Carlson, Mr. and Mrs. Carl Anderson, Mr. and Mrs. Roy Sundell, Mr. and Mrs. Clemens Nimrod, Mr. and Mrs. Rutherford Will Durant says we must marry, young, or take the consequences. Home Town of "Shepherd of the Hills" Bought by Missouri Business Woman WHEN Harold Bell Wright wrote a romance of the Ozarks around the peaceful village of Garber, Mo., he provided the means for a "true romance" as picturesque as the one which in "The Shepherd of the Hills" stirred thousands. For Garber, home of "Uncle Matt" and "Aunt Mollie," famous characters of "The Shepherd of the Hills," has become the property of Mrs. Ada B. Clodfelter, a Springfield, Mo., business woman, who purchased the village "hook, line and sinker" with the intention of making it a resort for lovers of Wright's novel. Population, Fifty In addition to owning the general store, the postoffice, five homes, a railroad depot and a canning factory, Garber's only industry for its 50 population, Mrs. Clodfelter is postmistress and general manager of everything that "goes on in town." She became interested in the little, tucked-away Ozarkian village because it was the home of "Uncle Matt" and "Aunt Mollie," whose real names were Mr. and Mrs. J. K. Ross. Their cabin still is a picturesque landmark in Garber. "Uncle Matt" was for years the postmaster at Garber and owned the general store—the only one in town. His other duties, as readers of Wright's novel know, consisted of being chief advisor to all the inhabitants of the countryside who were in trouble. "Except for the building of a branch railroad into the town and

when she was a child, Garber is much the same as it was in Uncle Matt's day. Native of Ozarks The owner of the "one woman town" is a native of the Ozarks and has a love for the country typical of its natives. Her father was an evangelist who for years "rode the Ozark circuit" some times accompanied by his wife and the present owner of Garber

As for the "true romance" ending to her purchase of the romantic village, Mrs. Clodfelter plans the immediate erection of a modern hotel. She believes that thousands will be attracted to the home of "Uncle Matt" and "Aunt Mollie" to spend their vacations, much as she was attracted to the village to the extent that she purchased it.

"Uncle Matt's" log cottage in picturesque Garber, Mo., made famous by Harold Bell Wright's novel, "The Shepherd of the Hills," and (inset) Mrs. Ada B. Clodfelter, who has purchased the entire town of Garber and expects to make it a popular summer resort.

Due to two live issues, the coming municipal election will bring out the full voting strength of the city for the first time in many years.

The contractor who has charge of the building of the new hotel on which work has been resumed, says the building will exceed expectations in all respects.

As the first day of spring, yesterday furnished the most satisfactory sample of weather of the year. The sun shone brightly from a cloudless sky and the elements were warm enough for mid-winter. Doors were allowed to lie down, furs were thrown open and heavy clothing was discarded.

We understand Wayne is being considered by Nebraska Presbyterians as a point for the location of a proposed old people's home. It would be non-denominational in service.

To promote interest in aviation, Col. Chas. Lindbergh took members of congress for an air ride over the City of Washington, and Congressman Edgar Howard was among the number.

The editor of the Norfolk Press suspects that we are too optimistic over the condition of the farmers in Wayne county, basing her surmise on what she had heard in contrast with instances we had been pointing out in these columns.

UNEMPLOYMENT

The Fremont Herald regards as unfair our suggestion that much of the prevailing unemployment is unnecessary and avoidable. It is quite likely we overstated the extent of idleness that is voluntary.

As they appear making the best of them, the while we are asking for improvement, and in the evolution of things and the onward movement, we prefer to emphasize the sunshine and minimize the shadows.

As evidence of the development of air navigation, Wayne has been asked to send representatives to a meeting and banquet to be held at Huron, S. D., March 30, for the purpose of planning airways which would touch this point.

Two major political parties insure the best government. If one party had surprising strength and undisputed control, abuses of power would be increased and popular interests would suffer.

