

### You Will Like the Way This Cultivator Works

A good many of our customers have chosen the John Deere VA from our line of cultivators, and they are all mightily well pleased with it.

Because of its satisfactory performance, we are glad to recommend it to customers who are now in need of a good cultivator.

Here are some of its features:

It is a straddle-type, level-bottom cultivator, easy to operate either on or off the seat. The rigs are not

affected by the weight of the driver. The shovels have wonderful set and maintain even depth of cultivation in all kinds of soil. There is an easy vertical adjustment to keep the rigs level. The couplings are adjustable for close or wide cultivation. The pull of the team is direct from the ends of the rigs—pull steady and runs light.

If you have seen this cultivator at work in a neighbor's field, we know that it made a good impression on you. We can furnish you with one just like it. If you haven't seen one, you can see it here at our store.

Come in and look over our cultivators and other good implements. Our service is ready to help you.

For-Clean Athletics.

Several matters of general importance came before the Northeast Nebraska Athletic association at their regular business meeting held at the Platteview hotel, Friday afternoon and track meet on May 16, 1919.

The eligibility protest of Jess Hamilton of Plainview on the ground that he was not a bona fide pupil in regular attendance in the Plainview high school, was sustained by the following schools: Boone, Creston, Laurel, Newcastle, Hartington, Osmond, Randolph, Tilden, Wakefield, Wakefield.

Not a dissenting vote was cast as Platteview asked to be excused and hence did not vote.

Motion made and passed unanimously that Ross, third baseman on the Newcastle ball team be disqualified on account of smoking cigarettes.

Motion made and passed unanimously that all points made in the Newcastle-Plainview base ball game be eliminated from the contest on the ground that both schools had violated the league constitution by playing ineligible.

All superintendents present (ten) went on record to stand 100 per cent in opposition to cigarette smoking among athletes.

Time Granted Germans.

(St. Louis City Journal)

A period of seven days of grace has been extended to Germany by the representatives of the allied and associated governments in order that they might formulate a peace treaty of such importance.

Almost simultaneously with the request by the peace plenipotentiaries for more time comes from Berlin a statement of the German cabinet that Germany is unwilling to sign the peace treaty. The document was set forward to stronger words, of the views of the German plenipotentiaries in Germany that more time was required in order that they might formulate a peace treaty of such importance.

Turks See Their Finish.

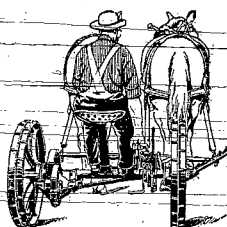

(World-Herald)

The Berlin statement of the German cabinet that Germany is unwilling to sign the peace treaty.

The extension of time which originally was to have expired at noon Thursday, was set forward to noon Friday, May 23, at the request of the German plenipotentiaries in Germany that more time was required in order that they might formulate a peace treaty of such importance.

# MR. FARMER, READ THIS

## THE McCORMICK No. 6

Is not a McCormick No. 4 mower made over. It is a new mower with all the good features of the No. 4 embodied with many improvements added.

### NOTICE THESE GOOD POINTS

Countershaft Easily adjusted.

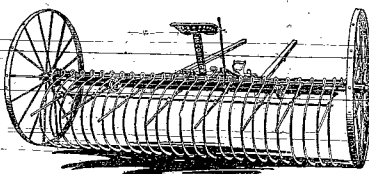

The outside end of the countershaft is kept in place by washers and cotter pins.

This construction makes it possible to make an adjustment on the countershaft in a few minutes. You will notice also that the adjustments are made from the outside of bearings, which is a desirable feature.

### FLEXIBLE GAG ARRANGEMENT

To do good work under all conditions, in rough meadows as well as smooth, a mower must have a flexible gag arrangement. It must be possible to raise the bar reasonably high without increasing the angle between the pitman and knife. The McCormick No. 6 is an improvement over most mowers in this respect. The cutter bar can be raised to the first notch, and if necessary to the second notch while the machine is in operation. The cutter bar has the same angle in both positions in relation to pitman and coupling bar. You will appreciate this extra high lift in rough, stony, or stumpy ground, or in going across a newly cut field and crossing windrow.

