Now Mayor Folda is wondering. The incident reminds the writer of an old story. It became necessary for some man to escort a particularly undesirable spinster to a social function. After much delay it simmered down to two men and they tossed a coin. When the escort arrived somewhat belatedly at the home of the spinster he apologized, explaining that he and Jack had tossed to see which one should escort her to the party.

"And you won," said the spinster with a girlish giggle.

"No, darn it; I lost," was the reply.

Mayor Folda will wait to see whether he won or lost.

The late Gen. John L. Webster of Omaha was a member of the 1875 constitutional convention. For many years he was the attorney for several of the big public utility corporations, including the Omaha Street Railway Co., the old Omaha Water Co., the Old Omaha Gas Co., and others. He was attorney for the Omaha Metropolitan Utilities District. He was known to have drawn immense fees as a lawyer. The filing of his will recently disclosed his estate to be worth less than \$30,000.

The writer recently came into

the possession of four copies of "The Central Nebraskan," published in Hastings. They bear dates in April, 1879, and contain full accounts of the trials of I. P. Olive, Frederick Fischer and six others, charged with the murder of Luther Mitchell and Ami W. Kitchem in Custer county on December 19, 1878. Mitchell and Kitchem were lynched, first hanged and then burned. The old papers will be carefully bound and preserved in the Hastings Museum.

Olive and Fischer were convicted and sentenced to life imprisonment. But the supreme court held that the trial should have been in Custer county instead of Adams county and ordered a new trial. But the Custer county grand jury failed to act, and the prisoners, out on bond pending appeal, were not again tried. Later Olive was fatally shot in a quarrel over a poker game in Kansas. The trial, held before Judge Gaslin, brought to public attention two young lawyers who later became prominent in Nebraska politics. John M. Thurston of Omaha assisted General Dilworth in the prosecution, and Thurston later became general solicitor of the Union Pacific railroad and still later United States senator. James Laird of Juniata assisted in Olive's defense. Later he represented the old Second district in congress for several terms.

THE MODERN MOTOR OIL

**SAFEGUARDS HOT MOTORS**

Complete removal of wax and tar from the new Polarine prevents this modern motor oil from running dangerously thin when heavy load and high speed cause the motor to heat.

Mud, sand and hard hills—plowing, disk-ing, harrowing—low speeds in low gear for miles heat any type of motor. That's when bearings burn out and wear is most severe—unless your motor oil holds its body.

The new Polarine is not surpassed by any oil, at any price, from any kind of crude in resistance to thinning by heat. It also deposits less than half as much carbon in the motor as any old process oil.

A premium quality oil by every test and specification, the new Polarine sets new lubrication standards. Sold at no advance in price.

# Marvelous Work Of New Konjola Medicine Told

## Felber's Pharmacy To Introduce Advanced Remedy For First Time In Wayne.

G. H. MOSBY

If you were told that one single medicine put hundreds of men and women back to work in Chicago, Philadelphia and other large cities where they had been idle for months with health troubles, it would sound impossible, wouldn't it? And that countless people were completely relieved of rheumatism and neuritis, and that they were able to walk again, without cane or crutches, and that this same medicine restored health to men and women who had suffered with stomach and kidney troubles for years, and that complete relief had come in cases of misery where health resorts, expensive treatments and medicine upon medicine had failed indeed, it seems impossible! Yet it is all true, and the medicine that has done all these things is the new Konjola which is being introduced, starting today, at the Felber Pharmacy, this city.

Whenever introduced, this Konjola is vastly different and more effective in thousands of cases of ill-health than any previously known medicine. It is a remarkable liquid compound for the following well-known troubles:

**RHEUMATISM:** Especially severe cases, where pains are intense, muscles swollen, joints stiff and rigid. In the milder cases of this disease, Konjola relieves almost at once, and this medicine brings the same results to the neuritic victims that it does for the rheumatic sufferers.

**STOMACH, LIVER, KIDNEYS AND BOWEL TROUBLES:** Nearly all forms of misery that arise from these unhealthy organs have been so quickly relieved by Konjola that men and women sufferers everywhere were surprised. It is the action of this medicine on the organs of the inner-system that removes toxic poisons from the system and brings quick relief in so many cases. The secret of this Konjola is the way it acts on the important functional organs of the body, namely: the stomach, liver, kidneys and bowels. So many diseases and long standing disorders of these organs were so completely conquered and entirely banished by this new compound that thousands of people in larger cities were able to give up taking medicine for some time to come.

After the great accomplishments and wonderful work of Konjola in other sections, it is declared that this medicine is what hundreds of sufferers in Wayne and vicinity have long needed to actually reach their cases, and preparations are being made to introduce Konjola for the first time at the Felber Pharmacy, where this medicine will be sold and explained to the public daily.

# EAT IT NOW

THE TIME to eat a popover is when it has just popped over. When it has reached its climax, and is puffed and crisp. Listen to it crackle when you break it apart for butter.

And the time to eat vegetables is when they've just been picked. They will never be so fresh again. The peas will never be so firm, knuckled tight in their pods... nor the corn so glistening and sweet under its silk. Shell the peas, husk the corn, hustle them into the pot. Have all your vegetables at their climax moment—with a garden of your own.

Ferry's purchased seeds are eager to burst into growing; and are fresh at the "store around the corner." They are purebred—all their name says they are. Their parent-plants and grand-parents before them produced vegetables and flowers that approached perfection. What their parents were, these seeds will become. Use Ferry's Seed Annual to help you in selecting; and to know of much paper, and new ways to cook vegetables. For the Annual, write to D. M. Ferry & Co., Detroit, Michigan.

Truly, this spring's creations are exquisite—how the designer and the manufacturer have been able to produce such artistry in these inexpensive dresses is still a mystery. Early it was predicted that price ranges of gresses would be raised but in spite of more material and notwithstanding the increase in making, we still are able to offer clever versions of the new modes at these surprisingly low price ranges.

Longer skirts—more fullness—swathed hip lines adapt well to large models.

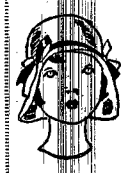

Already we are in receipt of a number of large sized dresses in plain flat crepes and in printed crepes. After modeling them it is our opinion that the problem of securing suitable styles in the large sizes will not be so difficult as in past seasons. More opportunities to vary the lines in larger sizes will be possible.
