We have been shown a special illustrated edition of the Wayne, Nebraska, dated September 12. Among. other good things, we find an injunction to its readers to "pot their flowers before the frost." One of their numerous cuts represents a harvest field, where the grain is placed in old fashioned bundles, and shocked up. We, in California, are in the habit of using the "conlined harvester," which takes the wheat heads from their stack and runs them through the thresher all and runs them through the thresher all and runs them through the thresher all at one time. We notice a price list as follows: Wheat, 35c. per bushel, Oats, 11c.; Corn, 22c.; Flax, 85.; Butter, 8c. per lb.; Eggs, 8c. per doz.; Feat.oss, 25c. per bushel; Hogs, \$3.60 per cwt. All of which indicates that the farmers are having lots of "Cleveland's good times,"—The Placer Argus, Auburn, Calf.

ARBITRATE OR FIGHT

ULTIMATUM TO ENGLAND THE VENEZUELAN AFFAIR.

New York Paper Claims the Sectary of State Has Instructed Am bassador Bayard to Notify Eng-land Uncle Sam Will Not Tolerate Her Present Position.

Must Arbitrate or Fight.

New York special: A Herald's Washington special says: The great international question of the hour is the Venezue-lan boundary dispute. Secretary Olney has prepared a dispatch to Amhassador Bayard which will soon bring the matter, to an issue. This dispatch is of a positive and most unequivocal nature. As soon as it shall be placed before the British government it will raise a question which can be settled only by the retreat of one or the other government. The stand taken by the United States in this dispatch is one which involves the oldest and most sacred which involves the oldest and most sacred

which involves the oldest and most sacred raddition of the government—the enforce-ment of the Monroe doctrine. Secretary Olney's dispatch is in sub-tance a declaration in the most positive anguage that the United States will never consent to the British occupation of the disputed territory in Venezuela unless hat nation's right there is first determined by arbitration.

arbitration.

First—If the quarrel with Venezuela is ordinary boundary dispute, having its lgin in faulty descriptions, imperfect revers or other misuaderstanding, result to urbitrate the same is contrary to cedents set by Great Britain hersel atrary to the practice of all civilized

and contrary to the practice of all civilized nations.

Second—If, on the other hand, as appears to be the case, and as is the belief of the President of the United States, it disputes as to the location of the boundary line is a mere disguise under which Great Britain is attempting by superior force to extend her territory in America, this is directly violative of the Monroe doctrine, and will never be submitted to by the United States.

This is the substance of the dispatch, which, in all probability, will soon become one of the most famous dispatches ever sent out from an American state department. It is a direct, positive and practical application of the Monroe doctrine in its broadest aspect to the quarrel between Great Britain and Venezuela. It commits the United States_to a position which would be adhered to.

What Analysis of the General Trade
Situation Shows.

New York special: R. G. Dun & Co.'s

Weekly keview of Trade will say:
Commercial failures in the third quarter
of 1805 were 2,702, with liabilities of \$502,467,179, averaging \$11,521 per firm, against
10,028 last year, or about 15 per cent. more.
The rate of commercial mortality, 2-34,
failures in a quarter for every 1,000 in
business, is tower than last year-and theporportion of defaulted liabilities to the
solvent business represented by payments
through clearing houses is but 2.49 per

in the same quarter last year; in trading,
\$8,077, against \$6.48 last year, and the
bank failures, not included in the above
have been \$1, with average liabilities of
\$114,000, against \$110,036 last year. In the
third quirter, when failures are usually
low, the average of 11bilities herosperous years falls below \$10,000, the number
below two in 1,000 firms, the defaulted liabilities below \$2 per 1,000 exchanges and
below two in 1,000 firms, the defaulted liabilities below \$2 per 1,000 exchanges and
below two in 1,000 firms, the defaulted liabilities below \$2 per firm in business. Thus the

