Mayor McKinley will be elected the next Governor of Ohio.

The Women's municipal support bill was defeated by telegram last Thursday.

It was a caution how the republicans scooped everything at the recent municipal elections all over the state of Iowa.

According to the Judicial Department the counties of Knox, Pierce, Wayne, Antelope, and Madison will constitute the Ninth Judicial District.

The ghost dance is being indulged in again by a few Indians on the reserve, but there is no apprehension of another outbreak.

Gen. Palmer, (Dem) was elected United States Senator by the Illinois legislature yesterday on the 15th ballot. The vote stood Palmer 103, Lindley 100, and Streeter 1.

The defeat of the proposition to re-submit the prohibitory amendment in Kansas by a vote of 72 to 27 indicates that the election in that state was anything but a democratic victory.

The suggestion to hold a meeting of the publishers of north-eastern Nebraska, seems to meet the approval of a large number of the fraternity, therefore a meeting will doubtless be called for the middle or latter part of April.

With a bill prohibiting the sale of patent medicines, the citizens of Wisconsin ought to feel pretty sure of a few more days of earthly existence. We do not know how it will affect the doctors from a protective standpoint.

The South Dakota legislature come to the conclusion that there is nothing like water, therefore no re-submission goes, but a large quantity of some of the worst quality of fire-water will flow as freely as though nothing had ever happened.

Wayne county should have a care. There is a deal of bad Indian blood in Thurston county which it will not do to stir up.—Thurston County Republican.

It is possible to extract blood from a turnip, or anything pertaining to Thurston county, let her stir. However, we believe the blood of that county is in a coagulated state and that coma has set in from which she will never arouse but will depend for the happy hunting grounds.

The Wakefield Republicans suggest Monday, May 4th as a good time for holding a convention of publishers of the counties of Wayne, Cass, Cedar, Dixon, Dakota, Thurston, Pierce, Madison, Stanton, Cuming and Burr. And that Wayne be the place for holding said meeting. We accept of the time suggested, and are in favor of the meeting if enough of the publishers will make known through the columns of their papers their acceptance of the date and their intention to attend.

The Pender papers insinuate that the attempt now being made by the publishers of Wayne county organization is attributable to a few hungry lawyers over in Wayne who are looking for a "grab sack," and when we consider the fact that somebody brought the Presbyterian church at Wayne the other night, it looks very much as if the insinuations are justifiable.—New Nebraska.

Well the Argus casts a long, glittering stab at Wayne's attorneys but it should bear in mind that they are not near the gambling dens of Covington, like the lawyers (?) of Dakota City, therefore they must exist in some other way.

The Omaha World-Herald—from a rocky standpoint—can swing into line contrary to its past precepts and accuse new tariff laws as to our present soldiery, and yet so bungle that the dimmest eye could perceive, especially as regards the silver question, it likes Cleverland ideas, and wears the bigotry "me too."

SPEECH OF HON. WILLIAM MCKINLEY, JR.

DELIVERED BEFORE THE SENATE ON FEBRUARY 12, 1891.

(Continued from last week.)

Mr. President, that country is the least prosperous where low prices are secured through low wages. Cheap foreign goods, free or practically free in competition with domestic goods, involve cheap labor at home or dependence upon foreign manufacturers.

The protective system, by encouraging capital to engage in productive enterprises, affords to labor, not only a higher, but greater rewards than could otherwise be secured, depending them against ruinous foreign competition.

England is the only country which imposes a tariff exclusively for revenue. This has been her policy for nearly half a century.

Every city and town has its unemployed. Millers are in poverty. Agriculture languishes; land is going out of cultivation; trades are going down; mills and furnaces are working half time; strikes run through every foreign goods and their things possible; mountainous wealth? At this day we have three millions of poor who in the course of the year are relieved in some way by the poor laws.

