WAYNE, NEBRASKA 68787, THURSDAY, OCTOBER 4, 1973
NINETY-EIGHTH YEAR NUMBER THIRTY-SIX

Published Every Monday and Thursday at
114 Main, Wayne, Nebraska 68787

No Newspaper Monday

This coming Monday issue of The Wayne Herald will not be printed because of curtailed postal service on Monday, Columbus Day.
Newspaper subscribers who receive their papers on rural routes or by carrier would not receive the newspaper until Tuesday if it were printed as usual Saturday afternoon.

4-H Calves on Auction Next Week

Eighty-three 4-H calves will be offered for sale during the annual 4-H calf sale in Wayne next week.
The sale is slated for the sale barn at 8 p.m. next Wednesday. A total of 33 individual calves and 10 pens of five will be sold during the evening.
Businessmen from throughout the county have been invited by county agent Don Spitze to attend the sale and bid on calves.
Successful bidders pay a premium above the packer bid, with the premium going to the

4-H'er who raised the calf as a bonus for the work he put into his calf project in recent months.
In a letter sent out to businessmen, Spitze explained how the premium is figured in an effort to help those who haven't attended livestock sales.
A list with weights of the animals and the packer bid on all the animals is handed out to prospective bidders before the sale gets underway, according to Spitze.
The list can be used by businessmen in calculating how much it may cost to purchase one of the animals. For example, a 1,000-pound steer with a packer bid of \$49 per hundred would cost a businessman \$30 if

the animal sold for \$52 per hundred during bidding. The premium is the difference between the packer bid and the sale bid.
Cattle will be sold in order of ranking based on a scoring system combining rate of gain and packer appraisal.
Four H youths are allowed to sell either an individual calf or one pen of five. The individual calves must have been shown at the county fair this summer.
Following are the youths who will be selling animals during the show

Wakefield: Hayley Greve, Wakefield; Gloria Spittiger, Wisner; Janet Spittiger, Wisner; Randal Dunklau, Wayne; Kent Roberts, Wakefield; Keith Roberts, Wakefield; Donna Roberts, Wakefield; Denise Roberts, Wakefield; Penny Roberts, Wakefield; Susan Sievers, Wakefield; Jacques Sievers, Wakefield; Jack Sievers, Wakefield; Dennis Magnuson, Carroll; Paul Roberts, Carroll; David Owens, Carroll; Megan Owens, Carroll; Becky Owens, Carroll; Jeff Baier, Wayne; Robert Anderson, Hoskins; Randy Owens, Carroll; Greg

Owens, Carroll; Kelly Frevert, Wayne; Brian Frevert, Wayne; Craig Nelson, Wakefield; Blaine Nelson, Wakefield; Debby Greve, Wakefield; Janeen Thomsen, Wakefield; Leslie Thomsen, Wakefield; John Geewe, Wakefield

PENS OF FIVE
Ricky Gathie, Wayne; Kevin Davis, Carroll; Shelly Davis, Carroll; Michael Dunklau, Wayne; Roger Gustafson, Wakefield.
Don Nelson, Wayne; Mike Rethwisch, Wayne; Bradley Roberts, Carroll; Kent Wittler, Hoskins; Kurt Wittler, Hoskins.

Spitze Is National Winner

Wayne County agricultural agent Don Spitze is one of 18 national winners in the public information awards program sponsored by Amchem.
Spitze received a cash award during a banquet at the Baltimore Hilton Hotel in Baltimore Tuesday night. The awards dinner was held during the annual meeting of the National Association of County Agricultural Agents (NACAA).
He placed second in the Single News Photo Class. Spitze was among extension workers from 28 states who submitted 1,093 entries in the sixth annual program.
Awards of \$25 or more go to county extension agents from around the country who have done an outstanding job in the communications area. Nearly \$6,000 in awards are provided through the program to winners at the state, regional and national level.
Spitze has been Wayne County agricultural agent since March when he replaced long-time agent Harold Ingalls. Before coming to Wayne, Spitze was agricultural agent in Thurston County for about six years.

Overall Governing Board For Colleges Is Suggested

Establishing an overall governing body for all institutions of higher learning in the state was one of the goals suggested for Nebraska during a meeting at Wayne State College Monday night.
Attended by about 20 persons, the Goals for Nebraska meeting was one of a series scheduled throughout the state in an attempt to get ideas from citizens about what the state should attempt to accomplish in years to come.
Several individuals at the meeting suggested that an overall board of all post high school institutions would be able to coordinate programs, avoid duplication between colleges and universities, cut administrative costs and improve education beyond high school.
Also suggested as goals for the

state during the meeting were such things as improvement of medical services in the state, encouragement of local industries, tax reform, development of industry along the Missouri River between Omaha and Sioux City, and improvement of the policeman's image.
Goals suggested during the meeting will be included among those which will be reviewed by a "blue ribbon" committee when all county and regional meetings are concluded.
The committee will recommend the goals which will be printed up and distributed throughout the state to public officials, community groups and the like.
In charge of the meeting at Wayne State were college staff members Neil Swanson, Ken Halsey and Charles Stelling.

200 Attend Breakfast Kicking Off Fund Drive

About 200 Community Chest workers turned out Monday morning for the annual breakfast kicking off efforts aimed at raising contributions from Wayne residents.
Goal for this year's drive is \$12,000, an increase over last year's goal of \$10,000.
Funds raised in the two-week drive will be distributed to local organizations as well as to a Sioux City home and national groups.
Obtaining money locally will be the city recreation program, \$3,000, and the Senior Citizens Center, \$960. A total of \$2,160 each will go to the Boy Scouts and Girl Scouts councils for this part of the state.
Other funds which will be distributed — if the \$12,000 goal is reached — include \$960 to the Red Cross, \$1,080 to the Salvation Army, \$240 to the United Service Organization, \$120 to the cystic fibrosis research fund and \$120 to the Florence Crittenton Home in Sioux City, a home for unwed mothers.

