Near Tornado at Long Pine. Long Pine, Neb., July 2.—Long Pine residents who had not retired for the night were considerably frightened last week and at the same time obtained a magnificent view of a tornado cloud, which after heading direct for the city lifted over the town and passed high in the air without doing any damage about 1 o'clock in the morning.

When first seen the tornado was estimated to be about seventy-five miles in diameter. At the time the large funnel appeared to be touching the earth. As it came closer a deaf roaring sound was heard and the cloud was seen to rotate about a point above the earth. The rate of travel was judged to be at least 100 miles per hour.

The moon had been shining brightly but was obscured by a smoky cloud during the passing of the storm cloud. Before the huge funnel passed from sight, however, the moon again shone brightly and illuminated the huge black funnel in all its fearful grandeur.

A high wind arose shortly after the passing of the cloud, no damage was reported. Apparently the storm cloud traveled off until its force was spent without touching the earth. Not few persons witnessed the passing of the storm cloud.

Bryans to Entertain. Lincoln, Neb., July 2.—Nebraska's gubernatorial mansion will be turned over to Nebraska democrats Saturday evening, July 7, when Governor Bryan and his brother, William Jennings Bryan of Florida, will hold a reception for members of the democratic party throughout the state. Mrs. Bryan will be on the receiving line to greet democratic women.

As to Potato Production. Lincoln, Neb., July 2.—Increased interest in certified seed potato production in western Nebraska is shown by the large number of applications being received each day by H. O. Werner of the agricultural college experiment station. Average of table stock potatoes will not be large because of low prices last year, says Mr. Werner, who has just returned from that section.

Assessments for Paving. The next installment of paving taxes in Districts One and Two will be payable in full today. The city engineer reported that the city will have about \$10,000 in paving taxes for the year.

The big Delco-Light factory at Dayton made this Wonderful Offer Possible

A FEW days ago I offered to the people in this county a wonderful opportunity to buy Delco-Light on a special Co-operative Carload Plan — an opportunity that will mean a very large saving for the farmers in this county who are willing to act now.

I know that you want electric light and power in your home. You have visited your neighbors who already enjoy these great modern conveniences. You have seen the bright, cheery atmosphere of their homes; the happy, joyous children whose lives have been gladdened; the mothers, from whose shoulders the burden of toil have been lifted, the fathers, whose interests in life have been broadened and whose profits have been increased—all because of Delco-Light. And now your home can have these same great advantages at a saving in cost never before offered in the history of the farm electric plant business.

I make a proposition that will mean an unbounded saving for you. By ordering on the Carload Plan I will save a large amount in freight and handling charges, and by making all installations in one group I can put Delco-Light into your home—installed, equipped, including the lighting fixtures, all ready to turn the switch, ready to flood your home with the blessings of electrical sunshine, at a price that will represent the biggest saving ever offered to you.

the washing machine, the separator, the churn, the feed grinder; electricity to heat the barn, to pump the water; and you will have clean, safe, economical light that will give to your home greater cheerfulness and deep content.

This Opportunity Is Limited

The number of plants that I have arranged to get on this plan is limited. You will have to act quickly. You will have to respond immediately. But the terms are so generous, the price so low, the advantages so great, that if you ever at any time in the future expect to modernize your home, to make it a better, healthier, happier place in which to live and work, now is the time to do it.

I want to place the full details of this plan before you immediately. I want to tell you of the wonderful savings, to quote you a price such as you have never believed possible. Mail the coupon or telephone down. You will not be obligated in any way. When you get the details of this plan you will realize that it is the most remarkable money-saving offer you have ever had.

Will You Take Advantage of This Opportunity

This wonderful plan of Co-operative Buying enables you to get dependable Delco-Light—the world's standard farm electric plant—and to save money while you are doing it. The cost of wiring and installation will be very low. I will give you absolutely at cost a generous part of the equipment that is needed to get the benefits from Delco-Light.

Now—at a cost probably half of what you have always expected to pay for electric light and power—you can give your family that joy and happiness that is possible only with dependable Delco-Light in your home. You will have power to do the chores, for

This Is Your Chance to Save

I have put my carload proposition up to the Delco-Light Company at Dayton. I have told them that I want to place a whole carload of plants in this county during the next few days. I have asked them if they will ship a whole carload of Delco-Light plants direct from the Factory to me.

