### Corn is Selling And Trade is Picking Up

Norfolk Daily News, June 8: A sudden change in corn has developed in the market, according to reports received from elevators and grain buyers who say that farmers who have been watching the grain market closely say by telegraph and telephone orders in unusual numbers when they mention that the market had gone up a few cents. The amount of corn is being sold here. Farmers who brought in the grain explained it was not sold because of first of the month cash calls, but because of rising market.

The sales in Norfolk although heavier than any other previous week for the past month, were no more comparable with those reported elsewhere in the state.

### Business is Picking Up

John Farnham, returning from a swing around the Norfolk district, says that farmers everywhere are beginning to sell corn. A come point five carloads of corn were shipped to Norfolk. It is quite probable that business has actually picked up and steady buying has begun. Mr. Farnham says that the business in the western Nebraska, finds conditions much improved. While business is by no means rushing, there appears a tendency among the farmer merchants and farmers to realize that pessimism fails where optimism wins. He found more liberal selling and signs of confidence which he believed would result in a rapid return to normal business.

A traveling salesman fresh from the Norfolk territory on Thursday night reported heavy sales of farm implements including tractors, and harvesters. On some farms machinery for picking corn has been purchased at this time.

### One Automobile Seizure Reported

Business is picking up in the Norfolk district, according to reports received from Norfolk territory on Thursday night reported heavy sales of farm implements including tractors, and harvesters. On some farms machinery for picking corn has been purchased at this time.

### Buying Still Conservative

Discussions with some other traveling salesman who two months ago reported a general pessimism, indicates that they are to have a different story to tell now. Merchants are buying steadily and close to the needs of the consumer. There is little of the old-time tendency to buy far in advance, although many farmers are now on stock due to increased demand on the part of the consumers.

Material men back from building, repairing or building work, report a labor at various places, but predict this will be all picked up when the new school and municipal buildings are started and paving and road work begin. By the time the work is finished, the corn picking season will be on once more.

**Townley and Langer.**—Huntington News: It is to be regretted that the debate between William Langer, former attorney general of North Dakota and A. C. Townley, head of the "Non-Partisan League," at Fordyce, Tuesday afternoon, has been a most interesting one. A larger community so that it could have been heard by a greater number of citizens. In spite of the fact that much of the time was devoted to an exchange of personalities it must be conceded that Mr. Langer backed up signed papers by Townley and produced photographic copies of others, showing Mr. Townley's signature.

Townley was at all times on the defense, meeting his opponent's challenge of his personal integrity with the charge that Langer was merely a discredited politician, and offered no defense of his own personal actions. It was particularly disappointing to many in the audience that Mr. Townley failed to explain why he should re-

ceive over \$3,000 from the farmer's bank organized at Valley, N. D., and which Mr. Langer charged that he had secured for the benefit of the bank. Mr. Langer, however, refused to compete Townley to return. This is the incident which Langer claimed had occurred. He stated that Townley exhibited copies of the check showing that the money was paid to Townley through the Scandinavian American bank of Fargo, now defunct, and the president and cashier of which were convicted of violation of the banking laws. A total of \$3,000 was taken from the Valley City bank and was returned when he started legal action, according to Mr. Langer. Over \$13,000 was paid to Townley by the bank.

With the exception of this one charge and the further charge that Townley was the manager of the organization was an acknowledged socialist, Mr. Langer devoted his time to the discussion of the personal record of Townley.

Many who went to the meeting with open minds anxious to hear both sides were disappointed and the meeting was adjourned some time to answering the charges hurled at him by Mr. Langer and less time to answer the personal charges of Langer. Langer's personality is so widely known by his followers but which failed to make any impression on those merely anxious to get the facts.