## McCORMICK SELF DUMP RAKE

The McCormick self dump rake will meet your requirements under all conditions. It has gained a reputation in every locality for durability and ease of operation. It dumps quickly, and the teeth return to the ground close to the windrow. As the rake fills the cleaner rods float above and retard the hay so that it does not roll into aropy form.

### WHEELS INTERCHANGE

The wheels of the McCormick rake interchange so that when one side of the racket is worn the wheels can be reversed, giving practically the wear of two rake wheels in one. The wheels have staggered spokes and heavy steel tires. They are large and keep the rake running smoothly when on rough ground. The inside racket is covered with a shield which prevents the hay from winding or interfering with the tripping device.

## THE EARLY DAYS IN TWO COUNTIES

From the Wayne Herald, May 21, 1919.

Mr. and Mrs. Ed Smith entertained twenty friends at cards.

O. Strahan of Malvern, Ia., visited relatives and friends in Wayne.

Mrs. D. C. Main went to Sioux City to see her little son's tonsils treated.

Mrs. Malinda Abbott died at the home of her son, J. E. Abbott, May 15, 1919.

Wick Hansen went to Boyd county to visit a few days and look over the country.

Miss Edith Snodgrass and Miss Eva Allen attended the Epworth league convention at Carroll.

Mr. and Mrs. L. C. Gilderberg took their little son to Sioux City

to have him treated for throat trouble.

Walden Tucker arrived in Wayne from Fairfax, S. D. for a few days' visit with home-folks.

Arthur Roberts who had been in the employ of L. P. Orth left for his home in Fairbury, Neb.

Miss Edna Britton who was working in Sioux City, came home for a few days' visit with her parents.

Mrs. Barbour of Missouri Valley, Ia., and Mrs. Easteron of Garfield, Neb., were called to Wayne by the sickness of their mother, Mrs. William House.

L. W. Alter who was elected to a six-year term as one of trustees of the state grand lodge of A. O. U. W., was in grand island on lodge business a few days.

The city council met and Mayor Britton made the following appointments for the ensuing year: Har-

shal, George Miner, electrician, T. H. Fritts, and city physician Dr. J. M. S. Merrill suffered several severe wounds on his body, the result of trying to stop a runaway team.

Dora Larson, daughter of Mr. and Mrs. J. P. Larson, was driving near the railroad track when the team became frightened and ran away. Mr. Merrill attempted to stop the animals but was knocked down and the buggy ran over him. The team was finally stopped by Chauncey Sewell.

From Ponca Journal, May 19, 1919.

We are now having in Ponca gay times in the walking business. Professor Buettner, the great walker, came down last week from St. Helena, and opened out in Gamble's hall. Every evening since, great doings and wonderful pedal performances have been going on.

At least forty or fifty persons walk every evening and it is rare fun to see them go. A large number are first-rate walkers, who step off a quarter of a mile in a minute and a half. Others are not quite so rapid in motion and especially at the turning points, where the footing is precarious.

One curious walker went as though he was swimming. Another went jiggety, jiggety, jig, and chewed his tongue as if he wanted to swallow it. These funny walkers attracted more attention and enthusiasm than the good ones. There was one walker who alternately quatted down and shot up as he ambled over the road. Another discharged himself with a hop, skip, and jump along the path like a cat, and his legs going faster than his body and his hips winking as though he had a hot potato in his mouth. Another, as he walked, struck the air with his arms and blew off steam like a locomotive. Another projected himself through space stiff-legged, while close behind came a walker stiff-backed, as though a ramrod had been run down him. Yet with all these eccentricities the majority did well. One sponched down and bounded along like a heavy wagon over a rough road, and you couldn't tell whether he was walking, running, or crawling. Another waddled like a barrel of beer on animated skids. Taken altogether, the performances are exceedingly amusing and are continually greeted with roars of laughter.

The professor appears in full uniform and gets over the ground in a right nimble manner. A dozen others do not seem to fall far behind him in mirth, although on a long pull, he will probably out-wind them.

Order of Hearing and Notice on Petition for Settlement of Account. In the County Court of Wayne County, Nebraska, Wayne County, State of Nebraska.

To, all persons interested in the estate of John Linder, deceased.

