Syrup of Figs is well known to be a combination of the laxative principles of plants, which act most beneficially, with pleasant aromatic liquids and the juice of figs, agreeable and refreshing to the taste and acceptable to the system, when its gentle cleansing is desired. The quality of Syrup of Figs is due not only to the excellence of the combination, but also to the original method of manufacture which ensures perfect purity and uniformity of product and, it is therefore all important, in buying, in order to get its beneficial effects, to note the full name of the Company—California of Syrup Co—printed on the front of every package.
