Hot and Heavy

A thermometer won't keep you weem.

It will tell you when the room is too hot—or too cold. A hydrometer won't keep your battery charged.

But it will tell you when the battery solution is too heavy or teo light—and in this way will indicate when your battery needs to be charged.

It's easy to use the hydrometer. All you do is to draw up a sample of battery solution in the hydrometer tube, and read the figures on the istem of a little case there.

## **Products on Food** and Livestock Prices

I F a drousand-pound steer could be used for nothing but its food parts; its meat, sold at regular prices, would not bring what the steer cost. If its three hingdred and fifty pounds of inedible parts were thrown away, either producers would have to take lower prices for animals or consumers would have to pay more for food

Hence, Armour and Com-pany must find a way to use and fell every ounce of all live-stock.

One of the fundamental benefits of big business is that it has the resources to make scientific investigations in de-veloping new products and the organization to sell them when they have been developed.

there have been developed, the have been developed upon as has merely the marketing of meat. The been animal referred to above affords an increase of our efforts in manufacturing—earl—selling the food at all. Multiply the one steer by millions. Think the properties of the problem of hadring the problem of the problem of

deavor in upbuilding many kinds of markets.

kinds of markets.

To produce foods conomically to produce foods conomically to the instance foods of the food of

But packer by-products re-late to more than food. They after the orderly all for dail. They give employment and wages to many additional thou-sumts of workers, and they are used in every business and characteristics.

Thus it is that when you pur chase Armour Products you are doing two important things:

You are helping assure pro-ducers of fair prices which en-courage them to raise the food supply of the future.

And you are definitely secur-ing for yourself utmost value in the food you eat.

You Must Plant It Right

PEFORE you can raise a bumper crop of corn, you must plant the seed right. This can be done only with a planter that fits your particular kind of seed.

### CB&Q Corn Planters

are equipped with every convenience to make corn planting a pleasant task. There is a plate for every size of seed. Besides this, the planter is simple, durable, and accurate—It plants corn as you want it done. Every hill checked evenly, planted at just the right depth, and covered carefully. The automatic marker, the simple clutch, the accurate valves, are features whe want to fall for you about before you buy. They are features that are worth money to any corn grower. Come in and see ut so con.

### Why C B & Q Planters Drop Kernels Accurately

To secure the best planting results all seed corn should be graded and seed plates selected that will fit the size and shape of the kernels to be lanted. The planter then has an even chance to perform its work.

On the C B & Q planter the plates are operated directly from the solid steel axel. The drive chain is always kept taut by an automatic chain fightener, which prevents any lost motion in transmitting power.

This construction all has to do with the efficient working of the plates and the valves of the planter. The plates operate exactly on time to that the desired number of kernels are delivered to the upper valves and are there waiting to drop whenthe valves are tripped. The valves have affected excellent on the total valves are tripped. The valves have affected excellent on their works, a plunger which forces the kennels out together and title the tattent or the furrow.

The action of both the plates and the valves is positive. The power dependable, the gears are carefully cut and therefore mesh properly, suring a high percentage of accurate dropping for this planter. Adress field conditions are met successfully by the C B & Q planter.

One of the strongest features of the CB&Q planter is the combined variable drop and clutch. The clutch is built into the dropping mechanism in a way that is signle and effective. By means of the variable drop, 4, 5, or 4 kernels can be planted in each hill and the clange can be made from the seat without stopping the team. The clutch is positive and accurate.

This is one of the strongest features on the C B & Q corn planter.

Automatic marker requires no attention at the end of the row.

You can use edgedrop, flat-drop and full-hill drop plates in the sam per without any change in the mechanism.

## **Have Advanced Greatly**

This Necessitates Increased Telephone Rates

Nearly everything we use in furnishing telephone service has increased in price the last few years.

High labor expense in manufacturing plants has raised the cost of telephone equipment.

Freight rates have gone up, too, and this has added to the price of the equipment we must buy.

The cost of telephone operation has steadily advanced, both because of the increased cost of material to the telephone company and the increased living expenses of employees.