## THE FRIENDLY TOBACCO

THERE may be some things that can be done well in a hurry, but pickin' a wife an' agin' a tobacco ain't amongst 'em.

Velvet Joe

We put away millions of pounds of fine Kentucky Burley tobacco every year, stored in wooden hogsheads. It ripens two years. When we take it out it's different—Nature has improved it, good as it was—made it friendlier, more fragrant, cool-smoking, long-burning.

Nature has given it a delicious quality of mildness and fragrance that no artificial means can ever equal.

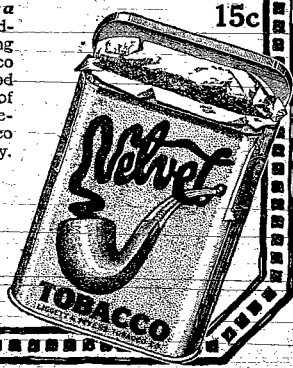

It's just that extra touch of friendly goodness that is building up VELVET Tobacco into the favor and good will of thousands of pipe smokers who prefer to smoke tobacco cured in Nature's way.

You would notice the difference.

Nebraska's New Code Law. Of Nebraska Farmers: Should the farmer favor or oppose the new Nebraska code law? It is the first time in the history of the state that there has been an office department of agriculture which is charged with the responsibility of administering all of the agricultural laws. At the present time these are administered in many different departments. Furthermore, the code law provides for a marketing division within the department of agriculture. It will be the duty of this division to see that anti-discrimination laws and other laws relating to the marketing of farm products are properly enforced. Here farmers can come for help, if without methods of complaint are being used against them by corporations.

The farmer should favor the code bill because it stands for efficient government—in times past, departments have been created without sufficient consideration of the work of other departments. There are not less than twenty departments, boards and commissions with their salaried heads appointed by the governor, with their force of stenographers and clerks and field inspectors doing work which should really be done by six departments. It is merely the object of the code bill to place the administration of each of the state's laws into one of the several divisions.

We think farmers should also favor the code bill because it points the proper way to a short ballot. Eventually we should have a government which will permit the people to know who is responsible for the administration of its laws. With the present number of commissions, boards and department heads the responsibility cannot be located. The present number of commissions and departments is responsible for a strong administration? There is a very real danger that the laws that are properly administered, and then we present him with such a tangled mass of administrative machinery that he finds his hands tied. The code bill will help straighten out the mess by permitting him to select responsible heads for his departments instead of mediocre heads for twenty. The plan is the same as that of our national government, a president and a cabinet. If the treasury department or the postoffice department, or the department of agriculture at Washington makes mistakes, we know whom to blame. We hold the people responsible, and if we don't like his way of doing things, we change the administration.

That is exactly the theory of the code bill. It holds the governor responsible for the administration of our laws in so far as the constitution will permit. Some of its critics say that it does not go far enough and that it is not a real code bill. They say that it is not a real code bill because it does not give the secretary of state, and the like. It cannot go farther under our present constitution, but it is a real code bill. The constitutional convention will remedy that situation.

The code bill will give to the man who is responsible for the administration of laws. We will get away with a large number of departments. We will elect a business like administration of the state's affairs. We will pay the heads of departments enough money so that we can get capable men. We will, by eliminating duplication and making possible efficient management, save money in the state's affairs. If we get a governor who makes a mess of his affairs we know whom to blame and can give him a proper thrashing when election time rolls around.

The Primary Bill. Kearney Hill, Governor McKelvie gives as a reason for not vetoing the primary bill passed by the late legislature: "I did not veto the primary bill. I regard the power of something to be used when a bill is vicious or is passed by improper means." This is the correct view. It was not up to him to pass upon the merits of the bill amending the primary law. The measure is not vicious and it was not passed by improper means. A trial may show that the changes are good and satisfactory.

Why the Count Sat. New York World: The explanation of why Count Brockdorff-Rantzau sat instead of standing when he addressed the peace conference is natural and satisfactory. "He was master of his voice and not of his legs." A witness of the knees was natural under the circumstances.

Cause of Headache. By knowing the cause, a disease may often be avoided. This is particularly true of headache. The most common cause of headache is a disordered stomach—or constipation, which may be corrected by taking a few doses of Chamberlain's Tablets. Try it. Many others have obtained permanent relief by taking these Tablets. They are easy to take and mild and gentle in effect. Adv.