Former Local Pastor To Head Boys Town

The Rev. Robert P. Hupp, pastor at St. Mary's Catholic Church in Wayne from 1951 to 1953, has been named new director of Father Flanagan's Boys Home near Omaha.
Father Hupp succeeds Nicholas H. Wegner, who has retired. See NEW HEAD, page 8.

Wakefield To Crown King, Queen

Wakefield High's homecoming king and queen will be crowned Friday at 3 p.m. in the elementary school building, according to Linda Peterson, in charge of homecoming activities.
This year's king candidates include Doug Soderberg, Don Lindstrom, Steve Sorensen and Sam Utecht. Queen candidates are Kay Fischer, Kaye Dolph, Kris Kraemer and Marcia Leonard.
The king and queen will take part in halftime ceremonies of the Wakefield game with Wisner Pilger Friday night.

Man Arrested On Main Street

An armed man was arrested by Wayne police Tuesday morning on Main Street in Wayne.
The man, identified as John Jackson of North Platte, was carrying a loaded revolver and a switchblade knife when he was arrested by police chief Robert Evers. Marijuana was found on the man, Evers said.
Evers said he tried stopping Jackson for speeding on Main Street, but the man ran through a red light and appeared to be trying to escape. Evers said he crowded Jackson's car to a stop at Second and Main and arrested him after he used abusive language when Evers began questioning him.
Jackson is currently out on bond.

Inside today . . .

Wayne County residents are guzzling soda pop at a record rate, spending nearly \$400,000 a year on bottles and cans of the taste-quenching, non-alcoholic drink.
For a story on the subject, turn to the editorial page inside this issue of The Wayne Herald.

Local Masons Mark 90 Years

Wayne Masons will mark the 90th anniversary of the local lodge Saturday during a banquet at Wayne State College.
Activities will include a talk by Harold Hultman of Elkhorn, current grand senior warden, and a 50-year membership presentation to Wayne Mason John Carhart. There also will be a reception for wives of grand lodge representatives, a resume of activities of the local lodge during past years and entertainment.

Burt Case Going to Jury Trial

Wayne County commissioner Floyd Burt will be tried by jury Oct. 17 on two charges of malfeasance by a public official.
District judge George Dittrock of Norfolk ordered the jury trial Wednesday morning during Burt's arraignment on the two charges in Wayne county district court. Burt pleaded not guilty to both charges.
Dittrock earlier in the morning overruled a motion by Burt's attorney to amend the two charges into one charge.
Burt, of rural Winside, has been charged by county attorney Bud Bornhoff of Wayne with making two illegal purchases as a county commissioner. The alleged purchases involve tires Burt bought in the name of Wayne County. The charges say the tires were for Burt's own use and the use of an unnamed third party.
Penalty upon conviction of a charge of malfeasance is a \$200 fine and possible removal from office, according to Bornhoff.

On the Job
CITY CLERK Dan Sherry, left, goes over a zoning map with Wayne's new city administrator, Fred Brink. With the municipal government of Kansas City the past two years, Brink, 43, began his new job Monday. He was hired for the position by the city council in September, filling a post created following adoption of a comprehensive study of all phases of the city's departments. Brink said his wife and three children will move to Wayne in the near future.

Huge and Heavy

THAT'S Norbert Bruger in the foreground, Wayne's new electrical transformer in the background. Bruger, superintendent of the city's electrical power plant, said the transformer will be located west of the power plant and will step down Nebraska Public Power District (NPPD) power coming into the city from 69,000 volts to 13,900 volts so it can be fed into city lines. Inspecting the transformer, which arrived in Wayne by rail Tuesday, are power plant employees, from left, Don Neisius, Al Grashorn and George Henderson. The transformer weighs 98,300 pounds, cost \$24,500. Yet to arrive are materials for the power line connecting the city to the Wayne County Public Power District line south of Wayne. NPPD power will be carried over that line to the city in cases of emergency or if the city wishes to purchase power.

ASC Office Keeping Eye On Farmers' Supply Needs

The Wayne County Agricultural Stabilization and Conservation Service (ASCS) office in Wayne is continuing to monitor area farmers' supply needs to help alleviate serious problems this fall.
Raymond Butts, executive director, says his office has been keeping tabs on local farm fuel and fertilizer supplies since early spring.
"We plan to continue these checks on fuel and fertilizer, and we are also monitoring the availability of crop storage and other losses caused by shortages as harvest progresses," Butts said.
Farmers should report any critical shortages of fuels for crop harvesting and drying and fertilizers for fall application to the county ASCS office, he noted. Some problems can be resolved locally or through ASCS or state government, according to Butts. If not, the shortages problems will be immediately reported to

Washington where they will be referred to the regulatory agency involved and to others concerned with helping assure adequate farm supplies.
Even though ASCS has no direct authority under the fuel allocation program, attempts to resolve critical fuel shortages will continue to be made, Butts said. He stressed that farmers should make every effort to obtain supplies before requesting assistance and urged farmers not to buy more fuel than they need to help assure equitable distribution to all farmers.
With regard to fertilizers, Butts said farmers should consider early delivery, on-farm storage and fall application where possible. With more crop acreage expected in 1974, farmers should deal now to fill their farm's fertilizer needs, he noted, because problems could develop. See SUPPLY NEEDS, page 8.

Chamber Board Trying to Fill Manager Post

A new manager of the Chamber of Commerce in Wayne may be named early next week.
The board of directors has already interviewed two persons and plans to interview a third yet this week in an attempt to replace former manager Floyd Bracken. Bracken has resigned because of ill health.
On a search committee helping find a replacement for Bracken are Ruth Eloffson, Clarence Kuhn, Roy Hurd and Arnie Reeg. Heading the group is Dick Keidel.
Persons interested in applying for the job should contact Keidel, owner of Sav-Mor Drugs. Bracken was manager of the local office for about three years until resigning recently.
Currently handling Chamber work is Liz Urbanos, office manager. Working with her the past four months has been Mable Haberer.

