Slight Gain In The Potato Yield

As potato growers, we are still in the "small potato" class, if we are judged on the basis of the gain in average production per acre made in the United States in the last 55 years.

From 1868 to 1888 the average yield decreased steadily until it was but 74 bushels to the acre. Since that time the average yield has steadily increased until it now the highest it has ever been.

The soil downward tendency has been checked by a number of factors which have helped to increase the yield and average production per acre.

Recently more attention has been given to the production of better quality seed and seed of high quality. The use of high-grade fertilizer by the United States department of agriculture, would increase the returns from potato crop of the country by many millions of dollars.

Increase in Appropriation. Randolph, Neb., Aug. 1. Estimate of expenditures issued by the city council here places the saving of the city for 1923 at \$31,211.48, an increase of \$1,061.48 over the appropriation last year.

Doctor Saves Son's Life. Columbus, Neb., August 1. Only the immediate presence of his father, Dr. Frederick Stoddard, Chicago, saved the life of 30-year-old Stoddard of Waterloo, Iowa, when his automobile plunged over an embankment near the south approach of the bridge.

Birth Record. A son was born Monday, July 30, to Mr. and Mrs. Ed Granquist, southwest of Wayne.

Clare Pollock of Fremont, who died in law, 31, was buried here yesterday when a northwestern switch engine struck their automobile on a crossing here.

Annual Fair Harvest. On the 1st of August the annual horse show of the southern Holt county is in full blast, beginning the first of this week. Holt county is the largest producer of commercial horses in Nebraska.

DEFINITE DECISION IN REGARD TO BANK SMOG

Within Week Destiny of Carroll Institution to be Announced.

The Herald is informed that the definite announcement will be made within a week in regard to reorganizing the Carroll bank, and in view of the small amount of deposits yet to be signed up, it is believed decision will be favorable to reestablishment of the institution.

FORMER SHOEMAKER IS ROBBED OF \$19

W. E. Barker Attacked by Two Men Who Took Sleeping Quarters of Shop Early Sunday.

VICTIM IS 68 YEARS OLD Robbers Assault Barker and Succeed in Rifling Pockets and Making Good Their Escape.

W. E. Barker who until lately ran a shoe repairing shop on the west side of the city, was attacked and who is aged 68 years, and a cripple, having only one leg, was assaulted and robbed about 2 o'clock Sunday morning. There were two assailants, and through a door which was not securely locked, they entered the shop where he was sleeping. Barker was warned to keep still on penalty of death. He grappled with the robbers, and knocked one of them down, sinking his teeth into his cheek. The other man saw Barker in the ribs, and in the scuffle the bad men were able to rifle Barker's pockets and make their escape. Barker had about \$19 in his pockets when he was taken but he thinks about \$19.

One man says that while he was struggling with the robbers he heard some pass whistling, and he yelled "Here" so loud that he could have heard a block away. The fact that the whistler kept going leads to the belief that he was an outside confederate whose whistling was a signal to the other robber to make his escape. Dr. W. B. Vall heard the noise at his residence a block distant and hurriedly got out and made haste in the direction of the shop. He met Barker who told him the circumstances. Marshal W. A. Stewart was notified and immediately instructed a patrol to be kept in the neighborhood where the robbers disappeared in an automobile. Other towns were notified to be on the lookout, and were reminded that one of the robbers could be identified by distinct teeth marks on his left cheek. Barker says he would know the man on sight. He has had an impression with his teeth.

Blaze in Garage of Wayne Motor Company The fire department was called to the garage of the Wayne Motor Co. in Omaha where on Saturday gasoline ignited in the work room and threatened to make rapid headway. E. S. Edholm, chief of the fire department, and with the aid of the firemen who arrived quickly, the blaze was soon put out. The gasoline service pump in front of the building was being drained out of the pump, and the gas fumes were charging the circumstances. One man started to fix a motorcycle. This started the outbreak of flames. Prompt action prevented serious damages.