## Pennsylvania Bar o Circle Tires

A Quality Tire at a Popular Price

The design of the tough, black tread is indicated by the name—combination of bar and circle. The special construction puts the thickness and wear resistance where it is most needed.

This heavy tread enables these tires to far exceed, under normal conditions of service, the mileage for which they are guaranteed.

## Fifteen Per Cent Discount on all Tires and Tubes

We are headquarters for Pennsylvania Tires—Vacuum Cup, Ebony Tread and Bar O Circle. As good values for the money as any other tires made.

VACUUM CUP TIRES—in 1914, nine Vacuum Cup stock tires were submitted to official test by the Automobile Club of America.

They attained an official average on two-ton cars of 6,750 miles. The maximum was 10,164 miles.

No other make of tires has ever been offered for this official test.

Vacuum Cup Tires stand on that record and with greatly enhanced quality over the stock tires that are made.

## Higher Prices Send Telephone Expenses Up

About everything you buy costs more than before the war.

High freight rates and unusually high wages have caused the prices of nearly all raw materials to rise far above normal.

The increased cost of labor and of raw materials has advanced the price of manufactured products.

Prices generally are at a higher level than before the war.

We do not look for the price of labor and equipment to come down materially for several years.

Higher prices for equipment and generally higher operating expenses have increased the cost of furnishing telephone service.

### "SNOW WHITE" GIVEN HERE

Under Direction of Miss Ardath  
Cohn, Operetta Is Successful  
The success of the operetta given  
by the grade pupils of the public  
school last Thursday evening, showed  
an excellent performance on the part  
of this community, revealing as it did,  
what stores of musical talent lie  
dormant among the children. From  
community life would be brightened  
and how the feeling of community  
loyalty might grow if often such  
intention, joyous, and artistic ex-  
pression in speech and music were  
incited. Under the skillful manage-  
ment of Miss Ardath Cohn, instruc-  
tor of music in the public school,  
the pleasing story of Snow White  
was made veritably uplifting to the  
audience that packed the open-  
house.

A large number of pupils repre-  
senting every grade all delightfully  
entertained, took part and all ex-  
ceedingly well. The freedom and  
naturalness of the action, the en-  
semble and general interpretation  
were indeed satisfying.  
The title role that of "Snow  
White" was sung by Frances Brown  
in a clear and flute-like high sop-  
rano. She was an alluring young  
girl, under the part of the evil  
and cruel queen by Katherine Bohner,  
with her strong flexible mezzo so-  
piano, certainly very acceptable and  
well surprised at the fine, active  
and delightful voice of the prince,  
Melvin Olson, who sang the tenor  
role. He was every inch a royal  
personage great alike in love and  
in war. Carl the huntsman, by Elmer  
Hayes, in the last part, was  
likewise pleasing. The high school  
orchestra, under the direction of  
Miss Cohn, has developed into a  
fine organization and its work on  
this occasion reflects great credit  
on the young people and on their  
leader. Miss Madeline Bohner  
served herself a competent accom-  
panist on the piano.  
But all felt that the triumph of  
the evening was the work of the  
entire group. Let such training con-  
tinue and grow in the high school,  
teaching all young people the fine  
art of living, of working together,  
of being conscious of the achieve-  
ments of their associates, each re-  
ceiving and each giving out, which  
is the best life for anyone.

#### Committee to Investigate City Need Makes Statement

The committee appointed at a  
mass meeting to investigate the  
need of a sewerage system, subse-  
quently to paying the following state-  
ment:  
The Storm Sewer Bonds.  
At a mass meeting of citizens of  
Wayne held some considerable time  
ago, the subject was appointed  
as a committee for the purpose  
of investigating the advisability and  
necessity of the city constructing  
storm sewers in connection with  
paying. We have attempted to make  
a thorough investigation and in that  
connection called to our assistance  
a competent engineer from Sioux  
City, who came here and made a  
thorough investigation. His report  
was embodied in that storm sewers  
were necessary and that any at-  
tempt to do otherwise would be  
a grave mistake and lead not  
only to great inconvenience but  
large and continuous damage to  
property. Two other engineers fur-  
ther investigated the matter and  
their reports were the same. The  
only difference in the reports of  
these three engineers is as to the ca-  
pacity and cost of the sewers. The  
last engineer believed that the sew-  
ers recommended by the former en-  
gineers would be satisfactory under  
some what an capacity. This ques-  
tion will of course have to be set-  
tled by the board of directors and  
after the board have voted.

