of the week to take up his studies in Creighton University as a dentist.

**Sends Aid to Cyclone Sufferers**

The Roy Reed Post of the American Legion sent several hundred pounds of clothing and other supplies to the cyclone area near Pender and Walthill. The Trinity Lutheran Aid society sent fifty dollars besides the individual gifts that will help the sufferers.

**Wayne County Holds Annual Sunday School Convention at Carroll.**

The annual convention of the Wayne County Sunday School Association was held in the Carroll Baptist church Friday with the Rev. M. G. Jones, county president, presiding and State Secretary, John C. White of Lincoln as the principal speaker.

Sessions were held, morning, afternoon and evening and delegations were present from eight schools, The Mays, Wayne Baptist, Hoskins Evangelical, Winside Methodist and the Carroll Baptist, Congregational, Presbyterian and Methodist. Special music consisting of solos and duets was furnished by the Carroll churches. Devotional and other addresses were given by Mrs. Iver Morris of Carroll, the Rev. W. P. Rominger of Carroll, the Rev. A. C. Downing of Wayne, the Rev. J. C. Beltrann of Stanton and the Rev. L. R. Keckler of Winside.

The largest attendance was in the evening when the church was filled with delegations from the various schools, and the principal address being given by John C. White of Lincoln. The convention next year will be held in the Hoskins Evangelical church.

The convention elected the following officers for the ensuing year: President, Rev. M. G. Jones of Carroll; Vice President, Rev. A. C. Downing of Wayne; Secretary, Mrs. Chas. Whitney of Carroll; Asst. Secretary, Miss Loretto Whitney of Carroll.

**LOS ANGELES INDUSTRY MAN IS COMING**

Honolulu will welcome tomorrow LeRoy D. Owen, sales manager of the Central Manufacturing District, one of the big new industries located at Los Angeles. He is arriving on the City of Honolulu with his bride primarily on a honeymoon trip, but also to make a survey for his firm during his week in Hawaii.

The Central Manufacturing District has headquarters in Chicago. It has recently established in Los Angeles a large produce terminal with the combination for a wide variety of industries. It is rapidly adding these industries in suitable locations within the district. The Central Manufacturing District of Chicago is a pioneer in the developing of high class, segregated industrial property. It cooperates in the erection of attractive buildings to operate various industries efficiently. The Central Manufacturing District of Chicago is said to be the largest privately operated industrial community in the world. It offers facilities for both manufacturer and distributor of merchandise. —Star Bulletin, Hawaii, Aug. 30.

**WHAT DO YOU KNOW ABOUT NEBRASKA?**

- Questions
1. What are the nine principal rivers in Nebraska?
  2. Of what four crop staples does Nebraska produce a surplus?
  3. How does Nebraska compare in wealth with other states?
  4. How many rural mail routes in the state?
  5. How many post offices in Nebraska?
  6. Where is the U. S. district land office in Nebraska?
  7. What Nebraskan founded Arbor day?
  8. How many mail trains serve

Omaha daily?

9 How does Nebraska rank in sugar beef production?

10 How many cheese factories in the state?

11 Where is the largest federal land bank in the United States?

12 How many banks in Nebraska?

13 What is the net bonded indebtedness of Nebraska?

14 How many milk cows in Nebraska?

15 How does Nebraska rank as a telephone state?

16 What is Nebraska's death rate?

**Answers**

1 Missouri, Platte, Republican, Niobrara, Elkhorn, Loup, White, Little Blue and Big Blue.

2 Breadstuffs, meat, wool and sugar.

3 Sixteenth in total wealth.

4 1,146 rural mail routes totaling 33,000 miles.

5 888 post offices.

6 Alliance.

7 The late J. Sterling Morton of Nebraska City, who was secretary of agriculture in President Cleveland's cabinet.

8 200.

9 Nebraska is second state in sugar beet production, with 1,048,000 tons in 1927.

10 Fourteen cheese factories, making 1,200,000 pounds a year.

11 In Omaha.

12 In 1927, 800 state and 170 national banks.

13 Nebraska has no net bonded indebtedness.

14 613,000 milk cows.

15 Only sixteen states have more phones. Headquarters for five states for the Northwestern Bell Telephone company is in Omaha.

16 Nine per 1,000, which is less than any other state of equal or greater population.

Bureau of Publicity, Omaha Chamber of Commerce.

Governor Smith is to speak at Minneapolis tonight, and it is intimated that agricultural relief will be the theme. Are you listening about 8:00 o'clock.

Elsewhere in this paper we quote from two or more members of the senate, both progressive republicans, as to their views of the Al. Smith candidacy on the democratic ballot. We ask that progressive republicans read them.

Four foolish men attempted to rob a bank at Lynch this week in which they failed to get anything but a fight, and get away free. They should learn to work from the inside as did Wupper at Beemer. Safer and more profitable.

We do not see that it matters much now whether Curtis took the drink which Bruce insists that he did or not—it is evident that they failed to do their duty as law-abiding citizens when they failed to have the legger who furnished the bottle penned up.

From all that we can read of political corruption the Tammany of late years, cannot hold a candle to that of the Pennsylvania machine under the direction of one Vane, who conducted such a law-defying, corrupt campaign in the Keystone state at the last election that the senate would not admit him to a seat in that body, and according to the reports that appear so well authenticated, Secretary of the Treasury, Mellon was his leader.

A Metcalfe day is being planned for next Thursday, the 4th when it is proposed to have at least one radio

party in each precinct, and "Met" will talk to us from 6:30 till 7:00 p. m. Every voter who can possibly arrange should listen in somewhere during that 30 minutes; for we are all on the jury, and the case closes for a verdict November 6. As a citizen, it is your sworn duty to vote, and for that reason, you should become informed as to the case.

According to our understanding of a letter a conference committee managers of Western Railways, concerning a difference between the men and the employers, is likely to be settled without a strike, tho a vote on that question was started, but later halted. Under the proposed truce the train men on passengers are to receive an advance of 7 1/2 per cent in wage, and a few differences as to some minor matters are to be adjusted by conference between the interested parties. The wage increase first asked for these trainmen was from 16 to 28 percent. Perhaps justice will be reached between the men, the railways and the public, who would foot the bill, and all may be well. The public did not appear in the controversy unless it was thru the board of mediation which was appealed to before the agreement was reached.

The editor has just received a communication signed by H. W. Evans, the imperial wizard of the Ku Klux Klan in which he disclaims that there is any foundation in fact in the whispered stories that the Klan is receiving financial support from the republicans or any other source than from its klectoken or membership donation, from dues and from klans. The letter continues to deny any affiliation with the republican party or any other similar organization; but that it is fighting to preserve Americanism. The Democrat is in sympathy with some of the moves that the Klan claims as a motive for its existence; but we do not believe that any secret organization is needed in this land of the free to put in force punishment for crime—punishment without public trial or chance for public defense. Much of their asserted motives do not sound bad, but with the ballot, free speech, the courts and public opinion to back every just move in our land, is there cause for any secret political organization? The Know Nothing organization and the A. P. A. are gone and all but forgotten. If the Klan was in the open, it might be charged with less of the skuldudery that is being committed in these times.

NATION'S MENACE IS DISCUSSED BY F. S. BERRY

"Lack of character and moral fibre, lack of interest in government and the inability to distinguish statesmanship from demagoguery is our menace and should be our chief concern," declared Fred. Berry, Wayne

attorney, in the concluding address of Constitution week over radio station WJAG Saturday.

"You will agree with me," he continued, "that any good form of government will last only so long as a people are capable of it and are worthy of it, and that a government of the people and by the people can succeed and come to its true destiny only in a citizenship which understands the fundamentals of self-government and are willing to accept the responsibility and obligations of such a government."

After giving a sketch of conditions that existed at the time of constitution became the governing document of this nation, Mr. Berry said "the simple life of old when people sat by the fireside and read the Bible and good books and thought out their problems has changed to the hurried, complex, unthinking life of the present."

Changed modes of living, changed habits of life, changed business methods and the most reckless habits and extravagance of all time have come upon us, he asserted. "In a prosperity never before known and in a depression that has been pitiful we have been drifting on uncharted seas without the use of a rudder or compass to guide us."

"Quick to grasp the situation, the ambitious politician and the apostles of this ism and that ism, with no honest concern for the people or the public welfare, have come forward with their nostrums and crack-brain theories and have led too many of our conscientious people to believe in things which are fundamentally wrong and never have been, never can be true."