Durrant's Lawyers Working Hard to Save Their Client's Neck. San Francisco special: After gather-ng up a few ragged ends of the testimony eft over from last week the defense in the ng up a few ragged ands of the testimonyeft over from last week the defense in the
Durrant case began the building of an
dibi for the young medical student from
pril 4 to April 12 inclusive. The purose of the albi is to impeach the testimony of Pawnbroker Oppenheim and W.
Phillips, who testified that on April 12
idrrant tried to pawn Blanche Lamont's
mgs at Oppenheim's store. During the
ourse of the testimony which covered
urrant's movements on April 4 and 5 a
traggle was precipitated by District Atorney Barnes, who again challenged the
cliability of a roll call book at Cooper
oliege. The argument ended in a vicory for the defense so far as the question
fore the court was concerned, as Judge
sturphy sustained an objection to a question propounded by himself to the witness
and cut off the discussion.

The building of Durrant's alibi was beun with the testimony of Dr. A. W.

Dr. Josiah "Hartseli of Canton, O., read a paper on "The Mississippi River as a Sewer," in which lie took strong ground against the pollution of that stream with sewerage. He scored Chicago severely for emptying its sewerage into the Chicago River. Dr. Hartsell said 281,000 tons of garbage and 4,000 dead animals suffering River. Dr. Hartsell said. 281,000 tons of garbage and 4,000 dead animals suffering from glanders, tuberculosis, etc., had been thrown in the Mississippi River in one year by four cities. The Mississippi drained 800,000,000 acres, the pollution of all gradually drifting into the noble stream.

"The government should put a stop to this," said Dr. Hartsell, "but the average politician is not a sanitarian. Every other nation has its national board of health and its high time that our government follows."

LIVELY.TIMES IN CHICAGO.

Numerous Broken Heads as a Result of Election Primaries.
Chicago special: Bruised, battered and bleeding the contending city and county factions in Republican primaries retired from the field of conflict to take a brief rest preparatory to fighting the battle to a finish in convention. Both factions claim a victory. Broken heads and black eyes in more than a score of primary precincts attested the fierceness of the battle waged between the city and country factions for control of the convention and for supermacy in the local party organization. The result of the riots at many of the polling places will be made manifest in the convention.

Republican State Convention,
The work of the Republican state convention at Lincoln was by acclamation, and goes down in the political history of Nebraska as the most harmonious state meeting of Republicans. All the nominations were unfluinmous and are:

Justice of Supreme Court—S. L. Norval. Regents of State University—Chas. S. Morrell and H. L. Gould.
Mr. Norval is at present justice of the supreme court of the state. The most exciting feature of the convention was a resolution offered by D. D. Courtney, a Lancaster County delegate, denouncing the A. P. A. and all other secret political organizations. Delegates tried to prevent its introduction, but its author was determined to place the convention on record, whether it served a good purpose temporarily or not. The A. P. A. sentiment of a few of the leaders and political manipulators was too strong for the opponents of the oath bound political organization and the measure was referred to a committee without being read, and never reappeared in spite of the demands.

The platform, which was adopted with great enthusiasm, denounces the faltacies of all other political parties; declares in favor of tiberal pensions; calls upon all patriotic people, irrespective of former political affiliations, to join in assisting to bring back prosperity to the stafe and nation by re-enacting protection to American industries on the basis of the McKinleya et; favors the use of both gold and plotter as standard money; opposes all phonetary legislation that would result in either gold or silver monometalism; demands the maintenance of a national currency, every dollar of which, whether in gold, silver or paper, shall be of equal debt paying or purchasing power; denounces the Democratic national administration for its supine neglect of American continent threatened with spoilation or conquest by any European power; hearting of the government in favor of the independent states of the American continent threatened with spoilation or conquest by any European power; hearting some powe

Morrison Murder Case.