Med Class at Allen Holds 1st Meeting

The initial meeting of those enrolled in Allen's emergency medical training course was Tuesday evening.
The 26-week course is being conducted by Bob Robertson of Walthill, with classes meeting from 7:30 to 10 p.m. each Tuesday.
The 72 hours of training will include 10 hours of in-hospital training.
Identical classes are being conducted in South Sioux City and Dakota City.

Newcomer Wins 'Bucks'

A newcomer to the community of Wayne has received a nice gift from local businesses.
She is Mrs. Byron Heier, latest winner in the weekly Birthday Bucks promotion sponsored by Wayne firms.
Mrs. Heier, who moved here from Columbus with her husband and family late this summer, won \$50 in Birthday Bucks by being the consolation prize winner in last week's promotion.
Mrs. Heier was in Kuhn's Department Store when the winning birthday was announced last Thursday evening. She was the person in one of the participating businesses with the birthday closest to the date selected at random earlier.
The weekly giveaway continues tonight (Thursday), with the \$300 grand prize going to the person in a participating store born on the exact date announced at 8:15 p.m. The \$50 consolation prize will be given away again if the grand prize is not claimed.
All residents of the community and area are eligible to win in the weekly promotion. No purchases are required, and no registration is necessary. Employees of local stores are eligible also if they are not working on Thursday evenings, and past winners are not prohibited from winning again.

MRS. BYRON HEIER

Wildcat Psychology Factor In Saturday Tilt With CSC

If psychology means anything in athletics, Wayne State's football Wildcats should be pretty well psyched up for their first conference battle Saturday afternoon: 1:30, against Chadron State in Memorial Stadium.

Consider these factors: The Cats remain the state's only unbeaten college team (naturally, that does not include Nebraska).

Nearly all the Wildcats are healthy, most of their wounds healed.

They thrashed Midland, 34-0, Saturday and for the first time this year gave the enemy no turnovers, while taking advantage of numerous Warrior errors.

And significantly, Wayne depth in quarterbacking proved a key factor. Not only did all three veterans play, but a freshman quarterback, Brad Hahn, took over near the end and pitched a touchdown pass.

The Wildcats will need all this going for them against a potent Chadron team.

Never mind that the Eagles are 2-2, compared with 3-0-1 Wayne. They lost Saturday to powerful Kearney State when they gambled on a two-point conversion late in the game, but ended up 7-4 losers. Chadron outperformed Kearney in nearly every statistic. For the season also, Chadron owns sizable statistical advantage over the foe.

But the same is true for Wayne. The Eagles have gained a few more yards than the Wildcats, but given up a good bit more yardage.

But all this doesn't mean much when these ancient rivals collide. Since their first game in 1912, each has won 24.

One question remains for the Wildcats: can they play on a dry field? This, of course, assumes some minor chance the turf may be dry Saturday. Every game so far, they have played on wet fields.

Surprisingly, Wayne passers have managed unusual success despite the weather — with 36 completions on 73 tries. Their receivers have scored no less than eight of 12 touchdowns. Wayne has not enjoyed such aerial finesse in years.

Against Midland, two of five touchdowns came by air — the first when Dean Ott nabbed a 26-yarder in the end zone from Rick Benedetto. That one, just before the half ended, put

RON COLES

Wayne ahead after an interception provided the first big chance.

The other scoring TD finished off the rout as Hahn found freshman Lyle Schwartz in the end zone for a 17-yard play, which started with three seconds left.

In between, three four-quarter scores resulted from Midland fumbles and a flock of penalties yielding first downs. Benedetto dove a yard for one TD. Then the defense scored when end Tom Allie scooped a loose ball on the Warrior 45 and, finding himself hemmed in by a flock of blackshirts, handed off to tackle Ron Coles and said "go." Coles did go, 40 yards with a wall of teammates blocking all pursuit.

And finally, after another Midland fumble, Ott scored on a two-yarder, running his season to a team-leading 30 points. Rich

TOM ALLIE

Mangiamei kicked points on the last four touchdowns.

For the first time, Wayne rushing defense let the foe pile up a fair amount of yardage — 110 — but for the season, the Cats still have yielded only 31 yards on the average. Wildcat tailback fullback Brian Moeller — he's played both positions — and wingback Ott are first and second in rushing at 140 and 134.

The Yardstick:		
	Wayne	Midland
First downs	13	7
Yards passing	108	50
Yards rushing	78	110
Total yards gained	186	160
Passes	11	20
Fumbles lost	0	5
Punts	38	24
Yards penalized	45	52

Scoring by Quarters:		
	Wayne	Midland
1	0	6
2	0	0
3	28	34
4	0	0
Total	28	34

Rain Postpones Reserve Match

That old devil, rain, did it again — washed out a Wayne State junior varsity football game Monday night.

The young cubs were scheduled to play the Midland JV at Scribner, but Sunday rain left all fields in the area too wet for play Monday.

It was rescheduled for Nov. 5, the site to be determined later. A Sept. 24 game at the University of South Dakota also was a wet-field casualty — but not rescheduled.

Athletes to Speak In Wayne Sunday

Mark Anderson, Wayne State basketball player, and Brad Jenkins, a tight end for the University of Nebraska-Lincoln football team, will be guest speakers Sunday at the Wayne First United Methodist Church. The senior high United Methodist Youth Fellowship will sponsor the informal meeting at 6:30 p.m.

Nebraska's fee for registering boats less than 16 feet long and powered by motors totaling five horsepower or less is \$2.

Allen Boy Wins PPK Contest

Rob Linafeller of Allen will compete in the zone competition of the Ford-sponsored Punt, Pass and Kick contest this Sunday at Fremont after winning first place at Ponca.

Son of Mr. and Mrs. Ken Linafeller, he will compete in the nine-year-old category.