Advertisement for 'Devoted To Golf' by Frank J. Brady. Text: 'The satisfaction derived from a well-balanced wooden club is that in the most pleasurable sensations that golf affords. The swing with the three wooden clubs, the iron, the driver, the putter, is the same in every respect. The fans of the brass and alloy are shallow than that of the iron, which is why to get the ball up, more upright help to get the player nearer the ball in the driver's case. It is much easier to handle and get more results with than the iron long iron club; that is, the club and driving iron. It elevates the ball and gives much greater distance. After getting the correct grip, the next thing is the proper stance, of which there are three types, the open stance and close stance. The beginner should adopt the open stance, and later change to one of the other stances. To get the square stance, draw an imaginary line parallel to the line of direction of the ball, stand so the toes are upon it with the ball nearly opposite the heel, and the feet far enough apart to give a firm, easy balance. Have the feet set so as to prevent stiffness and swaying of a diver vase and a vegetable dish trimmed off gold. At 5 o'clock a two-course dinner was served by Mrs. and Misses Larson, Mrs. and Misses Grover, Mrs. and Misses Olsen and Misses Ella and Hilda Larsen which was greatly enjoyed by every one present. The banquet was very enjoyable by the honored parents, the devoted children and the faithful friends.'

### The Early Days in Two Counties

From Wayne Herald, June 10, 1882:  
 Prof. Ahen returned from Dixon and will assist in his father's store. It is planned to form an Old Settlers' Association.  
 A large percentage of women in Wayne are learning or have learned to ride a bicycle.  
 Miss Marie Williams who is attending Bellevue college who is lecturing in the circuit class.  
 John P. Sheridan is loading the first car of brick for the new \$100,000 building at Bloomfield.  
 Lieut. Winston of the Fifth U. S. artillery arrived from Illinois, making most of the trip by bicycle. Cedric A. Britton was appointed traveling agent for the Bureau of Promotion of the Trans-Mississippi Exposition.

Markets, June 10, 1887: Wheat 52c; corn, 10c; butter, 8c; potatoes, 15c; oats, 12c; flax, 57c; eggs, 7c; hogs, \$3.00.  
 Yesterday was flower day and the members of the W. C. T. U. observed the day by leaving flowers at different places in the city.  
 Mr. Henry Frevet and Miss Martha Behmer were married at Hinsdale, June 27, it being tried at home. Mr. Behmer lives on a farm near Wayne.  
 C. K. Rash who murdered his wife and children at his home near Wayne, Jan. 27, is being tried at Pierce. The general opinion is that he will be found insane and sent to the penitentiary.  
 The town will celebrate Monday, July 5. The Wayne Corn Palace band will have charge of the program. Special features will be bicycle races, foot and sack races, base ball, a balloon ascension by a lady aeronaut, an electric parade and an address by Gen. Cowin, of Omaha.

From Ponca Journal, June 16, 1882:  
 District court was held in Wayne county last week. Counselor-Gant of this place, Mr. Bryant of St. Helena, and several other leading attorneys were in attendance.  
 Hon. A. H. Norris of Morganville, N. Y., arrived Friday evening on his way to the town of Norris, Iowa, of which he is the founder. Mr. Norris passed the winter in Florida where he has a large orange grove. He still remains in Cedar county several weeks.  
 Mr. Welly, the town treasurer, informs us that the indebtedness of the town of Norris is \$1381.02, of which was paid June 15, \$450, leaving unpaid \$931.02. It will thus be seen that the town is rapidly getting out of debt.  
 One day last week a son of Mrs. Gallagher, who lives about three miles west of town, was badly bitten by a rattlesnake while herding cattle.  
 On Tuesday afternoon this town was visited with rain, which has not been equalled for years and turned the streets into rivers. During the storm the school houses were struck by lightning, breaking out windows and otherwise doing considerable damage. Loss from \$100 to \$200. Fortunately no school was in session at the time.

**Girls, Be Careful!**  
 Laurel Advertiser: Ofttimes there are strange men on the streets of Lincoln and some of them are badly alone, too. Frequently our girls allow themselves to indulge in street flirtation. An excellent which comes to this office had the following truthful article on this subject, and we take occasion to reprint it:  
 "If any satisfaction could be derived from the passing smile, or the quizzical glance, or the upraising of a hat as an automobile which conveys the village or a couple of pedestrians of the opposite sex meet and go their separate ways on the city streets, there might be some reasonable explanation for a practice that, no matter by whom it is indulged, stamps the participants as common."  
 "Mother, I'll never marry a woman or girl who carries on this style of street flirtation with every possible looking masculine individual who addresses me—no—never—lead to anything further, but the woman who

# WAYNE MACHINERY

Don't delay—it is now time to think about hay tools, and we ask your earnest consideration of the standard lines we carry. When you go to the field you want implements that will stand up under the hardest kind of work, and in selecting our line we have stressed this particular point. Judge our line by its performance in the field. Our prices and service are absolutely right.