No one objects to the change from the representative government of the fathers to the direct action by the people, as illustrated by the primary, the initiative and referendum, the recall, and similar legislation if that change is for the better, Mr. Berry stated. "Direct action by the people will be based upon enlightenment and understanding, or upon misunderstanding, prejudice and ignorance. If the latter prevails a rule by massed incompetency is certain and the prophecy of both Macaulay and Carlisle that the people of this nation would be the means of their own undoing and that the government of Washington would ultimately go down in the destruction of fallacy and discontent, is certain to come true. I impress upon you that this changed form of government requires more time and study from our citizens and we must better equip ourselves for the present and the future if it is to be a success."

Mr. Berry told his listeners that every movement which has for its honest purpose a better citizenship, a cleaner and saner life, a better administration of justice, and a better public welfare will have the support of the great body of the American bar.

"We believe in this government," he continued, "and we believe in its people. We recognize the evils and the grave problems and dangers of the present, but with faith in the future. After all there is something in mankind, call it soul or spirit, or what you will, that makes a man want to do right, act right, live right, obey his God, and respect and serve the institutions of his country. In that spark of Divine lies our assurance against the piercing storms yet to come."

BLAINE CALLS HOOVER RENEGADE DEMOCRAT

New York, September 23.—United States Senator John J. Blaine, in a statement issued at his home in Boscobel, Wisconsin, and made public by the democratic national committee, announced today that he will not vote for Herbert Hoover for president.

Senator Blaine, although elected as a republican, has given previous evidence of his leanings toward Governor Smith in the present campaign. In a speech at Burlington, Wisconsin, on August 28, Senator Blaine declared he had no doubt that "my friends and supporters are going to vote for Governor Smith."

His statement follows: "No republican owes any political allegiance to Mr. Hoover as a presidential nominee. In the congressional campaign of 1918 he urged the election of a democratic congress. He said: 'I am for President Wilson's leadership not only in the conduct of war, but also in the negotiations of peace, and afterwards in America's burden in the rehabilitation of the world.'"

Sought Democrat Approval  
"Mr. Hoover in 1928 sought and was willing to accept the nomination for president on the democratic ticket. After he was convinced that he would not receive the democratic nomination, he declared: 'I must vote for the party that stands for the League of Nations.'"

SENATOR NORRIS ENDORSES SMITH'S FARM SPEECH

A dispatch from Washington in the World-Herald quotes the following sentiment from our senior senator.

"The Nebraskan said that after the Omaha speech those who believed in the McNary-Haugen bill as a proper method of dealing with the surplus question could not consistently oppose Smith. He also said that in his opinion Governor Smith's declarations at Denver showed that there was no comparison between his position on the power question and that of Herbert Hoover."

The World-Herald also quoted from a Lincoln dispatch that Chas. Bryan was pleased at the stand taken by the democratic nominee for farm relief, and power conservation and goes on to say:

"There is no question about the stand of the democratic party on these great issues. I have been preaching this gospel to the people of the state for five weeks, at the rate of five speeches a day, to the greatest campaign crowds I have ever seen and there is no question as to the feeling of the rank and file of the voters of this state on these two questions."

"The only hope of the people of the agricultural west, both for economic conditions which will make possible their future respectable survival, and for the preservation of their natural power resources from the greed of the power trust, lies in the election of the democratic ticket, from stem to stern, in this election."

With former Governor Bryan was former Secretary of State Charles W. Pool, when he set out tonight for a week of campaigning which will include over two dozen speeches in the remaining days of the week. Pool, democratic candidate for secretary of state, declared that he has never seen in 30-odd years of political campaigning, as large or as enthusiastic political meetings as those which are greeting former Governor Bryan four and five times a day.

"The people seem impressed with the importance of politics this year as I have never seen them before, unless it be in 1896," Pool said. "Governor Bryan's evening meetings invariably jam every auditorium in which they are scheduled to be held, and many times it has been necessary to remove the meeting to the public park in order to accommodate the people. Eight and nine thousand people is not unusual. It is my belief that the people of the state realize that they were

FARM LOANS!

We have the cheapest and most desirable plan of amortization loan on the market today.

Five, Seven and Ten Year Straight Loans

Five Per Cent

Interest rates are always uncertain. The time to secure a farm loan is when they are low. We are pleased to say that we are now offering farm loans at a lower rate of interest and less expense in handling than we have ever been able to before. If your farm loan falls due within the next six months now is the time to negotiate for a new one. Come and see us and we will lay our facts and figures before you.

State Bank of Wayne

Wayne, Nebraska

hoodwinked two years ago during the state campaign, and they are resenting it. There are also evidences that the last eight years of republican rule, with their constant slaps in the face of the middle west, have instilled into the popular mind the idea that a change is emphatically necessary, at this national election to avoid impoverishment of western industry, which is founded on agricultural."

"Where'd you get the black eye?"  
"Jumping."  
"What?"

"Yes. Jumping at conclusions about the girl I dated last night."—Old Maid.

She—I should think you would be ashamed to look me in the face, much less speak to me in the street!

He—Well—I am kinda, but I've got to be courteous.—Illinois Siren.

FALL TERM BEGINS WITH NEW FACULTY MEMBERS:

(From the Goldenrod.)

The beginning of the fall term finds several changes in the personnel of the faculty. Miss Helen Pence of Harvard, Illinois, is our new Dean of Women. The vacancy made by the resignation of R. D. Nelson is filled by Mr. Judson Q. Owen, of Minneapolis. Mr. George Costerisan of Wisconsin has taken Professor Orr's place in the department of education. The position formerly held by Professor Leon F. Beery in the music department is held by Mr. W. Irving Horn, of Crystal Lake, Illinois. Miss Lenore Ramsey of South Bend, Indiana, assists in the department of English and Expression.

Dr. Young's Dental Office over the Ahern's store. Phone 307.—adv. tf.

Room for rent, call Phone 77.—adv

J. C. Christensen, a resident of Wayne until a few months ago, when he moved to Lincoln, was greeting Wayne friends the first of the week. He is busy all the time, we are told.

Rev. Joseph Wells, a district superintendent of the American Sunday school union was here from Des Moines the first of the week, and spent the night as a guest at the E. B. Young home.

Rev. W. Schulz from Minnesota Lake is to preach here this evening, at the Theopolis Lutheran church southwest of Wayne. He comes applying for the pulpit of that church soon to be vacant by the resignation of Rev. Fischer who is to move to Wayne.

Wm. Laase left last week to begin school work at LaJunta, Colorado, where he is to find plenty to do until next June as instructor. La Junta is a thriving city, southeast of Pueblo, in a fine farming country, and is a junction point on the Santa Fee railroad with shops and a division headquarters there.

Henry Peterson, one of the good farmers of Carrol vicinity is shipping in a herd header of the Tamrock breed of red hogs—big, rangy porkers, fine looking, if one does not look too closely at the head, for their nose appears to be long enough to eat out of a barrel. But they are said to be excellent bacon hogs—and from length of body they certainly should furnish a lot of "side meat."

P. H. Vail, Piano Tuner will be back in Wayne about November 1st.—adv. May 17-1f.

Monday was C. H. Hendrickson's 41st birthday, and Mrs. Hendrickson planned a bit of surprise for him, and when he reached home after lodge that evening he found two tables spread for bridge, and seven of his friends inviting him to take a hand. A pleasant time was passed, and then the guests were invited to partake of a luncheon of most dainty eats, which were furnished in a generous quantity. C. H. probably would not have been more surprised than he was had some criminal called him up to plead guilty to some unlawful act.

**Shell Gas is the repeater. Weber's Filling Station.**

Mr. and Mrs. Clarence Page from Barrington, Illinois, were here Monday forenoon, on their way to Randolph, where they were to visit at the home of Mr. and Mrs. Fred Lage-schulte, a sister of Mrs. Page. The fact that Mr. and Mrs. Page were on their wedding trip, and had been at Hommingford in the western part of the state visiting relatives before coming to Randolph adds to the interest of the item. Mr. Page is a railroad man at that busy station of Barrington, and the bride Emma Wiseman, a professional nurse had been conducting a successful maternity home. They were married September 16th.

**WITH THE WAYNE CHURCHES**

**First Methodist Episcopal Church**  
William W. Whitman, Pastor  
Sunday school session 10 a. m. Our Sunday school registered an increase of more than 30 over that of a year ago Sunday. The college class had an attendance of over 50. We were delighted with this splendid attendance at the beginning of the school year.

