suddenly face to face with Lady Kildonan. She wor's hat and a long circular clock, and was leaning back against a bigh carved cahinet with an expression of steepy languor in her face and attitude which made her even more strikingly attractive than usual. As Armachwaite-stopped short at sight of her, she pressed one hand to her eyes, let it fall limply, and then held it out towards him with a vicepy, good-humored smile.

"Been to see my husband?" she asked. Then, without waiting for an answer, she went on in the same lazy tone. "You brought a letter from Dr. Peele, didn't you? I'm sure I dou't know what I've done with it. However, he wants to see me, and says he's very ill. So, I suppose, I'd better go. Will you drive me? I'm awfully tired to-day; I had a bad night, and I've been asleep nearly all the afternoon to make up for it, so I feel too demoralized for any active exertion."

There was nothing for it but to puthinself at her service. As they came in sight of Crosmont's house, and Armathwaite said he had been asked to call and see Mrs. Crosmont, Lady Kildonan flushed and gave him a glance of half-irritable, half-womanly entreaty.

"Not now," she said. "When you have left me at Dr. Peele's, you can come back."

They drove on, but he gave one wistful glance towards the gloomy looking house;

glance towards the gloomy looking noise; the noticed his expression.

An evil foreboding seized upon Arma-thwaite as soon as they came in sight-of-the doctor's house. The outer door, which always stood open till late at night, had the doctor's house. The outer door, which always stood open till late at night, had been shut; a curtain of the bay window in the lower room had-been drawn aside, and not pulled back from its place. These things, which would have seemed unimportant at any other-time, gained a portentous weight when there lay in the house a man who would never again leave it alive. He glanced with an anxious face at Lady Kitdonan. Her mind seemed to be wandering off to something else. Aremathweite got down, went slowly up the path, and into the house. He was afraid of what he should learn there. When the housemaid came scurrying along the passage towards him with a scared, tearswellen face, he stopped her, knowing at meet what had happened.

"Oh, sir," she began, in a heart-troken whisper, "the poor, dear doctor! He's gone! He would get up, because he expected Lady Kildonan. And he was all in a quiver expecting her, when suddenly—me, and Mrs. Peele, and Miss Milliewer all there, sir—he said he felt faintlike, and asked to be taken to the whylow. And we took him to a chair, and he looked out along the road. There was a look in his eyes made us know what was coming. And he had the wisdow opened, all in the cold and dark as it was; and it was loo dark to see, and so he listened. But he couldn't hear anything, nor we

was too dark to see, and so he listened. But he couldn't hear anything, nor we outlant, though we all stood quiet as mice. And presently he fell back in his chair and said, 'Alm-give my love to Adma. But Aphra, tell her I thought of her last of all, and with my dying breath begged her—' Those were the last words he said, sair. Then he drew a deep, long breath and he structed to herathe a breath, and he struggled to breathe a little while, and we laid him down. But it was no use. And he just held Miss-Millie's hand, and like that he died."

The girl burst out crying, and Armathyaite led her gently into the sitting room, which was empty, and with a few kind words left her there, and hurried

kind words lett her there, and nurried back to Lady Kildonan.

"What's the matter?" she asked, rather querolously. "Am I not to get 501?"

"I had better drive you home, Lady Kildonan," said Armathwaite, very gently.

"The doctor cannot see you—just now."

peated, excitedly. "Speak plainly. Do you mean that he's dead?" He only answered by a look; he was himself deeply moved.
"He is dead, then?" she persisted.
"Yes, Lady Kildonan. The last words

he said were—"
But she interrupted him in an unmis-

takably relieved tone.
"Well, then, it's of no use for me to

Armathwaite drew back in infinite dis-

"I think I must ask you to excuse me, Lady Kildonan. The groom can drive, can he not?"
"Oh, yes, if you don't want to come!"
she answered, in an offended tone. She was busily turning something over in her own mind. As the groom left the horses' heads to take Armathwaite's place beside

heads to take Armathwaite's place beside her, she beckened the doctor towards her, and said, in a low voice:

"You won't mind my asking you—I know you were in the doctor's-confidence—do you know anything about the provisions of his will?

"No, your ladyship. I am very sorry that I cannot satisfy—your anxiety."

"Oh, I only wanted to know if the poor ladies were provided for, and his protege, Alma, not forgotteal Good night. Tell Mrs. Pele and Millie how dreadfully sorry I am."

Those words.

