Some of them went to the shores of Crystal lake, some to Blyberg lake and others to points lower down along the river. After the hunting season closes many of them will engage in wood chopping for the winter, while others will return to their farms and homes.

From Ponca Journal, Oct. 17, 1886: From reports made to the county clerk by the several assessors for the year 1885, we are permitted to take the following figures: They show quite plainly our growing wealth and also our undeveloped resources.

By these figures, it would appear that Dixon county has in round numbers, of horses, 4,000 head; cattle, 16,000; hogs, about 2,200; sheep, 645; mules, 180, which shows at least that there are still some good ranges of sheep and a few more mules. There are 47 burrow safes in the county.

7 steam engines, 2 steamboats, and 100 plows and 100 harrows. These figures show that there is money to be locked up, lumber to saw out, and some travel here and there.

The amount of railroad property in the county is \$13,000,000 at the low valuation of \$4,000 per mile, and moneys of bank or banker footed up \$29,000. There was \$6,609 invested in household or office furniture, in merchandise \$43,000. This demonstrates that we have so far invested our money rather for the necessities of life as tea, coffee, calico and tobacco, than for the luxuries, as row wood desks, and marble top tables.

There were 15 pianos and 131 organs, 19 billiard tables, and 255 watches and clocks. These figures show that that pool only lacks two of being as popular as polka, and that organs are a good second to watches and clocks.

Indeed it is fortunate that the sky is generally shines in Nebraska, so that by its position in the sky, the great majority, who, according to the census, return every year, either by clock or to tell the time, or to regulate their movements as to be in the immediate vicinity of the house at meal time. In this natural phenomenon we may see how a benevolent providence tempers the wind to the shorn lamb, or else how the watch and the clock carefully follow the vigilant eye of the officer of the law.

We might extend this list but space warns us not to beset the figures given as reasons to indicate our wealth and prosperity beyond the shadow of a questionable doubt.

Dixon county has under cultivation at least 100,000 acres, and its population 290,000 and its total valuation on a cash basis is \$5,000,000.

Being modest we will not mention either our manners or our morals, but can with confidence assure strangers that we who may read these few lines, and who are seeking a home, that church and school are well sustained, that crime is rare, and justice evenly dispensed as may be, by impartial authorities.

DANGERS OF A COLD. Wayne People Will Do Well to Heed Them.

Many had cases of kidney trouble result from a cold or chill. Congested kidneys fall behind in filtering the poison-laden blood and backache, headache, dizziness and disordered kidney action follow. Don't neglect a cold. Use Doan's Pills at the first sign of kidney trouble. Follow this Wayne resident's example.

Mrs. J. L. Soules, says: "A cold settled on my kidneys and put them in a badly deteriorated condition. The muscles of my back were stiff and my kidneys were so sore and weak I could hardly get around at times. Many times it was impossible to get a night's rest, on account of the worn-out and miserable condition of my back. A friend told me about Doan's Pills. After using Doan's, bought at the Wayne Drug Co., I was much better in every way. I haven't had a cold since for some time."

Price 50c at all dealers. Don't simply ask for a kidney remedy—get Doan's Pills—the same that Mrs. E. H. Jones had. Foster-Milburn Co., Mfrs., Buffalo, N. Y. 62511

Wayne, Nebr., Sept. 6, 1924.

O. S. Roberts,
 Plumbing and Heating,
 Wayne, Nebr.

Pleased be informed that The Ideal Arcola Heating System you installed in my home last fall gives perfect satisfaction. I kept my house between 70 and 75 degrees Fahr. during the coldest weather we had last winter, with a great saving of fuel. I did not burn over three tons of coal all season. I did figure on installing a pipeless furnace, but I am glad I listened to you, as this heat is cleaner and healthier and more saving. I will take great pleasure in recommending the Arcola Heating System to anyone interested.

Yours truly, FRANK POWERS.

I have one of the above mentioned Ideal Arcola Heating Systems on display at my shop, and will be glad to show it to anyone interested.

Motor Bus Lines. At the end of 1923 there were 28 states which had adopted the policy of regulating motor vehicles engaged in common-carrier service according to the bureau of public roads of the United States department of agriculture.