Morning worship at 11. "Eternal Love" will be the theme for our morning sermon. Prof. W. Irving Horn will sing "Lead Kindly Light". The choir under his direction will also sing "God So Loved the World."

We have opened the nursery again with Miss Faye Beckenhauer in charge to care for the children during the morning service. Bring the children, they will receive the best of care during this service.

Epworth league services for both high school and senior leagues will be held at 7 p. m.

Evening worship service at 8. Prof. I. H. Britel will speak at this service on the subject "The Place of Religion in Education."

Monday evening 7:30 o'clock, monthly official board meeting.

Wednesday, 7:30 choir rehearsal.

We cordially invite anyone not attending services elsewhere to worship with us.

**First Baptist Church**  
Rev. A. C. Downing, Pastor  
Sunday school 10 o'clock.  
Morning worship 11 o'clock. Sermon by the pastor. Subject, last chapter of the serial sermon "The Four Objections."

Young People's meeting at 7 o'clock. Geo. Downing leader.

Evening service at 8. We were greatly pleased with the attendance at this service last Sunday. Many new faces were seen. We cordially invite all to attend regularly the ser-

VICES OF THE CHURCH.

Wednesday night, mid-week service. The Visitation campaign is already on. Teams are assigned to make visits. This is a friendly call: We want all of our people to know about our church program. A short series of meetings will begin (D.V.) October 14. Evangelist R. R. Richards, leading.

**First Presbyterian Church**  
Fenton C. Jones, Pastor  
Next Sunday is Rally Day. Our Sunday school will meet at 10 o'clock. Then at 10:30 we have our Rally Day and Promotion exercises. There will be special music, recitations, drills, an object talk and the distribution of diplomas. Remember and be on hand at 10 o'clock for Sunday school and at 10:30 for the program. Don't forget, only one morning service and it begins at 10 o'clock.

At 7 p. m. we have our Christian Endeavor meeting. A good meeting and a good time for all young people.

At 8 p. m. we hold our evening service with a sermon on "Can We Know God."

**Evangelical Lutheran Church**  
H. A. Teckhaus, Pastor  
Sunday school 10 a. m.  
English preaching service 11 a. m.  
September 29, catechetical instructions 1:30 p. m.  
Junior choir 3:30 p. m.  
September 28, choir practice 4:30.  
The Ladies Aid society will meet at the home of Mrs. Carl Wasniuty, October 4th.  
You are cordially invited to attend our services.

**Grace Ev. Luth. Congregation**  
(Missouri Synod)  
H. Hopmann  
Sunday school at 10 a. m.  
Service at 11 a. m.  
The Walther League will have a social Friday evening, at the chapel. Confirmation instruction, Saturday, 2 p. m.

**SOCIAL NOTES**

The Minerva club met with Mrs. E. W. Huse for the first meeting since the summer vacation. Each member responded with an experience of the vacation. Mrs. Fred G. Dale gave a paper of Mrs. Hoover, and Mrs. F. S. Berry gave one of Mrs. Smith, wives of the two candidates for president. Mrs. Berry also told of the luncheon for Mrs. Smith held at Omaha while the party was in that city last week. A two o'clock luncheon was served by the hostess with three of her daughters, Olive, Marion and Mrs. D. S. Wightman assisting. Mrs. O'Conner of Sioux City was a guest.

At the Country Club House, October 4th will be held the first of four club dinners, and for this occasion on the committee consists of six couples, as follows: Messers and Mesdames L. W. Ellis, Roy McDonald, O. L. Bowen, F. G. Dale, H. S. Ringland and W. C. Lowry

The Business and Professional Women's club served a covered dish luncheon at the court house Tuesday evening, after which a short business session was held. A good time was had by all present.

The Coterie will meet next Monday with Mrs. Warren Shulteis assisted by Mrs. John Ahern and Mrs. H. A. Welch entertaining at a one o'clock luncheon. This is their first meeting of the new club year.

The Fortnightly club will meet Monday for a social afternoon at the J. M. Strahan home. Mrs. Strahan, the hostess, will be assisted by Mrs. J. M. Brisher, Mrs. D. S. Wightman and Mrs. Dorothy Nyburg.

The Monday club will hold their first fall meeting with Mrs. T. T. Jones next Monday, Mrs. Jones assisted by Mrs. P. H. Kohl and Mrs. G. J. Hess will entertain at a one o'clock luncheon.

The P. E. O. will hold the first meeting of the year next Tuesday. Mesdames Maggie Mellor, Ida Blair and Marguerite Mines will entertain at the home of Mrs. Mellor.

The U. D. will meet Monday with Mrs. L. C. Gildersleeve.

Small Car Driver—Excuse me, is this the London Road?  
Big Car Driver—Yes.  
Small Car Driver—Then would you mind letting me have a bit more of it.—Missouri Outlaw.

"May I kiss you now, dearest?" he whispered.  
"Wait a while," she pleaded.  
"Why?" he protested.  
"I was raised in the South, big boy, and I'm not used to these sudden changes in temperature yet."—Columbia Jester.

# Wayne Public School News

Prepared by the class in Journalism

## Assembly Notes

One hundred, fifty-two students are enrolled at the Wayne high school this year. About thirty-five are new students. There are forty-nine tuition students. Seventeen of these are new and fifteen are freshmen. The same number of tuition students was enrolled last year.

Fire drills were practiced for the first time this year on Tuesday, September 18. There are two formations, A to be used in case of a boiler room fire and B in case of a fire in the laboratory. The students need a little more practice before they can clear the building in record time.

Dorothy Davis played the march last week. Jeannette Lewis is playing it this week.

When Mrs. Allis Pollard returned from the N. E. A. convention at Minneapolis she brought with her an orange-colored crepe paper lei. These lei represent the circle of unbroken friendship and were brought here and given away by Hawaiian attending the meeting. The lei were paid for by Hawaiian pupils and the name of one pupil it attached to each one. Mrs. Pollard has suggested that the classes in English composition write to the girl whose address is on her lei.

Notebooks illustrating the poem, "Silas Marner," which were exhibited at the Wayne county fair have been returned. The notebook belonging to Francis Meyers, one of last year's freshmen who is not in school this year, took first prize. Mary Norton's notebook was given second and Kathleen McGuigan's third place.

## Office News

The school board has \$10,286.45 on hand at the present time. Various repairs have been made on the school house this summer.

Considerable money has been earned this summer by the Wayne high school band. They received \$1,150 for playing at the Boone county fair at Albion and cleared about \$750 of this sum. They received \$375 for playing at the Wayne county fair. This fund will be used to pay back money borrowed for band suits.

Wayne's first football game will be with Pilger, September 29. The second game will be at Stanton, October 5th.

Teacher's county institute will be

held in Wayne, October 1 and 2. Students of the Wayne high school are going to sell tickets for the lyceum lecture course. The first number will be a play by Brown-Meneley Co. October 3. Chief Strongheart will give a lecture October 30.

A medical examination of all the children was given last Thursday by local doctors. A dental examination was given Friday.

Peter Henkel has been elected attendance officer. There have been some children who have not been attending school.

Coach R. K. Holder, Supt. T. S. Hook and others went to Norfolk last week Wednesday evening to a meeting of coaches, officials and superintendents. Coach Henry Schulte, from the state University, and Walter Black of Lincoln, secretary of State Athletic association, spoke at the meeting.

## Athletic Notes

A squad of eighteen men has been working out daily for the past week at the fair grounds, under the direction of coach R. K. Holder. Although hard hit by graduation, the squad looks much better now than at the first of the year. Mr. Holder hopes that what the men lack in weight they will make up in speed.

The possible lineup for the first game is as follows: Ends Isom and Hendrickson; tackles, Gildersleeve and Johnson; guards, Ingham and Morse; center, Surber; quarterback Peterson; half back Porterfield and Berry; fullback, Sund.

This group is light and fast and should chalk up several victories over heavier opponents this fall.

Seven games are on schedule for this season. They are as follows: September 29, Pilger, here or there; October 5, Stanton at Stanton; October 12, Ponca at Wayne; October 19, Randolph at Randolph; October 26, Hartington at Wayne; November 9 or 10, Wakefield at Wakefield; November 16, South Sioux City at Wayne.

## Commercial Notes

The bookkeeping class is studying chapter seven in the book, "Investments and Withdrawal." Bookkeeping was not taught last year.

Members of the first year typewriting class have learned most of the keyboard. One lesson is taken each day. Accuracy tests were given Tuesday and Wednesday.