The consumer has realized the necessity of paying more for rent, for food, for clothing and for transportation. . The telephone industry has been affected by the same conditions which have produced higher prices in all the necessities of life.

In order to meet the high cost of telephone operation a revenue in just proportion to expense must be obtained.

If this company is to continue to furnish telephone service to the public it must obtain such rates as will produce a revenue sufficient to cover the cost of providing the service.

CONSOLIDATED WITH THE WAYNE REPUBLICAN

WAYNE HERALD, THURSDAY, APRH. 24, 1919

OME TO BE PROUD OF. A REASONABLE PR

In every point of exterior appearance, interior arrangement, construction, and design, this home scores high. Here is a charming little bungalow that anyone could refer to with pride and say, "That is my home." It is constructed of standard materials that are not expensive, and the shape of the house makes it easy for carpenters to build. Six-inch siding produces a good-looking house, especially when contrasted with white window frames, and above the foundation a whife water table. The wide overhanging roof spreads its sheltering eaves over the sides of the house. Notice the decorative brackets on the roof over the porch. The porch is open on three sides, and therefore, its chances of getting breezes from somewhere are almost certain.

This attractive little home with its two bed rooms is large enough for a medium sized family in either the town or country.

Study the floor plan carefully. Notice the cozy arrangement of the rooms. There are five large rooms and a bath and reception hall. The living room, dining room and kitchen are so arranged as to save needless steps and labor for the housewife. Both bed rooms have large clothes closets and are easily ventilated.

This is one of the CURTIS home designs and is finished throughout with CURTIS woodwork.

Here, indeed, is an ideal house for the man of small income who wants a home of his own

Come in and see us about this house: We will give you exact information as to the cost of build-ing this home on your lot, and will furnish the plans for building it.

We want you to inspect our beautiful book of plans which contains One Hundred and Forty-Three illustrations, giving the exterior and interior designs of beautiful homes in different styles of attractive architecture our book of interior woodwork will appeal to you. It contains all the comfortable features so dear to the home builder, and such a large-variety to choose from The Duilt in features made by the CURTIS people are of such a distinctive class and variety, that we cannot begin to tell you in this advertisement of all the good things we can show you. Come in and see us and let us help you with your plans and, we can then show you with greater thoroughness, the beauty of our built-in buffets, book-cases, pedestals, columns, newels, winlow seats, fire places, cezy mocks, stait work, panel work, beamed ceilings, doors, windows, kitchen cupbeards, breakfast nocks, ironing boards, and, in fact, everything that makes for attractiveness and comfort in the home

## Clark's Garage

<u>Zidilidigaanuudun kirakiridin miiligaan makkirin makaana kaana makaana makaana makaana makan makan makan y</u>

has, on account of the ever increasing volume of all branches of the automotive industry, found it impossible to continue with it in a general way. Since the truck unit manufacturing and sales end has grown to such an extent that I cannot do justice to that part and general repair at the same time, I have decided that it is best to discontinue the repair end of the business and devote my entire time to that branch which is most in line with my plans for the future. This change will also allow us to render better service to our customers, on all lines that I have built or sold and on what we expect to build and sell from now on.

For the past year I have been building and have placed within Wayne territory a good quantity of truck units and a reasonable number of Chalmers cars (with the famous hot-spot manifold) all of which are giving excellent results, and whose users are all boosters. We expect to continue the manufacture of the truckunit in three capacities, but with some moderate improvements and with the additional feature of pneumatic equipment, which is optional, at a price.

In addition to the Chalmers cars and truck units, we have the Huber tractor, which ranks high in the ractor field, and the Clydesdale truck, a truck absolutely in a class by itself and without peer.

