Regraveling Is Near Completion

the Wayne-Altona Highway Is Being Finished.

Regraveling of the Wayne-Altona highway is nearly completed. A one-inch layer is being added to the three-inch surface placed priviously. Material is being hauled by trucks from the Lucschen fit near the Elkhorn, south of Altona. The gravel is spread after it is unloaded and the work will soon be done. Graveling of a short stretch on the Wayne-Laurel highway is being delayed until warmer weather. Digging the gravel from the pit and working it into the road are difficult when the ground is frozen.

Just a reminder. Sunday
school meets at 10 o'clock every
Sunday morning.

Morning service at 11. Sermon by the pastor on "A Changeless Command." filed 222754.91 106786.82

Commandments. We give here a few of the topics; others will follow week by week. The Ten Commandments in Modern Life. Are they out of date? Has Wayne discarded them? Feb. 5. "Thou shalt have no other gods before me." Do atheists worship ly god? Are all religions equally god? Feb. 12. "Thou shalt not make unto thee any graven image nor bow down to them." Was it the intention of the Christ that, the cross be borne in one's heart or on a crucifix? Can ritual take the place of faith? Radio versus church worship. Feb. 19, "Thou shalt not take the name of the Lord thy God in vain." Are we to interpret this literally? Why swear?

Young People's meeting at 1320 cm. Lorder Miss Ville. Evangelical Lutheran Church. (Rev. H. A. Teckhaus, Pastor) February 5: Sunday school, 10 a. m. Preaching service, 11 a. m. The Luther League will meet at 7:30 p. m. Milly Kugler, leader of topic.

Mr. and Mrs. Henry Bush and aughters, Prudênce and Anita, were Sunday dinner guests at the L. W. Needham home in Winside.

President Speaks Of 'Ship Building

Washington, Jan. 31—The navconstruction program now before
congress represents American requirements alone, in the expressed opinion of President Coolidge, and implies no invitation to
international competition.
Addressing the semi-annual
business meeting of the government last night, the president declared it was the intention to
build the ships as rapidly as permitted by the condition of the
treasury.

Church of Christ.
(Rev. Gerald G. Bentley, Pastor)
10:00 a. m., Bible school. We are counting on your presence at 10 o'clock sharp.
11:00 a. m., Communion service. Sermon by pastor. The sermon will be the first in a series of seven upon the subject: "The Victor's Crown." We hope you will be able to enjoy the entire series.

As estimated by others, the uilding program would cost

for a constructive economy gram, the president asked gress to adhere to the a tration's \$225,000,000 tax tion proposal and asserted

posal and he hoped there would be none in its final consideration by congress

oncerning are cleasury.
Director Lord of the budget lso addressed the gathering in lontinental Memorial hall, from which radio hook-ups carried the peeches throughout the country. Vice President Dawes, who was the first hundret director, several

Quick Cleaning Service

McCormick-Deering, Ball-Bearing OREAM SEPARATOR

Four Ball Bearings in the New McCormick-Deering

Until the advent of the ball-bear-McCormick - Deering, separating was a man's job where strength, endurance and considerable energy were required. Today, however, the McCormick-Deering ball-bearing cream separator with its close-skimming, easy-

turning and sanitary qualities, has enabled the farmer to increase his herd, raise better cows, and sell cream, thus

adding to his yearly profits.

The McCormick-Deering with four ball bearings is without question one of the greatest achievements in recent years in cream separator construction. Other McCormick-Deering features are equally important, but its light-run-ning qualities due to ball bearings have solved the dairyman's problem of separating more milk without loss of but terfat in less time, at less cost and w

Makes Child's Play of a Man's Job

The new McCormick-Deering ball-bearing cream separator not only a step forward in providing easy turning so long desired by it also provides a quiet, smooth running machine that even a woman child can operate with ease. Experienced persons know that a plain bearing cream separator with its high speed will have a much short life and be less efficient in operation than a ball-bearing separator the McCormick-Deering type.

Tests made by various institutions show that the friction in play bearings, under the best conditions, is almost four times as great a m ball bearings.

New McCormick-Deering Invites Comparison

A comparison of any plain-bearing cream separator with a M. Cormick-Deering will convince you of the superiority of ball-bearing construction over that of the plain-bearing type. A new McCormics Deering on your farm will mean greater profits from your cows any years of dependable and satisfactory service from your machine.