The Morrison murder case is still the main topic of discussion at Chadron. The lastest move in the case is the filing of a motion for a new trial, alleging gross misconduct on the part of attorneys for the prosecution, and bias and prejudice on the part of several of the jurors as a reason for setting asi. the verdict. The arguments of counsel will not be heard until December.

ber. The defense has secured a number of affidavits tending to show that Jurors Palmer and Poterson had expressed their conviction of the guilt of the secused prior to their selection as jurors, and had stated their intention of "unching" him if they

Jury Out Only Two Hours Brings in a Verdict - Defendan Killed His Wife and Said a Burglat

Sentenced for Life.
Rev. William E. Hinshaw is guilty of
the murder of his wife and will spend the
remainder of his life in prison. Such is
the verdict of the Danville, Ind., jury
after being out two hours and twenty

after being out two hours and twenty minutes.

Jan.-10 last William E. Hinshaw was found on the road in front of his house in Belleville, Hendricks County, with seventeen razor cuts on his person and two pistol wounds. He said robbers had entered the house and shot his wife, He had engaged in a dendly encounter with them and they had inflicted the wounds before leaving. He directed those who found him to hunt his wife, and she was found unconscious with a bullet in her head. She lived sixteen hours, but never spoke. Hinshaw lay in bed for ten dilys and was then well. His story was believed at first, then susuicion began to grow that the burglar story was not reasonable. In the snow on the ground his tracks could be seen, but no tracks of a burglar. His conduct was flippant and he continued to preach. He was popular with the women and it was common talk he was a very light-hearted widower. The grand fury convoied and he was indicted arrested, and lay in jail since May. His friends gathered around him and visited him zoustantly in jail.

Sept. 4 his trial commenced. The trial has covered four weeks, one week of which time was lost through the sickness.

Sept. 4 his trial commenced. The trial has covered four weeks, one week of which time was lost through the sickness of a juror. The trial has been most bitterly contested, there being expert testimony of the highest order on the point of whether the woman could have walked and talked after receiving the fatal wound in the head. Both sides had expert testimony on this.

The case was argued five days and one

wound in the head. Both sides had capert testimony on this.

The case was argued five days and one-half most exhaustively and the short time the jury was out showed that the jury determined every point as they went along. The verdict meets public approval. When the defendant refused to go on the stand in his own behalf there was nothing more needed to convince most people that he was guilty, although a hanged jury was the most they expected out of the trial. Hinshaw's attorneys will file an annication for a new trial, which, if when the detendant retused to go on the stand in his own behalf there was noth-ing more needed to convince most people that he was guilty, although a hanged jury was the most they expected out of the trial. Hinshaw's attorneys will file an application for a new trial, which, if granted, will result in a change of venue.

THE MAYA WOMEN.

THEY ARE INTELLIGENT, SWEET TEM PERED AND BEAUTIFUL.

the Olden Times These Wives of the First Owners of America Were the Mothers of a Courageous Race, and The Never Looked Into a Mirror.

Never Looked Into a Mirror.

An unfamiliar word, but as old as the hills almost, is this word Maya. Among the Brahmans it means illusion and is the name of the earth, the materia world, which, according to the Brahmanical doctrine, is nonexistent—"ax illusion. Maya Devi was the name of the beautiful mother of Buddha. Mays in the feminine energy of Brahma and the mother of all the gods, even of Brahma himself. Any Greek dictionary informs us that Maya is the good mother of all gods and men. In Japan the goddess Maya is still worshiped. The beautiful Indian poem "Ramayana" tells us about a great navigator named Maya, who in ages long gone by took forcible possession of the countries at the south of the Hindoostanee peninsula and settled there.

The Maya people of America were in

The Maya people of America were in The Maya people of America were in olden times a great nation, occupying the territory comprised between the isthmus of Tehnantepec and that of Darien. We know that they were navigators, their boats being depicted in very ancient books and paintings. In 1502, when Columbus came to America for the fourth time, he met on the high seas a large boat, in which were men, women and children. It also had a cargo of merchandise, consisting of wears.

women and children. It also had a cargo of merchandise, consisting of weapons, tools, products of the earth and ready made garments. The travelers called themselves Mayas. They were in the habit of traveling to Cuba and other islands to trade with their inhabitants. The Mayas were neatly clothed in white cotton raiment. They were self possessed and courteous. Fifteen years later their land, today called Yucatan, was invaded by the Spaniards, but it cost the white men 25 years of warfare to get control of that country, for every Maya fought like a hero. They were sons of fearless mothers.