Second year typewriting is taught this year. The students in this class have completed two lessons.

Both first and second year shorthand are taught. The second year class has been taking manual work and is now taking dictation and transcription.

## Music Notes

Fourteen students are enrolled in music. The class is a new one added to the schedule this year.

The history and essentials of music have been studied the last three weeks. Next week the study of harmony to ear-training and sightseeing will be given. There are fifteen members in the Boys Glee club which practices Monday and Thursday. Twenty-three are enrolled in the Girls Glee Club which practices each Tuesday and Friday.

A mixed chorus will be organized later in the season.

The plans for the High School Operetta are being made.

## Seniors

24 girls and 16 boys, making a total of 40 pupils, make up the senior class of 1928-29.

Class meetings were held last Friday. Dick Punske was elected president, Henry Reynolds, vice president; Dorothy Davis, secretary-treasurer, and Jeannette Lewis was elected stu-

dent representative for the student council. Mr. Hook and Miss Bacon are senior sponsors.

U. S. History class is divided into two divisions this year. The class has new books by Muzzey and is beginning the study of the English settlement. Tests covering the first two weeks work have been given. Oral reports are given once a week. Reports are taken from "Time" only. Iowa State General Information tests were given at the first of the year to determine what back ground the pupils have. These same tests will be given at the close of each semester. The Physics class is quite small this year only 14 being enrolled. The class has been studying the chapter on Mechanics of Liquids. Several interesting experiments have been performed. A list of new equipment is being made out and will be sent for soon.

10 are enrolled in the solid Geometry class. They have finished the introductory part of the book.

## Junior Notes

Junior class election was held Thursday, September 13. The following were elected to office: President, George Downing; Vice President Faye Wingar; Secretary-Treasurer, Margaret Panske; and Student Council Representative, Fred Dowling. There are thirty-one Juniors, twenty girls and eleven boys. Miss Huse and Mr. Albert sponsor the Juniors.

## Sophomore News

The sophomore class has forty-six members. Twenty-six of these are girls and twenty are boys.

September 10, 1928 the sophomore girls entertained the freshman girls at a "get acquainted" afternoon tea from four to five thirty o'clock. The tea was held in the kindergarten room. The other guests were the women teachers of the high school.

The same day the sophomore boys entertained the freshmen boys. The boys played basketball and other games in the gymnasium. They then went to the fair grounds for a wicker roast. Besides wieners, fruit nectar and apples were served. Mr. Alberts and Mr. Maynard chaperoned the group.

Mr. Maynard and Miss Mielenz are the sophomore class sponsors.

At the class meeting September 13, 1928 the following were elected to office: President, Lois Pierson; Vice President, John Kemp; Secretary-Treasurer, Faunel Beckenhauer; Representative to the Student Council, (continued on last page)

## COMMISSIONERS PROCEEDINGS

Wayne, Nebraska, September 18th, 1928.

Board met as per adjournment. All members present. Minutes of meeting held September 4th, 1928, read and approved.

On motion \$260.10 is hereby appropriated from the County General Fund to the Jury Fund.

The funds of the county, and its numerous sub-divisions, of which the county, through its county treasurer, is custodian, are found to be deposited in the banks of the county, at the close of business for August 1928, as follows:

State Bank of Wayne.....\$36,930.95  
First National Bank of Wayne.....36,689.20  
Carroll State Bank of Carroll.....21,061.79  
Hoskins State Bank of Hoskins.....20,266.47  
Citizens State Bank of Winside.....18,882.99  
Merchants State Bank of Winside.....18,688.39  
First National Bank of Carroll.....11,741.76  
Farmers State Bank of Altona.....1,701.23

The following claims are on motion audited and allowed, and warrants ordered drawn on the respective funds as herein shown. Warrants to be available and ready for delivery September 29th, 1928.

## SHERIFF'S SALE

By virtue of an Order of Sale, to me directed, issued by the Clerk of the District Court of Wayne County, Nebraska, upon a decree rendered therein at the April 1928, term thereof, in an action pending in said court wherein Charles Doering was plaintiff and Charles Phillips, et al were defendants, I will, on the 1st day of October, 1928 at 10 o'clock a. m., at the door of the office of the Clerk of said Court, in the court house in Wayne, in said county, sell to the highest bidder for cash, the following described real estate, to wit: The East half of Section Twenty-six (26) Township Twenty-seven (27) North Range Three (3) East of the 6th P. M., Wayne County, Nebraska, to satisfy the aforesaid decree, the amount due thereon being \$59,427.90 with interest at 7 per cent from July 28th, 1928, and costs and accruing costs.

Dated at Wayne, Nebraska this 28th day of August 1928.

A. W. STEPHENS, Sheriff.

A30-5t

## POLITICAL PROPAGANDA

(Beatrice Sun)

About half of the press sheets and offers of free copy which come to a newspaper office these days contain articles telling why Governor Alfred E. Smith should be defeated in his race for the presidency. The democratic national committee sends out some matter in support of the Smith-Robinson ticket, but that is about the extent of democratic ammunition. On department of prohibition and public morals sends quite a batch of propaganda against the democratic ticket, and an exceptionally hot issue of some of the sectarian publications occasionally drifts across the exchange desk. The Ku Klux Klan send at least two publications and it isn't even necessary to be able to read to absorb the fact that election of the democratic ticket would mean triumph to popery and our enslavement to Rome, and domination by the foreign born. The Anti-Saloon league contributes its bit to anti-Smith ammunition dump. The matter sent out by the republican national committee is only so much extra.

If there had been in the Smith administration of New York state such scandals as have been uncovered in the national administration whose policies it is proposed to continue, the country would be hearing a lot about them. The fact is that the Smith administrations have been clean. The national administration the past eight years has been republican and if there has been any deviation from virtue, it was incidental.

# Daddy's Evening Fairy Tale

MARY GRAHAM BONNER

## TED AND BILLY

"I'm the regular full-sized horse," said Ted.

"Oh, gracious," laughed Billy, neighing. "But you must still grow."

"Still grow? What do you mean?" asked Ted, very much puzzled.

"You must grow in intelligence and kindness and gentleness."

"Of course you are all of these things now but you can always keep on trying to be more kindly, more forgiving and more gentle all the time—then you'll be a very noble horse."

"And you must be braye and strong! And always work to be more so."

"That's what they call the right kind of ambition and also good sense."

The horses had been talking for quite a while before this part of the conversation and now Ted was laughing as hard as he could.

"It's the best joke in the world," he said.

"What's the best joke?" asked Billy, looking rather unhappy, for he thought Ted was very unkind to treat his fine lecture in such a fashion.

"Why, don't you know?" asked Ted.

"No, I don't," said Billy.

"Then I will tell you," Ted said.

"I will be obliged to you if you will,"

The Driver Came Out.

remarked Billy, still in a very haughty fashion.

"You started in, at the first of our conversation, to say that you hoped you would be appreciated and I told you not to be conceited."

"That was when we began to talk."

"Then somehow the lecture all got turned on me! And I was the one being lectured, and you were the one who was lecturing."

"Well, as long as one of us was well lectured it's a good thing. And I try to take my own lectures to heart as they say."

"I don't like people or creatures to be noble about others and their actions, and to be quite careless about their own."

"Do tell me," said Ted, "why you wanted to be appreciated."

"Oh, yes," said Billy, "I had forgotten about it. You see we've been waiting for the master to drive us along."

"He has been inside the building, yonder. But that automobile alongside of us has been stuck in the mud for a long time."

"And so it makes me think that people should stop thinking of machinery all the time and of automobiles, and now and again think of their old friend the horse."

Just then the driver came out, and Ted and Billy pulled the truck away, while the automobile still stuck in the mud!

And how proud these two truck horses felt as they left the automobile behind!

## Say This Quickly

Frankie's father, Farmer Foster, followed farms. Frankie Foster followed fighters. Frankie feared father, for father fogged Frankie for following fighters. Frankie Foster frowned, for fogging felt fearful. Foolish Frankie Foster found Farmer Foster formidable. Freddie Fleming fought. Farmer Foster found Freddie fractious.

Frankie Foster, finding Freddie Fleming's friend fighting Freddie Fleming, followed fighters further. Frankie's father, finding Frankie far from farm, followed Frankie's footsteps far. Further, further Farmer Foster followed futile footsteps. Frankie Farmer Foster, finding Frankie following fighters, frowned fearfully. Fighters' fight finished. Freddie Fleming's friend flew—fearing Farmer Foster.