Phosphor Bronze Crankshaft Bearings

While the McCormick-Dedring is a slow-speed machine and possible as the property of the proper

Cream Regulated by Discharge of Skimmilk

Upon the construction of the bowl depends the amount of but terfat recovered from a given quantity of milk.

terfat recovered from a given quantity of milk.

In the design of the new McCormick-Deering cream separator bowl the density of the cream is regulated by controlling the discharge of the skimmilk. This construction is far superior and more efficient than the cream screw-type of separator bowls.

With the cream screw-type of bowl the regulation takes place at a point directly in the path of the cream discharge. In the McCormick-Deering the skimmilk regulation of the cream density is scientifically aplied at the point of discharge of the skimmilk and not in the path of the cream density is less sensitive, more positive, and results in the delivery of a more uniform cream in a better condition for churning.

The dividing disc prevents the remixing the already separated cream and skimmilk

Cream, Skimmilk Covers and Spouts

The cream and milk spouts which are structed of heavy steel, are one piece with no sellaps or rivets to obstruct an even flow of cream the proper discharge of the skimmilk.

Oil Supply Visible Through Glass Panel

The glass panel in the lower part of the glass panel in the lower part of the process of the glass panel is a convenient, positive oil supports the convenient of the glass panel in the glass panel in the lower part of the glass panel in the glass p

Bowl Drained At Machine

You do not have to hold the bowl to drain-Draining the bowl prevents freezing in winter, co tamination in summer or rusting as the result of pe lect in emptying the bowl.

Simple Speed Indicator

The speed indicator (bell type) on the McOgr mick-Deering is located on the end of the crank When the crank has been brought up to the speed at which the machine is intended to run, the beau will cease to ring and will remain silent as long the proper speed for efficient operation is main tained.

Friction Clutch

Discs'

Tinning the discs after the buttons have been welded in place makes a one-piece sanitary disc that will not collect dirt and rust as do the common type

Rubber Ring

The rubber ring is easily removed for washing after each skimming which prevents rust and an unsanitary condition.

Tubular Shaft

The tubular shaft is carefully machined and heavily tinned to provide complete sanitation.

Positive Automatic Oiling System

The lubrication in the McCormick-Deering is entirely taken care of by a splash force-feed oil clarifying system.

Oil Sprayed To Bearings

The one phosphor bronze crankshaft bearings are also lubricated by a spray through a groove in each bearing, the used oil being returned to reservoir by spirals on crankshaft.

Outside Faucet

Metal Trough Regulates Oil Supply

An exclusive McCormick-Deering feature is the metal trough installed in the oil reservoir in which the spindle driving gear revolves, thus spraying fresh clean oil to every running part.

One-Piece Spun Metal Anti-Splash Supply Can

It is securely locked in position on the supply can bracket, which enables the operator to rest a can of milk on the side of the supply can without fear of tipping the supply can over.

Revolving Supply Can

The supply can when filled with red easily within the bracket circuit. milk can be turn

Bowl Vise

The bowl vise is located within the bracket.

Main Driving Gear Thoroughly Oiled, Completely Enclosed

The main driving gear in the McCormick-Deering is completely enclosed, thus protecting it from dust and dirt.

I Shall Protect the Good Name and the Reputation of This Store

The best thing any business can have is a good name and reputation. It is such a valuable asset that nothing can be compared with it.

For some years past Bill has been making his annual trips to the Hardware conventions, and if any one can go to a convention more than once and keep his good name he certainly is an angel, and believe me or not but Bill don't have wings.

This time, before he left the old dump, he says, "Bungsell some of those ranges before I come back cause we need the room." (Now don't get the idea this store is a dump 'cause I call it one, 'cause really it is not. It is one of the best Hardware Stores in Nebraska and we are certainly proud of it.)

But we all know old Bill Hiscox and when he says any thing there is no use in trying to argue him out of it So I must sell some ranges at most any old price to get rid of them. And with each range I sell the rest of this week I am going to give a big set of cooking ware absolutely free. This offer is good for this week only 'cause Bill will be home Sunday or Monday and I may have to look for a new job but if I do, there is one sat isfaction, and that is that Hiscox Hardware has kept up its reputation and had one more real range sale And that Bunt kept up the reputation of the old dumi right to the last.

BUNT

Not the Owner—Not the Flunkey —Just the Boss HARDWARE
