Early Days In Wayne County

Early Days from the Wayne Herald for May 9, 1907: John R. Morris has a new ice house on his farm near Carroll. Rev. C. J. Ringer spoke to the Y. M. C. A. members at the college.

Mrs. Banister is visiting her daughter, Mrs. W. R. Bradford, in Hoskins. John Kaulen, Bert Tomplin and Will Weatherford of Hoskins, went to Kansas to look at land. M. S. Linn of Carroll, went to Chicago with a shipment of cattle belonging to the Shannons. M. VonSeggern is building a large, modern residence on a hill at the northeast edge of Wayne.

Friends of Ernest Behmer, sr., met as his home in Hoskins to remember his seventy-sixth birthday. Mr. and Mrs. J. J. Abern went to McLean, the former to rearrange the stock of merchandise bought by Fred Remender. John G. Neihardt entertained a group at the Presbyterian church with a lecture on "Keats." Mr. Neihardt and his mother plan to spend the summer in the Black Hills.

The county commissioners, E. W. Cullen, R. Russell and J. F. Stanton, and Clerk C. W. Reynolds met and appointed Fred Pflueger, James B. Grier, D. Meyer, H. Brudigan, John Dunn and Otto Fredrickson as road supervisors. The Wayne Commercial club held its second annual smoker at the Woodman hall. The band, organized by the club, played. C. M. Craven was chairman of the program and Prof. James Pile, D. C. Main, F. M. Northrop, J. E. Kato, A. R. Davis and Prof. Wilson spoke. F. E. Gamble, Ed Johnson, Geo. Wilbur and W. H. Morris sang.

The Zone of Kelvinator. Kelvinator maintains a constant condition of dry, frosty cold that is constantly under fifty degrees. This is the Zone of Kelvinator. It is much colder than the average ice-cooled refrigerator. In this intensely cold and dry air, foods not only keep fresh and sweet for days, but actually improve. Meats become mellow and acquire a delicious tenderness and flavor. Green salads and vegetables "crisp up" in a marvelous way. All perishable foods stay sweet, wholesome and inviting. Electricity Keeps It Cold. Imagine an unending supply of cold coming from an electric plug to chill your refrigerator. That's Kelvinator Electric Refrigeration. The cold regulates itself. It requires no attention. Once the electric connection is made, you simply forget refrigeration. Your refrigerator will actually keep itself cold. You can go visiting whenever you like, knowing that your food will keep perfectly while you are gone. Call or phone and learn how easily Kelvinator can be installed in your present refrigerator. Prices as low as \$195.00. Carhart Hardware Company, Wayne, Nebraska. Kelvinator. The Oldest Domestic Electric Refrigeration.

Good roads are essential to the advancement of any community. They are the links that lead us to the outer world—the links that lead others to us. With the ever increasing use of the automobile better roads have become a necessity not only to ourselves, but to visitors from other points as well. The city that is the hub of well paved thoroughfares is progressive and thriving. Our plea to county, state and nation is: "Give us better roads!"

Triple-Power Tractors
1. Practical power on the drawbar.
2. Serviceable power on the belt.
3. Positive power and uniform speed on the power take-off.
The power take-off, which is considered the greatest single tractor improvement made in over ten years, is an original feature on McCormick-Deering tractors. It consists of a shaft attached to the rear of the transmission and driven by power transmitted direct from the engine. It is enclosed to protect it from dust and dirt. It can be used at the same time as the belt pulley, if desired. The power take-off operates in very much the same way as a propeller shaft, and drives the mechanism of the pulled machines, such as tractor binders, rice binders, corn pickers, etc. It enables these machines to do more work and do it more astisfactorily under very adverse conditions of both crop and ground. The power take-off always runs at the same speed whether the tractor is in low or in second gear. It can be run when the tractor is standing still. This is an advantage in clearing the pulled machine in case it should be become clogged.
It would prove a real advantage to you in selecting a tractor to be sure that it can be equipped with a real power take-off because power farmers are finding more and more uses for the power take-off.

McCormick-Deering P & O Little Wonder Tractor Plow
Positive-Action Power Lift
The power lift device is driven by the land wheel, which is thirty inches in diameter and provides ample traction to raise the bottoms even when the ground is slippery. Setting the clutch in action by a pull on the trip rope, the bottoms are lowered quickly, but are prevented from falling too abruptly by a balance spring and a retarding roller in the clutch. This feature prevents breaking the share points when the ground is very hard. Another pull on the trip rope brings the bottoms out.
Lever Depth Adjustment
The Little Wonder has two levers, one for regulating the depth and the other for leveling the plow. Both levers can be reached and adjusted from the tractor platform so that the operator can adjust the depth or level the plow without stopping the outfit.
Extra Good Clearance
There is extra large clearance between the bottoms and under the beam. The result is that the plow does exceptionally good work in trash ground; it will not clog under any reasonable conditions. The trash covering proclivities of the Little Wonder are remarkable.

A Specialist for Every Task
A ship's crew must be carefully trained before venturing onto the open sea.
In like manner, the telephone organization, although on a vastly larger scale, must have a well-trained man or woman for every separate task. For telephone service, like the ship upon the sea, must go on night and day, in fair weather or foul. Nothing must be neglected.
Repairman, operator, engineer, and every other employee has been carefully selected and painstakingly trained to do his or her part so that your voice may be carried smoothly and constantly along the wires at speech.
Whether you come into contact with an employee, the clarity of his or her speech that you will find that "spirit of service" which has made the telephone in America the cheapest and most efficient in the world.