Frankie Foster felt fearfully frightened, fearing father's fogging. Frankie flew for farm, father following. Frankie Foster's father fogged foolish Frankie for following fighters far from farm. Frankie Foster follows fighters few.

## Cleaning Up a Million

Mother of College Freshie—Here's a letter from our boy at last.

Dad—Has he a job yet?

Mother—Yes, he's washing dishes in a cafe.

Dad—Fine. He said he was going to clean up a million.

## Should Be Masculine

Teacher—The Mississippi river is called the "Father of Waters."

Little Boy—If it's the "Father of Waters," why do they call it Mrs. Sippi?

## Snow Real Blanket for Clover Fields

### Winterkilling in Northern Sections With Severe Cold.

Winterkilling of alfalfa and clover presents examples that seem to be contradictory. Dr. A. J. Pieters explained to a gathering of seedsmen recently. Doctor Pieters, who is one of the forage-crop specialists of the United States Department of Agriculture, in discussing the adaptation of alfalfa and clover to climatic extremes and in resistance to diseases, said imported seed was, as a rule, inferior to native seed, and that strains successful in one region in the United States were to be recommended only for other regions having approximately the same extremes of temperature. Temperature averages are of small service as guides, he said. He also emphasized the important role which snowfall plays in the wintering of alfalfa and clover, particularly in the northern sections where winters are severe.

"We need to know the lowest temperatures," said Doctor Pieters. "Not only that, but we need to know whether these low temperatures will reach the plant. When plants are covered during winter under a heavy blanket of snow, the cold recorded by the weather bureau may never reach them. In the Northeast low temperatures are usually accompanied by heavy snowfalls, so that these low temperatures do not operate effectively on plants at the ground level. As an illustration, Italian clover at Chatham in the northern peninsula of Michigan has never winterkilled so much as it has near Lansing, Mich., or in Ohio, though the air temperatures at Chatham are much lower. The snowfall begins early and the plants are protected by several feet of snow during the entire period of severe weather."

### Three Requirements of a Good Alfalfa Seed Bed

Failure to obtain a good stand of alfalfa and to maintain it through the first winter frequently is caused by a poor seedbed. The three requirements of a good seedbed for alfalfa are:

1. A fine but firm soil.
2. Plenty of available moisture at seeding time.
3. A good supply of available plant nutrients at seeding time.

The best time to seed alfalfa under most conditions in eastern Kansas is during August, and the above requirements should be met by the middle of that month. Fortunately, the tillage methods which will produce one of the required conditions will also help produce the others.

One of the most satisfactory methods of preparing the soil for alfalfa is to plow the land very shallow immediately after harvesting a small grain crop and then disk it immediately. The disking will incorporate the stubble with the soil and thus hasten its decay. Shallow cultivation should then be practiced frequently enough until seeding time to prevent the growth of weeds and volunteer grain. Disking should be avoided so far as possible during this period because it leaves the soil too loose and open. The frequent shallow cultivation will make the surface soil fine, and by preventing the growth of weeds will help conserve the soil moisture and plant nutrients. If the soil is not firm below the surface half an inch at seeding time a cultipacker, or a subsurface packer should be used. There is very little danger of having the soil too firm.

### Husking Corn With Hogs Most Economical Plan

How times change! Thirty years ago turning a bunch of shotes in the corn field to help themselves would have been looked upon as a lazy man's way of harvesting the crop. Today one is behind the times if he does not know something about hogging down corn. Many experiments have proved the economy of the practice when rightly done. A suitable supplement is of greatest importance. If good forage is available near the corn, it will serve a very useful purpose. Alfalfa, rape, and clover are best in the order named. If forage is not available, tankage or skim milk is best. A mixture of tankage 70 parts, linseed meal 15 parts, and shorts 15 parts is better than tankage alone. Skim milk is fed at a rate of 3 lbs. for each pound of corn consumed or about a gallon and a half per head daily.

### Outline of Practical Plan for Filling Silo

For filling the silo, the small silage cutter owned by one or two farmers and operated by the farm tractor or gas engine is cutting the labor requirements for filling silos. If used with corn binders with bundle loading attachments the tiresome work of lifting heavy green bundles of corn stalks is practically eliminated. Field silage cutters which eliminate hand labor entirely are also coming into use.

With the husked corn cribbed with the use of portable or stationary inside elevators, then shelled from cribs having a drag-way in the foundation to eliminate hand scooping from the crib, the corn finds its way to pig, steer, lamb or country elevator, handled entirely by the products of human ingenuity instead of aching muscles and bending backs.

## HOW

MICROSCOPE IS UTILIZED IN SOUND MEASUREMENT—It is certainly odd that the microscope is better than the ear for measuring some sounds, but this is true. In determining the pitch of very high notes, it has been found that the ear cannot be depended on, and more than one investigator has therefore turned to the microscope for aid.

Sound is a phenomenon of vibration, and the pitch of any musical note can be determined if the sound wave corresponding to it is in any manner rendered measurable.

One authority has solved the problem in this way: He covers a plate with a thin layer of a mixture of olive oil and stearine, the surface slightly ridged by rubbing it delicately with the finger. To a high-pitched tuning-fork a short hair is attached and a similar hair is fastened to another vibrating body, such as a rod, whose pitch is known. The ends of these hairs trail across the prepared plate as it is passed rapidly over them, and thus is marked upon its surface a double series of wave lines corresponding to the periods of vibration of the fork and the rod. The microscope is then called into action in order to compare the length and depth of the waves, and thus determine the musical pitch of the vibrating fork, with an accuracy not attainable by the ear alone.

### How Nonshatterable Glass Is Turned Out

The type of nonshatterable glass used in windshields and windows of automobiles consists of three layers. The two outside layers are plate or sheet glass. The middle layer is a transparent sheet of cellulose material, like celluloid, which may, in fact, also be used. Two pieces of glass and one piece of this material are first cut to the exact size and shape of the desired windshield or window. This must be done with care, because after it is finished it cannot be cut or altered in size. The three layers are laid together and put through 17 different processes, including elaborate chemical cleaning, pressing between huge presses (which exert many tons' pressure on each piece of glass), heating, grinding and polishing and sealing. The three laminations become so closely welded together that they are actually one piece. In thickness it is the same as ordinary glass.

### How Molasses Saved Ship

Another of the weird tales of the sea is that of the steamship Dora, which fought a nearly losing battle in the tropics. The Dora took on her cargo of molasses at Havana and Antilla. Two days out for New York the hurricane burst. For hours all hands battled to guide the tossing vessel through the fury. The master, Captain Bush, knew that oil, when poured on a raging sea, will calm the furious waves, and wondered whether or not molasses would have the same effect. As a last resort, he ordered the cargo to be pumped overboard. Not until more than 70,000 gallons had been emptied were the waters stilled enough to insure safety. Then the pilot kept the vessel within the stilled area until the hurricane had passed over.

### How Sugar Gives Courage

That chemists of the future will not only create life, but find ways of altering personal character by chemical compounds, is the opinion of Dr. Edwin Slosson.

Such things as individuality, fascinating temperaments, and charms of vivacity are due to definite hormones, some of which are already known as chemical compounds, he tells us. Courage is due to sugar, and a variation of a few hundredths of 1 per cent. in the glucose of the blood may make the difference between cowardice and courage.

Even sex may be regarded as a chemical affair, which might be regulated by small amounts of certain compounds in the blood or food.

### How to Have Small Feet

Doctor Lepape, of Brussels, has, in the last few months, devoted most of his practice toward making Cinderellas of women, whom nature had not actually intended for the glass slipper. His patients are able to wear the smallest shoe by just having the little toes amputated. The operation makes a difference of three sizes in shoes. There are at least fifty well-known women of society in Brussels, London and Paris, including a few American women, who no longer have their small toes.

### How Dust Causes Rain

Condensation centers, nuclei, are essential to the formation of cloud and therefore of rainfall. These nuclei may be dust particles, especially of certain kinds, such as sea salt, or even, it is believed, molecules of certain sorts that have great affinity, as we say, for water. The air always contains an abundance of such nuclei, so that adding more dust to it neither increases nor decreases the probability of rain.

### How Almonds Grow

The almond is the stone or kernel of the fruit of the almond tree. The fruit is a drupe with a thin, hard covering, which splits open when ripe.