### McCORMICK SELF-DUMP HAY RAKE

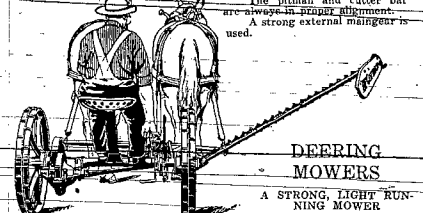

The self-dump feature is properly designed and never fails to work. All the operating parts do it to press a small foot lever and the horses do the rest. When the trip lever is pressed down, the pawls at the end of the trip rods engage the wheel ratchets which raise the rake teeth.  
 The dump rods are reversible and the wearing surfaces are tempered. Adjustments can be made to raise the teeth to any desired height. If the ratchets become worn, wheels may be reversed.  
 The teeth are made of high-grade oil-tempered steel and will positively spring back to their original shape.

### DEERING SELF-DUMP RAKES

They are made of steel throughout—it is built so strongly that it will stand up successfully under the roughest usage and the hardest work in which it may be employed. The best angle iron is used in the construction of the frame and the different parts are put together in a substantial manner.

### McCORMICK MOWERS

Among the many prominent features of the McCormick mowers are the extra durable working parts. Consider these points when you purchase a mower:  
 The cutter bar is made of high-grade steel, heat treated, which gives them strength and flexibility.  
 The guards always remain in line.  
 Weight of cutter bar is carried on wheels.  
 The guards are designed to ride over the ground.  
 The knife has a wide margin of drop-forged steel.  
 The pitman box is equipped with bronze bushings.  
 The pitman and cutter bar are arranged in a perfect alignment.  
 A strong external manager is used.

Deering mowers have a world-wide reputation for light draft. This is because of the light but strong construction of the mowers. For the fact that ball and roller bearings are used where there is any great amount of friction, these features mean that the horses can do a longer day's work.

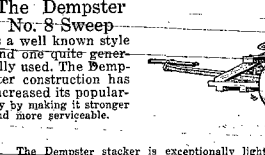

### DEERING MOWERS

A STRONG, LIGHT RUNNING MOWER

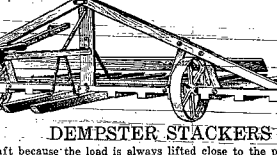

### I. H. C. AND DEMPSTER SWEEPS AND STACKERS

### The Dempster No. 8 Sweep

is a well known style and one quite generally used. The Dempster construction has increased its popularity by making it stronger and more serviceable.

### DEMPSTER STACKERS

The Dempster stacker is exceptionally light draft because the load is always lifted close to the pivot point of the arms and for this reason the distance of the drive shaft down which is much quicker delivery. It is not necessary to stake down the rear end of the Dempster stacker, neither is it necessary to stake the front because in starting a stack the head does not lift high enough when delivering the load to tip the machine over. It is exceptionally easy to adjust to deliver hay at different points. It is entitled to a place on every farm where modern, efficient, labor-saving machinery is taking the place of the slow wearisome methods of the past.

### I. H. C. Sweeps

have many features which should command attention. Built strong and sturdy and does its work in a manner that is pleasing to the operator.

Both of these well known lines have many features that will appeal to the man who wishes to put up his hay in the most efficient manner.

## The Deltor

—The Pattern That Saves You Money—  
Is in our Pattern Department.

Since the invention of the sewing-machine there has been nothing of more importance to those who sew than the new Butterick Pattern—the Deltor. It is a pattern that actually saves you money, because it is constructed by experts to utilize every inch of your material. It has directions for fitting and for sewing, as well as for cutting—and, finally, a page of minute directions for the "big little" details that are such an important part of the garment. And if you don't know how to sew now, it is a simple matter to learn with "The Deltor."

### Corsets

If you wear a Kaho or Nemo Corset you need not be afraid that the style is not right. The success that we have had with these two brands of corsets proves that they are right and the satisfaction they give is unlimited. They are moderately priced.

Phone your grocery orders to No. 247. Personal attention is given each order.

