## Wayne County Feeders Elect Precinct Directors

Senator Hugh Butler was guest speaker for the evening. A summary of his speech was reported in The Herald last week.

Don Cunningham, Sioux City, acted as master of ceremonies.

The meeting got under way around 7 p.m. with dinner featuring 4-H roast beef served by the women of St. Paul's Lutheran church in Wayne.

The Rev. O. B. Pypert of Wayne gave the invocation and Marvin Dunklau, county feeders association president, welcomed the group.

Special entertainment included songs by the men's quartet from Wayne State college and sleight of hand tricks by John A. Lewis.

Four men divided a \$21.80 cash prize for guessing a year ago the correct high cattle price on the Sioux City market during the year.

The men, who received \$5.45 each, were: Irwin Strudthoff, Wisner; Oscar Ramsey, Woffo; Val Demma, Wayne; and William Hugelman, Wakefield.

Thirteen feeders association directors were named in the balloting Wednesday night. They will meet in January and elect officers and decide on the three tie votes.

Directors elected for the county precincts are: Brenda, Martin Willers; Chapin, James Troutman; Hancock, Hans Blocker; Hopkins, Ed Winters; Hunter, Herb Perry; Leslie, William Longe; Logan, Marvin Mortenson; Plum Creek, Val Damme and Robert Bergt; Sherman, George Owens; Strahan, Marvin Dunklau; Wilbur, Ted Young and John Hanson; Deer Creek, Robert Waller and Kenneth Eddler; Garfield, Clarence Schroeder.

## \$143,607 Higher Than Last Year's

For the first time in history residents of Wayne county will pay over \$1 million in personal, real-estate and motor vehicle taxes.

County Treasurer Jean Boyd announced this week that taxes totaling \$1,039,573.88 are scheduled to be collected for 1951.

Total property taxes last year were \$895,966.34 or \$143,607.34 less than this year.

Taxes for 1951 are divided into \$450,800.80 for personal and motor vehicle taxes and \$588,773.08 for real estate taxes.

Last year \$23,582.80 were collected for personal and motor vehicle taxes. \$572,383.54 in taxes were paid on real estate.

Real estate taxes are due the first of January, 1952. Personal property and motor vehicle taxes are due now.

A new system of bookkeeping is being used at the Treasurer's office this year. The taxes are now consolidated and distributed on a percentage basis instead of the complete breakdown used in the past. Based on \$34,688.970.

Wayne county's tax levies for 1951 were based on an evaluation of \$31,688,970.

## Babson's Business Predictions for '52

### 'Stalin May Delay Third World War'

Roger W. Babson, a pioneer in the field of business and financial statistics, enjoys an unusual record of accuracy in his annual forecasts for 1951 was 86% accurate.

The Presidential election Nov. 4, 1952, I comment further upon this in paragraph 18.

3. The administration and its economic advisors appear firmly convinced that radical inflation is about to break out next year. But the "key" trusters' are overlooking the fact that the boom is already old and that it was creating badly when the Korean war broke out. The date of the slide has only moved ahead.

4. Farm income will continue high in 1952.

5. If civilian production declines too much, the public may cry. "This is a government-made slump; let's change the administration."

6. If in 1952 it becomes evident that business is declining too much as a result of government curbs, the planners at Washington will rush their patient into an oxygen tent.

7. Many labor groups will be successful in getting another round of wage increases in 1952. Although there may be more important strikes in the first part of 1952, there should be a decline in work stoppages in the last half year.

8. Tightness in the labor supply will continue through 1952, particularly of highly-skilled workers. Wages of such workers will be advanced voluntarily in order to hold them.

9. The Taft-Hartley law will not be repealed during 1952 but may be amended. The administrators of the law will continue to wink at some of its clauses.

10. Wholesale prices of many commodities will suffer a mild decline in 1952 when compared with

the price level for December 31, 1951. In some lines the drop may be quite steep from the high levels of 1951. Retail prices for 1952 will hold steady.

11. Commodity speculation for a rise will not pay in 1952. Furthermore, our expanding stockpiles of strategic materials present a real price threat in the event of a peace scare. Such stockpiles could then act strongly as a depressant on prices. Wise merchants will operate with only a conservative inventory.