## "Fourth Estate" First Applied to the Army

Carlyle credited Edmund Burke with originating the expression "the Fourth Estate," frequently applied to the newspaper profession, but Dr. Frank H. Vizetelly declares in Editor and Publisher that the phrase is much older, having originated with Lord Falkland in the days when Richard was lord protector of England. Richard had consented to the appointment of a general council of officers to aid in the government. Parliament and the army were opposed to each other. Five hundred officers assembled and attempted to remove command of the army from civil power. In parliament, Lord Falkland, who foresaw the threatening danger, said: "You have been a long time talking of the three estates. There is a fourth, which if not well looked to will turn us all out of doors." The application here made it not to the press but to the army.

The phrase has been used at various times to distinguish the army, the laboring classes, and the press as distinguished from the church, and the lords and commons.—Detroit News.

### Balfour's Moments of Uncalled-for Anxiety

A good story against himself was told by Earl Balfour.

During the time when he was prime minister he was asked to play golf on some links on a Sunday. This was before golf became a recognized Sunday game, and he objected that it would do him no good if the fact of his playing became known.

He allowed himself to be persuaded, however, and was just beginning to enjoy the game, when to his annoyance and anxiety a couple of spectators appeared on the scene, watching him intently.

His anxiety soon vanished, however, when he overheard a brief snatch of conversation between the two.

"Who's the chap there in the check suit?" asked one.

"I don't know who he is," replied the other, "but he can't play golf."—Boston Globe.

### Old London Church

The old parish church of St. George the Martyr in London is visited by many because of its association with Charles Dickens, who made reference to it in his stories several times. Up to the eighteenth century it was the custom for the bell of the church to be tolled as a signal for fires to be put out, cattle locked up and apprentices sent home. Malefactors who died or were executed at King's Bench prison often found their last resting place in St. George's crypt. One of them, Richard Banks, executed in 1610, was taken to St. George's in the belief that he was dead. After being three hours in the vestry, "he did revive again," whereupon he was taken back to the prison to suffer a second execution. The present church was built in 1734, and stands on the site of the first one.

### Lawyer Vs. Witness

A lawyer recently engaged in trying a case asked one of the witnesses his name. The witness gave it, but the lawyer did not catch it. He repeated the question, and the man on the stand promptly repeated the answer. Still failing to get any clear idea of the name, the lawyer demanded, rather impatiently, that the witness spell his name. He did so, saying, "O-double t-i-double you e-double-l-double you-double o-double d."

The spelling confounded the attorney; and, amid the laughter in the courtroom, he quietly conducted the witness to one side, and learned that his name was "Ottiwel Woodd."

### Griming by the Day

There's a girl out our way who makes up her face and lets her complexion set every morning around a bright and engaging smile. All day long she smiles and smiles, because that's her freckled expression and she's bound to hold it. We'd like to be around when that smile-a-while girl gets good and mad some day. If she ever loses that sunny grin her face will simply go all to pieces. It is to be said for the fixed simper that it is better than a scowl, however, difficult as it may be to smile a ka-somined smile by the day.—Fayette Journal and Courier.

### Old White House Gates

The office of public buildings and grounds says that the White House gates on Pennsylvania avenue at Jackson place between the White House grounds and the State, War and Navy building, were put there during Grant's administration between 1870 and 1874. This land was originally the White House grounds. The gates were placed there to shut off that road as a public thoroughfare at night. These gates were removed because they had served their purpose and were to some extent an obstruction to traffic.

### Honors Were Even

A man was sitting beside the bed of his business partner, who was dying. Said the latter:

"I've got a confession to make. Ten years ago I robbed the firm of \$50,000—I sold the blue prints of your invention to the rival firm—I stole the letters that were used against you in your divorce case."

"Don't worry," said his partner. "Don't worry—I poisoned you!"

## Grow Cucumbers for the Market

### Now One of the 20 Important Truck Enterprises in This Country.

(Prepared by the United States Department of Agriculture.)

Cucumber growing for table supply, in contrast to production for pickling is now one of the 20 important truck crop enterprises in the United States. In 1926 nearly 40,000 acres were devoted to the crop of slicing or salad cucumber which was valued at nearly \$7,000,000. This is exclusive of the crop grown in greenhouses. Cucumbers are grown for carlot shipments in 29 states, but 14 states produce the great bulk of the market supplies with Florida by far the most important producer. Approximately 68,000 acres are planted for pickles.

### Business Increases.

From a shipment of 3,680 carloads in 1920 the business increased to nearly 8,500 cars in 1925 and 7,180 in 1926. "The present outlook for table-cucumber consumption does not warrant any great expansion of acreage," says W. R. Bentine of the United States Department of Agriculture, the author of "Cucumber Growing" which has just been published by the department as Farmers' Bulletin 1563-F. "There is need," he adds, "for more intensive culture and the production of higher grade table stock."

The growing of high-grade table cucumbers is rather difficult, owing mainly to the prevalence of insects and diseases which must be overcome by spraying and by other special methods. The bulletin includes descriptions of these difficulties and the methods of control. Returns from the cucumber crop average about \$180 an acre, but production costs are high enough to limit profits. Intensive production of cucumbers under glass in the Norfolk (Va.) section and at other points along the Atlantic coast is fairly profitable, especially to growers who are giving the work close attention. Overhead sprinkler systems or subirrigation are in use in some places, and the tendency at present is toward the provision of all the necessary facilities for making a high-grade crop.

### Packed for Market.

"Cucumbers should be shipped packed for the market, according to the United States standard grades," the bulletin says, "and under refrigeration wherever conditions require it."

Farmers' Bulletin 1563-F contains information for commercial growers rather than for amateur gardeners, and may be obtained free on application to the Department of Agriculture, Washington, D. C.

### Fertilizing Losses of Manure Are Prevented

Losses of the valuable fertilizing constituents of manure through fermentation and leaching may be prevented to a large degree by hauling the manure to the fields as soon as possible after it is voided.

As far as may be practicable it should be immediately spread and incorporated with the soil. If there is no danger of surface wash, it may be spread and left on the surface of the land. The application is best done by the manure spreader. If season and soil conditions are such as to prevent this method of handling and distribution it may be piled in small heaps and spread in early spring. On sloping ground the dressing of manure should be reserved until such time as it can be incorporated with the soil shortly following its application, or surface drainage may cause valuable constituents to be carried away.

### Around the Farm

Plenty of clean, fresh water and protection from flies and heat are necessities for the dairy herd.

Dusting plants and the surrounding ground with air-slaked lime or land plaster has a tendency to keep slugs away.

The only real basis for measuring success in the production of farm products, be they parsnips or pigs, is by the net return.

Early plant growth is brought about more easily by putting fertilizer near the seeds as is possible without injuring germination.

Keep a close watch on your birds for the appearance of lice and mites. Poultry mites may be controlled by painting the roosts monthly with used crank case oil.

Small patches of quack grass can be killed by covering with roofing paper or by hoeing every time green spears of the grass appear. If paper is used weight it down with stones or other heavy objects to prevent the wind blowing it off.

Calves on pasture should be visited frequently, and if the feed gets short they should receive grain or some other supplemental feed, say State college dairy specialists. A check in growth always is expensive because it dwarfs the animal and delays the time that the heifers should come into milk.

## HOW

EXPERIMENT WILL PROVE NATURE OF QUICKSAND—Quicksand is the name given to sand which is incapable of holding up material. Though it is bodiless, when once it gains a grip on man or beast its suction power is terrible. To understand what quicksand is like, fill a sealer with dry sand. It takes a good deal of force to push an uncut pencil to the bottom of the sealer. Dampen the sand and it is still difficult to penetrate, but soak it—mix it with a quantity of water, and keep the mixture stirred—and the pencil pierces to the bottom with ease. This shows the secret of quicksand. If the grains are separated by water which is constantly coming in from below, the sand is "quick." But the separating agent need not be water; it may be gas. Small patches of quicksand found upon a beach are often the result of decaying matter, such as dead shellfish, buried beneath the surface and giving off gas. Quicksand found inland, in river beds or on moorlands, are usually caused by underground springs. But quicksand is not a special sort of sand. Any fine-grained sand becomes quick in the circumstances described.

### How Heat of the Sun Reaches Mother Earth

The Smithsonian institution says that the earth does derive its heat largely from the sun directly. On a clear day at sea level, with the sun in the zenith, about 75 per cent of the solar rays are transmitted directly to the earth through the atmosphere. Of the remainder part is scattered and reaches the earth in the form of sky light, part selectively absorbed, in the main by water vapor, and part reflected back to space. Four constituents of the atmosphere, comprising less than 5 per cent of the total weight of the atmosphere, are very largely responsible for the losses which the sun's rays suffer in reaching the earth. These constituents are water (both as water vapor in the form of clouds), dust, ozone and carbon dioxide. If the amount of these four constituents remains unchanged, the density of the atmosphere may vary through a wide range without appreciable effect on terrestrial climate.

