THANKSGIVING

A current magazine details seven mistakes of life which many make to their disadvantage and sorrow. Here they are: The delusion that individual advancement is made by crushing others down; the tendency to worry about things that cannot be changed or corrected; insisting that a thing is impossible because we ourselves cannot; accomplish it; refusing to, set aside trivial preferences, in order that important things may be accomplished; neglecting the development and refinement of the mind by not acquiring the habit of reading; attempting to compel other persons to believe and live as we do; the

This dinner was given to test the manners that the bupils have been learning. Letha Porterfield and Falmeil Beckenhauer had charge of the games that the pupils played in the hall before the duncer. Letha Porterfield and Frank Gamble were chosen as captains for races played after dinner. Frank Gamble's side won. In hygiene and citizenship the pupils are working on a fresh ar project. Some one is appointed to see that the room's temperature is kept between 68 degrees and 70 degrees. Fresh air project. Free hand maps of South Africa are now being made. The pupils make three different sets of maps. These are the political maps in which the states are studied; the product maps which are maps showing the products raised in each place; and the physical maps, in which the states are studied; the product maps which are maps showing the products raised in each place; and the physical maps, in which the mountains valleys, plateaus and such land formations are studied.

It has been decided by the class that the chalk writing on sidewalks does not look well, so each pupil is to see to it that no chalk writing is on the walk in front of his home and he will not write on walks thinself. As there are twenty families represented in the class, the children decided that this plan, when, worked out, would make a great improvement in the looks of the town. Then too, perhaps, other children would also adopt this plan.

Vocabulary study has been conducted for preparatory work in the English class.

Fresh water, easily accessible to cattle, hogs and other live stock is an important essential during cold weather. A tank heater is necessary to prevent freezing. Give your stock plenty of water by installing a tank heater. See them at our shop.

## McCormick-Deering **Feed Grinders**

Built in three sizes, from 6-inch to 10inch, requiring from 3 to 16 h. p. according to size and type. Designed to grind various combinations of grains and forage crops.

Save 12 per cent to 26 p

Actual tests with whole grain, fed to healthy, full-toothed animals, show an average loss of from 12 per cent to 26 per cent. In other words, out of every 100 bushels of whole corn fed, 26 bushels every 100 bushels of whole corn fed, 26 bushels yield practically no nourishment. The unground oat diet shows a loss of 12 bushels out of every 100. Even though you feed only a few animals, such feeding losses cannot be overlooked. A few minutes, now and then, with a McCormick-Deering Feed Grinder will turn the whole grain into nourishing, easily digestible feed at low cost.

### McCormick-Deering **Corn Shellers**

For every need; ranging from the 1hole steel hand sheller to the power cylinder sheller of 350 to 400 bushel per hour capacity

## McCormick-Deering Engines

Full-powered engines with removable cylinder, enclosed crankcase, magneto ignition, efficient fuel mixer, Sizes  $1\frac{1}{2}$ , 3, 6, and 10 h. p.

## **McCormick-Deering** TRACTORS

Sturdy, 4-cylinder tractors, built in two sizes, 10-20 h. p. and 15-30 h. p. Also, the all-purpose Farmall. Ideal tractors for winter belt work.

For years the McCormick-Deering has provided the standard farm power, made in two sizes, 10-20 h. p. and 15-30 h. p. Fully equipped 4-cylinder tractors with ample power at belo drawbar, and power takeoff. Thousands upon thousands of successful farmers rely on McCormick Deering Tractors to keep down the costs of farming. They are beating down the high cost of labor by making that labor do two or three days' work in one, and that method leads to farm profit.
