

BAGAN FOUND GUILTY

VERDICT OF THE COURT-MARTIAL IS DISMISSAL

Famous Military Trial Comes to an End, and Decision Is Reached in a Few Minutes—Dismissal from the Service Is Recommended.

Brig. Gen. Charles P. Bagan, commissary general of subsistence, was found guilty by a court-martial of conduct unbecoming an officer and a gentleman and also of neglect of the duties of his station. The finding of the court is that he failed to supervise the construction of the building at Camp Sherman, Ohio, and that he neglected the duties of his station.

The charges against Bagan were that he neglected the duties of his station by failing to supervise the construction of the building at Camp Sherman, Ohio, and that he neglected the duties of his station.

Bagan's counsel made a plea based on the fact that he had been promoted to brigadier general in 1902, and that he had been found guilty of neglect of duty in 1903.

The court-martial found Bagan guilty of neglect of duty, but recommended that he be dismissed from the service. The court recommended that he be dismissed from the service.

The court recommended that Bagan be dismissed from the service. The court recommended that he be dismissed from the service.

CREAMERY MEN IN SESSION.

Immense Crowd Gathers for the Sioux Falls Convention.

The first national convention ever held within the borders of South Dakota convened Tuesday, Jan. 21 at 3 o'clock, when the National Creamery Buttermakers Association was called to order in the big auditorium recently erected in the city.

The proceedings in the House were continued on Friday by a vocal duel between Mr. Grosvener of Ohio and Mr. Washington, Democrat, the member from the state of Virginia.

The proceedings in the House were continued on Friday by a vocal duel between Mr. Grosvener of Ohio and Mr. Washington, Democrat, the member from the state of Virginia.

THE STATE LEGISLATURES.

In West Virginia contests were partially decided. Democrats are conceding election of Scott for Senator.

In California, Utah, Nebraska, Delaware, Washington and Montana the Legislatures took ballots for Senator without contest.

In Pennsylvania one vote for Senator was taken without apparent change. Quay men hint at plan for his election to be put into effect on Tuesday.

In West Virginia the opposing branches of the Legislature continued their warfare over contested bills.

In Nevada House a test ballot showed votes evenly divided between Stewart and Newlands, with one absent.

In Wisconsin the Republican caucus took three ballots for United States Senator without material change in the result.

JUSTIFIABLE A CHANGE.

An exchange suggests that if Bryan shall discover that 26 to 1 and anti-expansion do not promise to be profitable issues for the campaign of next year, he take up the question whether the twentieth century begins in 1900 or 1901.

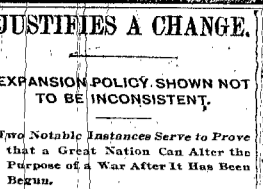

In Montana, Utah, Washington, California and Delaware ballots were taken for United States Senator without a choice.

In New York both Democrats and Republicans offered resolutions urging the ratification of the peace treaty. The resolutions were referred to a committee.

In Texas the election of C. A. Culbertson to the United States Senate was ratified.

In New Jersey John Kean (Republican) was elected United States Senator to succeed James Smith, Jr.

In Wisconsin the Republican senatorial caucus took twenty-five ballots without change of vote for any of the candidates.

WAITING FOR THE DOOR TO OPEN.

In Michigan several new measures were introduced, including a general taxation bill and one providing for a tax on incomes.

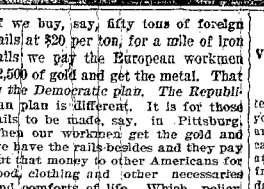

In Nevada William M. Stewart (Silverite) was re-elected United States Senator.

In Pennsylvania the senatorial fight is growing bitter, but the deadlock is unbroken.

In New Jersey John Kean (Republican) was elected United States Senator to succeed James Smith, Jr.

In Wisconsin the Republican senatorial caucus took twenty-five ballots without change of vote for any of the candidates.

In Michigan several new measures were introduced, including a general taxation bill and one providing for a tax on incomes.

PUBLISHED EVERY THURSDAY.

The exposition boomers are now whistling through their hats. It's a lost cause and few are the regrets that such is the case.

Whoever the question of expansion has been submitted to a vote, either in a convention or state legislature, the anti-expansionists have been greatly in the minority.

Bro. Huss, in the Norfolk Daily News of Saturday, gave the Fremont Tribune a rebuke it justly merited, and it had the first time that paper has merited it; not by a random shot.

The insurgents over in Hollo, about ten thousand miles away, still seem to be in a fighting mood. It is too bad such people can't see a good thing when it is presented to them.

It's "grippe" now; what it will be a few years hence has not yet been announced. Nevertheless, it's the common-sense thing to make a person want to swear we ever heard of.

Uncle Sam is not looking for an alliance with Great Britain and there never will be one in the flat term of the word, through a mutual understanding of a decidedly friendly nature will no doubt long exist.

France has her Dreyfus trouble, while the United States has troubles of her own not the least of which is the disposition of the Philippine question. But Uncle Samuel has never failed to settle such problems, and always right-ly, too.

The Cubans have become restless of running the G-men of the Antilles to suit themselves, but they will find that patience covers a multitude of sins and is the golden key to a future stable government, with freedom as the watchword.

William A. Clark, the newly elected Senator from Montana leans toward free silver, and although a democrat is a protectionist, which makes him about one half republican. A man who isn't a protectionist doesn't last long in the northern and western states.

In one of the eastern states a candidate for United States senator who has been accused of buying the influence of certain papers, says the only papers worth buying are those which cannot be bought. A paper that will sell its influence certainly hasn't much to sell.

No wonder that Nebraska enjoys the distinction of being one of the states in the union with the smallest percentage of illiteracy. There has been enough bills introduced in the legislature, providing for normal schools to educate the population for ten years.