### How Ship Is "Arrested"

According to maritime law, ships, like men, can be arrested for failure of the owners to pay just claims against them, says Popular Mechanics Magazine. Some large ports have a special dock which is used as a sort of marine lockup. In case of an arrest, a sheriff's officer usually comes aboard, shows a warrant of arrest to the captain and nails the document to the mast. The ship is then legally a prisoner. According to British maritime law, anyone who has done any service for the ship, such as towing, repairing, lending money or even laboring as a seaman, can demand payment from the owners and, if this is not forthcoming, arrest proceedings are authorized.

### Mexican Law Rigid

It is unwise and expensive to float the metric system in Mexico. A Tampico merchant was fined 200 pesos (\$100) for advertising his wares in terms of pounds instead of kilos. The metric system is supposed to prevail all over Mexico. In the country the Indians often have vague measurements of their own, and in the cities Americans and British sometimes lapse into pounds and miles and quarts. Such lapses in advertising in Tampico will be followed by fines, the department of weights and measures has announced.

### How Magnets Are Made

There are two general methods for making artificial magnets. One is to take a bar or a needle of a magnetic substance—that is, iron or steel—wrap an insulated wire around it and place a strong electric current through the wire. The other is to take, as before, a bar or needle of a magnetic substance and place it near a magnet. The intensity of the magnetization is increased in both cases by hammering the bar while the magnetizing action is going on.

### How to Keep Evergreens

Evergreens require unusual care in transplanting. When placed in pots, urns or window boxes they seldom live beyond the first year. In growing evergreens they must receive plenty of water, sufficient cultivation, and the proper amount of fertilizer. There is little excuse for these trees dying after planting. By giving them careful attention they can be grown with success.

### Bait Landed "Fish"

There was a suitcase lying beside the road. Four Kansas women in a motor car stopped to pick it up. As they did so a lone highwayman appeared, took \$2,500 worth of diamond rings from the women and then vanished. The suitcase was just a bait.

### How Lightning Acts

There is a widely held error that a lightning conductor attracts lightning. All it does is to conduct the electric fluid to earth when lightning strikes a building.

## Winside News

The Sophomore class of the high school entertained the freshmen at a party at the school auditorium Friday evenings with the high school teachers as guests. Various games were played and lunch served by the sophomores. This party took the place of the usual class initiation.

The Winside players lost to the Wisner team Friday afternoon on the home grounds. The home team also lost to the fast Bloomfield nine on the Norfolk grounds Sunday. The game on Tuesday afternoon at Wisner was won by the locals by a score of 3 to 6. This is one game for each team in the series of three games to determine the last half of the seasons games. The deciding game is to be played this week at Pilger.

Virgil Keeney had his nose broken Tuesday when he was struck by a ball on the school grounds.

Mr. and Mrs. Fred Bright and Mr. and Mrs. Rasmus Rasmussen were at Pender and Walthill Sunday.

Mrs. C. E. Benschhof left Saturday for a visit with relatives at Eagle Butte, South Dakota, and will go from there to St. Lawrence to visit her sister.

C. E. Benschhof returned Sunday from a business trip to Sidney.

Mr. and Mrs. Cal Rippey left Saturday for their home at Eagle Butte, South Dakota, after a visit with relatives here.

The Auxiliary of the American Legion held their regular monthly meeting on Friday afternoon at Dr. B. E. Katz home with Mrs. B. E. Katz and Mrs. Frank Gray as hostesses.

Alfred and Anna Drevesen drove to Blair Tuesday.

Mr. and Mrs. Sam Coulter of Missouri, who have been visiting at the Geo. Coulter home, left Monday.

### COUNCIL PROCEEDINGS

Wayne, Nebr., Sept. 25, 1928. The regular meeting of the City Council was held in the Council Rooms in the City hall in Wayne, Nebraska, with the following members present to-wit: Mayor Orr, Councilmen: Bichel, Lewis, Miller, Wright, McClure and Strahan. Absent, none. Present, W. S. Bressler, Clerk.

The minutes of the last regular meeting were read and approved.

The following bills were examined, read and on motion allowed and warrants ordered drawn to-wit:

O. B. Haas, refund on heat bill	15.75
John Sylvanus, Sept. salary	105.00
H. Meyers, Sept. salary	125.00
G. Simmerman, Sept. salary	125.00
N. Brugger, Sept. salary	135.00
Ray Norton, Sept. salary	95.00
Rollie E. Miller, Sept. salary	110.00
Mid-West G. E. Sup. Co.

Motion by Wright and seconded by Lewis that the Clerk be instructed to advertise for bids for the painting of the stand pipe. Motion carried.

The Mayor appointed Hans Sundahl to fill the vacancy of Street Commissioner, following the resignation of H. W. Bonawitz. Motion by Wright and seconded by Lewis that the appointment be approved. Motion carried.

The matter of disconnecting the Real Estate from the City of Wayne will be taken up at the next regular meeting.

Motion to adjourn. Motion carried.

ATTEST:  
W. S. BRESSLER, W. M. ORR,  
City Clerk. Mayor.

### DEAN HAHN SPEAKS AT FIRST FACULTY MEETING

(From The Goldenrod)  
At a meeting of the Faculty Thursday evening, September 20 President Conn discussed the policies of the school along all lines of school activity. Dean Hahn gave a talk on the work done in the teachers training department. This is a teachers training school consisting of several departments. The school is not complete without each one of these departments. Each department has its responsibility in making its contribution to the preparation of teachers.

"The problem of preparing teachers calls for cooperations," he said, "Each member of the faculty must cooperate." He spoke of the influence possibly arising out of one teacher's lack of sympathy with the profession of training teachers.

Every school which trains teachers has two departments, the one giving academic training and the one giving training in the technique of teaching. These departments have some things in common. First, certain techniques of the college teacher carry over to the lower grades, the nature of giving assignments and the methods of presentation of subject matter; second, personalities of the college instructor carry over to the teaching level of the grades, personal habits, traits, dignity, and politeness of elementary teachers are easily traced to the teachers of other times.

The college instructor supplies the general education. Several years ago it was thought that the general education was adequate for the teaching profession but now we have analyzed the teaching job and find that there is a demand for different types of work and hence a differentiation of training. The service in the kindergarten, service in the intermediate grades, junior high school and high school, each demands a different training. It is the objective of the training school to give to the student the type of training needed for the branch of work which the student wants or needs.

In the training school there is first the supervisor whose duties are manifold, curriculum making, disciplining, health guarding, teaching, demonstrating, and gaining the confidence and good will of the community in which she works. The hours are long and the calls many.

In the training school of the Wayne State Teachers college the teachers are given an unusual opportunity. The classes in observation and methods are supervised in the observation as well as in the study of methods. The supervisors demonstrate in the actual class room the method studied and the student is not sent out to observe a generality and gain nothing, as is often the case in teaching training classes. President Conn in a talk following Mr. Hahn spoke of the method used in Wayne and complimented Dean Hahn who is responsible for the method used here.

## Wayne Public School News

Prepared by the class in Journalism

(continued from page six)

Loha Porterfield.

### Seventh Grade Notes

Thirty-three pupils are enrolled in the seventh grade this year. Netha James was absent last week because of a bad cold.

For exhibits sent to the fair, first prize was awarded the penmanship exhibit and second prize was awarded the picture study booklets.

The A reading class is now dramatizing "The Bishop and the Convict." Members of the art class are drawing different kinds of trees. The pupils improve their own ideas by studying the trees during recess.

New sash curtains have been placed at the windows.

### Sixth Grade Notes

Sixteen students are enrolled in the sixth grade this year. There are eight in each class.

The sixth grade prepared a penmanship exhibit for the fair, it was awarded second premium.

The children have been very interested in a lei wreath sent by a little Hawaiian girl. They all plan to write letters to her telling her about their school.

Paul Benson has been absent from school this week. He is in the hospital with an infected foot.

June Gayle Jones and Margaret Stoven were each absent two days on account of sickness.

Stanley Norton was absent Tuesday.

### Fifth Grade Notes

The fifth grade consists of 18 pupils; twelve are in the A class and six in the B class. Vera Berry is the only new pupil. She attended the training school last year.