### Average Wheat Crop Is the Prediction

Lincoln, Neb., June 8.—An average wheat crop with good prospects for oats, rye and barley, evident in the recent rains, is predicted in the weekly report of A. E. Anderson of the bureau of crop estimates. His

reports also that potatoes have begun to bloom and the first crop of alfalfa is being harvested. The only crop apparently damaged by the rain is corn, where some places report the plants were either washed out or covered up.

"The slender stalks, short heads and apparent lack of vitality of a large percentage of the Nebraska wheat crop, states the report, has eliminated all chances of more than a fair crop and unless the temperature rises too much Mr. Anderson predicts an early harvest as heading started two weeks ago in southeastern Nebraska. Although the stand of corn has been damaged somewhat by the rain, the hard soil has been loosened and improvement in general conditions is expected.

The harvest of the first crop of alfalfa has been started and the yield is below usual although still high in excellent condition. A large amount of hog cholera has been reported.

There has been a further drop in apples and the crop is predicted to be small. Production is not expected by the bureau to be over half the amount predicted in May. Strawberries, blackberries and raspberries are pronounced as promising and a large yield of grapes is forecasted. Strawberries "have been" reported ripe in the southern part of the state.

### Big Fourth of July Celebration at Wakefield

The city of Wakefield will celebrate July 4 this year. The celebration will be under the auspices of the American Legion just at that place and from all indications promises to be the biggest and best that has been held in northeast Nebraska for a long time.

There will be a big parade, a patriotic address by Rev. Mr. Harper of Laurel and the best band music in this part of the state furnished by the Wakefield band. This band is considered by all who have heard it to be the best of its size in the middle west.

will be shown at night. It will be bigger and better than the display shown at Wakefield last year and those who witnessed that display considered it the best ever shown in this part of the state.

Time and money have not been spared in making this celebration the biggest and best in the history of Wakefield. The best of order will be maintained. Ample rest room will be provided for the use of everyone. The city park has been recently enlarged and makes a splendid place for picnic lunches. There is plenty of running water in the park.

Obituary.  
(Continued.)

Margaret Trudeshon, wife of Mr. Neil Anderson, one half mile west and two miles south of Concord, Neb., died at St. Joseph's hospital, Sioux City, Iowa, Saturday, May 25, 1921, about 2:30 p. m., at the age of 60 years, 4 months and 17 days. Her health having failed her for several years, she was consulted on Monday, the 23rd of May and the following days of last week, with the result that on Thursday morning, May 26th, she submitted to a surgical operation. On the following Saturday morning she became unconscious after severe sufferings. Her family and friends gathered around her deathbed, but helpless. At 2:30 p. m. she slept away peacefully "in the Lord."

Mrs. Anderson was born in Guelph parish, Kristianstad, Sweden, Jan. 12, 1861, and received the holy baptism in infancy and was also confirmed in the Lutheran church of her fatherland. In the year 1890 she came to the U. S. of America, locating in the vicinity of the present holy marriage in Mr. Neil Anderson in the fall of 1890, who together with two children survive her. One daughter, Thelma, married Mr. John Luther, having gone before her, respectively in 1903 and 1911.

Mrs. Anderson has been a member of the Lutheran church of Concord, Neb., since June 1, 1893, and has proven herself a faithful member, a good and loving wife and mother by Christian faith and practice, who Christian family worship and discipline were upheld in earnestness. She always took an active part in the promoting of God's kingdom, loving her Saviour and His church. Formerly she was a teacher in the Sunday school and was at the time she departed a member of the church's Ladies' Aid and secretary of the Women's Home and Foreign Mission society. She was also a member of the Concord Cemetery Association.

Her work is finished, her sufferings ended and the heavenly rest awaits her. Her dear friends are the dear, who die in the Lord—that they rest from their labors—and their works follow them. (Rev. 14:13)

Funeral services will be held at her departure, the husband, Neil Anderson; one daughter, Ethel; one son, Arthur; three brothers, C. E. Trudeshon and Peter T. Nelson, of Platte county, S. D.; Ole Trudeshon and three sisters, Gladys, Olga and Dora, of Sweden (Gustaf Olin being deceased at Stockholm); many other relatives and a host of friends.

Funeral services will be held Tuesday, May 31, at the home at 9 p. m. and in the Lutheran church at Concord at 7 p. m. New E. Beaman, pastor, spoke words of comfort from Rev. C. E. Trudeshon, of Platte county, S. D., relative to the mourners spoke from Phil. 1:21. A quartet sang two of the deceased's favorite songs. The remains were deposited to the grave in Concord cemetery.