12. The cost of living will remain high during 1952. This prediction recognizes that living costs next year may continue above the lower levels that existed during the first half of the year now closing. I also predict further rises in freight and passenger rates.

13. Congress will not take any action during 1952 to legally bolster so-called Fair Trade price maintenance. It's too risky politically when consumers are complaining about the cost of living. But some manufacturers will tighten up on distributors, eliminating those who won't sign Fair Trade contracts.

14. Barring crop failures, the total supply of food available should be larger in 1952 than for 1951, since the government will raise its acreage quotas as part of its anti-inflation policy. The weather is extremely favorable, the government will be asked to give away and an inch fell on Thursday and Friday. Another trace was recorded Monday.

15. With prospects good for a rising supply of feed grains, most meat should be more plentiful next year than in 1951. Prices for beef, however, will be held up by high wages and military needs.

Temperature readings for the week's period dipped below zero almost every night and the long-range forecast calls for more of the same.

## Weather Continues to Stay Cold

The layer of snow covering the Wayne area seems destined to stay with us a while longer as the mercury continues to stay near the bottom of the thermometer.

Not much additional snow fell during the week according to Archie Wert's weather records. A trace was reported on Dec. 19 and an inch fell on Thursday and Friday. Another trace was recorded Monday.

Temperature readings for the week's period dipped below zero almost every night and the long-range forecast calls for more of the same.

## Salvation Army Drive Scheduled

Announcement was made today that the Salvation Army service unit committee, of which L. W. McNatt is chairman and Adon Jeffrey is treasurer, will conduct a campaign to raise funds for local and regional welfare needs. Special letters will be mailed to local citizens requesting contributions to be mailed to Mr. Jeffrey.

This is the annual appeal and will get under way within a short time.

On completion of the campaign, a portion of the money raised will be left with the local committee for a program of health, welfare and cultural activities. There will be no restrictions on the use of the funds, and the local committee can render service at the point of need, to the limit of their funds.

Mr. McNatt urges everyone to give liberally when the Salvation Army drive is conducted here.

# Babson Sees Defense Boom, Good Farm Income for 1952

(Continued from Page One)

**Local Taxes Will Be Higher**  
16. The burden of Federal taxes, both corporate and personal, will not be increased again during 1952 above the advance late in 1951. State and municipal taxes, however, will go higher again.

17. The above forecast is based on the assumption that unless Stalin starts World War III during the early months of 1952, he has made up his mind to forget World War III until the United States and our allies again "go to sleep," which will be some years hence. We give this as a definite prediction as to the outlook for World War III.

18. There are three ways of preventing inflation: (1) increased production; (2) decreased spending; and (3) an increased tax, in increased taxes. I forecast that the current exploitation and accompanying fear of inflation are not yet at their peaks for this business cycle.

19. States and municipalities will again be under pressure to find adequate sources of revenue. Further increases in sales taxes by States and municipalities can be looked for next year.

20. There will be no increase in "luxury taxes" during 1952.

**Domestic Trade Uncertain**  
21. Credit curbs will continue to hold down the demand for automobiles and certain household equipment. Completions of fewer dwellings will also act as a damper on furniture sales.

22. Falling demand for hard goods should stimulate the public's spending for food and lower-priced soft goods.

23. The above trend forecast will mean a decline in department store volume. I predict a rise in the sales of variety and drug chains.

**Foreign Trade Outlook**

24. I believe that armament is to become a new and permanent industry, at least for many years to come. Airplanes, tanks, artillery, runs, and munitions will constantly be replaced as they become obsolete. This new activity will operate much as the automobile industry has operated. I forecast that this will be more and more recognized throughout 1952.

25. Barring new war developments, I look for continued shrinkage in our civilian exports during 1952. Imports, however, may rise further. Exports to South America will be cut. Total foreign trade should not be changed much, but the exports will be on the short end of this business with the importers gaining.

26. Except for war supplies, it will become more difficult to convince Congress that additional heavy credits should be granted abroad.