Injured Eyeball of Little Girl Removed J. S. Liveringhouse returned Sunday from Omaha where on Saturday an operation was performed on the right eye of his little 5-year-old girl, Evelyn, whose sight in that member was destroyed in an accident last week. The eyeball was cut on the glass in a Ford coupe. The eyeball was operated on to permit the use of an artificial eye.

How City Folk Spend Their Leisure Hours

The following communication touching play among city dwellers, was prepared for Herald readers by Mrs. M. A. Phillips, for many years principal of the Wayne high school, and now a leader among Omaha teachers.

The spirit of play does not limit her visitations to inhabitants of the open country and the small town; she is abroad and busy in the big city as well. Indeed, there seems a greater tendency toward play in the city dwellers than in those of suburban communities.

Across the alley is a modest home in whose back yard is ample provision for play: a sandbox for the tiny daughter and her little playmate, a tennis court used also by the ten-year-old boy of the family as a ball ground or croquet ground, a tent for all, a driveway to the garage that makes an excellent roller skating rink. Here are also stakes for pitching horseshoes, and a pool table. Some enter into friendly competition in which the former may and does injure into the mind of his small son ideas of clean thinking, fair play, courage in meeting defeat, and clean speech in sport. Neighboring children gather here to play, conscious always of the presence of observing elders who are ever ready to make suggestions, right differences, and prevent quarreling.

philanthropic, or civic organization. Speaking of parks, this city is rich in that regard. No part of the city but has its public park; so that some part is within walking distance of almost every home in the city. And city people appreciate them and avail themselves of the advantages they offer. These parks are connected by a network of boulevards along which conveyances of all kinds, from the little dog-cart or motor car to the big side car well loaded, to the most elegant limousine, whirl every hour of the day and almost every hour of the night, bearing folk on pleasure bent.

Then, too, the schools do their part to develop habits of play. Almost every school, however closely surrounded by great business or industrial concerns, has some ground on which the children may play, and for this purpose has provided everywhere shade trees.

When I recall my childhood school life, one school stands out clearly from all the rest. Here was a large inclosed yard, well shaded and thickly soded with bluegrass and sheltered by great spreading shade trees, while the back yard was left bare for the boys.

But how different from most of the country schools of even today, where the only shade is the narrow strip made by the school house itself, and where the sharp, thick stubs of great weeds allowed to grow to full maturity during the summer and mowed at the opening of the school term, make real play next to impossible.

If school playground is limited, gymnasiums are provided where children may play. Almost every school has its physical training director, and where there are none the teachers are required to do the work of an under the general supervisor. In all the work of this department the tendency is away from formal drills and toward free, happy play in which all children, rich and poor, are taught ideals of health, physical fitness, right living, and efficient citizenship.

But in the city, children are not alone in their pursuit of play. Youth clubs, athletic clubs, and dance clubs, most all parks provide dancing pavilions which are by no means the halls of vice that they are often pictured to be. Careful supervision is furnished and any infringement of standards summarily dealt with. Of course there are what might be called dens of vice called public houses, but even here authorities are ever on the alert, and any flagrant violation of established standards may result in the closing of the establishment.

Municipal tennis courts and golf links, according to say nothing of those provided by organizations like the Country club or by private individuals. Then there are the league ball grounds and numerous others of these provided by organizations like the Country club or by private individuals. Then there are the league ball grounds and numerous others of these provided by organizations like the Country club or by private individuals.

employment are usually such as to leave regular hours for leisure, have learned to make use of the opportunities for entertainment and amusement. A drive from park to park of a late summer-afternoon, especially Saturday or Sunday, would make one feel that the entire city population must be gathered in them, but if that drive be pursued through the city streets, one is led to believe that magic must have transported everybody to the theaters or dance halls, for it continues through the remote districts we shall see happy family groups enjoying their porches or lawns or indoor play, or other wholesome pastimes of the home. Wherever we are, however, we see people at play.

Miss Adele Bergt is Married Sunday

Miss Adele Bergt, daughter of Mr. and Mrs. J. G. Bergt of Altona, and Mr. Roy Daniels, son of Mr. and Mrs. A. F. Daniels of Omaha, were married at 5 o'clock in the afternoon Sunday, July 29, in the Evangelical Lutheran church in Altona. Relatives of the bride and groom were present, witnessing the ceremony performed by Rev. F. G. Schaller.