We shall continue with a good line of staple accessories, and are in a position to sell you guaranteed tires at a price that will be cheaper, in most cases, than having your old tires repaired

Our business will be carried on under the name of R. A. Clark Co., and don't forget that "Clark Did It" and will continue to do it, so that when you are in the market for accessories, a truck unit touring car, truck or tractor, remember that it's R. A. Clark Co. for service because we are equipped to deliver it, that valued assistance which is as worthy of consideration as the product you seek to buy,

Thanking you for past favors and assuring you that we are in a position to serve you in a bigger and better way, we are, yours eventually

NASH

# Passenger Cars

Let us demonstrate to people who are figuring on buying hew ears, the superior points in the Nash. We can show you a wide choice in body styles. In addition to style, it has abundant power, works easily and rides smoothly. All Nash cars have the Nash Perfected Valve-in-Head Motors now acknowledged to be a step forward in motor construction. Nash cars are conceded to be in the front rank of America's motor car values. The Nash motor's quick "pickup" and flexibility adapt the car for city service. Its unusual power and endurance fit it for the hard going of the country road. The family desiring a car for all purposes and for all seasons will find the versatile Nash a sound and sensible investment.

Our territory for the Nash includes Hancock, Brenna, north half of Plum Creek Hunter, Strahan, Wilbur, south half of Chapin and Wayne.

We handle Nash Trucks, and also Republic, Hawkeye and Ford Trucks. If you need either a car or a truck, see us. We can satisfy you and serve your advantage.

District No. 14 Dan Thomas, road work District No. 42 

The following claims are on file against the county but have not beed on at this time:

The following claims are on the against the Comp. 2016.

The following claims are on the against the Comp. 2016.

This should for 9.50; 1.330 for \$325.00; 1515 for \$1.201.04; 298 for \$199—\times 88 for \$165.70; 112 for \$15.00; 276 for \$70.00; 298 for \$341.32; 106 for \$38.00; 216 for \$28.08; 287 for \$251.75; 299 for \$342.40; 111 or \$15.00; 231 for \$472.55; 290 for \$57.90; 388 for \$953.28. Report of W. O. Hanssen, county treasurer showing amount of fees received by him for the quarter ending March-31\_1919, amounted to the sum of \$9.00 was duly approved.

Whereupon board adjourned to May 6, 1919.

CHAS. W. REYNOLDS, Clerk.

Picture on left shows Outfit divided into Power Plant and Light Plant. Pow not consists of 4 H. P. Cushman Engine on skids, with Cooling Tank and G divided the consists of Generator and Switchboard, mounted on fram signed to set on skids of Power Plant. "Feture or right shows complete unit belted for electric light service."

Why the Cushman "Does More"

It does more because if give you both portable Light and portable Pown, in the most compact, efficient and convenient form ever devised. He does more because there is less whilation with a belted outfit like their consequently less adjustments, regains and service are required; consequently less adjustments, regains and service are required; and the convenient of the service of the consequently less adjustments, regains and service are required; and the convenient of the conv

## The Land of Opportunity Kit Carson County, Colo Located in the Rain Belt of Eastern Colorado

This land produces more wheat, rye, barley, and oats per acre than eastern Nebraska, where land is selling for five and six times as much. Alfalfa grows equally as well as on your \$250 and \$300 land.

Gorn will yield-from twenty to fifty bushels per acre de-pending on the manner of cultivation. With this combination it makes the ideal stock-rasing country, as cattle, horses, skeep, logs, and poultry are free from the many diseases so prevalent in the east.

Burlington, the county seat of Kit Carson county, is lo cated on the Main time of the Rock Island railway as it enter Colorado from the east, and the markets are brought very close

Denver, Colorado Springs, and Pueblo on the west, Kansas City, Omaha, St. Joseph, and Chicago on the east afford an ex-cellent market for both grain and stock.

Kit Carson is especially favored when it comes to climatic conditions. The air is very invigorating, and never heavily laden with humidity as in the eastern localities.

The alititude of this county is 4,160 feet

As in eastern Nebraska and Iowa, settlement means higher land values. The same conditions exist here as in western Nebraska and values are now selling from \$85

Land is now selling for from \$25 to \$50 an acre for the choicest farm land, but will not stay at that price for many months, and those who have money to invest or who wait an ideal farm bome will do well to buy at once.

The original purchase by the thirteen large real estate firms now operating in Burlington; is now nearly-exhausted, and this will mean you will have to pay from \$10 to \$20 more per acre in the next sixty to ninety days.