### Correct Lenses for Your Car

The new law regulating the use of automobile lenses, passed by the last legislature, finds many car owners in need of new equipment. We have the McBeth and Violet Ray Lenses, 50% of which comply with the law. Following are its provisions:

**TITLE**  
"A bill for an act to define lawful lenses; to require their use on all motor vehicles; to prohibit the sale of unlawful lenses; to prohibit sale within the state of motor vehicles unless equipped with lawful lenses; and to provide penalties for the violation thereof."

"Be it enacted by the people of the State of Nebraska:  
"Section 1. For the purposes of this act the words and phrases used shall be construed as follows: "Motor Vehicles" shall include automobiles, motor cycles and all vehicles propelled by any power, other than muscular power, excepting tractors, traction engines, road rollers, and other vehicles which run on rails and tracks. "Lawful Lenses" are lenses for use on motor vehicles that have been submitted to and approved by the secretary of the department of public works.  
"Section 2. It shall be unlawful to use, sell or offer for sale, to be shipped or otherwise import into the state any motor vehicle lenses except as described in section 1. The possession of unlawful lenses, either in the motor vehicle or in stock shall be prima facie evidence of intent to violate the law.  
"Section 3. No motor vehicle lenses shall be shipped or otherwise imported into the state, and no lenses shall be sold or kept for sale within the state, except such as shall be approved by the department of public works. A fee of \$10.00 shall be paid by the manufacturer or his agent to the department of public works for examination and testing of lenses.  
"Section 4. It shall be unlawful for any person, firm or corporation to drive, or cause to be driven upon the public highways, or upon any road, street or alley in the state of Nebraska, between the hours from one hour after sunset to one hour before sunrise, any motor vehicle which is not equipped with lawful lenses, provided the provisions of this act shall not apply to tractors, driving through the state for the same subject in the state of their residence. Providing that the owner of any automobile now-in-use in this state, whose lens now comply with the present laws of the state, shall not be required to change the lens thereon to conform to new regulations under this act so long as the automobile is in use in this state.  
"Section 5. Any person, firm or corporation violating any of the preceding sections shall upon conviction be fined not less than ten dollars nor more than fifty dollars.  
"Section 6. No motor vehicle shall be sold or offered for sale within the state unless equipped with lawful lenses. Possession of motor vehicles equipped with unlawful lenses shall be prima facie evidence of intent to violate the law.  
"Section 7. Any person, firm or corporation violating the provisions of the preceding sections, shall upon conviction thereof, be fined not less than twenty-five (\$25.00) dollars, nor more than one hundred (\$100.00) dollars.  
"Section 8. The department of public works shall annually lease a printed list of approved motor vehicle lenses, designating the candle power of light bulbs to be used with the different lenses, and the department of public works is authorized to make additional rules and regulations governing the motor head lights and spot lights not inconsistent with state laws, copies of which shall be furnished each county attorney, justice and city law enforcing officers."

### Large Class Complete Elementary Course

A crowded house witnessed the eighth grade graduating exercises held at the Methodist church in Wayne Saturday afternoon at 8 o'clock when one hundred and two pupils from the rural parochial and village schools of Wayne county completed the course. Rev. Wm. Kilburn gave the invocation. Miss Dorothy Puls presided at a pleasing banquet. Prof. J. G. W. Lewis gave the address using as his subject, "Successful students." His address depended largely upon a good knowledge of English, more education, work, imagination, and the spirit of teamwork. In discussing the first point he emphasized the ability to read and to express oneself. In explaining the meaning of the term, "more education," he said that the completion of the eighth grade was a definite step since statistics showed that only thirty per cent of country children ever finished that grade. "The educated man," said Prof. Lewis, has the greatest chance to become famous. He proved his point by listing names listed in Who's Who of America.

In his third point, work, Prof. Lewis declared that the greatest men and women of the world were the hardest workers. He mentioned Napoleon, Lincoln, Wilson and others as examples. "No man can succeed without the dream spirit, without imagination," he said. "It is the thing that makes life worth while." And last of all he mentioned the spirit of teamwork. "Every person must have an interest and a pride in his work," he declared.