Gregg Carr, son of Mr. and Mrs. Loren Carr, also of Allen, won a third-place trophy in the 12-year-old division.

Wayne Runners Finish Last

Wayne High's cross country team finished last in a field of about 10 teams Monday at the Crofton Invitational.

Mark Powers led the harriers with a 13:03 showing over what coach Harold Maciejewski said was a "rough, hilly course."

The other Blue Devil runners covering the 1.9 mile run were Tom Maier in 14:54, Ken Daniels in 15:59 and Bob Keating in 17:11.

Driver's Venture To New York Reaps Memories, No Money

Wayne's entry in Sunday's World Demolition Derby at Islip, N. Y., didn't bring home any prize money.

But he did store up a lot of memories about his trip to New York and about derby driving.

City employee Vern Schulz competed with about 200 other drivers from around the United States, Mexico and Canada for the \$1,500 first-place prize.

Schulz, who didn't have to qualify in an earlier heat race, made it through about a quarter of the way in the finals before his car gave out. "I didn't have to go in the qualifying heat," he explained, "because I was a winner at North Bend I automatically qualified for the finals."

Despite his showing, Schulz noted that there is a chance his car might be among those filmed for ABC television network's Wide World of Sports. "I won't know when the derby will appear on television. I'll have to check the TV listings," he added.

Schulz started out in a field of 70 cars, but seven to 10 minutes later his car stopped. The poor

Sportsbeat

By Bob Bartlett

THERE SEEMS to be some question as to how The Wayne Herald's Athlete of the Week is chosen.

Some readers think we pick an athlete from a town where circulation is not up to par. That way more people will buy the paper and perhaps become a subscriber.

Not a bad idea, but it doesn't wash. Selections are based on nominations from the coaches at Wayne, Winside, Wakefield, Laurel and Allen High Schools. If there is more than one nomination, the selection is made after comparing such things as yards gained, outstanding plays and the like.

Every week we try to contact the coaches and ask them if they have anyone to nominate. Usually a call is placed to the coach. If he is not there or is busy we ask to have a note left so he or she will call back.

Sometimes a coach may forget to call back so another call is placed. After that, if a coach does not call, we move on to another school.

The selection is not always perfect, we admit. How can it be with more than 150 athletes participating in just one sport — football — in the five area schools? Then

there is girls volleyball and cross country to consider.

An athlete may be overlooked by a coach or there may be so many students deserving mention that some have to be eliminated.

In any case, we try to be fair when it comes to picking the Athlete of the Week. We doubt if anybody else could guarantee much beyond that.

IT'S TOO BAD we can't give some type of award to Wayne State's fine football club. After last Saturday's fourth-quarter explosion over Midland, the Cats deserve some mention for their offensive and defensive talents.

Both sides of the Wayne club had a hand in the 34-0 blanking. The offense did its share in the early stages of the game, but so did the defense when it scored a Wayne TD. And let's not forget the freshmen part of the club, which put the last seven points on the board as time ran out.

It should be mentioned that the Cats are the only undefeated team among the state's small colleges.

Wayne, boasting a 3-0-1 mark, aims to improve its record in its first Nebraska College Conference clash, against Chadron State at home Saturday afternoon. Game time is 1:30 p.m.

SINCE THE game will be played in the afternoon, it will be a good chance for area fans to back the Cats as they go for No. four.

So far, attendance at Wayne State's last three home games has been pretty good, with numbers ranging between 1,800 and 1,900, according to a college official.

Let's see if we can't beat that number in cheering Wayne State on to victory and an undefeated season.

Homer Drops Allen Teams

Allen's junior varsity and junior high teams dropped both contests Monday night to strong Homer football squads.

The reserves took the worst beating when Homer unleashed a 21-point attack in the first and second halves to wipe out the Eagles, 42-14.

Steve Shortt put the area club on the board in the first stanza with a 55-yard punt return before a 25-yard pass from quarterback Bob Sullivan to Brad Chase scored the last TD in the fourth period. Jack Boss made the two-point conversion.

The junior high team played a closer match losing, 12-6. No other information was available.

Allen travels to Ponca Oct. 17 for its next junior high and reserve football games.

Allen Meeting Friday

Ellis Paint and Floor and Paul Koester will sponsor this Friday's Allen High booster club meeting beginning at 7:30 a.m. at the Home Cafe.

Two L-C Loop Clubs Battle for Divisions

By **BOB BARTLETT**

For the first time this football season, all five area high school teams will go their separate ways Friday night.

With mid-season approaching, most high school schedules reflect the tough lineups remaining. For instance, in the Lewis and Clark Conference, two key battles unfold as Winside and Allen set their sights on division championships.

Winside plays at home against a rugged Wausa club that victimized Coleridge last week, 8-0. Coach Doug Barclay's team should be ready for the Vikings after downing a good Hartington club last Friday, 13-0.

Meanwhile, Allen visits Homer in its division battle. The Eagles' big game last week was a 7-0 nipping of Ponca to claim the No. 1 spot in the East division. If coach Charlie Haag's team gets by the Knights, the Eagles will have to beat Newcastle and Walthill to set up a possible rematch with the Wildcats for the L-C loop title at the end of the season.

As it looks now, Winside and Allen get the nod in Friday's tilts.

One team that could be a surprise in the Northeast Nebraska Activity Conference is Laurel. Head mentor Bob Olson's club put on a strong display of offensive and defensive talent Friday to tie Creighton, 8-8. The week before the Bears almost beat Randolph, falling short in the closing minutes, 13-8.

The 0-3-1 area team deserves some recognition by its foes, and I'm sure that this week's opponent, Neligh, won't take the home team for granted.

However, it must be noted that the Warriors are a top team in the conference. Last week's 25-6 romping over Pierce is evidence of that. The pick goes to Neligh.

Leadership in the Husker Conference will begin to shape up more this week as Wayne and Wakefield stay in the West half to battle.

