feed into a pound of beef.

In recent months, four public feeding demonstrations-were conducted at sales yards in Indianapolisi, Ind., Norfolk, Nebr., Louisville, Ky., and Evanaville, figd. In each test, twenty head of steers were sorted evenly into two lots. All cattle were fed the same basic ration with just one difference: one lot at each location was fed a single-ware protein supplement, while the other lot in the split test re-

ceived Purina Steer Fatena with stilbestrol. Length of fseeding varied between 100 and 140 days... for an average of 125½ days. The gap between market price and feed cost was \$20.33 wider per steer in the Steer Fatena groups (average), than for the cattle fed single-source protein. In addition, the Steer Fatena cattle put-on-each pound of gain with an average of only 7.46 lbs. less feed than the U. S. average! (See chart above.)

only time can confirm the gift of greatness.

Artist, statesman, writer, craftsman—each must await the years for the maturity of his talent and for the verdict of his judges.

And, without question, the mission and the accomplishment have been one and the same.

The goodness of Cadillac has, in fact, been so apparent over that lengthy span that the Cadillac name stands today as an accepted synonym for quality wherever highways exist.

The pretenders have come-and they have gone. For time is an exacting taskmaster—and only the principles that have created the great Cadillac car and only the devotion that has given it being have been equal to the challenge.

Never has this fact been more deeply etched in the public consciousness than it is during the present automotive year.

If you have yet to take the wheel of a 1957 Cadillac, you should hesitate no larger to visit

your authorized Cadillac dealer. Waiting for you in his showroom is proof beyond doubt that Cadillac is—in fact as in reputation—the Standard of the World!
