I ly light."

It was the light of that despair that often preceded victory. It means victory or to them death. Behind them lay, the leaders of prohibition ready to cover their retreat and mobilize their seattered ranks; on either flank stood Union Labor and the dull leaden form of knownothingism, arisen Phoenis like from its abee; in front, entreached behind all the walls or good government, hay democracy, with gailant Cleveland at its head.

As the sameke of battle clears away we see the victors already rioling over the spois, and the vanquished leaning upon their swords and shields, comforted but by the thought that the sacred trust reposed in them has not been betrayed, even in the great struggle for supremance.

th gine 17. LLGS., British man of swap of your plying in the Mysile river three a case up to bill at the little American army interendent on hunter LHG. The ship three more than one ball, but this particular one was procedure parties the 250th and savel. The other day, at the 250th and iterate you have the Botton Ancient and Henorable Artillery some party of British stullary has a back of the same of t fittle out of order I am often at a loss to know what to da. Xer I suppose it one know how, it is generally easy to put them right For instance, Auntilia, how would you fasten out bossed leather on wood when it gets-losse? to a party of British arrillery near the bad come over to belp colebrate the occasion. The presentation was made at the dinner by Colonel Walker. "I hold in my hand," said Colonel Walker or, "a cannon bell thrown by a British "I would make a little coment of molted India rubber mixed with shellac varnish," said Aunt Julia, who is predited with knowing more about the er, 'a cannon bell thrown by a British ship of war at the patriot army on Bunker Hill, June 17, 1775. Through adds and ends of hoasekeeping than applicitly ches in her circle.

"And how would you keep varnished, wood looking fresh and bright?"

"I would rub it thoroughly with oil the kindness of Mr. Hassam, who gives it to this company to present to you. I give it to you to carry home as a memente! (handing the caune) ball Laished, wood looking fresh and bright?"

"I would rab it thoroughly with oil from time to time. Onl. a little oil most be used; and that should be care. It will be the seed and that should be care. It will be the seed and that should be care. It will be the seed and the seed of the wood will be worse than the first."

"And suppose your white marble lisbs and maniels get discolored, what we have the seed of the wood will be worse than the first."

"And suppose your white marble lisbs and maniels get discolored, what we have the seed of the wood will be worse than the seed of the word of the word what the word of the word o a-memater (thruther-the-camon-ball, to Major, Dustant amid hearty cheets and applane). "It was thrown at us a war. We give it to you in pasce as in a token of the amity which lives to-day between our great nations, and which was lary any live foreyer." "There is time for wonderful changes in a hundred years," any to New Haven Palladium, in commenting on

of the earth." - Army and Navy Reg ister, New York.

Rudolph Clausius.
Rudolph Jerlan Emmanuel Clausius,
the noted German physicist, died at
Bogn on the 24th of August. He was born in 1822 at Kocslin, in Pomerama He begun his studies at the gymnasium He biggarhis studies at the granesium, and pursued them at the university of Berlin, and them at the university of Berlin, and them at Haile, where his was made decent at Berlin, where he was privat docent at Berlin, where he as the same blue laught less the same before the Berlin School of Artillery and Engineering up to 1835. Two years strovard he was appointed by the Swiss Federal Counties to the chair of physics of the Polytechole school of Zuruch.

The work of Clausius was purely doctrian. He made no experiment, and contented hisself with applying the results obtained by others to his mathematical deductions. His work was connected with alther general metablishes of thermodynamics and

"It would have given

the above. "It would have given the grizzind old fighters of the British war ship a queer feeling If they could have known, when they touched her off-and seat that ball expecting at the Yankee breastworks on that June-day, 1775, that, a hundred yazar later the Uall would be handed back over a

friendly dinner table as a token of unity and concord between the two greatest and most enlightened powers

mechaniss or thermo-dynamics an electric ty. It was published for In most part in the Anuals of Poggen

dorf.

His first memoirs upon the mochanical theory of heat date back to 1830, when he catablished the proposition upon which he relad to demonstrate the second-law of thermo-dynamics, viz, that heat cannot of itself pass from a warner to a colder body.

The chief memoirs of Glausius were printed in two volumes, which have had a large seals and been remitted.