Mr. President, we find nothing in our own experience to justify the reversal of our protective laws. We have nothing to take back; nothing to apologize for. A low tariff has always increased the importation of foreign goods and our money runs out; multiplied our foreign obligations; produced a balance of trade against the country; supplanted the domestic production and manufacturing industry; and our farmer's home market without improving his market abroad; undermined domestic prosperity; decreased the industries of the nation; diminished the credit and energy of our country and investment, and robbed labor of its just rewards.

Mr. President, we find nothing in our own experience to justify the reversal of our protective laws. We have nothing to take back; nothing to apologize for. A low tariff has always increased the importation of foreign goods and our money runs out; multiplied our foreign obligations; produced a balance of trade against the country; supplanted the domestic production and manufacturing industry; and our farmer's home market without improving his market abroad; undermined domestic prosperity; decreased the industries of the nation; diminished the credit and energy of our country and investment, and robbed labor of its just rewards.

Industry and property were exceedingly depressed from 1784 to 1790, and again from 1818 to 1824, under the low tariffs then in operation; also from 1837 to the end of 1843, under the Compromise act of 1833, and again from 1846 to 1861, under the Free Trade Tariffs of 1846 to 1857. The depression which prevailed during all these periods was felt in every individual pursuit and national industry.

Mr. Edward Atkinson, a careful student and himself a Tariff reformer, recently wrote: "The share of the annual product which is now falling to the hands of the street sweepers, a bigger share of a bigger product than workmen have ever attained before in this or in any other country."

Mr. President, we find nothing in our own experience to justify the reversal of our protective laws. We have nothing to take back; nothing to apologize for. A low tariff has always increased the importation of foreign goods and our money runs out; multiplied our foreign obligations; produced a balance of trade against the country; supplanted the domestic production and manufacturing industry; and our farmer's home market without improving his market abroad; undermined domestic prosperity; decreased the industries of the nation; diminished the credit and energy of our country and investment, and robbed labor of its just rewards.

capacity. Idle mills are being started. The only menace to our advancement and prosperity, in our wage-earners and farming interests, is the party which is opposed to the repeal of the new law and the substitution of the British system in its place. Free and full discussion will avert the danger. Nothing else will.

The Greatest Traveler. In point of actual distance covered, the greatest traveler in the world is said to be Chief Engineer Sewell, of the White Star fleet, who is well known in this city. While in charge of the engine department of the vessels of that line, including the Britannic, Mr. Sewell completed 192 round trips between Liverpool and New York, traveling the enormous distance of 816,400 nautical or 941,000 standard miles, nearly four times the distance between the earth and the moon. This is said to be only about two-thirds of the total distance traversed by Mr. Sewell since he became a seagoing engineer.

First and Last. The increasing prevalence of the scientific spirit, with its passion for exact statement, makes it more and more necessary to be only too precisely what they mean and nothing else.

After the Panic. Miss Neversay—Why does paw look so glum, maw? Did the bank keep his money in safe? Mrs. Neversay—Worse. The bank he supposed to keep his money in didn't fail.—Good News.

A beautiful skin, bright eyes, sweet breath, good appetite, vigorous body, pure blood and good health result from the use of Dr. Williams' Pink Pills for Pale People.

The New Discovery. You have heard your friends and neighbors talking about it. You may be one of the many who know from personal experience that there is a thing in it. If you have ever tried it, you are one of its staunch friends, because you are not falling about it, but that when once given a trial, Dr. King's New Discovery ever holds a place in your mind.

The Press (New York). We have no controversy with Great Britain or her fiscal system. She is free to adopt the one which her statesmen believe will best serve her welfare and that of her people. Each nation must settle its own domestic policy; each is supreme in that sphere, and should brook no interference from the outside.

The Press is the organ of no faction; no wire; has no animosities to gratify. The most remarkable Newspaper in Success in New York. The Press is a NATIONAL NEWSPAPER. Cheap news, vulgar sensations and trash that are the vermin of the press.