The locals take on Stanton at the Mustangs' homecoming. This will be the

third time coach Al Hansen's squad has ventured into the West half. And so far the record looks good, 2-0.

If the rains and fog can hold back this Friday, Wayne fans attending this match may see the Blue Devils offense finally get going.

In the team's four outings, the Devils have racked up only one game over the 20-point level — that against Wisner-Pilger, 26-6.

One question mark that remains on the team is who will get the starting quarterback ticket. Bill Schwartz got the call for the first half last week, leading his club to a 7-3 halftime lead over Wakefield. But coach Hansen made the switch in the second half to former starter Marly Hansen in hopes his club could move the ball more.

Regardless of who is the No. 1 quarterback, Wayne will have its hands full with Stanton. The Mustangs whipped Emerson-Hubbard, 8-0, giving the Devils enough warning about coach Ron Bunk-

er's team.

I'll go with Wayne to take this one. They need the win — it would put them on top of the West division.

Wakefield should rebound against Wisner-Pilger this Friday at the Trojans' homecoming match. Coach John Torczon's club is a lot better than last week's 16-3 defeat at the hands of Wayne might lead some to believe.

Perhaps this time the Trojans can connect on their passing game while running up the middle to boost their 2-1 record. The sign points to Wakefield to win this battle.

So far the number of right picks has been keeping ahead of the loss column, with two right, one wrong and a tie last week. (I don't count ties in either the win or loss column.)

Laurel, as you may remember tied Creighton, 8-8, with Allen pulling a nifty, upset over Ponca, 7-0, for the only wrong predictions. That brings the record to 9-5 — not quite 65 per cent.

Reserves Rip Hartington CC

Wayne High's reserve football team riddled Hartington Cedar Catholic to the tune of 30-0 Monday night with the help of runningback Rich Workman's two touchdowns.

Workman, who ran for 70 yards, earned half of that amount on a 35-yard scamper in the first quarter to first put the locals on the board. Rob Mitchell then dashed in for the two-point conversion.

Workman capped another sustained drive in the next period with a one-yard plunge for a 14-0 lead. This time the two-point try failed.

In the second half, quarterback Paul Althoff hit Dave Hix for a 10-yard TD in the third quarter before Dick Chapman scrambled for a seven-yard six-point in the last frame. Chapman and Dave Nuss scored the two-pointers in the second half.

"Our offense really looked good," coach Ron Carnes said of his 3-0 reserve club. Wayne actually has a 3-1 record, Carnes pointed out, but the game with Norfolk's sophomores doesn't count on the reserve record.

"It was a team effort," the coach said, adding that Jack Froehlich led tacklers with seven takedowns. Dave Nuss and Greg Moyes both had six tackles each, he said.

Monday the Wayne team travels to Wisner-Pilger.

For deer hunting in Nebraska, the only handguns allowed are .44 Magnum, .357 Magnum, .41 Magnum, and .44 Special. Handguns may not be used for hunting antelope.

N Peoples Natural Gas Division of Northern Natural Gas Company

Wayne, Stanton Top in West Husker; Allen Leader in L-C Division at 2-0

Wayne and Stanton are tied for the top spots in their league division this week, and Friday's contest between the two will answer the question as to who is No. 1.

The two are 2-0 in the West half of the Husker Conference. The Blue Devils are 3-1 overall, losing to Blair earlier in the season. The Mustangs are 4-0, with their latest win an 8-0

shutout of Emerson-Hubbard.

Wakefield, another area team in the West half, is tied for fourth, with Hartington Cedar Catholic at 1-1. Wakefield has a 2-1 season record. Hartington Cedar 1-2.

Winside and Wausa will battle for leadership in the Clark division of the Lewis and Clark Conference Friday when the Cats host the Vikings.

Cross Country Places Tenth

The Wayne State harriers traveled to Doane last Saturday for their third meet of the year. Wayne placed tenth out of eleven teams.

UNO won the meet with 73 points. Concordia was the runner up with 82 points. The winning runner, Dan Cloeter of Concordia, ran the four mile course in 20 minutes 30 seconds. Roger Kuhlman was the leading Wayne State runner placing 45th.

Assistant cross country coach, Bob Cooper said almost every one improved. The team is relatively young with four fresh men and one sophomore.

Volleyball Teams Fall in 2 Tournaments

Three area volleyball teams venturing into tournament action this week found the going rough as Winside, Allen and Wakefield lost.

Winside made it to the finals of the Newcastle tourney, going against Newcastle in the Tuesday night clash. But coach Don Leighton's girls couldn't continue their two game winning streak from Monday night. Newcastle took the meet in two straight sets, 15-5 and 15-6.

"Our girls looked sharp in their two wins Monday night," Leighton pointed out. Although the head mentor usually doesn't list names, Deb Bargstadt, Joan Weible and Sally Landanger were cited for their play on the front line in Winside's conquests over South Sioux City and Ponca.

The Wildkittens defeated South Sioux in the first game, 15-13, 13-15 and 15-10, before stopping Ponca, 15-10 and 15-7.

Another area team in the meet, Allen, fell, in the first round to Newcastle, 15-7 and 15-5.

Wakefield had its share of problems in the Osmond tournament, as the host club defeated the Trojanettes in two sets, 15-8 and 15-5. "We couldn't get unfracked," said coach Ernie Kovar. "It was a case of Osmond being ready," he added.

Laurel and Wayne were the only clubs not featured in tournament action this week.

Laurel's A team downed Creighton, 15-8, in the first set Tuesday night before taking a loss, 3-15. The Bearettes then tied back with another 15-8 score to win.

The reserves didn't fare as well, falling in two sets, 10-15 and 4-15. The C team, though, won in three sets, 15-12, 5-15 and 15-12.

Norfolk girls sharpened up from last week's losses to Wayne and turned the match in their favor as Wayne's A squad lost, 15-9 and 15-3, also Tuesday night.