The report of the National Crime Commission, headed by former Gov. Frank O. Lowden, of Illinois, adding into account conditions in the big cities, characterizes police forces as untrained, inefficient and inefficient.

With Defeat

Lincoln Journal: A few days ago E. J. Burkett of Lincoln, who is out for the republican nomination for congress, wrote a letter to his rivals in which he pledged his loyalty to his party.

right to vote against it on matters which he considers wrong. An obstructionist can work alone. Any person can tear down a structure; very few can build one.

Business

Sioux City Journal: Trade has livened up considerably since the first of March, but there is still room for improvement. It encourages the hope that predictions of an upturn this spring will be borne out.

Another good sign is in the revenue freight car loadings for the last week reported, that ending March 3. The figure was close to 1,000,000 cars.

The car loadings for the week ending March 3 were 30,326 being the same week last year and only 5,171 below the same week in 1925.

Market Report

Furnished by Steele, Siman & Co., Sioux City Stock Yards. March 21.—Bearishness has surrounded the trade on live beef and pork this week while sheep and lambs have strengthened to new high levels for the season.

Public Pulse

To this department communications, touching facts or opinions, are invited. Signed contributions are preferred, but in any event the editor must know the name of the author to justify publication.

An Explanation

Dear Editor: I notice by last week's Democrat that I am supposed to run for councilman in the second ward on an anti-pool hall platform.

I believe the matter is not nearly as important as some other things, for example, an economical and efficient management of the city's affairs.

Statement

The following statement has been issued by one group of men who appear as candidates to represent this state in the republican national convention, and whose names are appended to the same.

"We agree with that vast number of republicans who believe that Nebraska should discontinue a policy of protest, and take its place as a constructive influence in the councils of the party.

"It shall be our purpose as delegates to strive for the nomination of a republican candidate for president of the United States who is an experienced statesman of sound and tried judgment, willing and well equipped to safeguard the interests of the nation through the sound principles of republicanism.

Samuel R. McKelvie, C. Frank Reavis, Albert W. Jeffers, Norris Brown, Charles H. Sloan, George C. Junkin and C. N. Wright, delegates at large; C. Petrus Peterson and Paul Jensen, delegates, First congressional district; Charles E. Abbott and Fred S. Berry, delegates, Third congressional district; Loren H. Laughlin and R. S. Norval, delegates, Fourth congressional district; Clarence A. Davis and Ralph E. Bryant, delegates, Fifth congressional district; N. P. McDonald and Wm. E. Shuman, delegates, Sixth congressional district.

sales have been made above \$13 this week. Yearlings do not show much change this week. A few sales have been made up to \$13 with bulk of the supply at \$11 to \$12.25.

Farmers have been clearing their places of cattle, getting ready for spring work. Receipts probably will run lighter right along now and some improvement in demands for beef is expected in the near future.

The butcher stock market has been uneven so far this week but the average is not much different compared with the close of last week. Heifers have been in better demand than cows.

Supplies of butcher stock have been fairly large and both shippers and packers have been inclined toward weakness. Good choice heifers were quoted at \$16.00 to \$12.00 with fair and medium grades at \$9.00 to \$9.50.

Stocks and feeders have been received in limited numbers this week and the market has held close to steady. Some slowness was in evidence on plain grades.

Two loads of feeders sold at \$12.50 on the opening day this week, as high as they have sold any time in the past few weeks. A real good class of steers of all weights sold at \$11.00 to \$12.00 with fair to good kinds at \$9.00 to \$11.00 and plain grades down to \$8.50 and under.

Sheep receipts at 11 leading markets amounted to 90,000 head the first two days of the week, 12,600 less than last week. Demands for sheep and lambs have been broad this week and the market has advanced to the highest level since June, a year ago.

Likely To Reduce Potato Acreage

Lincoln Neb., March 20.—Nebraska farmers are not planning any marked changes in crop acreage except barley and potatoes, the state and federal division of agriculture statistics reports.