In reading the works left by the Spanish chroniclers—priests who accompanied the soldiers—we learn that the Maya women were very good looking, as many are at the present day; that they were charitable, sweet tempered, industrious, modest and so free from vanity that they never consulted the mirror, although their husband did. In physique these women were large and beautifully shaped.

Their complexion was a light brown, and their silky black hair very abundant. Father Cogolludo, a Spanish priest, wrote, "These women are more beautiful and better tempered than those of Spain." They always dressed themselves, as they do at the present time, in flowing white garments, and in their happier days were greatly addicted to the use of perfumes and flowers. They were industrious, devoted wives and fond mothers, but exacted great deference from their children. Their ideas of modesty were so strict that they did not permit their daughters to look boldly into the face of a man, and if a girl showed a want of shyness the indignant matron would pinch her arms. After the Spaniards were in possession of the land they subjected these women to indignities and cruelty. Among many other things it is recorded that in one village they found two young women of remarkable beauty, one a bride, the other a maiden, and they hanged both, so that there should be no trouble about them. Many young mothers were hung from trees and their infants suspended from

nation, the Maya women seem to have enjoyed the same privileges as the men, to have had equal power in politics and equal authority.

Today, when business is to be transacted, the wife takes the active part, her husband nodding his head affifmatively. It is not that she desires to domineer, but because he looks up to her, relying on her indgment. She complies with admirable moderation and modesty. She is eloquent and forceful without being loquecious, and she never scolds. When her husband gets himself into trouble, she pleads for him, being a more able reasoner than he is. If he gets intoxicated, she guides him home. If he strikes her, she says, "He does not know what he is doing." regarding him with angelic forbearance, so that domestic brawls are quite unknown. It is her pleasure to give him the best of what they have, keeping for herself the worst.

This woman's home has a thatched roof and earthen floor. She has no pretty objects around her. Hummocks serve as seats by day as well as beds by night. There is one low chair or stool on which she sits while her busy fingers make the garments of the family. In one corner stands a bench and grinding stones. Her hands grind all the corn used in that humble abode. The fire is built on the floor between three stones, on which rests the clay pot or the disk for baking tortillas. Outside at the back of the hut there is a long dugout, serving as a washtub, resting on trestles. There she stands for some hours every day, her small feet bare, saupsads up to her elhows, yet her hands are small and pretty, her voice is sweet and low, her language never cade, and if you approach her lut she welcomes you with such perfect grave and self possession, mingled with cordinality, that you ask yourself if she is not a princess in disguise. She may be, but, alas! the palaces of her sires are erumbiling away in the forests where her husband cuts timber for his master, the white man, now owner of the soil. The dying race must bear its fato, and the Maya woman meets it inchly, with resi

The pop party in Wayne county bout "kerflunked."

The next thing on the program is th emocratic county convention.

Gov. Stone of Mississippi was a vis itor at the Nebraska Capitol Saturday

W. M. Robertson will be the next udge of the Ninth judicial district.

The republican majority will be something good to look at in Wayne county this fall.

Perhaps it would have been better from things said since the convention ad been left unsaid.

The Ohio campaign is warming up but the old Buckeye state will show democracy what a handsome republi-can majority looks like in five figures.

He who complains loudest of high pries because of the Tariff, is never any hurry to reduce the prices of his own commodities. - American Econ-

Daddy Martin thinks something of locating elsewhere as he does not wish to attend the funeral of the pop party which will occur after the coming elec-tion. He seeks "greener" fields.

The Nebraska Editor is just the thing for the press of the State. It is replete with everything of interest to the fraternity, and it was a wise act when the State Press Association made it their official organ.

At the republican state convention held at Lincoln Wednesday, all nomi-nations were made by acclamation as follows: Justice of the Supreme Court, S. L. Norval; Regents of the State Uni-versity, Chas. S. Morrell and H. L. Gould.