"There's really not too much to say," said coach Mavis Dalton. "Norfolk looked a lot better than last week."

The C and B teams picked up wins at the Norfolk gym, the freshmen winning their fifth straight, 7-15, 15-5 and 18-16, and the B team taking their victory in two sets, 15-8 and 15-3.

High school volleyball action continues today (Thursday) with Laurel hosting O'Neill and Wausa traveling to Winside.

TV Note book

By Larry Turner

Football fans who prefer their game at home on TV have an opportunity to analyze the fine points of the game to a greater extent than the average man in the stands. Instant replays, in slow motion, show exactly how each player carries out his assignment.

Sophisticated fans are apt to watch the interior of the line men. They get little publicity or glory but they often decide whether or not a play succeeds. Watch to see if the guards pull out to ease blocking for a running play, move downfield to block for a pass receiver or fall back to protect the passer.

Enjoy the football games and all the new fall TV shows to the fullest with a new color TV set with all the latest features. It costs less than you think too, when you take advantage of our low competitive prices. Stop in soon, and get our deal.

THE MOST EVIL MAN IN THE U.S.A.

A few notes on the evil he created in 1969.

He found a quarter of a million "unemployables" who never could hold steady jobs.

He trained them and put them into work that pays money they never dreamed of earning before.

He's a businessman.

For poor kids who couldn't otherwise go to college, he took three hundred and fifty millions and saw to it that those who earned them got scholarships.

He gave eight hundred million to non-profit organizations for medical research, to help stamp

out cancer and heart disease and a hundred other dread diseases of the world.

To build new housing for the poor and middle-incomes in U. S. cities, he put up one billion and a quarter dollars, so more people can live in decency.

Sure, he's been a polluter — as has everyone from the U. S. government to ordinary citizens. But last year he scraped up two and one half billions to fight pollution of air and water and nature. This year he plans to get up four billion more, to keep up the battle.

After that, he put up fifteen billion dollars in Social Security

taxes to help provide support and medical care for senior citizens. And he added forty-one billion dollars in income taxes to help pay the bills of the U. S. A.

And all the while, he was contributing millions of hours of personal and business time to virtually every humanitarian cause you've ever heard of.

He's a businessman. The most evil man in the U. S. A.

Isn't it time somebody had a good word for this evil man who happens to do so much good for so many people?

We think so.

THE WAYNE HERALD

Senior Citizens Meet For Cards

Winside Senior Citizens met Tuesday afternoon at the city auditorium with 18 present to play cards.
Prizes went to Mrs. Ben Fenske and Otto Herrmann, high, and Mrs. Gustav Kramer and Edgar Marotz, low. Door prizes were won by Fred Wittler and Mrs. Otto Herrmann.
Mrs. Martin Pfeiffer was coffee chairman.
Eighteen Senior Citizens met Thursday evening at the auditorium for cards.
Mrs. Ruth Hanks and Fred Wittler won high and Mrs. Gustav Kramer and Herb Peters received low. A cheer card was sent to Mrs. Jean Boyd.

Winside, and now residing at the Dahl Retirement Center in Wayne, was honored at a card shower for her birthday Sept. 27.
Several Winside friends and relatives called on her during the week to honor the event.
Meet For Bridge
Three-Four Bridge Club met Friday afternoon in the Warner Janke home with 12 members present. Mrs. Louie Kahl was a guest.
Prizes were won by Mrs. Louie Willers, Mrs. Carl Troutman and Mrs. Kahl.

Area Girls Receive Medals

Five area baton twirlers received medals in the novice divisions of the Open National Baton Contest held in Omaha Saturday.

Janet Anderson, 13-year-old daughter of Mr. and Mrs. Norman Anderson of Laurel, received fourth place for a solo number and Lynette Hansen, 11-year-old daughter of Mr. and Mrs. Cyril Hansen of Wayne, won fifth place.

Joetta Haase, six-year-old daughter of Mr. and Mrs. Jerry Haase of Norfolk received a fourth place award and a fifth place award in novice basic

strut competition. Kim Damme, four year old daughter of Mr. and Mrs. LeRoy Damme of Winside, placed fifth.

In duet competition, Connie Hansen, nine-year-old daughter of Mr. and Mrs. Lester Hansen of Wayne and Lynette Hansen received third place medals and Kim Damme and Joetta Haase placed fourth.

All the twirlers are students of Mrs. LeRoy Damme.

Closing for Columbus Day

Wayne County offices and post office service will be curtailed on Monday because it is Columbus Day, a national holiday.

There will be distribution of mail to lobby boxes at the post office and afternoon collection of mail from deposit boxes in the city, but there will be no window service, says postmaster Wilbur Giese. The lobby will be open regular hours during the holiday, he noted.

All county offices will be closed for the holiday, reports county clerk Norris Weible.

New Head —

(Continued from page 1)

from the post after serving as director since 1948.

A native of Clearwater, Father Hupp will take over his new duties Oct. 11. He is currently pastor of Christ the King Parish in Omaha.

While at Wayne, Father Hupp, 58, was chaplain at the Newman Club at Wayne State College. He was ordained in May of 1940.

Weather Is Subject

Planetarium shows for the fall season at Wayne State will feature a weather subject, "Sun, Stars and Seasons."

Twice-weekly shows on Wednesday nights at 7:30 and Sundays at 3:30, beginning Oct. 3, will continue through Nov. 18.

Carl Rump, director of the Dale Planetarium in Carhart Science Hall, has arranged a sequence of slides showing how astronomical factors affect earth's atmosphere, weather and climate.

Rump invites organizations and school classes to request special showings if they cannot attend the regular Wednesday or Sunday shows.

Clay tablets dating from about 2000 B.C. show that in Babylonia valuables were deposited for a service charge of 1/16th of what they were worth. Interests on loans ran as high as 33-1/3 percent!