27. Many domestic manufacturers will feel increasing competition from foreign merchandise. A cry for increased tariff protection will be heard; but no radical tariff legislation will result.

**More Deficit Financing**

28. The first quarter of 1952 may actually see a budget surplus as a result of high National Income and increased taxation. But, a Federal deficit will surely arise during the balance of the year.

29. Government loans will gradually increase during 1952 and there will be some strengthening of basic interest rates.

30. Government bonds will continue to be held tightly between the floor of Federal Reserve support purchases and the ceiling of Federal Reserve anti-

**Inflation sales. Under such conditions, price changes should be negligible during 1952.**

31. While Canada and South Africa have permitted "free markets" or revaluation of gold, because of increases in costs of production, the administration is still opposed. The gold stock of the United States is, however, likely to be revalued upward when the nation, in the opinion of government economists, "need another shot of inflation." This will not be in 1952.

**Stock Market and Bond Outlook**

32. Until the danger of war is past, wise people who can easily do so will move out of large bomb-vulnerable cities and avoid having investments in such areas.

33. Sometimes during 1952 stocks will sell lower than current quotations. This applies especially to oils and certain "blue chips."

34. Stocks now in the best position for 1952 should be many of those that have not been popular as inflation hedges in the past months. I like good chain variety store stocks, certain movie stocks and possibly the air-transportation issues.

35. Investment trust funds, pension funds, and insurance companies may provide an excellent backlog of demand for sound income stocks where good values can be demonstrated.

36. Successful investors of 1952 will be those who have the PATIENCE to follow a carefully planned investment program. Such a program will emphasize diversification—not only by company and industry, but also by quality and cash.

37. Highest-grade taxable corporate bonds should hold in a narrow price range during 1952, but I see no reason for individual investors to buy them unless they are CONVERTIBLES.

38. With present high income taxes, tax-exempt bonds should continue to be a popular investment, with some part of their bond funds maturing each year. As there usually is not a good market for tax-exempts when an estate is liquidated, it is wise to hold only such bonds as will mature near the time of one's probable death.

**Real Estate Activity**

39. Much of the recent real estate boom was the result of easy credit—almost nothing down and small payments for years hence. Under the recent legislation there will be fewer small homes built in 1952, but some credit restrictions will be modified. Mortgage money should soon be had on more liberal terms.

40. Non-essential commercial building will be hit in 1952—but, barring World War III, controls will be lessened rather than increased.

41. The decline in new building will continue to throw a wet blanket over speculation in vacant suburban lots during 1952.

42. The scare caused by the Korean-China war and fears of an early outbreak in other sections will adversely affect the demand for big city real estate. This fear, however, is declining and many who had put their city properties up for sale are withdrawing them.

43. Small sustenance farms should hold up well in price as these continue to be valuable inflation hedges. Demand for large commercial farms, however, should weaken as the year progresses.

44. Any swing back toward rent control will act as a further damper on new apartment house building. There is as yet no incentive to build homes for rental income, although rent control is gradually lessening.

45. Tighter credit controls will make it more difficult to improve older residential properties. Hence, the prices for these should weaken even though these are now the best buys.

46. Volume of money and credit in circulation will continue to increase to about the peak of a few years back. The big rise has been in credit. Much of the credit increase is "secured" by commodity and property values that can shrink greatly when defense spending ends.

**Defense, Critics and Politics**

47. Those who can do so should attempt to get defense orders if needed to hold up production volumes and reduce overhead. Not too much profit from such war business should be expected. These contracts will be subject to tight-fisted re-negotiations.

48. The political outlook for 1952 will be completely dominated by jockeying for position in the Presidential race for 1952. Barring World War III, Congress will pass very little new legislation except some sops to labor and the veterans.

49. Congress will still be dominated by a conservative coalition of Northern Republicans and Southern Democrats. This North-South coalition will still be able to curb onslaughts by New Dealers.

50. Democrats, as well as Republicans, in Congress are making every effort to avoid antagonizing farmers. Again, in 1952—as in 1948—the farmers will hold the balance of power in the Presidential and many Congressional elections. Mid-west states can make or break the Presidential candidates. The labor vote is overrated.