The actual valuation of prop-  
erty subject to taxation in Wayne last  
year was \$2,400,000 and the valua-  
tion this year is expected to ex-  
ceed \$2,500,000 and will gradually  
be expected to increase. Taxes  
on the property are levied on the  
actual valuation of property. Tak-  
ing an assessed valuation of \$500,  
000.00 as a basis a 4 mill tax will  
raise \$2,000.00 each year. The an-  
nual interest on the \$3,000,000  
bonds provided the bonds carry on  
June 9, will be \$325,000. A tax-  
payer owning property to the value  
of the value of \$50,000 would be  
required to pay a trifle more than  
\$4.00 each year for his share of the  
interest on the bonds.

These bonds will bear 5 1/2 per  
cent interest. It is impossible to  
sell bonds bearing a less rate at this  
time. The bonds will be payable in  
ten years. Under the law, they  
containing a penalty payable in less  
than ten years. The bonds will be  
refunding bonds can be issued to  
take up these bonds, and very prob-  
ably at a very much reduced rate  
of interest.  
We respectfully report that in our  
opinion the bonds should be voted  
and the storm sewers constructed.

### A Cozy Bungalow For Town or Country

This attractive little home with  
its two bed rooms is large enough for a  
medium sized family in either the town  
or country.  
Study the floor plan carefully. Notice  
the cozy arrangement of the rooms. There  
are five large rooms and a bath. You will  
find, too, that a front hall is a great con-

The living room, dining room and kitchen are so arranged as  
to save needless steps and labor for the housewife. Both bed rooms  
have large clothes closets and are easily ventilated.

This is Curtis House No. 2032 and is finished  
throughout with CURTIS Woodwork.

Here, indeed, is an ideal home for the man of small  
income who wants a home of his own.  
Come in and see us about this home. We will  
give you exact information as to the cost  
of building this home on your lot,  
and will furnish the plans for building it.

**Obituary.**  
Frank Irvin Blake was born October 22, 1888, on a farm three miles north of Wakefield, and passed away on Thursday, May 15, at his home in Rock county, Neb., at the age of 34 years, 6 months, and 19 days.

When he was 14 years of age he moved with his parents to Holt county, Neb., where he resided with them until he went on a ranch in Rock county in 1915. He was married May 13, 1918, to Miss Ruby Harrington, and to this union was born a boy Glen now 2 months old. On Thursday last he was herding cattle near the house and went in for a while. Presently he went up stairs to look out of the window to see if the cattle were all right. He may possibly have seen something he thought he would shoot from the open window, and reached for his gun, which with other guns, was standing on a little platform over the barn at the top of the stairs. Drawing it towards him, muzzle first, the weapon must have caught and was discharged; the shot going right through his head and killing him instantly. His wife heard the report and immediately followed upstairs, only to find his already lifeless body.

Besides the widow and baby Glen, there survive a father and mother, Mr. and Mrs. C. T. Blake, of Holt county; also four brothers and two sisters, viz: William, of Holt county, Mrs. Ray Coolidge of Holt county, Edward of Rock county, Mrs. Glen McCullough of Dixon, Neb., Mrs. Bert Sibrant of Sibrant

**FENCE POST?**

When you consider putting up a fence you are naturally anxious to make the material and labor you put in last as many years as possible. Consider then the many advantages offered you in the "Century Steel Post."

Strength.—The construction of the post, with the double angle, gives a stiffness and rigidity to the completed fence impossible by the lighter easy-bending posts. It is heavy enough to stand the most severe strains put on it.

Easy to Set.—There are no holes to dig. Nothing to do but drive the post with a heavy mallet or sledge straight down in the spot you select. Effective as it is simple.

