## WORK ON NEW TELEPHONE BUILDIN IN WAYNE IS STARTED

VORK of constructing Wayne's new telephone building is now under The contract was awarded to Frank H. Thielman of Wayne. The new building, H. Thielman of Wayne. The new building, which will be a one-story brick structure, will house the business office, a new local and long distance switchboard and associ-ated central office equipment. There also will be an attached garage for the com-pany's work truck and for the storage of telephone envalue. hone supplies.

Undertaking the telephone improve-ment program at this time will provide work for a number of artisans and other rkmen in Wavne.

The new switchboard will contain improvements to facilitate the handling of calls. It is especially adapted to meet telephone service requirements of the people of Wayne.

Considerable work also will be performed on the telephone lines outside of the central office. The poles and cable on Main Street south of First will be removed and will be replaced by buried cable over another route, and other changes will be made during the rebuilding program.

伊爾 计计算机

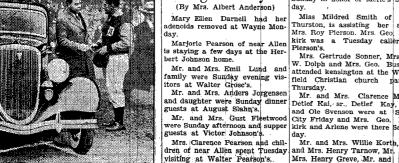

The construction of a new telephone building in Wayne has been considered for some time. During the past 20 years the number of telephones in Wayne grew steadily until in 1930 there were 1,137. steadily until in 1930 there were 1, by: This growth taxed the capacity of existing central office equipment, and had it not been for the temporary slowing up in the demand for service during the general business recession, it would have been necessary to add facilities three years ago.

Grey

Telephone engineers know from exp rience that when it becomes necessary to replacements or additions to tele-facilitics, consideration must be given to a long-time view of telephone requirements in order to be able to adefunction of the second best be assured by making repl and additions to existing telepho and housing the new switchboard and other central office equipment in a new building designed especially for that purpose.

Motorists who got the first G-3's put outmonths before the public announcement-say, "You're too modest!" Many of them report 50% to 100% more non-skid mileage. Why, then, do

we insist on only 43%? Well, 43% is a definite, test-car-proved figure. Very likely it is low for normal use-because the tests which established the 43% average were gruelling : cars speeding up to 50, jamming on brakes, mile after mile, day and night. Very likely most motorists will get more than 43% more non-skid mileage. But we'll string along with 43%-because it's plenty to deliver at no extra cost. Come see the tire that's the talk of the nation.