These words were uttered in the softest and sweetest tones of condolence, but to Armathwaite they might as well have then jeers and curses. If there had been more daylight, or is the lady's usually keen wits had not been so entirely luited by a reckless and indifferent languor, she by a reckless and indifferent languor, survould have seen in expression on the seen and seen in expression on the more dangerous than any that had even the seen of the seen o

Armathwaite resolvent to go up to The Crags next day, and try to learn there the reason of his abuppt dismissal. On the following afternoon, therefore, he made a pretext to call at the grent house, and see the philologist. After a few minutes' conversation with Lord Kildonan, who was always much delighted by a visit from his favorite, he fancied he had made a distovery. For the old Sootchman, while commenting with some anxiety upon the appearance of a work on words, which seemed to hard-nsurped some of his own ground, said that he would get Ned Crosmont to obtain it for him in Liverpool, as he was going uy there that—evening. Inner Histories.

If the inner histories of people were known, what strange secrets might come to light! A man who for half a century had lived an intensely religious life died suddenly. Then the fact trans-pired that in his youth he had commit ted a crime, and the austerity of his after years was caused by remorse. The writer knows a querulous spinster of sixty who apparently has not a grace of body or mind, and whose existence is one long complaint. Twenty-five years ago, this woman was a popular singer whose beauty matched her genius; people thronged to hear her, and she refused men by the score. Nov she has scarcely a friend in the world, and few dream that she and the once famous singer are identical. A middie-aged, taciturn man who occupies an inferior position in a grocery store, was once a brilliant orator. His memory failed him, and his career was cut short In an Eastern city there lives an ugly decrepit old woman who was consid ered in her youth the handsomest girl in Kentucky. Poems were written about her, men went crazy over her and duels were fought by jealous admirers Yet she married a worthless man who got trains and abused her. A highly respectable citizen sends one thousand dollars a year away to the conscience found at Washington. A PRACTICAL TEST.

THE currain rang down, and the served up in every possible style and play was over. A drama it had been called, but it partook of traged, and its strong climaxes, handled as they were by converted to the conver as they were by competent players, were received by the audience with

uncontrolled storms of applause.
My friend Lester and L. old goers as we were, thrilled with the others at the strong human touch of the actors' art, and were silent as we slowly moved outward in the perfumed crush and chatter of the fashionable crowd. We went to a quiet restaurant we knew of, where the noisier pleasure seekers did not follow, and ordered our

chops and ale.

Released from the spell of the counterfeit world in which we had lived for some two hours, the presaic reality of actual life soon brought us back to our normal condition of mind.

"Doesn't it seem strange," said Les-ter, who carried all kinds of theories in his head, "that a play like that should impress any one as a true representa-tion of life?"

"So it seemed to me," I answered, in some surprise, for Lester, I had noticed, had yielded as fully, if not more so, to the spell of the performance than I-myself had. "The plot was far less improbable than the happenings set forth in our daily papers, the situations were brought about naturally, and the handling of the characters unusually well

managed." "Xes," said Lester, "I know that's true, but you haven't caught my-idea. No wonder, though, for I haven't advanced it yet. I was just thinking of the language that playwrights and nov-elists put in the mouths of their char-acters: —When do you ever hear real people use such stilted high-flown talk? Of course I know it's necessary for them to improve on our everyday slipshod lingo, or the whole thing would b a fiasco, but, all the same it isn't true to nature. I refer particularly to strong emotional scenes. In such crises in real life the participants will always lose what little ideas of grammar, con-struction_and choice of language they generally have, and either stammer out a lot of idiotic commonplaces, simply

always rises to the emergency. That's art, of course, but it isn't truth." "I don't altogether agree with you," I said. "I thin kthat even in actual life men and women when confronted with some great and sudden danger, sorrow their petty conventionalities of expres sion and use language sometimes passionate, lefty, and dramatic as that belonging to literature or the stage. We modern people have become slaves to the artificial and have frittered away our souls on sordid things. We express ourselves jerkily, slangily, and poor ly. We aim at pertness, and brevity and have a foolish dislike for allowing

deception, and the concealment of our thoughts. But, at heart we are still cases out of six, bring to the lips words fully as theatric, melodramatic "stagey" as those we heard on boards to-night or read in books."

"You're wrong, old man," said Lester In his positive way. "We're hopelessly unpicturesque in our parlance. Get one of us into an end of fifth act denouement, and we either get tongue or talk unintelligible rot. us half an hour for preparation, and we might think up something appropriate to say, but not-off hand. People doubt indulge in heroics nowadays. They ply can't do it. The twentieth century atmosphere is unfavorable to them. Thus, unseen by the human eye, brown and fragrant, "you can't expect the water at the surface is being made people to talk blank verse and indulge to continually change places with that in elevated apostrophe on ordinary oc-callons, but I dare say that the first time you happen to witness a ccene with the proper amount of tragedy in It, you'll hear some talk very much the same kind you find between novel covers and across the footlights."