Following the speech Miss Gladys Richardson of district 10, sang a solo. Two little boys, Arvid and Stanley Davis, gave the flag salute. Art Anderson of district 2, played several selections on the accordion. Miss Pearl Sewell announced those having the highest averages at Leona Rue Miller of Sholes, first and Nora Tucker of district 44, second. After the class song and presentation of diplomas, the graduates and pupils went to the Baptist church steps where they had their pictures taken.

**Church Should Not Mix Missions.**  
—Omaha World-Herald: The church will fulfill its mission so long as it is free from the petty and selfish needs of its people. When one of its branches attempts to dictate to those outside of its own fellowship and to those with whom they should find their recreation it repels rather than attracts. "Numerous impositions of its will upon men will wear them from it rather than woo them to it."

**Is Penrose's Sun Setting?**  
—Springfield, Mass. Republican: Senator Penrose was severely rebuffed by the faction led by Gov. Pennell during the closing days of the Pennsylvania legislature and now it is said that Senator Knox is to look after his own patronage instead of leaving it wholly to his colleague as heretofore. "The Penrose day is in its twilight."

**Mitchell Republicans—** If pausing wages are gradually slowed down the industrial machine to everybody's discomfort, maybe running them down will speed up the selfsame machine to everybody's delight. Unemployment jobs men know the price that is paid for a lapsed wage schedule.

**Importers, exporters, travelers—ship and sail under the Stars and Stripes**

There are today few ports in the world of importance to shippers or travelers, which cannot be reached by ships that sail under the Stars and Stripes. President Harding has said that, "We cannot sell successfully where we do not carry." The American Merchant Marine that once almost vanished is again an established and important carrier of the world's commerce.

You can ship and sail anywhere in American ships designed for utmost comfort and safety.

## They never made a cigarette like this in my day—

The Camel idea wasn't born then. It was the exclusive expert Camel blend that revolutionized cigarette smoking.

That Camel blend of choice Turkish and Domestic tobaccos hits just the right spot. It gives Camels such mellow mildness and fragrance!

The first time I smoked Camels I knew they were made for me. I knew they were the smoothest, finest cigarette in the world, at any price.

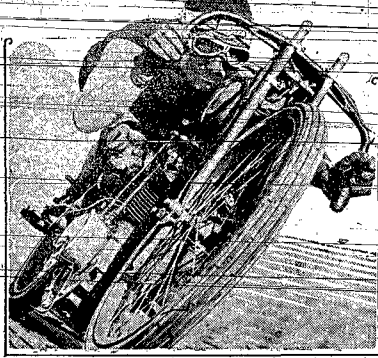

Nobody can tell me anything different.

**Farmers Have Done Their Share.**

Lincoln County—The post-haste dollar is up to where it belongs, there must be a compensating movement all around. The producers of raw material, the farmers, have been bearing too much of the loss. Their buying power has been greatly weakened, and the effect on business generally is manifest. To restore the balance is the economic need of the hour, and the railroad readjustment is an essential factor in that restoration.

**FELT LIKE AN IRON BAND AROUND HEAD**  
 Mrs. Osborne Says She Shudders When She Thinks How She Suffered.

"For years," said Mrs. V. B. Osborne of 718 Lancaster Ave., Leavenworth, Ky., "I have been in a run-down condition; nervous, weak and dizzy. I was actually so nervous that any sudden noise or excitement would produce a palpitation of my heart that frightened me. I absolutely could not climb stairs, for to attempt such would thoroughly exhaust me. I had nervous headaches and when they came on it seemed that an iron band was drawn tight around my head. I now shudder when I think of those headaches. My stomach was weak and I could not digest the lightest liquid food. Any food of a solid nature caused nausea, and the sickening sensation remained for hours. My misery was almost unbearable. My sleep was never sound and I was worn out all the time. My condition was indeed a very deplorable one. I finally sought medical treatment but, nothing helped me. One night I was on the verge of giving up in despair when my friend pleaded with me to try Tanla. I obtained a bottle of the medicine and began its use. It began improving at once and soon felt my nervousness and dizziness disappearing. Then my head-aches left me and I realized my strength had returned. My appetite improved and I am now feeling so much better in every way. This Tanla is a wonderful medicine and I can only hope every poor wretch who is suffering as I did will try it."