The Delco-Light Company is willing to ship the carload, which will result in a great saving in freight. It is possible for me to

Buy Delco-Light Now - at a big Saving

The big Delco-Light factory at Dayton made this Wonderful Offer Possible

Notice

The Delco-Light Plants referred to in this special offer are standard Delco-Light Plants, fully covered by the regular service guarantee as to material and workmanship, and fully protected by the liberal service policy. Each plant has the famous 4-cycle, air-cooled, valve-in-head Delco-Light engine, and the thick-plate, long-lived Delco-Light Storage Battery. Any one purchasing a Delco-Light Plant as a part of this special carload order is assured of the same satisfaction he would receive in placing his order individually, — the same satisfaction now enjoyed by 175,000 Delco-Light users.

Young Man Killed By Lightning Bolt

Ray Kloppling, 19-year-old son of Mr. and Mrs. Henry Kloppling who lives on the farm near Wayne, was killed instantly Tuesday evening of last week when he was struck by a bolt of lightning. He was the only child in the family, his sister, Miss Alice Kloppling, who was student the past year in the Wayne State Normal, having died just four

months and two days before from spinal meningitis. Funeral services for the boy were held Friday at his home and at the Lutheran church with burial in the Wynot cemetery. Ray Kloppling was throwing hay from a wagon to the stack when the first bolt of lightning struck, his father being on the stack. Both were thrown down by the shock and the beam man was killed. The horse was killed and the other stunned. The lightning set fire to the hay and wagon. Mr. Kloppling ran to the scene and rescued the body of the boy. The young man's clothing was torn to riddles but there was only one mark, a burn on his forehead, from the lightning.

Chicago & North Western System C. & N.W. Ry. Facts Relating to Railroads. RAILROADS—A NATIONAL ASSET. The United States is the wealthiest nation in the world today. It contains 5 4/10 per cent of the land area of the world, or 259,555 miles. The railroads are one of the nation's greatest assets. They provide transportation which is the basis of commerce and the means whereby exchange of products is accomplished. For each person in the United States in 1900 there was transported 8 tons of freight. For each person in 1920, 12 tons. The increasing cost of living is really the cost of better living. VALUE OF TRANSPORTATION. Transportation is the measure of civilization. History confirms this statement. Production without transportation must be very limited, and if so limited would have greatly retarded the progress of civilization. Transportation increases the worth of all property it serves. Property values are largely determined by the ability of the property to produce and the owner's opportunity to dispose of the products at a profit. The value of all farm property in the United States increased from twenty and one-half billion dollars in the year 1900 to seventy-eight billion dollars in the year 1920, and the value of all farm products, at the same time, increased from five billion dollars to twenty billion dollars. This is due in part to adequate transportation. INCREASE OF MANUFACTURES: Production is the measure of human efficiency and human progress. There is no limit to the amount of wealth that may be created except the limitation of production. The purchasing power of an individual, community or nation lies in its power of production. Manufactured products in the United States increased from a value of eleven and one-half billion dollars in the year 1839 to sixty-two and one-half billion dollars in the year 1919. Transportation contributed substantially to this development by affording an easy method of exchange. PROGRESS OF UNITED STATES: The total wealth of the United States has increased in the twenty-year period, from 1900 to 1920, two hundred ninety-five per cent. During the same period farm values in the United States have increased two hundred eighty-one per cent. Investments in manufacturing industries have increased three hundred ninety-eight per cent. Investments in railroads in the United States have increased thirty-seven per cent. The expanding commerce of the country requires an expansion of railroad facilities and equipment. It is clear that railroad development has not kept pace with the growing commerce. A new era of expansion is necessary. ADEQUATE RETURNS: The railroads in the United States increased their investment in locomotives, cars, yards, terminals and other railway property, in the ten years ended December 31, 1922, by more than five billion four hundred million dollars. The amount they received in the year 1922 was eleven million dollars less than in the year 1913, being a smaller income from a substantially increased investment. Investors cannot prudently place their money in an industry which does not yield a reasonable rate of interest. In expanding commerce requires continuous investment. It is clear that investments in railroads in the United States must be made more attractive and secure. REASONABLE RATES: Railroad rates to be just and reasonable must, among other things, be sufficient to meet the cost of wages, materials and fuel, taxes and the interest on capital. No one expects a person to sell his wares at less than cost and all agree to a fair margin for the use of capital. The railroads should receive the same consideration, in order to render efficient service which is always our purpose. M. W. Finley, President.

Baby in Lincoln Journal: While the tank of his Ford sedan was filled a resident of Austin, Minn., lighted a cigaret. He jumped out in time to save himself but the car was totally destroyed.