There has been but one absence and no one has been tardy so far.

Mrs. Randall has been a visitor to this class.

The children have started to make penmanship folders. They have drawn flowers with crayons. These fall pictures and the autumn leaves, which now decorate the wall, will be preserved for booklets. The wall is also decorated with vacation pictures.

A health contest has been started. Two sides have been chosen, one side is called the "Buick" and the other the "Packard." Frank Strahan is captain of the "Buicks" and Ima Jean Kilborn of the "Packards." The officers are as follows: president, Peggy Strahan; vice-president, Josephine Ley and secretary, Margaret Jones. The president and vice-president will act jointly and both are called president; one presides at the meeting one week and the other the next. Both sides have meetings every Monday morning. The coat rack is used as the race track. Each car is represented by a paper picture of the cars from magazines. A pole with a flag on it marks the middle of the track. Every member on each side must have his hands, nails, neck, ears, face and teeth clean before he can move one mile; one mile is represented by the distance between two coat hooks.

The A class is studying informal and formal invitations in language. The B class is studying the use of the comma.

Two projects have been planned in geography; the A class, "the African Village", for which material is now being brought; the B class "Rubber in South America." In the meantime each class is making a thorough study of the projects.

New curtains have been placed in the room. The room has also been painted during the summer.

### Fourth Grade Notes

Twenty-six are enrolled in the fourth grade this year. There are thirteen in each class.

The B class has begun work in their Thorndyke arithmetic books.

Tests in Geography were given to both classes on Monday.

A property rights lesson was studied Tuesday. A story was used to illustrate property rights.

Gerldine Gamble won a prize on her health poster at the fair this year.

Francis Sydow left the fourth grade last Friday, she will attend school in the country.

Margaret Randall had a birthday party last Friday, cakes were served to members of the class.

### Third Grade Notes

Two new pupils have entered the different classes of the third grade. Fern Evans of Wimer, South Dakota, has entered the B class and Catherine Woven the A class. The enrollment is now 24 pupils, 8 in the B class and 16 in the A class.

The B class is having a contest in penmanship. The reward of this is to be allowed to use pen and ink in writing.

The grade is holding a health contest between the boys and the girls.

The pupils are drawing fall flowers with crayons in their art work. They had azoanoe and Indian poster entered at the fair.

Last week Helen Mabot gave a talk on an octopus. She showed an octopus which had come from California. Orville Graham had a birthday party for the children on his eighth birthday, September 11. Mrs. Graham served dixie cups and lolly pops. Dorothy Liedtke celebrated her birthday September 13 at school. Mrs. Liedtke served chocolate eclairs and gum.

Other visitors to the third grade were Mrs. Ross and her daughter Mildred.

### Second Grade Notes

Seventeen pupils are in the second grade this year. Three new pupils enrolled last week, Jean Mines, Lauretta Mahne, and Norman Manke. Two pupils left school last week. Lucile Kingdom moved to Sioux City and Bobby Hollam moved to Fort Travis, Houston, Texas. Bonadel Roland, Richard Gildersleeve and Bonnell Jones were absent because of illness.

The second grade took eight prizes at the fair this year. The girls are ahead in the Health contest. Health posters were made last week.

### First Grade Notes

There are 18 students attending the first grade this semester. The new students entering since school started are Alice Mae Stoven and Reva Barns.

The last years class won a second prize at the fair on a card of water color paintings.

The children were all weighed and measured during the first week, Margaret-Larson was the only member who was exactly normal. Two were over weight and the others were below normal. Attempt will be made to bring their weights to normal. The pupils will be weighed each month.

Mary Catherine Cavanaugh had a birthday party and treated the first grade. Games were played.

### Kindergarten Notes

Mrs. Ed Rucizka was a visitor in the kindergarten this week.

These little students, who are now in the kindergarten, are starting on a long period of school life. Some of them will probably be in the same class when they are graduated. Their names are: Ermajean Dunn, Edna May Dimmick, Bonni Beth Greene, Marjorie Ann Gildersleeve, Barbara Ellen Hook, Wilma Geen Hoguewood, Nona Jane Hall, Annabelle Iona Jensen.

Mildred Ann Mau, Elaine Jane Rhoades, Amber Ivadeak Richards, Hollis Darlene Simmerman, Hazel Thompson, and Lila Westerhouse. Amber Richards was five years old September 19. A party was given for her in the kindergarten room.

### FINISHED NEXT SEMESTER NEIHARDT HALL TO BE

The progress of the new girl's dormitory, known as Neihardt Hall, has been extremely marked since the close of the summer session.

The outside work is nearly finished, only the leveling of the grounds, the painting of the windows and the placing of the iron grille across the front of the terrace remaining to be done.

The inside of the building is now completely plastered and all rooms are tinted. Rough wood floors have been laid in all the rooms except the basement. Finished woodwork is being put into place rapidly upon the third floor. Terrazzo floors are on all the corridors and stairs and require only the grinding to make this part of the building complete. The marble, wainscoting and stalls of the toilet and shower rooms are complete on the third floor.

During the next two weeks the automatic Otis Elevator will be installed. There is no question but that the

building will be ready for occupancy by the next semester. Its capacity, when completed, will be one hundred twenty girls. Later on in the future when another wing will have been added to the present structure, its capacity will be two hundred women. Pres. Conn, the Dean of Women, and Mr. Huntmer, architect in charge of the building, are to select the furniture.

All plans for this new dormitory have been carried out. Nothing of which Mr. Huntmer has dreamed or planned for the excellence of this building has been left out and it is safe to say that it is the finest building of this type to be found among the buildings of any of the forty schools which Mr. Huntmer visited while making the plans for this structure.

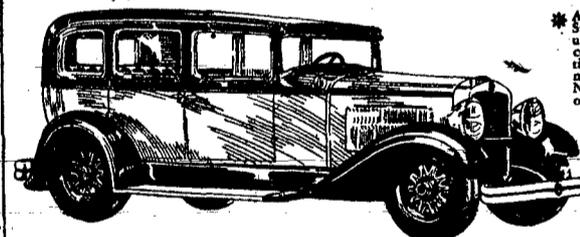

Ned—Say, Spraggs, call up my girl; tell her you're me and that you won't be over for a couple of hours yet.

Ted—Won't she recognize the voice? Ned—No, she's out with Jones and it will only be her roommate pretending that it's she.—Grinnell Matheaser.

Gladys F.—Will you be an usher at my wedding? Have you had any experience?

Margaret R.—Do I know anything about weddings? Well, I guess. I sold the ammunition for one and held the lantern for another.

THE WORLD HAS A NEW AND FINER MOTOR CAR

\* Art Goebel won the Dole Race from San Francisco to Hawaii then to bang up a new record for a Coast to Coast continuous flight, with a twin ignition, high compression, valve-in-head motor. And then he bought a new Nash "400" to get the same kind of performance from his motor car.

Special Six "400" Sedan  
\$1345 f. o. b. factory  
fully equipped

## It was a Twin-Ignition Motor that carried Lindbergh over the Atlantic, Goebel \* over the Pacific, Byrd over the Pole!

In history-making flights Lindbergh, Byrd, Goebel\* and a host of others have established dramatically and conclusively the superiority and reliability of twin ignition, high compression, valve-in-head motor performance.

spark plugs (airplane type) to each cylinder instead of one; 360 sparks a second instead of 180, at top speed, burns the highly compressed gases more thoroughly and economically.

And all three principles are combined in the great new Nash Twin Ignition Motor which powers every Nash "400" Special and Advanced Six model.

The result is more power from less gasoline, and ordinary gasoline at that. No special, high priced fuels are required for the Twin Ignition Motor.

The Nash Twin Ignition Motor, with two ignition coils instead of one, two

Once you drive the great new Nash "400," you are certain never to be contented with the performance of older types of motors.

## NASH "400"

Leads the World in Motor Car Value

### IMPORTANT FEATURES—NO OTHER CAR HAS THEM ALL

Twin-Ignition motor	High compression	Salon Bodies	Short turning radius
12 Aircraft-type spark plugs	New double drop frame	One-piece Salon fenders	Vanity case and smoking set, leather mounted
Lovejoy shock absorbers (Exclusive Nash mounting)	Aluminum alloy pistons (Inver Struts)	116-inch wheelbase	Nash Special Design front and rear bumpers
	7-bearing crankshaft (bellow crank pins)	Body, rubber-insulated from frame