At the republican convention held at Hoskins Monday, for the purpose of placing in nomination a candidate for commissioner of the third district, Geo. Harrigfeld was nominated. Mr. Harrigfeld has been an active worker in the party and is qualified in every sense to fill the office. In addition to this fact the west end of the county is entitled to the nomination, as much work is needed there. George will be elected.

The Trick Has Failed?

Protectionists invite and encourage iscussion of the Tariff and of our in custrial interests in general. The ore the subject is examined, fairly and dispassionately, the greater is the and dispassionately, the greater is the gain for the cause of home industry. On the other hand, Free-Traders, Tariff Reformers and the like, are engaged in a conspiracy of silence. The word seems to have been passed along to the Free-Trade press to lie low—to discourage discussion of the Tariff—to divert attention from it to the currency question or any other subject except that one which is the most important of all to the American people.

But the Free-Trade tactics will not avail. The great dominant question which has occupied the attention of Alexander Hamilton, Clay, Greely, Carey, Blaine and other great minds will continue to engross public attention, and it will be studied by the plain people, as Lincoln called them, as well as by every person who aspires to be a

by every person who aspires to be a statesman or a politician, or who has the good of his country at heart.—American

ROBERTSON NAMED.

It Required ros Ballots to Nominate the Republican Standard Bearer of the Ninth Judicial District.

Although the utmost harmony prevailed the contest for the nom-ination for Judge of the Ninth Judicial district in the republican convention at Norfolk Tuesday was stubborn, and it required 105 ballots to make the nomination.

Judge Jackson was made temporary chairman, who, upon tak-ing his seat, thanked the delegates and expressed the belief that the man placed in nomination would be the next judge of this district, and expressed the hope-that har-mony would prevail through the deliberations of the convention. W. H. McNeal was made tem-

W. H. McNeal was made temporary secretary, who read the call of the convention.
W. H. Needham was elected assistant secretary.
A committee of three was appointed on credentials and after a short intermission to give the committee time to make up the list. The report of the committee was adopted and the committee was discharged.
Upon motion the temporary organization was made permanent.

Motion prevailed that the delegates proceed to cast their ballots for candidates for district judge, by call of counties, and that the first ballot be informal.

The informal ballot resulted:
Antelope, 10 for J. F. Boyd;
Knox, 11 for J. H. Berryman;
Madison, 16 for W. M. Robertson; Pierce, 3 for Robertson, 4 for Berryman; Wayne, 10 for A. A. Welch.

The first formal ballot resulted:

Berryman 15, Robertson 20, Boyd 9, Welch 10.

9, Welch 10.
The succeeding ballots up to the 105th continued without any material change, although on a number of ballots Welch received 16 votes. On the 105th Robertson was nominated, the vote standing: Robertson 34, Welch 10, Boyd 10.
Mr. Boyd moved that the nomination be made unanimous, which

ination be made unanimous, which was seconded by Geo. Brooks, and carried with a cheer by the delegates.
Mr. Robertson was called for

Mr. Robertson was called for and thanked the delegates for the mark of esteem and confidence bestowed upon him in this nomination. He had felt that the nomination should be made fair, open and above board and he was glad that such had been the case. The republican party was never in better shape to win than today, and he believed victory is in the air for this campaign.

Berryman, Boyd and Welch each thanked the delegated for

the support received and prom-ised their hearty support to Mr. Robertson.

The following persons were selected as members of the judicial central committee:

Antelope, T. P. McCarty, of Neligh; Knox, J. H. Berryman, of Creighton; Madison, M. D. Tyler, of Norfolk; Pierce, Benj. Lindsay, of Pierce; Wayne, A. A. Welch.

M. D. Tyler was elected chairman of the central committee.

Democratic leaders and organs who, a few years ago, were denying the truth of reports showing the increase of wealth the advance of manufacturing, the improved condition of the wage earners, the increase of national savings, the extension of railroads, are now breaking their necks to secure reports indicative of growth and returning prosperity. In this wild endevor those of us more or less interested in the preparation of exhibits of national growth, smile at the eagerness with which the old time "calamity howier" points with consolentious pride and patriotism to the very documents which a few years ago he was as wildly denouncing as Protected Tariff lies and robber baron falsehoods.

