Thirty years of experience, protective patents, and many other valuable improvements devised and perfected by the DeLaval en-gineers in all parts of the world in the past three years are gineers in all parts of the world in the past three years are responsible for this fact. Every feature of the DeLaval is improved from the supply can to the base. The new centreimproved from the supply can to the base. The new centre-balanced bowl with its separate spindle is alone a triumph in separator construction and must be seen to be fully ap-preciated. Then there is the 1-piece "anti-splash" sanitary supply can, adjustable shelves for skim-milk and cream rec-eptacles, new frame designs, and many other less important all combining to make the DeLaval as nearly ideal as a sep-arator for farm and dairy use can be made. There is the proper size machine for every size dairy from the smallest to the largest and no cow owner can afford to be without one of these improved machines. Write us at once and we will send you our new illustrated catalog by first mail with full information how you may have a free demonstration of the improved DeLaval in your own home. It will pay yon to do so and your only regret will be that you did not investigate sooner.

There were many buyers from a distance and the greater part of / the sales were to outsiders. This is account-ed for from the fact that this was the fourth sale Mr Clark has held in less than a year and in the prior sales the local demand for his stock was pretty well filled. There were sixty three head sold at an average of \$93 a head which, considering the grade of cattle is not a high price. In the four sales Mr. Clark has held in the past year he has sold. \$24,000 worth of cattle.