Construction Underway

WORKMEN last week were pouring concrete for foundations of the new Pizza Hut which will be built on the east edge of the Wayne. The work was held up for a few days because of a shortage of concrete in Wayne. Plans call for the new business to be built and open for business early next month. The building, 30 by 60 feet, will seat 68 people. Unlike some Pizza Huts, it will not have a fireplace.

Kansas-Bound

MAPPING OUT the route they followed on their trip to Abilene, Kan., are these four Wayne ladies, among the 33 persons who left early Tuesday morning on the local Senior Citizens Center sponsored tour. From left are Mrs. Rose Heithold, Goldie Leonard, Mrs. Mary Echtenkamp and Mrs. Alma Spittgerber. Residents of Emerson, Wakefield, Wayne, Wisner, Carroll and Winside went on the overnight tour. The group planned to make several stops, including one at the Eisenhower Museum in Abilene.

Develop in replenishing local supplies.

Butts added that farmers should also make every effort to conserve and make the most efficient use of plant nutrients, using soil tests for accurate determination of requirements.

Large harvest of grains and oilseeds expected this year, together with the high

demand, may cause serious spot problems with storage and transportation, according to Butts. The local ASCS office will be reporting on a continuing basis the local situation of grain storage, spoilage and transportation problems so state and federal authorities will have the earliest opportunity to help resolve them as they arise.

Supply Needs —

(Continued from page 1)

Athlete of the Week

LARRY WEIBLE, WINSIDE HIGH SCHOOL

Second effort by any athlete is the mark of a determined player. Willingness to scratch for extra yardage on the football field can inspire a team to victory.

Winside's Larry Weible has just that quality, earning him this week's Athlete of the Week award.

The senior halfback powered his way through a muddy Winside football field for 74 yards running and another 66 on punt returns for a total of 140 yards Friday night.

Although the son of Mr. and Mrs. Ed Weible of Winside didn't score any touchdowns in the 13-0 win over previously undefeated Hartington, he was instrumental in setting up the Cats' third win of the year, said assistant coach Carter "Cap" Peterson.

"Larry showed tremendous attitude," Peterson pointed out, "after coming off a leg injury in the game with Allen a week before." Weible took a Hartington punt and raced 55 yards to set up Winside's second TD in the fourth quarter.

Last year Weible was named to the Lewis and Clark all-conference football team in addition to the conference's basketball team. He also was a top 440-yard runner.

A past Boy's Stater who averages B grades, he also is president of the "W" club.

Last year, Weible was named to the first Wayne Herald area all-star basketball team.

—Sports Slate—

VOLLEYBALL: Today (Thursday) — O'Neill at Laurel; Tuesday — Winside at Emerson-Hubbard, Allen at Wayne, South Sioux at Wakefield; Saturday — UNL, UNO, Peru at Wayne State.

I See By The Herald

Helen Gildersleeve and Mae Young were in Columbus Saturday to attend funeral services for a former Wayne man, Fritz Nelson. Burial was at Alexandria, Minn., where Nelson had most recently made his home.

Fritz Nelson was the father of Bill Nelson who is Mrs. Young's son-in-law.

200 Attend Planning Night At Wayne High

Slightly more than 200 students and parents turned out Tuesday night for the annual Educational Planning Night at Wayne High School.

"The parents and students felt it was a good idea for them to be able to shop around," said high school guidance counselor Ken Carlson.

A total of 18 colleges, beauty schools, business schools, vocational schools and the armed forces were represented at the annual affair.

Parents and students were permitted time to talk with each representative to see what kind of opportunities are offered to young people after high school.

Many Workers

In Homes Can Get Benefits

Almost one-third of the nation's household workers could be eligible for social security retirement benefits in seven years or less, according to Dale Branch, social security district manager in Norfolk.

Most women household workers are in their 40's, but 29 per cent are over 55. These are the workers who could start getting retirement benefits in seven years or less, he said. A household worker can get reduced monthly social security retirement checks beginning at 62 — or full benefits beginning at 65 — if she has worked long enough in jobs covered by social security.

There are nearly 1.7 million household workers in the nation, and 1.5 million are women, noted Branch.

A household worker's cash wages count for social security if she is paid \$50 or more in a three-month calendar quarter from one employer working as a maid, cook, cleaning woman, laundress, housekeeper, babysitter or the like in someone else's home.

This means that a household worker's wages are covered by social security — if she is paid as much as \$3.85 per week in cash for 13 consecutive weeks in a calendar quarter.

"To get the proper social security credit for her earnings," Branch said, "a household worker should be sure to give her employer her correct social security number. The employer is responsible for sending a quarterly report of wages paid and the social security contributions to the Internal Revenue Service."

Single copies of a leaflet, "Social Security and Your Household Employee," are available free on request at any social security office.

BIG BUILDER resembles a familiar game of Monopoly where the player buys and sells land. But this new game at Allen High offers students a chance to learn techniques in

building and negotiating, according to instructor Keith Simkins. Playing the game are, from left, Todd Koester, Steve Lutz and Val Hansen. Watching is Simkins.

Allen High's 'World of Construction' Offers Underclassmen Building Skills

It's bad enough when a teacher catches his students playing games during classwork, but when a teacher joins in on the games, well...

Allen High School's new industrial arts instructor, Keith

Simkins admits he likes to play games during class period. And so do his students.

Every day during the seventh period, Simkins gathers with his 10 students in the old agricultural building behind the high school and break out the games.

Yes, it's fun, Simkins says, but it's also educational. The name of one of the games is Big Builder. The aim is to get on the job experience by trying to complete a certain task with the best results. Simkins, who heads the construction world course at Allen, said the game might seem childish to those who are not familiar with its goals.

The first year Allen instructor picked up the concept of Big Building while studying a summer course at South Dakota University. "We learned to use types of instructional material such as this and apply it to some of our teaching concepts," he said.

Of course, the whole course isn't based on playing games. That is just part of the class. The members have assignments both with and without work books.