Stays Put.—When the post has been driven, the bar just beneath the ground level keeps it straight in line and rigid in the earth. Sets firmly in any kind of soil. Cannot frostheave.

Cannot Burn.—Prairie or forest fires or any other fire can do no harm to Century Posts. They will not warp nor bend.

Lightning Proof.—Your stock will not be killed by lightning because of the fence or posts you use, when a Century is used, for our posts immediately "ground" the bolt before it can do harm.

Saves Labor.—No holes to dig, no delay because of bad weather. Two men can do the work formerly done by six. Saves time in setting posts and fastening wire; 250 to 300 Century Posts can be set in one day.

Long Life.—The fence you put up with Century Steel Posts is put there to stay for years. Rust-proof steel posts mean permanency—this you can now have.

Reasonable Cost.—The cost of Century steel posts is very much less than their comparative value to you. They are low enough in cost to be well within your reach—they are the cheapest permanent investment you can buy.

Canning for State Honors. "Dipping" in the same old-fashioned way, Mrs. Harry Pritchard of Laurel spent the day at the home of the sister Mrs. Charles Sherman. Mrs. Pritchard was in Wakefield on Thursday, accompanied by Mrs. Evin. Carl Davis of Omaha arrived in our city last Thursday. She has a position at the Farmers' Store. Albert Lehmann of Fallon, Mont., is visiting relatives in Concord and will leave in a few weeks. Mrs. J. J. Jones, two of our teachers left Saturday for their homes at Harrison. Mrs. John Peterson and children of Carroll, Neb., visited over Sunday at the home of her sister, Mrs. D. J. Vandenberg. Miss J. J. Nelson who attended the Wayne Normal is home for her summer vacation which she will spend at her home in Concord. Mrs. Rowena Brannan entertained a number of friends last Sunday afternoon at her home. Plates were served in the course of the afternoon. The teachers and pupils of the intermediate school enjoyed a winter roast after school last Monday. All were a jolly good time. Last Monday Mr. and Mrs. A. J. Wallin, Mrs. Beryl Craig, John Hattig, Dr. A. Farnberg, and Jon Lundstrom were Wakefield passengers.

Sugar Crop Above Average.

The sugar "campaings" recently conducted by the United States has produced an amount of sugar that is estimated by the United States department of agriculture's bureau of crop reports to be over 2,000,000 pounds, and this quantity is 25,000,000 pounds above the average of the last year. Beginning this year the principal sources of domestic sugar production, beet and cane, the variations of one crop often fit into those of the other so as to give some degree of steadiness to the total of the two. To some extent this happened last year since the domestic sugar crop was 569,000,000 pounds, or 60,000,000 pounds above the average of the last year. The beet sugar crop 1,530,000,000 pounds, while the production of cane sugar, including the sugar crop produced in the year 1918, was 41,507,000 pounds, or 5,000,000 pounds below the average. All together, the domestic sugar crop is usually about one-quarter of the domestic consumption, the receipts from American possessions about one-quarter, and the imports from foreign countries about one-half. Beet sugar production in the United States has gained rapidly in the last twenty years, and permanently exceeded it in 1906-7, so that it has been about three and three-quarters times the cane sugar crop during the last six years.

To the sugar production may be added that of sirup and honey. It is estimated that the sugar equivalent of the cane sirup of last year is 174,000,000 pounds, and of the sirup sirup 146,000,000 pounds, which together amounted to 320,000,000 (carrying forward the census of 1907), not computed into equivalent sugar, which including coffee sirup, for the grand total production is beet sugar, cane sugar, and sirup, maple sugar and sirup, and sirup sirup, all in terms of sugar, and of honey was 2,515,000,000 pounds—total somewhat above the average of recent years.

Wilson's Stubbornness. Lincoln Journal: The Italians are making it appear that their claim to Fiume is backed by nothing but the stubbornness of Wilson. The fact is that the stubbornness of Wilson is protecting the people back of Fiume, the Jugoslavs to whom giving Fiume to Italy would be like our giving New York to Italy, Germany or any foreign power. America is forced to take the side of justice? That is the only question. The answer is obvious.

No Hope for the Consumer. Aberdeen News: The consumer is assured there is no prospect for a fall in the price of flour, flour or many other commodities. The consumer might just as well settle down to a realization of the fact that the price of flour is the high cost of living will really be the normal cost of living for some time to come.

