THE WAYNE HERALD

The Oldest Established Paper in Wayne County PUBLISHED EVERY THURSDAY Entered at the postoffice at Wayne Nebraska as Second class mail matter in 1886 under the act of March 3, 1879. Known office of publication, Wayne, Nebraska.

E. W. HULSE, Editor and Proprietor Subscription, \$2.00 Per Year in Advance TELEPHONE 146

Thomas A. Edison who stands high in the scientific world, announces firm belief in immortality.

The death of John F. Nesbit, republican candidate for congress, on last Thursday, was a source of much regret. His many warm friendships testified to his high character and honorable career.

Safes in New York were closed during the voting on election day in Chicago. The safes were a source of anxiety as they are operated on every other day of the year in defiance of the federal constitution. Not consistent. -But New York does not pretend to be consistent.

The H-Y convention to be held here during three days following Thanksgiving gives Wayne an opportunity to express its interest in a worthy organization. As was understood, the purpose of the H-Y is to develop Christian character and encourage high ideals. The boys who attend are benefited and become helpful to others. The youths who come here for the convention, will, if favorably impressed, want to come back to attend college.

A chemical analysis of bread is reported to show that it contains from one to two per cent of alcohol, and therefore it is pointed out, as mentioned in the Literary Digest, that alcoholic prisoners who are on a restricted diet, are not held entirely aloof from spirits tabooed by the prohibition law. To reduce alcoholic content in making bread, it seems necessary to avoid use of yeast, but no woman who takes pride in her culinary product could be persuaded to do it.

Election is over, and the county has settled the matter. The candidates who were defeated, should understand that the result does not necessarily indicate lack of popular approval. In the politics of one campaign is often followed by victory in another. In politics, it is important to be able to be courageous in making a defeat a victory. Our experience in running for office is nil, though we can appreciate how defeated one might feel by being the under fellow. One's last band might have to be enlarged as a consequence of capturing the office. Usually, however, one's others little, if at all, influences that determine votes. One thing that hindered us from entering the race for public office was the fact that places we could fill we didn't want, whereas places we would want, we couldn't fill and couldn't get it.

The Madison Star-Mail explains at length the history of the county printing in Madison county. It says that it is the cause of friction in newspaper circles which will not account for the fact of the loss of the county publishing. It seems the other newspapers of the county divide the legal rate which was made when prices were down, and which is now too low, and they seem to be pleased over the privilege. In Wayne county the publishing was divided equally. Four newspapers which had been more newspapers, doubtless there would have been more division.

PASSING. The proterodactyl, pleiosaurian and mastodon are extinct, but of them we are sometimes forcibly reminded by the unextincting of all remains. Of them we are also reminded of a not quite extinct semi-boreal politician. He still gets in his office, and he still runs for election by using into groups of innocent people and compelling them to elect him. He has a few facts mixed with many false conclusions. He sees the county drifting towards the rocks. He is in the reality of crazy, but his assumption of prevailing lies. He sees darkness, talks much and says nothing that is worth while. He gets in his office, but he is not his political action, and following election, he lapses back into the sea of desolation where he remains until another campaign is around. Political brain-stormers of the type mentioned are getting scarce. They are the ones who are advancing strides, and facts and facts will find them only in fustian, and they will only be remembered as a source from which succeeding generations have happily escaped.

The Herald was included in the division, but declined to participate in it. Thus, the publishing done by the Herald is done without charge, and the contents are not for sale. The treasurer, though the saving is such a trifle that it will take a long time to make it noticeable in the matter of pay. We think every country should pay for service the same in individuals, and not permit the pitifully small rate of pay to be a source of such infinitesimal parcels that each editor who accepts the pitance, feels humiliated to look into a mirror and see his reflection. Since the Herald has ceased to keep books on financial molecules in connection with the publishing, it is not possible to become normal and it does not feel like apologizing for being in existence.

STICKING. A man who has been a distinguished success in business, advises people to stick to their jobs. While he thinks changes are sometimes advisable or necessary, he believes the one who stays with his task is the one who wins largest returns. Changing to strange communities and trying to overcome obstacles that have to be overcome. One is lack of acquaintance. Where one is known and treated, he is sure to get a better price. Changing locations and jobs taxes nervous energy that may well be used in constructive service whose long continued confidence gives support. It is not so important how large pay one receives as how well he manages what he does get, and chasing a will-o'-the-wisp in the way of changing jobs or locations in the hope of larger compensation or greater salary likely to prove disappointing and an overwhelming handicap.

Early Days In Two Counties.

The J. D. King and L. U. McKee families left for San Diego, Calif., to spend the winter.

John Juhlin, son of Mr. and Mrs. N. J. Juhlin, and Miss Trickett of Kansas City, were married November 24, 1926. Mr. Juhlin will travel for an implement firm with headquarters in Omaha.

From Ponca Journal December 18, 1925:

Whether summer weather in the winter time is healthy or not we don't know. One thing is certain, however, that such kind of weather is so pleasant that one can afford to take the chance of sickness in consequence of it.

On Tuesday afternoon a party of about fifty railroad graders, with mules and scrapers, arrived in town and remained over night. The next morning they started for Plainville, where they were to work on the Short-Line.

Wayne Gazette: "Farmers are now planting corn. Suppose the railroad company reduced the freight rates on coal and corn, what then? They would by so doing benefit not only the farmer but themselves by increasing the traffic of their road. There is such a thing as charging so much as to overreach themselves. When corn is twelve to fifteen cents a bushel and coal from five to six dollars per ton, corn will be the fuel every time."

COAL!

A few days ago a customer came in and said, "Send me a ton of that coal that doesn't make any ashes. My neighbor used it last winter and said it was the best and cleanest coal he ever burned." Now we call that a real compliment for our HOT LUMP COAL—it is the best of satisfied customers that has made Hot Lump Coal the biggest seller of any coal that comes to Wayne.

We recommend the Nut size for cookstove use. It saves breaking, saves waste, is properly sized and costs less than the lump.

Prices on the different grades of coal range from \$8.50 to \$14.50. As with other lines of merchandise, the quality governs the price.

What becomes of the bag of pus at the end of your tooth? You may not know that it is there. Pus bags and pockets form at the ends of dead roots, decayed teeth, and teeth that appear perfectly sound, or in the hidden crevices between the teeth. The absorption is passed into the blood channels, into the heart, the kidneys, the liver, stomach and intestines. The result? Diseases of every sort have been started. The X-Ray reveals such conditions.