"I guess not," said Lester.

Lester was a brilliant young man, and had a future before him. I also and had a future before him. I also pursued with some eagerness the phantom of hope, and we confided in each other concerning the cut and fit of our coming laurel wreaths.

Lester was engaged to a girl with the control of the contr

air and direct frankness of a child, and eyes forty-seven fathoms deep. I had looked into them and always felt like drawing back a step or two when I did.
Her eyelashes looked to me like rushes

There was no nonsense, and very lit

He was intensely practical, and when he called on the girl he talked about his busi-ness and the architecture and drain age of the house they were to build It seemed to me, for safety's sake, he should have talked more of stars and roses and affinity and those things. It occurred to my mind that those eyes were out after matter of that sort.

The wedding day was set and a rush of engagements kept me too busy to see much of Lester until three or four days before the time. I was to act as best man, and one afternoon I ran down to his rooms to see him about the arangements. I overtook him on the street and we walked down together. He caried in his hand a bunch of letters he had just received by mail. Lester opened his door and turned on

the light. "Tumble those things out of the rock er," he said, "and excuse my glancing over this mail."

He quickly drew out of the bunch the square white envelope I knew he was most anxious to find. They used

I henril the tearing of the envelope, and this-mustle of its contents as he unfolded it. Thus there was such a long sit. ed it. Then there was such a long silence that I looked up. Lester was staring at the letter in his hand with a face white as chalk and a look upon

it like that of an animal when it dies.
I started up.
"What.—." I began.
Lester fossed me the letter.

Somebody knocked at the door and I sprang toward it. Lester opened a drawer to his table and fumbled in it. A man had brought a package for

Lester. It was the girl's presents re-turned. While I was closing the door got his pistol and put the ball straight for his heart. I knelt in the smoke and raised his head. A brief gleam of his old quizzieal, philosophical humor came into his eye. "Frank," he sald, with a faint smile.

Calms the Sea.

Sailors speak of a heavy shower "knocking down a sea," and that in spite of the fact that the wind may still be high. It's rather hard to understand just how such tiny drops can flatten down the enormous swells of an angry ocean, but the observations of a wellknown English scientist explain it clearly. Each drop, he says, sends be-low the surface a certain quantity of water in the form of rings, which, with gradually decreasing velocity and in-creasing size, descend as much as eightwould a woman off the stage do? Cause of Holes in Umbrellas. One of the fruitful causes of holes in the folds of an umbrella is improper, care when it is wet. To roll up a wet umbrella is to invite the dyes to rot it, and one of the banes of the umbrella manufacturer is loaded dye on silk. What a strong and unfailing thing is parental attachment! Was it not almost time for Jacob to forget Joseph? If the father have large property, and he be wise enough to keep it in his own name, he will be respected by the heirs, that they often it is when the son finds his father in famine, as Joseph found Jacob in famine, the young people make it very hard for the old man. They are so surprised he cats with a knife instead of a fork. They are chagrined at his artediluxian habits. They are provoked because he cannot hear as well as he used to, and when he asks it over again, and the sor has to repeat it, he bawls in the old man's ear. "I hope you hear that!" They think it of no use to have a doctor in his last sickness, and go up to the drug store and get something that makes him worse and economize on a caffin, and beat the undertaker down to the last point, giving a note for the reduced amount, which they never pay! I have officiated at obsequies of aged people where the family have been so inordinately resigned to Providence that I felt like faking my text from Proverbs, "The eye that mocketh at his father and refuseth to obey its mother, the raveus of the valley shall pick it out, and the young eagles shall eat it." In other words, such an ingrate bught to have a flock of crows for pall-behrers! I congratulate you if you laive the honor of providing for aged parents. The blessing of the Lord God of Joseph and Jacob will be on you.