Preceding the wedding Prof. F. W. Meinke played Schubert's wedding march. The bride couple were attended by Miss Clara Bergt, sister of the bride, and Mr. Lloyd Daniels of Omaha, brother of the bridegroom. The bridesmaids were: Miss Esther Gruse and Miss Meta Bernth of Fremont. Two nieces of the bride, Twila Bergt and Mildred Mueller, acted as flower girls.

Mr. and Mrs. Daniels left Monday for a visit in Omaha before going to Kearney where they will be at home. Mr. Daniels is manager of the Golden Rod Ice Cream company.

After the ceremony a three-course dinner was served to the bride couple and guests at the home of the bride's parents. A large reception was held and refreshments were served to the large crowd of young people present.

The bride wore a gown of white canton crepe trimmed with Spanish lace and carried a shower bouquet of roses and snap dragons. The maid of honor wore a gown of white and carried a bouquet of white and pink flowers.

Out-of-town guests were: Mr. and Mrs. Paul Mueller of Thayer, Lloyd Daniels of Omaha, Miss Esther and Valdemar Gruse of Fremont, and Miss Meta Bernth of Fremont.

Will You Be Young or Old

The Decision Rests Largely With You

If Young—You may be happy, vigorous, self-supporting, self-respecting.

If Old—You may be bent with the misery of want and abandoned hope; perhaps dependent on charity.

Why This Difference?

You may be young because you are receiving a check each month from the Connecticut Mutual Life Insurance Company—the result of early, prudent forethought.

You may be Old because you have failed to make wise provision for an Old Age Income.

You can insure to yourself an income for your declining years and, in doing so, banish not only the fear of want in old age, but also the dread of the consequences to yourself and to your family of premature disablement or death.

Mr. and Mrs. F. S. Berry and son, Frederick, accompanied by Mr. and Mrs. John Barry and son, Ray, of Sioux City, arrived some Sunday from a 2,500-mile automobile trip to northern states. From Duluth they took a boat trip on Lake Superior to Port Arthur and Fort William, twin cities of Canada whose population is 46,000. The boat trip was most pleasant with every possible accommodation furnished for the comfort and entertainment of the guests. The round trip was about 500 miles. From Duluth the party drove 100 miles to Vermillion, Lake in which are 365 islands from the size of a table to that of a house. The lake is 35 miles long and the rocks and pines make it beautiful. They then went to Bay Lake, about eighteen miles from Brainerd, Minn. This lake is noted for its numerous fishing, conservatories, and iron mines which are the richest in the world. Iron is scooped out of the ground just like sand. The country around Brainerd is populated with houses for the children, factories, conservatories, and iron miners, dental and medical facilities. Paved roads lead to the village. Eighty per cent of the school tax comes from the mine owners. Hibbing and Virginia are located sixty miles from Duluth.

Before you buy any car, see the STUDEBAKER 1924 MODELS

Studebaker presents its complete line of 1924 models, announced a week ago, with the conviction that they will increase the prestige of the name Studebaker which, for 71 years, has stood for the best in transportation, quality and value of product.

Into these 1924 cars are built every proved feature in design that makes for the comfort, convenience and safety of passengers, and many refinements that further enhance the value of a line of cars already highly perfected.

It is common knowledge in the steel industry that Studebaker uses only the highest grades of the finest steels. And the same is true of the electrical equipment, instruments, bearings, batteries, upholstery, finishing points and accessories used in Studebaker cars.

It is equally well known that Studebaker, with \$90,000,000 of actual net assets, including \$45,000,000 of plant facilities, is unsurpassed in ability and

resources to manufacture economically and give maximum intrinsic value for a given price.

Produced under these favorable conditions, the 1924 Studebakers are distinctly the lowest priced and greatest values Studebaker ever offered.

