Your Place in the Stars
 by Tom McDermott

No doubt many readers are familiar with the interesting little magazine entitled Fate, which has been published continuously for the last 25 years. The magazine's articles on the after-life, ESP, reincarnation, and about every subject that can be classified as "parapsychology." Incidentally, Fate can be checked out at the Wayne public library.

In a recent issue of the magazine there was a full page advertisement telling of seminars in parapsychology and hypnosis to be conducted at Eastern Nebraska Christian College at Valley. Realizing that the college was bound to be different from most others (in light of the fact that it offers such classes as ESP, hypnosis, psychic phenomena, etc.), I wrote to the president, Dr. E. Arthur Winkler. He sent me a very cordial letter and a copy of the school's catalog. Although I don't necessarily endorse the college, I'm sure that many will be interested in the unusual school.

The college is non-denominational, offers associate, bachelor and even master's degrees in the following subjects: Biblical studies, religion, theology, psychology, counseling, hypnosis, guidance, speech, pastoral ministry, art, general education, sociology, business administration and other areas. It also provides "preparation for the Christian ministry" by providing ministerial certificates. Why does Eastern Nebraska Christian College neglect to require some of the fundamental courses, such as English, literature and history, that are required by other colleges, asks the college's own catalog. The answer to this question is, according to the catalog, that high schools have already taught students the basics.

Housed in a large 50-room building in Valley (15 miles north of Omaha), the school is a resident college with 30 sleeping rooms. However, it is primarily a correspondence school. Dr. Winkler told me that recently all home-study courses are tuition-free; with donations being asked but not required. Examinations (by mail) are given in the home of students, who place themselves "upon their honor" to not cheat.

Readers will probably be interested in the different courses being offered. A few of the different ones. Psychology Department - The Power of Suggestion, The Unconscious Mind, Overcoming Worry, Living Successfully, Success Through Thought, Basic Hypnosis, Introduction to Self-Hypnosis. General courses of "Interest and personal help" - Life After Death, Reincarnation, Extra Sensory Perception and I, A Study of Psychic Phenomena in America, Case Studies of ESP, Study of Psychic Power, Study of Experiences in Telepathy, etc. Remember, most of these courses can be taken through the mail, tuition-free. Why not write for the school's catalog, just for fun?

Dr. Winkler is also president of the Psychic Phenomena Research Foundation "for study and research on hypnosis and reincarnation."

How can the college support itself if most classes can be offered through the mail on a tuition-free basis? Dr. Winkler tells me that the college has on its board a "millionaire" who "is in the process of setting up a Foundation to provide our college with a continuing income." But how about those seminars about parapsychology that I said were advertised?

The president writes: "We have found that a great number of people from all over the country are quite interested in parapsychology. In the four seminars we conducted in 1970, we had students from about 20 different states. At the present time, we have students enrolled from 42 different states and several from Canada."

Regardless of your opinion of Eastern Nebraska Christian College, you must agree that it's highly unusual, especially for our conservative state!

Sometime soon you're going to have to talk to your teenagers about drugs. The sooner the better. We hope this page gives you something to start talking about. Because we want you to get to your kids. Before someone else does.

THE OPIATES

When most people refer to "narcotics" this group of drugs is what they are talking about. Opiates are used medically as pain killers. On the street they cause pain for the user and society in general.

Opium
a white powder from the unripe seeds of the poppy plant. Opium can be eaten, but it is usually smoked in an opium pipe.

Morphine
is extracted from opium. It is one of the strongest medically used pain killers, and is strongly addictive.

Heroin
this strongly addictive drug is prepared from morphine. Outlawed even from medical use, heroin is the most commonly used drug among addicts. It can be sniffed, injected under the skin, or into a vein. Street slang for heroin includes "scag", "smack", "H", or "junk".

"On the Nod"
or nodding. The state produced by opiates. Like being suspended on the edge of sleep.

Mainline
or "to shoot up" injecting a drug into a vein.

"A Hit"
street slang for an injection of drugs.

Works
the apparatus for injecting a drug. May include a needle, and a bottle-cap or spoon for dissolving the powdered drug.

A Fix
one injection of opiates, usually heroin.

Junk
heroin, so named because it is never pure as sold on the street.

Junkie
an opiate addict.

Skin Popping
to inject a drug under the skin.

A Bag
packet of drugs, or a single dose of an opiate. Amount of the drug in the bag is denoted by price, a nickel bag (\$5), a dime bag (\$10).

"Cold Turkey"
describes the withdrawal that occurs after repeated opiate use. The addict can become irritable, fidgety, perspiration increases, there is a lack of appetite. The main problem in discontinuing opiate use is not getting off the drug, it's staying off.

Track

scars on the skin left from the repeated injection of opiates.

Overdose
cause of over 200 teenage deaths in New York City last year. Death is caused because the part of the brain that controls breathing becomes paralyzed.

Addiction
physical dependence on a drug, so that when the drug is taken repeatedly, and stopped suddenly, physical withdrawal occurs.

THE STIMULANTS
These drugs stimulate the system, or make a person more lively. While they are not physically addictive like the opiates, they produce a psychological dependence or craving.