I rejoice to remember that, though my father lived in a plain house the most of his days, he died in a mansion provided by the filial piety of a son who had achieved a fortune. There the octogenarian sat, by the filial piety of a son who had achieved a fortuine. There the octogenerion sat, and the servants waited on him, and there were plenty of horses and plenty of carriages to convey him and a bower in which to sit on long summer afternoons, dreaming over the past, and there was not a room in the house where he was not welcome, and these were musical instruments of all sorts to regale him, and when life had passed the neighbors came out and expressed all honor possible and curried him hot the village Machpelah and put him down beside the Hachel with whom he had lived more than half a century. Their foot now so feeble, then with the sprightiness of a bounding roe, as they shall say to you,—"A spirit passed this way from earth and told us that you were wayward and dissipated after we left the world, but you have repeated, our prayer has been answered—and you—are—here, and as we used to visit you on earth before we died now we visit you in your new how died now we visit you, in your new how died answered and you are here, and as we used to visit you in earth before we died now we visit you in your new home after our ascension." And father will say, "Mother, don't you see Joseph is yet alive?" and mother will say, "Yes, father, Joseph is yet alive?" and then they will talk over their earthly anxieties in regard to you, and the midinght supplications in your behalf, and they will recite to each other the old Scripture passage with which they used to cheer their staggering faith, "I will be a God to thee and thy seed after thee." Oh, the palace, the palace! That is what Richard Baxfor celled "The Saints' Everlasting Rest." That is what John Bunyan called the "Celestial City." Love—Has it ever occurred to you what a masterful thing love is; what obstacles it surmounts, and what difficulties it overcomes? Love does not hesitate for impulse nor wait for opportunity, but creates both. It comes into the cottage of the poor, numble and downfrodden, with the same sweet breath that it diffuses in the palacer of the rich and proud.—Rev. A. S. Yantes, Episcopallan, Brooklyn, N. Y.

A retired sea captain, sixty years of age, well known to the reputable citizens of New Haven, suffered from an overworked and worn-out digestive apparatus. He had no faith in patent medicines as a cure for dyspepsia, but was induced by a friend to try Ripans Tabules. This he did with but little hope of benefit. After try ing them for some time he said to the friend who had directed his attention to them: "Those Ripans Tabules were so effective from the start that I was amazed at the result. They are wizards. All the dyspeptic misery endured by me since becoming a landlubber has disappeared. I take one every night now, and feel so much rejuvenated by their use that I sometimes think I could climb a ship's rigging as well as I did thirty years ago."

It will require more than a school house campaign to defeat Ran Frazier, the next sheriff.

The ticket is the strongest one nominated for years and we won't do a thing to the fusionists.

The Woodmen war has come to an end and the head offices have been moved from Fulton to Rock Island.

Republicans you must vote for the republican ticket or repudiate the administration. Which will you do?

Now to work with a vim. The republicans have a glorious opportunity to march on to victory. Get aboard.

Ex-President Grover Cleveland, 'tis said, is not adverse to filling a seat in the United States Senate, and may enter the senatorial race in New Jersey

The caucuses were clean, open and fair, and the popularity of Ran Frazier carried the day, just like it will election day. You might just as well make up your mind as to that.

Jack Cherry is a pretty good fellow. So is Ran Frazier, and Jack has the warmest competitor any candidate for office in Wayne county ever had. It's a time when fusion won't fuse.

All you men in Wayne county who are free silver republicans, hold up your hands.

Four! Well, that's good.

Fifteen thousand people perished in a flood near Tung Chou, China, Mon day. The flood was the most disastrous that has visited China for years. It's pity Weyler doesn't go to China.

The nomination of T. S. Goss for county commissioner was a good one and when he gets through with Jake Ziegler, Jake will think confusion has entered the camp of the silverites.

Yes, you bet your sweet life. This year and the next, and the next, and

Boys, some one had to get left. Two or more men cannot get a nomination for the same office. Let's get together and every republican vote for the whole ticket, and get as many of the other fellows to vote it as we can. Whoop er up.

The democrats say the republica are 'Incky.' It is ever thus. The dis-gruntled and the incompetent always speak of a capacity for success as luck but the level-headed, common sense of the common people has a better name for it. That name is "pluck." It is because the republican party has the courage of its convictions and an abiltty to achieve that the people have con-fidence in it. The American voter ad mires this kind of pluck.—News

THE CANDIDATES.

F. L. Neely, the republican nomine for county clerk, is well known to the people of Wayne county, having been engaged in the hardware business for many years. He needs no introduction The voters will attend to that.

Enoch Hunter, the republican nomi zen of Wayne county. His qualifications for the position are of the best. He is an old soldier and well known throughout the county and the people irrespective of party should give him their vote. He is worthy of it..

J. R. Manning, the republican nomines for treasurer, is well known to the people of Wayne county. He has served the district in the state senate, making a splendid record. No man in Wayne county is better qualified for the office of county treasurer. Mr. Manning is a thrifty farmer and stockman residing near Carroll, and deserves the full republican support.

Ran Frazier, the republican nominee for sheriff, is, perhaps, the best known man in the county. There is scarcely farmer whom he has not had dealings with in stock. He is one of the pioneer citizens of Wayne, and a loyal republi-can, and as has been repeatedly remarked, has done more for Wayne county farmers than almost any other man in the county. Therefore, you know your duty. Further comment is

W. E. Howard, the republican nominee for county superintendent is thoroughly qualified for the position. He is among the best educators of the state, and thoroughly understands the needs of the schools and all educational institutions in the city. He will, if elected, devote his entire time to the office and all people with whom he has business will meet with fair and honorable treatment. Your vote-for him will be no mistake:

J. P. Gaertner, the nominee for corener, and Ludwig Ziemer for surveyor are gentlemen who have filled their offices acceptably, and of course, they will be re-elected.

