The Same Kind, Tender Care After That You Gave Before. THE BECKENHAUER SERVICE

What is the "Low-price Field"? YOU hear a lot about "the low-price field" these days. A good many cars claim to be in it. So whenever the low-price field is mentioned, remember: Until Ford came, no average American could own a car. Today all Ford prices are still low — with the prices of the 60-horsepower Ford V-8 \$30 to \$60 lower than those of any other car of comparable size. But with Ford, "low price" doesn't merely mean low figures on the price tag. It means much more than that. It means low prices and low costs all the car's long life. Low prices for service — for parts — and, above all, for operation. Both Ford V-8 engine sizes are economical to operate. The 85 horsepower gives greater gasoline mileage this year than ever, and the "60" delivers the highest mileage in Ford history. FOR LICE ON LIVESTOCK

DURING winter and spring is when lice attack horses, cattle, calves, and colts. That's because the lice is long and furnishes a fine habitat for these parasites.

But the old saying is that "It is an ill wind that blows no good."

By applying Dr. Hess Powdered Lice Killer and rubbing it into the skin, this deadly pest becomes the thing of Mr. Louse because it holds the fumes and the fumes are what kill the lice.

Dr. Hess Powdered Lice Killer is now better than ever, with more kill, and packaged to suit the stockman. A large 6-oz. package for \$1.00—we have it.

HERE IS WHY WE CAN MAKE THIS CHALLENGE

More mileage is an assured fact with D-X or D-X Ethyl, because, as an exclusive feature, modern motor fuels contain a special high resisting lubricant which provides superior protection to upper cylinder parts not adequately lubricated by crankcase oil. (See cross-section diagram of motor below.) This extra cylinder lubrication makes engine run smoother and cooler, decreases and increases mileage. Diamond 760—the 100% petroleum lubricant—has been tested and found to be the most effective.

Will Introduce New, Unique Foot Comfort Service Dr. Scholl's Scientific Shoes To Be Demonstrated May 21 At Larson's Store.

They say that truth is stranger than fiction and that old adage may be aptly applied to this story. To build shoes that would satisfy the most discriminating taste and at the same time fit comfortably has been the despair of shoe manufacturers.

Years ago Dr. Scholl, the well-known foot authority, began to work on a line of shoes that would completely solve this knoting problem. When he gave to the foot-suffering public his famous line of scientific shoes, his efforts were crowned with success.

R. L. Larson, who has for years been headquaters for Dr. Scholl's Foot Comfort Appliances and Remedies, has arranged with Dr. Scholl to demonstrate his scientific shoes at the Larson store Friday, May 21. Dr. Scholl's foot and shoe experts will bring with them advanced showings of the complete line of Dr. Scholl's new style shoes. There will be 600 fittings to meet the most fastidious tastes and all types of feet, in sizes for men from 6 to 14; for women from 3 to 11; in widths from AAAA to EEE.

Unless one has made an intensive study of the feet, he would never realize how many different kinds of feet there are. Here is a woman who has a short, stubby foot; the next is a man with a long slim foot with a narrow heel; the next customer has a high arch and his friend, weak, broken-down arches. Then there are legends who have foot troubles: such as corns, callouses, bunions, crooked, over-lapping toes and those who continually run their heels over. In short, many people will tell you "I have the hardest foot in the world to fit." It is this class, Mr. Larson says, who should be vitally interested in Dr. Scholl's scientific shoes.