Some potato growers in western Nebraska already have taken action to reduce the acreage of potatoes, the report says, and some winter wheat will be abandoned which will force some further adjustment in acreage.

Planting intentions of Nebraska farmers, the report announces, follow: Corn, 190 per cent; spring wheat, 96 per cent; oats, 101 per cent; barley, 129 per cent; grain sorghum, 190 per cent; potatoes, 112 per cent, and tame hay 191 per cent.

Close-Up of Shattered Dam

The shattered remains of the giant St. Francis Dam, near Newhall, Calif., released 12,000,000 gallons of water to flood the Santa Clara valley, is pictured above. Many huge chunks of concrete thousands of tons were carried three-quarters of a mile by the irresistible wall of water.

A Typical Sight in Flooded Valley

How homes were reduced almost to piles of kindling when the St. Francis Dam, near Newhall, Calif., burst and released the waters of the Santa Clara river is graphically pictured above. Many men greeted rescuing parties after the flood waters had abated. The property damage will run into millions of dollars.

**Harvey S. Firestone, Jr., Sends First Message
From Liberia To Rubber Company's Own
Station In Akron—Daily Reports On
Rubber Growth To Follow**

Mr. and Mrs. Harvey S. Firestone Junior, now in the African jungles, today broadcasted the first message sent from the special radio station recently erected on the Firestone rubber plantation in the interior of Liberia, on the West Coast of Africa. The message was received at a similar station on the roof of the Firestone factories at Akron, Ohio.

This marks a new era of communication with the interior of inaccessible countries. Heretofore, the method used was to send foot messengers through jungle trails, taking days to get in touch with the outside world. Broadcasting by radio direct from one continent to another thus gives the Firestone Tire & Rubber Co. a great advantage in developing its million acres of rubber lands that were secured from the Liberian government. Although these properties are located over 5,000 miles from the Firestone headquarters at Akron, Ohio, it will now be possible to send reports every day by radio from the Liberian plantations to Akron.

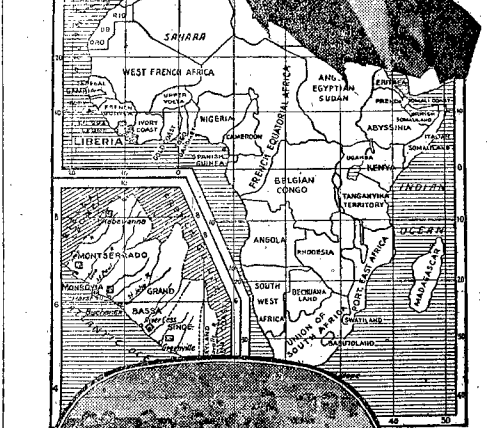

100,000 Acres Laid Out
Mr. Firestone, Jr., has been in Liberia since early January. In his first report by radio today, he said that the Liberian government officials were enthusiastically cooperating with Firestone in the company's great undertaking to make Liberia one of the important rubber-growing countries of the world. Mr. Firestone said that during the first year two 50,000-acre plantations had been laid out—one on the Du river and the other 150 miles south of the Du on the Cavalla river.

Firestone engineers in the same time had constructed over 75 miles of roads and had built and established headquarters on the two plantations, with housing facilities for the resident staffs of 118 Americans. Power plants for the development of electric power, light and refrigeration had been built, as well as hospitals and trade stores for the benefit of the Americans and also to supply the needs of the 15,000 natives who are employed in clearing the jungles and planting rubber trees.

1,500,000 Trees Planted
During the past year, according to Mr. Firestone's first radio report, over 1,500,000 rubber trees have been planted on a total of over 15,000 acres of cleared jungle lands. This is a record in rubber plantation work. It is the largest number of trees set out and acres planted by any single company in the same length of time. And Mr. Firestone stated that the rate of progress in clearing land and planting rubber trees is being constantly increased.