The nomination of T. S. Goss, better known as "Jno." Goss, by the conven tion of the second commissioners dis was a happy nomination, one which the whole people will approve. Wayne county needs a man of executive ability on the Board of Commis sioners, and Wayne county needs Mr. Goss an hundred times more than he needs Wayne county. If you mean business, cast your vote for T. S. Goss.

There will always be trouble between capital and labor and there never should have been any. One great source of the difficulty is a lot of men who have no direct interest in either but who make it a business to go about preaching a crusade against capital and trying to make men dissatisfied, distrustful and quarrelsome. They sow the wind and the public, including both employer and employe, reap the whirl-If there were no agitators and no unnecessary annoyances to manufacturers there would be a great deal more money invested in that line and more work to do. The investments would be more profitable, labor would be productive and profitable and would be in demand at better wages, and both the proprietor and the workmen would make more money. It is a pity that men will be influenced by the rantings of those who have no interest in them xcept what they can make out of them but they are not to be blamed so much as the deceitful and dishonest demagogues who play upon their weakness and prejudice. If capital pays wages it must be made profitable and the interest of every man who works in a factory is identified with those who own the concern and pay the wages. Anybody who tells them anything else is a dan-gerous man and will do them irreparable harm if they listen to them.—York

Nebraska's prosperity will bring thousands of farm buyers to our state. You should read the Journal which is not an Omaha paper or a Lin coln paper, but a state paper in its truest sense. "What will be for the best interest of Nebraskans?" is the first question asked by the Journal when called upon to decide. Every Nebraskan should do his best to keep the State Journal before the people and that best means by sending in One Dollar, which will pay for the paper to January, 1899. After you read it send it to your friends in the east and let them see what great things we are doing in Nebraska. Send in your dollar to The State Journal, Lincoln, Neb. The sooner you send, the more papers

you will get for your money. Read THE HERALD, for THE HERALD tells the truth.

It was a great day in Winside on Sat nrday when the free silver republicans' went to that town to hold their con-vention. There were four of them: Wm. Wright, J. Tower, Henry Templeton and Mr. Goltz. The latter was elected chairman, and W. M. Wright secretary. Templeton nominated Mr.

Tower for Judge and he was chosen on the first ballot. Three spectators were present. It must make the free silver republicans, if there are any left in the county, feel extremely happy to read of such a big convention.

Few men in this country are better or more favorably known to the drug and medicine trade than E. J. Schall, buyer in the proprietary medicine department of Meyer Bros. Drug Co., St. Louis. He says: "My boy came home from school with his hand badly lacerated and bleeding, and suffering great pain. I dressed the wound and applied Chamberlain's Pain Balm, freely, all pain censed, and in a remarkably short time it healed without leaving a scar. For wounds, sprains, swellings and rheumatism, I know of no medicine or prescription equal to it. I consider it a household necessity." Sold by Orth.

"I can't see how any family lives without Chumberlain's Colic Cholera and Diarrhoed Remedy," says J. R. Adams, a well known drugglet of Geneva, Als., in a letter inquiring the price of a dozen bottles, that he might not only have it for use in his own family, but supply it to his neighbors. The reason some people get along without it, is because they do not know its value, and what a vast amount of auffering it will save. Wherever theomes known and used it is recognized as a necessity for it is the only remedy that can always be depended upon for bowel complaints both for inliften and adults. For sale by L. P. Orth.

How to Cure Catarrh

Every sufferer from Catarrh should know that it is impossible to cure the disease with sprays, washes, inhalations, etc., which are universally used. In fact, the experience of growing worse all the while is proof that the treatment is all wrong. Many who have been under treatment for years and met with disappointment instead of benefit are willing to doubt that there is any ewre for Catarrh.

The trouble is that all of the treatment they have received has been misdirected; and has not touched their trouble. Catarrh is a stubborn deep seated blood disease, and everybody should know that to simply treat the surface, that is, the local irritation, does not reach the disease. A blood remedy is needed, but it must be a good one; a remedy which goes down to the very bottom of the trouble and forces it out. S.S.S. (Swift's Specific) is the only one which can have the slightest effect upon Catarrh, for it is the only one which goes to the seat of the disease, and permanently gets rid of it. This is the only reasonable way to treat Catarrh.