 (Rev. George Carter, Pastor).  
 Order of service: Sunday school 10 a. m., Praying for the week 11 a. m., Epworth League 7 p. m., Prayer service Thursday 8 p. m.

The Ladies Aid society has been busy serving the two banquets, one for high school alumni and one for the Woman's club.

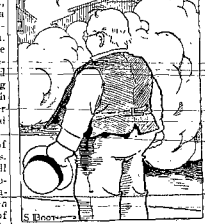

The leaders of the Epworth League have been encouraged the last few Sunday evenings on account of small attendance. There are plenty of young people connected with this organization and glad to help make a league of which all might be proud. Everyone counts. Meet your next Sunday evening!

The Missionary society met Friday afternoon with Miss Edith Carter and Miss Josephine Carter. Teresita Bayes left devotional. Mission work reviews were given by Mrs. A. E. Hutchins, Mrs. George Lewis and Mrs. Art Auker. Miss Susan Hutchins sang a solo. The next meeting will be with Mrs. Jess Clayton. The hostess served sandwiches and coffee.

The Junior-Missionary society, including the "Light Bearers" and "King's Herald" are planning to meet as soon as it gets a little warmer. The last few days have been too cool to enjoy an outdoor supper.

ANOTHER EARLY SUMMER BATTLE

campaigns are cooperative enterprises, the department specialists joining with the state extension officers and local officials and leaders in showing the value of milk as a health food. Thus far seventeen states have cooperated in carrying out similar campaigns, and more than 100 rural communities.

Before a milk consumption campaign is held in a community a preliminary survey is conducted to make sure that the milk supply is clean and wholesome, and that there is a sufficient amount to take care of any increased consumption resulting from the campaign, and that the local authorities are willing to cooperate in the movement. It is also necessary to create a condition of undernourishment among growing children and that children are consuming too little milk. As a result of this study, the department specialists say, every milk campaign thus far conducted has been successful—and has resulted in a more than temporary increase in the consumption of milk.

Making a Law.

A new, quick method of establishing stands of sod on lawns, and more especially golf courses, where the grass gets severe wear, has been worked out by botanists of the United States department of agriculture. Best grasses which grow in dry runners, are principally used in the method. A quantity of healthy sod is stripped at a depth of approximately one and one-half inches, which gathers in most of the grass roots with as little dirt as possible. The sods are run through a feed cutter which is so arranged that they are then into ribbons about two inches wide and the ribbons are shredded by hand, leaving a mass of grass roots and these roots are scattered over the ground, which has been carefully prepared by plowing and harrowing; and the soil is then evenly covered about an inch deep and rolled.

For ordinary lawns this method has been found sufficient to broadcast the sods in a harrow or roller. By this method a good stand of sod has been obtained in as short a time as three weeks. The method has been used in the United States and in other countries. A green of the public golf course in Potomac Park, Washington, D. C., prepared in this manner, is cited as one of the finest in the country.

Business.

St. Louis City Journal: Money which has just been put on the market is a necessary step to bring about deflation some months ago, is now making a bid for the exercise of its power. Governor Harding, after a long C. Harding of the federal reserve board, are eager to lend money to legitimate business. Such loans, it may be remarked, may be had at more reasonable interest prices than prevailed sixty to ninety days ago. This is made possible, of course, by the amply workability of the federal reserve system, and is augmented in large measure by the presence in the United States of vast amounts of gold and gillette securities. At no time has the country had more actual cash with which to do business.

Governor Harding says, after a long through southern and middle western states, that "the federal reserve banks are in a position, better than ever before, to extend to all legitimate business all assistance needed—they are anxious for business to avail itself of their assistance." This invitation also is reflected by the other banks, all of which feel that the time has come for business to be given the impetus necessary to carry it out of the period of depression. As to the period of depression, Governor Harding declares it has passed and that the financial condition of the country is such that it "should inspire only optimism." He is talking only of the country's finances when he refers to the business depression as having passed; yet he is emphasizing the most important thing in the plan of reconstruction, which is money in the industrial progress always possible and the economic situation always is safe when money is available for enterprise. This should be a warning, as Governor Harding suggests.