Mr. Firestone reported that the steamship sent over for service had been placed in commission along the Liberian coast and is now linking up the Firestone plantations and the coast towns of Liberia. He expressed the hope that Firestone will soon have its own vessels operating directly between New York and Liberia, making the Atlantic passage in less than two weeks. When this is done it will not only give Firestone an advantage of from two to five weeks in time as compared with other rubber-growing countries, but will also greatly reduce the cost of transportation.

Teach Natives Trades
Great progress in the development of the Firestone trade schools was also reported. Mr. Firestone said that the natives were very anxious to learn under the instruction of the Firestone technical staff. The dark-skinned Liberians are being taught to be carpenters, blacksmiths, plumbers, electricians, automobile mechanics, sanitary en-

gineers, soil experts and foresters. Now that the Liberian, for the first time in the history of the country, have a system of good roads, they are suddenly becoming enthusiastic about motor transportation, and they all want to ride in automobiles, trucks or tractors. As a result, Monrovia, the capital of Liberia, has established a traffic signal to police the traffic on its principal streets.

When the Firestone company went into Liberia, there were no roads in the country, and only one automobile. This was owned by the President of Liberia, who had very little occasion to use it because of the absence of good roads.

When Mr. Firestone arrived at the Du river plantation, he was greeted as the "Great White Chief" by many thousands of Firestone native employees who had erected a great arch of leaves and ferns at the entrance of the property and lined the road on both sides as he drove through eleven miles of the plantation to headquarters.

\$5,000,000 Loan to Liberia

Mr. Harvey S. Firestone, Sr., has successfully arranged a \$5,000,000 loan in America for the Liberian government. This places Liberia on a firm financial basis, and permits the development of roads, schools and public buildings. The 118 Americans comprising the Firestone technical staff are helping to organize the 2,000,000 or more native Liberians and give them remunerative employment which had not been hitherto available in their own country. The natives are proving very adaptable and willing to work in an organized way. This has made possible the clearing and planting of such a large acreage during the past year and has undoubtedly had a very appreciable effect in the recent reduction in the price of crude rubber.

European newspapers have carried many articles deriding Firestone for going into Africa to plant rubber. They claimed the soil was poor for rubber growing and that the natives would not work. The British government now realizes that Firestone's Liberian enterprise is anything but a folly. It is conceded by everybody that Firestone has made the greatest rubber development ever accomplished by any single company in the same length of time. Until the natives were very anxious to learn under the instruction of the Firestone technical staff, the dark-skinned Liberians were being taught to be carpenters, blacksmiths, plumbers, electricians, automobile mechanics, sanitary en-

Post May Assist In Celebration

Legion Will Place New Steel Fence At LaPorte Cemetery Second Sunday in May.

The American Legion post met Thursday evening at the Legion hall and discussed mainly the topic of whether or not the post should cooperate in celebration of the Fourth of July. There will be a celebration at the Kay amusement park and the Legion considered whether or not the organization should assist or plan some features. E. E. Gault, J. M. Pile, R. F. Jacobs and Dr. J. C. Johnson comprise the committee appointed to sound out sentiment of the town. The hall furnishing committee reported. It was decided not to purchase furniture until after the Auxiliary had finished the furnishing the members plan. In regard to placing the new steel fence at LaPorte cemetery, it was decided that the Legion men do this the second Sunday in May. The fence will be furnished by the county commissioners.

Unwritten Contract.

Written by the late Geo. D. Prgkins of the Sioux City Journal many years ago, and reproduced in Sunday's issue of that newspaper: "The contract between the publisher and the people is not written, signed or sealed, but it ought to be none the less binding upon a man of honor. The best capital a newspaper can have is confidence in the integrity of its character. The measure of confidence it has ought to be held sacred by it, and any betrayal of this confidence, no matter what the personal consideration, no matter what the promise of pecuniary or other profit, is an association with total depravity. In connection with this loyalty to an unwritten contract the newspaper should be a newspaper. The most dangerous untruths are half truths. The newspaper should tell the news, as completely and as impartially as it can. Intelligent people do not care as they used to what the alleged opinions of the newspapers are. What they ask of the newspaper is the news, the facts, the evidence. If this is put into their hands they will undertake to supply opinions."