Mr. B. P. McAllister, of Harrodsburg,

Mr. B. P. McAllister, of Harrodsburg, Ky., had Catarrh for years. He writes:

"I could see no improvement whatever, though I was constantly treated with sprays and washes, and different inhaling remedies—in fact, I could feel that each winter I was worse than the year previous.

"Finally it was brought to my notice that Catarrh was a blood disease, and after thinking over the matter, I saw if was unreasonable to expect to be cured-by-remedies which only reached the surface. I then decided to try S. S. S., and the results were gratifying, for after a few bottles were used, I noticed a perceptible improvement. Continuing to take the remedy, the disease was forced out of my system, and a complete and permanent cure was the result.—I advise, all who have this dreadful disease to abandon their local treatment, which has never done-them, any good, and take S.S.S. (Swift's Specific), a remedy which can reach the disease and cure it."

To continue the wrong treatment for Catarrh is to continue to suffer. Swift's Specific never fails to cure even the most aggressed cases. It is a real blood remedy, and cures Catarrh, Rheumatism, Contagious Blood Poison Eczena, Cancer, Scrofula, and all other blood diseases. S. S. S. is guaranteed

PRETTY NEW BODICES

ATE IDEAS IN FANCY WAISTS FOR FALL WEAR,

Waists Distinctly Out of Decollete Fashion, Being Succeeded by a More Modest Mode-Hair Should Be Spe cially Dressed for Evening Occasions.

The Dictates of Fashion.

ANDSOMER than ever is the new erop of fancy walsts, and for a wonder they seem really new. The yoke and the blouse effect are especial features, and in many of the pret-tiest waists both yoke and blouse appear. Frills, to which the summer has accustomed us without making us

weary; are to be added to other elaborations, and a look at some of the newer bodices makes a woman wonder how_ever she contented herself with any walst not made of several materials, and not cut up into all sorts of mathematical designs by all sorts of mathematical designs by the arrangement of the decoration. Yet there is an artistic discretion shown which keeps these new bodices pretty and becoming instead of merely freakish. One dainty walst that was particularly attractive because so easily copied at home was a real blouse; that is, it went on over the head, which was made possible by the depth of the yoke. The blouse was pale-blue silk and laid over it was gray ince, while a comple of accordion pleated gray chiffon frills passed about the body, matching epaulettes of the same design at the shoulders. The gray chiffon yoke gath-

made with sides not matching. In this case the jacket was at the back and one side of the front, the other side of the front being-half-bloused pleated of the front being-half-housed pleated monselline de soie. Befow the folded sash belt little tabs of material to match the jacket appeared to spreas the Russian blouse, which must show below the belt. Violet pompadour silk was bordered with a stashed betthat of the silk trimmed, with two rows of thanks only the facility of the silk trimmed, with two rows of the silk trimmed, with two rows of the silk trimmed.

mauve volvet ribben, and with a fall of the mousseline. Mauve volvet gave the belt, and the busque tabs were trimmed to match the bertia. Sleeves to these dainty bodiece are either long or below the elbow, and fit closely its very near the shoulder where they have leg-o-mutton characteristics. Such waists, too, should have skirts to match though they are all right if worn with

though they are all right it work with skirfs that merely harmonize.

Next to this is a much simpler bodice, that is almost as effective. It might be said to be plain except for the tucket, collar effect of black satin. This passes co about the neck, showed the throat in a narrow V, and its ends extended become the the round waits affect here. a narrow V, and its ends extended below the belt, the round waist effect belowed for the rest of the bodice. Apple-green taffeta covered with black mousseline was used for the rest of the bodice, but it is a model for which many materials are suitable, and its pretelle-collar effect may be jewered or embroidered, histead of tucked. It such ornamentation is preferred. This bodice does just the reverse from what the last one described accomplished in that it suggests slenderness that the wearer's figure may not carry out. If wearer's figure may not carry out. It should be understood that this method of extending a portion of the bodice trimming below the best is one way of harmonizing skirt and bodice even though the two may not have been made to match. In the remaining costume this point is carried out more bold-

ly. Its rich panel of tucked lavender material trimmed with black satin pas-sementerie began at the cut-out, narrowed slightly at the belt, and then

The entire-effect was as pretty and is new as pos-sible, of which the initial picture here

This year's evening waists are very attractive for their novelty, and such as are pictured here are not to be crit-icised for immodesty. Long sleeves are a feature with moderately loware a feature with moderately low-necked dresses, and extreme low neck is voted admissible only for the most formal occasions. Just a little cut-out at the throat is what is right, and almost any woman can stand that. Chough if she really cannot she can fill in with a little gauze or chiffon that will vell without hiding the neck. What is prettier than a dainty bodice-blouse of pleated liberty silk made in a half surplice fashion that bares only one side of the throat in a fascinating way? side of the throat in a fascinating way? Such was the left-hand model in the next picture. Then, too, the first row

widened to fall, almost in apron lastion, to the foot of the skirt. The rest
was corn-colored crepe de cline, the
collarette being lavender with black
trimming. Women who are withing to
resort to expedients will welcome these
collarettes that are almost shoulder
capes, for with them a very log cutcomposite to the shoulder of the collarettes. gown may be adapted to less formal use. In some forms a pair of sleeves can go with the cape, and then with collarette and sleeves removed, the dress is in shape for the most exacting