Amphetamines
these stimulants are taken in tablet or capsule form, or injected into the blood stream. Among the widely used amphetamines are:
Deserdrine - or "dex" or "dexies"
Benzedrine - or "bennies"
Methedrine - or "speed"
or "crystal meth"
Biphetamine - or "footballs"

Speed Freak
person who repeatedly takes amphetamines or "speed", usually intravenously.

Mental Effects of "Speed"
amphetamines produce a decreased sense of fatigue, increased confidence, talkativeness, restlessness, and an increased feeling of alertness. As dosage increases amphetamines can produce irritability, distrust of people, hallucinations, and amphetamine psychosis.

Amphetamine Psychosis
a serious mental illness caused by overdoses or continued use of amphetamines. The person loses contact with reality, is convinced that others are out to harm him. The most frightening part of this psychosis sometimes continues long after person has stopped taking the drug.

Rush
the brief heightened state of exhilaration at the beginning of a high.

Crashing
withdrawal from amphetamines, the swift descent from an amphetamine high to severe lows of depression.

Cocaine
another kind of stimulant, derived from cocoa leaves. It is sniffed as a white powder, or liquefied and injected into a vein. It produces a fast and powerful feeling of elation. Cocaine does not produce physical dependence (addiction), but does produce a strong psychological craving.

Coke
street slang for cocaine.

PSYCHEDELICS

The medical classification of all mind altering substances. "Psychedelics" change a person's perception of his surroundings.

Hallucinogens
Those psychedelics which cause hallucinations.

LSD

probably the most powerful psychedelic. Reactions to LSD are extremely unpredictable. Distortions in time and space. Brighter colors. Vivid sounds. Feelings of strangeness. A sense of beauty in common objects. Sometimes fear and panic. Sometimes even psychosis.

Flashback
a user can be thrown back into the LSD experience months after the original use of the drug. Other possible risks of LSD, which are being thoroughly researched, include brain damage and chromosome breakage.

Acid
a slang term for LSD. A frequent LSD user is an "acid head".

Drop
to take any drug orally. LSD is usually dissolved in water, and may be placed on a sugar cube. The term is to "drop acid".

DMT
a powerful psychedelic prepared in the laboratory as a powder or liquid. It is usually injected into the vein or smoked along with marijuana or in cigarettes.

Psilocybin
this psychedelic comes from a mushroom. It is less potent than LSD and takes a larger dose to get the effect.

Peyote
from the peyote cactus, causes pronounced visual effects. It is used in a religious ritual by some Southwestern U.S. and Mexican Indians and its use in these rituals is legal.

Mescaline
"mesc" is the common name for this drug which also comes from the peyote cactus. Stronger than peyote itself, mescaline also causes vivid visual impressions.

DOM
called STP by users. The effects of STP can last for two or three days.

Marihuana
the crushed and chopped leaves and flowers from the hemp plant. Sometimes smoked in cigarette form. Sometimes smoked in pipes. Reactions can be a giddy feeling like drunkenness; changes in perception and mood; feelings of well-being or fear; and possibly hallucinations. Slang terms for marijuana are "grass" or "pot".

Joint
a marijuana cigarette.

Roach
the butt end of a joint.

Stoned
describes the intoxicating effect of marijuana, or really any drug, or alcohol.

Hashish
called "hash". Also prepared from the flowering tops of the hemp plant. Hashish is smoked in a pipe or taken orally, and is more powerful than marijuana.

THC

tetrahydrocannabinol. Purified extract of the resin of the hemp plant. Also made in the laboratory. It is thought to be the substance in marihuana and hashish that causes the mind altering effects of these substances.

Trip
a name for the reaction that is caused by a psychedelic drug. A lummer is an unpleasant or frightening trip.

Head
someone who uses drugs frequently.

THE DEPRESSANTS

The category of drugs that depresses the functions of the brain.

"Downs"
street slang for depressants.

Alcohol
ethyl alcohol, a depressant because it slows the functions of the brain that control thinking and coordination. In high doses it produces drowsiness and sleep. Alcohol is an addictive drug, since after prolonged or continued use it can cause physical dependence (alcoholism), and when discontinued, causes withdrawal symptoms at least as serious as the other addictive drugs.

Barbiturates
these drugs are in the group called sedatives - medicines to make you sleepy. Barbiturates are taken in capsule or tablet form. They cause physical dependence (addiction), and after repeated use, physical withdrawal does occur when these drugs are discontinued. Among the common commercial names for barbiturates are:

- Seconal or "red devils"
- Nembutal or "yellow jackets"
- Amital or "blue heavens" or "blue devils"
- Luminal or "purple hearts"
- Tuinal or "rainbows" or "double trouble"

Barbiturate Overdose
more people in the United States die as a result of an overdose of barbiturates (usually suicide) than of any other single substance.

Intoxication
sedative or tranquilizer intoxication is similar in its symptoms to alcohol intoxication. Driving while intoxicated can be extremely dangerous, and is thought to cause at least 25,000 traffic fatalities a year.

Tranquilizers
drugs that calm tension and anxiety. These drugs do not cause sleep except in high doses. Tranquilizers are taken in capsule or tablet form. Some common commercial names for tranquilizers are: Equanil, Miltown, Librium, and Valium.

INHALANTS

Among substances which are inhaled and produce a high are: glue, gasoline, lighter fluid, and refrigerants. Continued inhaling has been reported to cause severe anemia, liver damage, brain damage, and death.