Saving You Money

Yes Sir! Saving money now is money made.

WE can show you how to save money by using paint. Investigate—today.

Very few people now days build a new house without painting it because they know how foolish it is to leave new lumber exposed to the weather.

Many houses need paint this minute. Just nose up close and look at the nail and knot holes and see how the boards are exposed. Stand on the edge of your lot; look at the buildings. Be your own judge. Honest—Do they need paint?

A good painting would add to the looks more in value than the cost. Paint spread now would save many times the cost later on. Our spring stock is here, any color you want. Quality House Paints at \$2.50 per gallon and up.

Chinamel and Valspar varnishes for floors, inside work and furniture. Valspar Brushing Lacquers in all the newest colors. Everything to paint with. Yes Sir! We can show you how to save money and how to do the job. Bring in your paint needs and let us help you.

Graveling North Road Is Resumed

Work on Second Layer of Surfacing for Highway Is Started the Past Week. Hauling of gravel for the highway north of Wayne was resumed last Thursday. The Wayne county sector of the Wayne-Laurel highway was given one coat of one and one-half inches last fall with the exception of a part of a mile near the Oscar Jonson corner nine miles northwest of Wayne. Gravel for this part of a mile not surfaced last fall, is now being placed. Gravel is also being hauled for the second layer of one and one-half inches on this highway. Some of the material for the second coating was laid last week near the two-mile corner north of Wayne. Material is shipped here from the Fremont pit. Some gravel was placed on the highway from Wayne to the corner one mile east last fall. This has been a bad place in the road and the surfacing has helped it. More will probably be placed on this later. Graveling of the Wayne-Altona highway was completed this winter.

Siman Files For Attorney General

Lincoln, Neb., March 14.—With a belated filing, and affidavit as republican candidate for nomination in the Twenty-first senatorial district, State Senator Ralph M. Kryger, Neligh, got in under the wire. The district comprises Antelope, Boone and Wheeler counties. His filing was accepted as legal by Secretary of State Marsh, although it is dated March 12, two days after the limit for filing nominations. Harry E. Siman, Winside, perfected his nomination for attorney general on the republican ticket by filing a receipt for \$5 paid to the county treasurer of Wayne county, March 10. Someone in Lancaster county nominated Mr. Siman by petition of 25 voters and had paid the filing fee to the treasurer of Lancaster county, instead of presenting a receipt from the county treasurer of the county where Siman resides, as required by law.

Gloves Used At Boston Tea Party

Neligh, Neb., March 17.—M. L. Holt of this city has in his possession a number of relics of Revolutionary and Civil war days. One of these is a pair of gloves that belonged to a man who helped throw tea overboard in the Boston harbor. These gloves, given him many years ago by a friend, were knitted from white yarn, though now they are moth-eaten and yellow with age. Around the wrist they are trimmed with a narrow fringe of yarn.

Another interesting relic in this group is an edition of the New York Herald printed April 15, 1865, the day following President Lincoln's assassination by Wilkes Booth. The paper is a six-column folio with queerly arranged headlines and small type, which is rather hard to read. Many parts of the articles seem queerly written, for example one sentence which the modernist would read "The president is still unconscious," is stated thus: "The president is still perfectly senseless." This paper sold for 4 cents per copy in 1865. A copy of the Vicksburg daily paper printed the day before the surrender of Vicksburg to General Grant July 4, 1863, is another of these interesting, historical relics. Great value is placed on these and similar articles by the owner by reason of the sentiment attached thereto.

made in a divorce suit filed by Phares. The petition said that the "custody of the child was refused him and he was compelled to go to Nebraska and get her." Phares returned here last night with his daughter.

One-fourth of the deposits in the bank were paid to the depositors at the time the bank was taken over by the state commission.