Omaha ran up against a snag at Washington last week when Congressman Mirov's exposition resolution was shelved by the ways and means committee. Taken collectively, the towns and cities outside of Omaha are a heap bigger than that city, and this is the first deposit to that account.

West Virginia got right down to business and elected a republican United States Senator, but there are other states that have been dilly-dallying away time in an effort to do likewise until the desire of the people to elect United States senator by a direct vote has become very pronounced.

Congress is grinding away on the treaty question, a vote upon which will be taken next Monday. Four-fifths of the people desire that the Paris treaty be ratified. After that the question of the disposition of the Philippines can be settled as congress sees fit. It is a question for the whole people to decide.

The rains running between Chicago and the Missouri River these days travel so fast that special air tubes are attached to each passenger's life insurance rates have not yet been raised, but sitting at such a gallop has become more interesting than Cyrano de Bergerac.

A bill providing for the redistricting of the state of Nebraska into new representative and senatorial districts has been introduced both in the senate and the house. The 11th senatorial district, according to the bill is to be composed of the counties of Wayne, Dixon and Cedar, and the 12th representative district of the counties of Wayne and Thurston.

If the republican representatives and senators at Lincoln ever get into a caucus, the proceedings should be open and above board. No secret business will meet with the approval of the republicans throughout the state. To do otherwise would be to incur the wrath of the people, for every member would be tainted with suspicion. The party cannot afford to have such a state of affairs existing.

THE FARMER'S SHARE.

The extent to which the agricultural producing classes have shared in the great increase in national prosperity and wealth which has followed the restoration of the American policy of Protection to labor and industries is shown in the statement of the Treasury Department Statistical Bureau, in connection with the records of the grand expansion of our export trade during the year just closed. From these official statistics it appears conclusively that the farmers of the country have in fact been the largest beneficiaries of the marvelous export trade of the year 1908. Three quarters of the total year's exports of upwards of \$1,200,000,000 in value of the farm. Breadstuffs, cotton, provisions, live animals, tobacco and fruits supplied the great bulk of the \$650,000,000 worth of their products which went abroad during the year, breadstuffs being the largest in value, cotton second, provisions third, animals fourth and tobacco fifth.

In no earlier year in our history has the exportation of products of agriculture been as large, the total for the year surpassing by \$100,000,000 that of the export years 1891 and 1892. Both in quantities and prices received the exportations of farm productions have been unusually large, and this relates to nearly every class of articles exported. Of breadstuffs alone the exports of the year were \$350,000,000 greater than those of 1897, and were more than double in value those of 1895. Of provisions, the year's exports were nearly \$25,000,000 in excess of those of last year, while cotton exports were considerably in excess of those of 1897 and 1898, but slightly below those of 1896.

Besides these great classes the smaller items of fruits and nuts, hay, hops, seeds, vegetables, oil cake and vegetable oils, eggs, feathers and many other articles of this class, added to the receipts for agricultural articles exported, bring the grand total up to more than \$850,000,000, against \$730,000,000 in 1897, \$655,000,000 in 1896, and \$544,000,000 in 1895.

All the articles of great agricultural exportation showed a marked increase for the year, compared with preceding years. Corn for the first time passed the 200 million bushel line in the calendar year's exportations. Oats, in which the growth of our exportations has rapidly increased during the past few years, shows a total of 85 million pounds, an increase of more than 25 per cent. over last year. Wheat shows a record total of 150 million bushels, against 110 million bushels last year, and 85 million bushels in the preceding year, while the value exported in 1898 exceeds \$130,000,000, against less than \$100,000,000 in 1897, and less than \$60,000,000 in 1896, being more than double those of 1896.

Great Britain is the farmer's largest foreign customer, despite the fact that our purchases from her in the past year have greatly decreased. Notwithstanding the fact that we have reduced our purchases from the United Kingdom nearly one-third during 1898, as compared with 1897, our sales to that country have increased more than \$50,000,000, and for the full year will exceed \$600,000,000. Of the more than 200,000,000 bushels of corn which the farmers have sent abroad during the year, over 75 million bushels have gone to the United Kingdom. Wheat exports to the United Kingdom increased nearly 30 per cent. and formed 60 per cent. of the total exports of wheat, while flour exports to the United Kingdom increased in a like proportion and formed more than 60 per cent. of the total exports of that article. Cotton exports to the United Kingdom have increased over 40 per cent. and those of provisions and other farm products likewise show a marked increase.

Germany has also increased her purchases from the United States, despite the frequently expressed belief of the existence of adverse duties and regulations in that country. Her purchases of corn from us in 1898 increased 20 per cent. and her purchases of wheat and flour from us have more than doubled as compared with 1897. Of cotton, our sales to Germany increased nearly 25 per cent. Oil cake and meal increased 50 per cent., while even in provisions there was also a marked increase, the sales of bacon increasing more than 30 per cent., and those of hams more than 100 per cent. Lard exports to Germany increased more than 40,000,000 pounds, while exports of fresh pork to Germany in 1898 are more than five times those of 1897 or 1895.

The following table shows the exports of agricultural products in each calendar year during the past decade, the figures for December, 1898, being estimated:

| Calendar year. | Agricultural exports. |
|----------------|-----------------------|
| 1888. | \$491,381,608 |
| 1889. | 589,507,035 |
| 1890. | 628,779,597 |
| 1891. | 730,069,702 |
| 1892. | 712,539,832 |
| 1893. | 619,135,633 |
| 1894. | 573,684,383 |
| 1895. | 545,715,881 |
| 1896. | 664,955,372 |
| 1897. | 730,323,514 |
| 1898. | 850,000,000 |

* Estimated.