EREE TRADE THEORIES KILLED.

FREE TRADE THEORIES KILLED.

Comparing the 1805 year's imports, during which the Gorman tariff was in force for ten months, with the full twelve months' imports of 1802 and 1803, it is seen that the Gorman tariff imports are in some cases larger than those for 1802, and in other instances larger than the imports for 1803, and sometimes greater than the figures given for both of these two McKinley protection years. When considering the effect of the present lower tariff, it should be remembered that in 1892 and early in 1803 the bulk of the people were far more prosperous than they are to-day and consequently were better able to pay for the luxury of foreign goods. Now the lower tariff permits the larger quantities of imports at such low prices as enable keen competition with our own manufacturers and interference with their business in our home market, the people not being able to afford to purchase so many articles of voluntary use and luxury as they did in 1892 and 1803.

The establishment of a cotton mill in China, and the fact that it is probably the precursor of many others, indicates the possibility that the manufacture of cotton goods will be greatly shifted in a few years by cutting off the markets in many parts of the world that have hitherto been dependent on the product of English and American mills.—Boston Herald, Aug. 17, 1805.

California's Vintage.

California's Vintage.
California's vintage has begun, and trustworthy estimates as to the production are now available. In every district the outlook is more favorable than last year. The production of dry wine in the State will be about 20 to 25 per cent. greater than last year, and will be from 12,000,000 to 13,000,000 gallons. About 4,500,000 gallons of sweet wine will be produced, making a total wine production in California this year of about 17,000,000 gallons. This is far short of the consumption, and much less than the production of 1893, so winemakers look for good prices and prosperous times. The average price for dry-wine grapes will be about \$16 a ton.

Her Dress and Hair Betrayed that She Was a Schoolma'am.

"How unconsclously men and women take on the atmosphere of their surroundings and avocations," remarked a man recently to a New York Advertiser reporter. "I can recall an illustration of that fact in an experience I had some years ago. I had been so long accustomed to the association of women school teachers that I am rarely mistaken when I come in contact with one. A primient woman teacher from a northern city was expected at an educational meeting. I had never seen her, but received a telegram asking me to meet her at the train. I was sure I would be able to identify her. I went through the train, which was crowded with passengers. I looked around and soon found the teacher. She was perfectly astonished when I came up and said: "Is this Miss Blank?"

"Yes, that is my name, she replied, but how did you know me?"

"Yes, that is my name, she replied,
but how did you know me?
"I did not explain, but it was easy
enough. At first glance I saw her hair
was short, that she wore eye-glasses
and had on a plain-looking sort of gray
cloth dress. Any doubts I might have
had were soon relieved as I noticed
hanging from her watch fob a small
globe, being a miniature of the earth.
Another earmark was a small hand
satchel that snapped loudly when she
closed it. I knew I could not be mistaken, and results showed I correctly
disgnosed the profession of that woman."

Water as a Conductor.

Mr. Edison's inventive faculty often runs in fanciful grooves. Some time ago he evolved an elaborate scheme for the electrical defense of a fort. He contended that half the ordinary complement of guns could be dispensed with, and in their stead he would install a powerful dynamo. Current from this machine would be conducted by wires to the nozzles of hoses, carrying a heavy stream of water under high pressure. These would be placed on the ramparts and as the enemy approached the jet would be turned on. As water is a good conductor, the stream would be heavily charged with electricity of fatal power, and every man within its radius would be killed. An Auburn ex-alderman has just escaped what might have been unpleasant consequences from seeking to experiment in the same field of electrical conduction. He was wetting down his lawn with the garden hose when he become suddenly possessed with a desire to "shoot" at the trolley wire, and he would have done it but for the timely appearance of the lineman, who advised him not to do it. He has since been consulting electrical authorities on the subject, and, although there is no certainty that a person who throws water on an electrical trolley wire will get a shock, the alderman has come to the conclusion that he will not try it.—New York Times.