In general, control over routes, services and fares is exercised by the state public service commission.

Through regulations and the promulgation of rules, the state commission supervises the operations of motor buses; speed limits are established; provisions are made for all kinds of safety measures, rules of conduct and hours of duty of drivers are definitely prescribed, the capacity of loads is fixed, and all manner of precautions are taken for the benefit of the traveling public.

According to the information obtained from a number of state commissions which regulate the operations of all common-carrier motor vehicles, there is a tendency for the individual operators to be taken over by corporations organized for this purpose, considering the small operators also organized. Large companies are appearing which control the routes in a given section of a state.

The motor bus business may go through the same consolidation movement which took place in the early days of the street railway business.

Top Sioux City Market. Walt Fenske of Hoskins, Nebraska, said one of the best strings of calves on the Sioux City market of Sept. 15 that has been offered this season.

The sixty-three head in the consignment, all Herefords, averaged 503 pounds and cashed at \$11 per hundredweight, the top price for the day. The cattle came from the Wyoming range as calves last fall, as they when they averaged 300 pounds. They made a good gain in weight and a nice margin of profit.

On Exhibition at Wayne County Fair

From our stock of McCormick-Deering machines, we will have on exhibition at the Wayne county fair, a corn picker, corn sheller, binder and cream separator, all operated by one of our famous tractors. People are invited to witness and inspect these demonstrations. The merits of the different machines will be cheerfully explained. Note the five machines to be on display:

The McCormick-Deering Tractor

Backed by the experience of eighteen years of tractor building and nearly a century of farm machine manufacturing, the McCormick-Deering 15-30 gear drive tractor represents the most modern power unit of the farm. In every feature of its design, the type of construction used is that approved by the best of tractor engineering authorities. For instance, the unit frame adds strength, stability and rigidity, as well as neat appearance and at the same time provides a clean, tight, dust-proof housing for the working parts. The powerful engine with ball-bearing crankshaft is an innovation in the tractor field.

McCormick-Deering Tractor Binder

The McCormick-Deering Tractor Binder is the latest development in harvesting equipment—a thoroughly up-to-date binder designed especially for use with McCormick-Deering Tractors. The Harvester Company has had this tractor binder in the field for several years, improving and developing it by practical usage under all sorts of field conditions.

The Corn Picker

The frame of the McCormick-Deering corn picker is made entirely of steel angle bars riveted and bolted together. Both wheels and axle are steel, making a light but extremely strong machine. The picker lives up to the reputation of McCormick-Deering machines for light draft, for every point subject to any great amount of friction is equipped with roller bearings. As the machine passes through the field the corn, whether straight or leaning, is picked up by the gathering shoes and the ears are snapped off by the snapping rolls. They are then carried back to the husking rolls, husked clean, and the husks dropped on the ground. The cleaned ear is delivered by a corn elevator into wagon drawn alongside the picker.

The Corn Sheller

When ear corn is sold, a deduction is made to cover the weight of the cobs. If this should be estimated too high, the grower of the corn is the loser. When you own a McCormick-Deering sheller, and shell your corn before you sell it, you can be sure of receiving payment for all the corn, and you have the cobs left on the farm to use for fuel.

You can haul more bushels of shelled corn per load, and as a result move your crop to market in less time. The economy in this is very evident. It also pays to do your own shelling for seed and feed. You can shell just when you want to, and put the shelling profit in your own pocket.

No matter what your shelling needs may be, you can find the right equipment in the McCormick-Deering line. The small McCormick-Deering shellers are ideal for shelling corn for seed and feed and will deliver the cobs in good condition for fuel. The larger shellers are well adapted to custom work as well as individual use, and will easily pay for themselves with what they save you on your own crop and by shelling for neighbors.

Ball Bearing

Primrose Cream Separator

The Highest Development in Cream Separator Construction. The Ball-Bearing Primrose Cream Separator represents the highest development and construction in cream separators. For years the Primrose has been recognized and vouched for by thousands upon thousands of satisfied users as exceeding all others for efficiency, durability, close skimming, design, compactness and finish. The added feature of ball bearings now places it far in advance of any other type of cream separator, and without additional cost to the user.