Apart from the fact that "money talks" and that it is eagerly hoarded by legitimate business, a number of other conditions have been observed which have a direct bearing on the economic situation. Step by step the agencies of the government are using what influences they possess to encourage adjustments necessary in industrial life. From President Harding down, officials are active and helpful. Executives are pointing the way, making suggestions and counseling various ways and means for the transformation that will bring the desired result, which cannot be better described than as money in the industrial life. Comply with the Law!

The late legislature passed a law which imposes penalties for failure of automobile drivers to have the right kind of lenses on their cars, and the purpose is to strictly enforce the requirements. Our lenses, the Osgood, McBeth and Conaphore, fully comply with the law, and car users who are not already equipped, should call on us without delay and let us fix you out to stand inspection.

CORYELL & BROCK

Wayne, Neb.

These two steps on the part of the administration show the sympathy of the government for business and its desire to be encouraging and helpful. Actual trade signs are pointing toward more rational times. Dun's report insists "conditions are steadily working toward a stronger and sounder basis." E. C. Forbes, writing in the Philadelphia Public Ledger, says: "No boom is in sight. No boom is desired. It is not to be had."

of living shows some decline, but one not material in its effect over a short space. Prices have not yet fully settled, but are believed to be near the average which they eventually will find.

Agriculture Notes.

Cow Feed from Sawdust Now.

Hydrolyzed sawdust as a part of the ration for cows is apparently giving satisfactory results in Wisconsin. The Forest Service of the United States department of agriculture reports that cows at the agriculture reports of that state are doing as well on a ration consisting of one-third sawdust as they did when their feed was only one-fourth wood meal. That is to say, they are keeping up their weight and their milk production and show no ill effects from the diet.

The bureau of animal industry is considering the proposal of the forest service laboratory to start feeding trials with dairy animals in which the wood product will form a part of the ration and the tests will extend for an entire year at least. The hydrolyzed wood feed for these cows will be made at the laboratory. So far all the stock feed has been made from white-pine sawdust. Other soft-woods, particularly the western species, will be tried in the future.

Teaching Agriculture.

Agricultural courses for elementary schools, prepared by the United States department of agriculture, have been adopted in Wisconsin.

Ohio, Maryland, Virginia, and Arkansas. These courses are suitable for use not only for elementary schools, but for consolidated rural schools and secondary schools. They have been prepared at the request of the state authorities, and the department specialists have cooperated with the state boards of education and the state agricultural colleges in their preparation.

In addition to preparing complete courses in agriculture, the federal specialists in agricultural education have series of lessons on different phases of agriculture, which are being used extensively in a number of states—topics relating to growing crops, selecting and growing corn, potatoes, poultry, etc., have been worked out, the department publications on the various subjects being used as a basis for the information in these studies.

Leaflets on how teachers may use certain farm bulletins have been prepared. These leaflets have been widely distributed, and they have been in great demand among teachers of agriculture.

The Milk Habit.

Selling the milk habit to folks is the way some people refer to the educational milk campaigns which are being held under the supervision of dairy specialists of the United States department of agriculture. These

The Fourth at Wakefield. The American Legion is making preparations for a big celebration in Wakefield July 4. Rev. Mr. Harper of Laurel will give the address. Music will be furnished by the Wakefield band. One of the big features will be two baseball games between Laurel and Wakefield and Allen and Wakefield. Other sports, fireworks and attractions are being planned.

Legion Benefit Play. An American Legion benefit play, "A Bachelor's Honeymoon," will be presented in Wakefield under the direction of Harry Melver of Omaha at the auditorium on the evenings of June 17, and 18. The cast includes thirty-five home people with special musical and dancing numbers. The principal characters are as follows: Harry Borg, as "Dan Gillispie," the bachelor, (A good fellow, whose imagination runs high with him.) Leola Hypse as "Dorothy Johnson," his resident, (A strict authority on potato bugs.) Donald Ayers, as "Dorcas Smith," his partner, (A bird that is good under adverse circumstances.) Myrtle Carlson as "Miss Ophelia Cannon," his housekeeper, (On the matrimonial marriage market and means business.) Mrs. C. E. Fyler as "Sally," a good hearted little domestic, (Who unlike most women, can really keep a secret.) Twenty-four young ladies will assist in the drama work.

Mrs. Elmer Jones will act as pianist. There will be eighteen big musical numbers besides specialties between the acts.