These are not careless statements. They are facts that reflect the honesty and integrity of the manufacturer and its product just as they do the truth of Studebaker advertising.

The public has placed its confidence in Studebaker by accepting these facts, supported by the performance of Studebaker cars in owners' use. That why Studebaker sales for the past six years have increased progressively each year and sales for the first six months of 1923 of 81,800 cars broke all six months' records.

Studebaker never cheapens quality to meet competition. The name Studebaker stands for satisfaction and service.

THIS IS A STUDEBAKER YEAR

For live hogs. He asks, "Will we ever get back to a sound basis of equal and consistent values until we get back to some of the practical and economical methods that were necessarily employed by the early settlers?" The editor of the Herald has undoubtedly hit upon one of the main contributing causes to the unbalanced economic condition that prevails in the country today. So far we have been prone to look to congress and our state legislatures to solve our problems, but they seem to offer the easy way, but ultimately we shall discover that legislation offers but temporary relief and then we will settle down to work out our own salvation at whatever cost the town contains.

Paint Agents Wanted. A large Paint Concern selling its entire output direct from the factory to the consumer, wants local representatives to take care of their business in this territory. Experience unnecessary. Substantial pay-look to congress and our state legislatures to solve our problems, but they seem to offer the easy way, but ultimately we shall discover that legislation offers but temporary relief and then we will settle down to work out our own salvation at whatever cost the town contains.

GAS FROM FOOD PRESSES ON HEART

If food does not digest it turns into poison which forms gas. This often presses on heart and other organs causing a nervous, restless feeling. Simple nachtkorn bark, glycerol, castor oil, menthol, potassium iodide, decaying food-matter you never thought was in your system which caused gas and pressure on heart, kidneys and bowels, and gas from both upper and lower bowel. Excellent to guard against appendicitis. Wayne, Drug Company. **221**

A Safe Test

For those who are in need of a remedy for kidney troubles and backache, it is a good plan to try Doan's Kidney Pills. They are strongly recommended by Wayne County and its neighbors.
Melvin Norton, painting contractor, Wayne, says: "I have been a painter for the last forty years and continue inhaling of the turpentine fumes and my kidneys in bad condition. The secretions were unnatural and burned in passage. At times I could hardly move or get around on account of the steady aches and pains in my back. I tried different remedies for this trouble but to no effect. At last I tried Doan's Kidney Pills and they benefited me. I kept on using Doan's and they benefited me. I use them at different times now when I feel my kidneys need a little attention and they always remedy the trouble."
Price 60c at all dealers. Don't simply ask. Advertisers will refund Doan's Kidney Pills—the same that Mr. Norton had. Foster-Milburn Co., Mrs., Buffalo, N. Y. **221**

Avoid Fuel Shortage

People should heed the warning to buy their coal now and avoid possible shortage next winter. F. W. Wadleigh, federal fuel distributor of Washington, D. C., issued the following "buy-your-winter-coal-now" plea:

"Mines in Colorado and New Mexico are operating only one or two days a week and those who are in position to foresee the demand that will be made later on are certain that a serious shortage of coal will exist this fall and winter."

"In a great many instances, dealers have cooperated in the purchase of coal as far as their limit of capital and small storage space will permit, but this tonnage is in no case sufficient to protect against the first storm."

"Coal supply and transportation conditions are now ideal. In another thirty days, however, it is expected the situation will greatly change, due to increased movement of fruit, grain, livestock and numerous commodities, so that when the public actually awakens to the necessity of getting fall and winter supply of coal everyone will be demanding their requirements at once. Neither the coal operators nor the railroads will be able to cope with the situation."

We have plenty of coal to supply your needs now, and would advise placing orders without delay.

What a satisfaction to be able to offer a private bathroom to your occasional guest. And with it every day in the year comfort your household would derive from increased bathroom facilities.

You can have that extra bathroom. A surprisingly small space will suffice on larger than a good-sized closet. Let us find it for you. The cost will probably be considerably less than you suppose. May we submit an estimate?

We will gladly call. Or, will you visit us and inspect our fine showing of beautiful Kohler fixtures?
