It is interestingly illustrative, of the remarkable progress in this era that the first line of railway built south of Liverpool, and on which Nephenson ran his famous engine. the "Rockt," was superseded by a, new structure only about a wock ago. The line runs from Licestor to Swan-nington. It has always been a locall line with little traffic, and is remains to day in almost the primitive con-dition of early days of railroading. The static was pomph to Licless-the station-was opened July 17-1832. Railway tickets of metal were used. and some of these are still in exist-ence.

Do You Wish the Finest Bread and Cake?

It is conceded that the Royal Baking Powder is the purest and strongest of all the baking powders. The purest baking powder makes the finest, sweetest, most delicious food. The strongest baking powder makes the lightest food

That baking powder v lich is toth surest and strongest makes the most digestible and wholesome food

Why should not every housekeeper avail herself of the baking powder which will give her the best food with the least trouble?

Avoid all baking powders sold with a gift or prize, or at a lower price than the Royal, as they invariably contain alum, lime or sulphuric acid, and render the food unwholesome

Certain protection from alum baking powders can be had by declining to accept any substitute for the Royal, which is absolutely pure.