A great many blouses open over inner chemisette of white or other color contrasting with the blouse, both chemi-isette and blouse bested at the walst. Gray will be in great vogue, and is a relief after the gay colors in which we have reveled.

It is a pretty notion, now very gen-erally followed, that the hair should

be distinctly dressed when an evening costume is assumed, and that if should be not only especially arranged,

of insertion on the high side showed the pretty pink flesh through. The sleeves may be to the elbow, or be long, and if the hair be done very daintily, the bodice will be dressy enough even if the skirt of pleated slik with insertions of lace be not added. Or take the next example: the blouse may be pleated chiffon over a low-necked slik bodice. In this case the chiffon was modeled in blouse fashion, belted in at the waist and crossed over double-breasted, only a little of the throat showing above the cut-out yoke, which was edged with a bit of jeweled lace. A band of the same leweled lace over ribbon should pass about the throat, her hair will be glossy and prettily combed, and Charlie will think her very pretty, or he is a queer Charlle.

Waists like the last of these three show how the jacket effect of last season is revived in some of the boffces

of insertion on the high side showed that the style adopted should not be that of every day. Women make a big mistake in doing their hair always the same way. Folks become accustomed thereby to their looks, and forget how pretty they really are. Copyright, 1897.

AUTOMATIC ENVELOPE SEALER

Ingenious Device Successfully Tried

Ingenious Device Successfully Tried in the Treasury Department.

Washington: Quite an important test of a labor saving device has been in progress at the treasury department—this week. The device is an automatic envelope scalag, and shows what American ingenuity can accomplish in the way of mechanics. Josiah Dupaw, an employe of the treasury department, knowing the enormous amount of mail sent out daily, conceived the idea of a machine that conscived the idea of a machine that would saal the envelopes automatically, and this week the machine was completed and ready to be tested. Twenty-seven thousand interest checks, were to be sent out from the logal division and the machine out from the loan division and the machine was tried on that mail first. The sealer is was tried on that mall first. The sealer is semething on the order of a printing press, the envelopes being fed in. The machine moistens, folds and sehls the envelopes automatically. A very little practice on the part of the operator developed a capacity of 230 per minute. The department offlicals are delighted with the showing made by the machine. The device is owned by Josiah Dupaw of Vermont and Capt. L. W. Gifford, a Ponnsylvanian.

SIX PERSONS KILLED.

Train Crashes Into a Loaded Wagon

Train Crashes Into a Loaded Wagou at Willow Springs, Mo.

WILLOW SPRINGS, MO. A passenger train on the Kansas City, Fort Scott and Memphis Railway ran into a wagon containing seven persons at Dead Man's cit, three miles north of here, at 9 o'clock Tuesday forenoon, instantly killing six, and fainly injuring the other one. The train was stopped and the remains of the dead and injured were brought here. Conductor Hallaway says proper signals for crossings were given, but they were not heard. The crossing is considered one of the most dangerous in the country, being on a curve and a heavy grade. The persons killed lived in Texas County, Missenri and were on their way to Arkansas souri, and were on their way to Arkansa to nick cotton.

TRAMP HEIR TO A FORTUNE. Peter Champion's Claims Arc Found

Peter Champion's Claims Are Found to Be True.

St. Louis: Peter Champion, a tattered tramp, was recently admitted to the Central Home of Rest here, but while he had every appearance-of a common vagabond his polished manners indicated he had seen better days. He was very despondent, but-earnestly asserted he was heir to a fortune in Dussdorf, Germany. Finally in a spirit of compassion the superintendent wrote to Germany. A letter has just been received saying relatives of Champion-have been looking for-him-for-three-years and he is heir to a large estate, his portfon have been looking for him for three years and he is heir to a large estate, his portion being 670,000 marks. Inclosed in the left-ter was a draft for 1,100 marks to pay his expenses. Champion will go to Germany at once.

Central and Western States in Danger

Central and Western States. In Danger from Lack of Rain.

Nearly the entire central and western nortions of the United States are suffering from the long-continued drought. Diager and hardship exist in many of the sections where no rain has falsen recently, and the result is great fear among the people. Had not the crops matured before the dry spell they would have been secreted and ruined. And even now fire threatens the fields mid pastures on the prairies of Illinois and other Western States.