Vollers-Stolling. Miss Martha Stolling and Carl Vollers were married Thursday, May 15, at 3 o'clock, in the German Lutheran church east of Concord. Rev. E. Gehrke officiating. After the ceremony a reception was held at the home of the bride's parents, Mr. and Mrs. William Stolling. Only relatives were present. The happy couple will be at home to their friends at their new home in north Concord.

AGRICULTURE NOTES.

Plant Rust-Resistant Asparagus. The asparagus industry is fast becoming important in South Carolina, and especially in Aiken, Barnwell, Edgefield, and Saluda counties. In these counties an average crop is 15 to 25 per cent of the crop is due to asparagus rust, and county agents are urging growers to use more and more rust-resistant strains developed by the United States department of agriculture. A report from one agent states that a grower in his community who uses crowns of the rust-resistant asparagus is highly pleased with the showing it made this season and expects to increase his plantings greatly.

Club Girls Can't for Others. Seven cents a pair, 10 cents a quart, and 15 cents a half-gallon jar were the prices charged for canning last season by Margaret Kirk, a Yalton county club girl. Margaret Kirk and two other girls had completed several years of canning club.

The Dangerous Truth. Anamosa Eureka: It has been suggested that if a newspaper took truth for its standard it could not be made a pecuniary success. Any newspaper may take truth for its standard, but if any newspaper publisher, minister, doctor, lawyer, merchant, or banker should always take the truth and speak all that is in his mind, he would land in one of two places--the insane asylum or the penitentiary. Inviting Barleson's Denunciation. New York World: In venturing to announce that as one of the levelers of the republican house, he will seek to have abolished the zone system as applied to second class mail. Representative Johnson must be prepared to be denounced by Postmaster General Barleson as in league with selfish interests engaged in a conspiracy against the government. Somewhat Impertinent. Kansas City Star: A delegation of Americans has been touring Ireland making speeches for Irish independence. How would the people of the north have felt if a party of Englishmen had toured South Carolina in 1860 inciting secession. Penrose in a New Role. Chicago Daily News: To hear Senator Penrose urging retrenchment in governmental expenses gives one a sensation akin to that of being wrong side up in an airplane. Still, the senator may prove a wonder in the retrenchment line.

**Safe Test.**

For those who are in need of a remedy for kidney troubles and backache, it is a good plan to try Doan's Kidney Pills. They are strongly recommended by Wayne people.

Mrs. Henry Hansen of Wayne says: "I was subject to spells of backache for a good many years. Sometimes I went months without a spell and then all at once it came on. I think the cold weather and over-exertion is what caused it. My rest at night was broken by the pain in my back. I had been that way for about three weeks last spring when I began using Doan's Kidney Pills. They made me feel like a different woman." (Statement given June 25, 1935.)

On July 18, 1936, Mrs. Hansen said: "I occasionally use Doan's Kidney Pills when I feel my kidneys need attention." They keep them in good condition so that I have no more serious trouble."

Price 60 cents at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Hansen had. Foster-Milburn Co., Mfrs., Buffalo, N. Y.—Ad.

# The Best Investment in the World is Land

There is no excuse for not owning a farm in the best part of Colorado.

The land is rich and fertile, no hot winds to burn your crops, plenty of rainfall in the growing season and prices and terms are within the reach of all.

Thousands of dollars will be made this year in buying Kit Carson county land and this may be your last opportunity to own a farm in a level land, good soil, where rain is plentiful and crops are abundant.

We invite you to investigate and compare our land with any in the west at our expense.

Viola Donaldson, 26, June bride. The guests were seated at one long table decorated in the bride's colors, pink and white. In the center of the table was a large bowl of pink and white sweet peas. Fastened to the pink and white place cards were ribbons extending to the center-piece and at the end of each ribbon was a little card with "Viola Donaldson and Theodore Rydbeck June 26" written upon it. Mr. Rydbeck who lives at Rock Island, Ill., is attending a theological seminary and will graduate in June. A large white cake in which was concealed a thimble, ring, dime, and button caused much fun. Following an excellent three-course dinner, the evening was spent in sociability.
