

Towns of Disease-Bearing Filth, Rodents and Insects - Organized Sports - Weather Variety in Nebraska - Getting Along with Russia.

The town of Coleridge is the latest to make a mass attack with DDT on filth centers and rodent and insect-infested quarters as a health preservative.

A united movement such as Coleridge put into operation last Friday brings bigger results sooner. Individuals have no doubt done well in ridding Wayne of rubbish and otherwise cleaning up, but we think it would be the height of wisdom for authorities to make an organized and determined move on filth strongholds.

Way to Solve Problem. The way to solve the delinquency problem among youth is not to sidle by and deplore it, but to do something about it.

Training Proves Value to Youths

Prof. Bernard Burke Speaks To Kiwanians in Wayne Monday Noon

Vocational agriculture is serving a most worthwhile need in training high school boys for efficiency on the farm, stated Prof. Bernard Burke in addressing Kiwanians Monday.

The Smith-Hughes act of 1917 provided for agriculture courses with the government paying some of the expenses.

The work, offered in three or four years, is practical, the speaker noted. The agriculture course includes the following: First year, animal husbandry with emphasis on hogs, sheep, beef, dairying, poultry, feeding and common diseases; second year, crops and soils with emphasis on wheat, corn, weeds, small grain, legumes, garden fruits, soil conservation, pasture; third year, farm management with emphasis on supervision, farm accounts, buying and selling, cooperation, farm laws and taxation.

Other work in the course deals with farm mechanics and extra-curricular work in which youths learn cooperation, leadership, etc. Shop begins with wood work, wood finishing, farm drawing, tool sharpening, rope work, forge work and handle fitting.

The fourth year of the course is devoted to production projects, farm betterment and skill in jobs. Prof. Burke expects to develop the projects as he has already offered assistance. EPA are now making and selling concrete troughs with which to buy sows.

44 ways To get "Something for Nothing"

The railroads have received 44 "rules" demands from the leaders of the operating unions... More Money For Less Work But what kind of rules are being asked for? Twenty-eight of them would compel railroads to pay more money for the same, or less work; 7 would require additional and unnecessary men to do the same work; the rest would bring about changes in operating practices at increased cost. For Instance: The Union leaders demand additional train and engine crews on Diesel-powered trains—one full crew for every power unit in the locomotive. A freight train hauled by a 4-unit Diesel would have to carry 4 engineers, 4 firemen, 4 conductors, and at least 8 brakemen, or a total of 20 men instead of 5. "Made Work"—Sheer Waste The Union leaders demand that full-length freight trains be cut to about half their length, even though such trains are most efficient for low-cost service to you. This rule would call for twice as many locomotives, would double the number of trains, and make accidents more likely. Additional equipment, yards, and other facilities required to take care of these short trains would cost hundreds of millions. What the Union leaders really want is to make more jobs. The Union leaders demand that when a crew in one class of service perform incidental service of another class, they will be paid not less than a day's pay for each class, even though all service is performed as a part of the same day's

ductors and trainmen be reduced from 150 to 100 miles, which would have the effect of increasing their pay 60%. Such a run often takes only two or three hours! You Can't Afford This Waste Demands like these are against the interests of the whole American people, who depend on railroad service for nearly everything they eat, wear and use. These rules would cost a BILLION DOLLARS annually—a gigantic waste which neither the railroads nor the country can afford. Railroad workers are good citizens and good employees, with pride in their calling. Their record during the war was outstanding. We do not believe they fully understand the "featherbed" rules which the Union leaders are demanding. We do not believe they understand the harmful results which these rules would have to the railroad industry, to the millions of men and women dependent on railroads for their livelihood, and to the shipping and consuming public. The great strength of America is in production—an honest day's work for an honest day's pay. For only through greater production can we hope to stop the steady upward surge of living costs. Surely, if ever there was a time in our history when we needed to work, not waste, this is it.