In many instances the In many insuffices the conditions have become such that there is actually severe suffering among the adoptation. Farmers on both sides of the Missauri river are compelled to had water many miles. Wells have become dry and men and animals must quench their thirst. The only rain that has fallen has been insufficient. to affect the parched ground or to bring water into wells which have become dry or at least low. Instead of the fall rains, which would soften the ground for plow-

which would soften the ground for plowing, there is fair weather and lan unusual and dangerous dryness.

One of the greatest tangers connected with this condition throughout the country is that of fire. Not only in northern Wisconsin, covered by timber land, is there fear of destructive fires, but in Illinois and adjoining States every farmer whose acres are traversed by a rathead or are near to any railway. But is seen. or are near to any railway line is con-stantly afraid his corn fields may be set aftre by sparks from a passing locomo-tive. The dried-up pastures all over the prairie land are in the same danger, and the least carelessness may result in enor-

mous destruction and even loss of life.
As for the lack of water, it is daily becoming greater, and farmers do not know what they will do with their stock when coming greater, and farmers do not know what they will do with their stock when present sources of supply give out, which will not be long if there is no precipitation of moisture soon. There is no State where these conditions do not exist. Kansas, Missouri, Iowa, Wisconsin, Illinois and Indiana all are included in the belt where there is nothing but dust and the parched remains of harvest fields and pastures where animals grazed a month ago. In Illinois, Indiana and Iowa there is the worst suffering, according to the reports received from all the cities, towns and lamilets in the country districts of these three States.

In Illinois and Iowa, where so large a portion of the crop is open and conf fields cover every county and line every railway, the most fear of prairie fires exists. It is only the absence of a strong wind which has so far prevented them for any small spark might simple are drea. The farmers have exercised the agreed street dealing, the last two weeks to prevent small blazes spreading.

But the fire danger and the suffering from want of water in some districts is not the only result of the drought. Nearly-all pasturage has been made absolutely barren. At this time, when horses and cows usually are outside before the approach of the cold wather, they must be fed on hay. They have dorn up even the roots in pastures in their endeavor to get grass, and dust has taken the place of verdure.

Bold Talk by a New Minister.

A special dispatch from Madrid published in London gives the substance of an interview between a newspaper, correspondent and an unnamed member of the new Spanish cabinet. The latter, is quotied as saying that Senor Sagasta will carry out the Cuban reforms proposed by Marshal Martinez Campos ten years ago. These include the granting of autonomy to Cuba on condition that she shall take over the Cuban debt, including the wandebt, and accept Spain's customs fariff.

Continuing, the new cabinet minister is said to have declared that Premier Sagasta would not consent to a customs union between the United States and Cuba, and that if the former were not satisfied Spain was prepared to fight, as the Spanish navy was regarded equal instrength to the navy of the United States. Further, if necessary, Spain, according to the cabinet minister, would have recovered. Further, if necessary, Spain, according to be cabinet minister, would have recourse

Certainly you don't want to suffer with dyspepsia, constipation, sick head-ache, sallow skin or loss of appetite. Try DeWitt's Little Early Risers for these complaints and be cured. They are small pitts but great regulators L. P. Orth.

Farmers are busy husking corn although the weather is most to warm for such work.

Small precautions often prevent great mischiefs. DeWitt's Little Early Risers are very small pills in size but are most effective in preventing the most serious forms of liver and stomach troubles. They cure constination and headache and regulate the bowels.—L. P. Orth.

Following is a list of advertised letters, etc., for week ending Oct. 5, 1897: Mrs. Ellen Hennett, E. Collins, Will Lerns, John Rinhard, Geo Savage, Jno Steele, Miss Tillie Stribley, Miss Cor. R. R. Wright. W. H. McNeal, P. M.

A crowd of boys gathered up a lot of old tin pans, tin pails, etc., and went up to the home of S. H. Alexander last vening and proceeded to give Everett Laughlin and bride an old fashioned chavirari. They failed to bring him out however, and the sudden appearance of Marshal Miner scattered the boys in a hurry.

Few men in this country are better or more favorably known to the drug and medicine trade than E. J. Schall, buyer in the proprietary medicine department of Meyer Bros. Drug Co., St. Louis. He says: "My boy came home from school with his hand badly lacerated and bleeding, and suffering great pain. I dressed the wound and applied Chamberlain's Pain Balm, freely, all pain ceased, and in a remarkably short time it healed without leaving a scar. For wounds, sprains, swellings and rheu-matism, I know of no medicine or prescription equal to it. I consider it a household necessity." Sold by Orth.