"The course is designed to help the student understand basic concepts of construction work outside of high school and to make him more familiar with work proceedings in daily life," he said. "Although the students won't actually be doing on the job work, they will be involved in

making a number of projects that will call upon their knowledge in electrical, plumbing, heating and overall building areas, Simkins adds.

The course will provide some of the information needed, he added, and this way the student will have some understanding of what it takes to be on the job construction.

Another aim of the course is to help the student become more familiar with problems in the community such as building new apartment houses in urban areas.

Every week students learn new assignments as Simkins breaks the class into two groups of five. The idea is to have the students work as a group in tackling problems. Then they compete with each other to solve the situation. Simkins pointed out that this way the members in each group can contribute to the others in helping to learn

new material. "We want the students to learn everything that is concerned with building a house or any type of construction at a site," he said.

The new class is open to freshmen and sophomores only. Simkins said, noting that usually juniors and seniors advance to the trades and industries course if they want further training in the field. "This course we have now is just to give the student a better insight into working with people in a work type business situation," he said.

Allen Unit Called

The Allen rescue unit took a South Sioux City man to a Sioux City hospital Tuesday morning after the man fell from an 18-foot ladder at the Dixon County feedlot.

THE WORLD OF CONSTRUCTION is closely knitted with the game of Big Builder to help students understand basic concepts of construction work outside the high school

OBITUARIES

Edwin Gustafson

Edwin Emmanuel Gustafson, 82, of Wakefield, died last Tuesday at St. Luke's Medical Center in Sioux City. The son of Peter J. and Josephine Lennart Gustafson, he was born April 30, 1891 at Tekamah. On Feb. 11, 1920 he was married to Ida Rodgers. He was a member of the Salem Lutheran Church of Wakefield.

The Rev. Robert V. Johnson officiated at funeral services Friday at the Salem Lutheran Church. Pallbearers were James Gustafson, Kenneth Gustafson, Morris Gustafson, Harry Gustafson Jr., Marlow Gustafson and Marvin Stolle. Burial was in the Wakefield Cemetery.

He is survived by one son, Berneal of Wakefield; two daughters, Mrs. Faith Olson of La Puente, Calif., and Mrs. Arthur (Eunice) Hanson of Sioux City, Ia.; six grandchildren; two brothers, Harry of Omaha and Milton of Wakefield, and one sister, Mrs. Lillie Linder of Wakefield.

Mrs. Beryl Lanser

Funeral services were held Saturday at 2 p.m. at the First Lutheran Church, Allen, for Mrs. Beryl Lanser, 62, of Allen. She died Thursday at the Wakefield Hospital.

The Rev. Clifford Lindgren officiated. Pallbearers were Lloyd Anderson, Archie Bottorff, Vern Nobbe, George Sullivan, Clarence Stallbaum and John Book. Burial was in the Eastview Cemetery, Allen.

The daughter of Ed and Dorothy Allen, she was born Jan. 22, 1911 in Dixon County. She was married to Herbert Lanser April 18, 1929. She had lived her entire life in the Allen area and was a member of the Allen First Lutheran Church.

She was preceded in death by her husband in August of 1969. Survivors include two sons, Larry of Allen and Roger of Alto, Ga.; two daughters, Marie Fredrickson of Golden, Colo., and Mrs. Charles (Barb) Phillips of Okonobos, Fla.; ten grandchildren and three great grandchildren; one brother, Warren of Allen, and one sister, Mrs. Everett (Thelma) Lamb of Newcastle.

Anna Nelson

A Wakefield resident, Anna Maria Nelson, died last Tuesday at the Wakefield Hospital at the age of 78 years. The daughter of Carl and Ingar Persson Johnson, she was born May 27, 1895 in Sweden. She was united in marriage to Olaf Nelson Dec. 6, 1917 at Sioux City.

Funeral services were held Friday at 2 p.m. at the Evangelical Covenant Church, Wakefield, with the Rev. Fred Jansson officiating. Pallbearers were Kevin Bengtson, Richard Park, Paul D. Bengtson, Lawrence Nelson, Randall Larson and Harold Oberg. Burial was in the Wakefield Cemetery.

Survivors include one son, Clarence of Wakefield; one daughter, Mrs. Paul (Verna) Bengtson of Wakefield; five grandchildren and six great grandchildren, and two sisters, Mrs. Emma Nelson and Alma Carlson, both of Sweden. Preceding her in death was her husband.

Ernest Brammer

Funeral services are pending at the Willse Funeral Home, Wayne, for Ernest Brammer of Wayne. He died Wednesday morning at his farm home northeast of Wayne.

Selecting Names

ROY KORTH of Wayne picks up cards with names of individuals he is to contact during the two-week Community Chest fund drive which got underway this week. The drive, kicked off with a breakfast attended by about 200 persons Monday morning, will provide funds for the city recreation program, Senior Citizens Center, Boy Scouts, Girl Scouts, Florence Crittenton Home in Sioux City, United Service Organization, Red Cross and cystic fibrosis research. Goal: \$12,000.

Allen to Have Streets Graveled

The Allen town board voted Monday night to have five more streets gravelled, according to secretary Ken Linafelter, but no date was set for starting the project.

agreed to have the gate to the town dump open for one week after construction in the area is finished. Workmen are presently completing installation of water lines from the town's new well. The gates should be open by the end of the week, Linafelter said.

In other action, the board

Mrs. Benstead will host the October meeting.

WHS Student To Talk at Speech Clinic

A Wayne High School sophomore will be one of the students giving demonstration speeches during the annual speech clinic at the University of Nebraska-Lincoln later this week.

He is Mike Schmidt, son of Mr. and Mrs. Burton Schmidt of Wayne.

He will demonstrate on informative speaking during the clinic, slated for Friday and Saturday at NU.

Also attending the clinic from Wayne High on Saturday will be six or seven members of the school's speech club and club sponsor Ted Blenderman.

Blenderman said the clinic will attract high school students from across the state. Selected students will give demonstration talks in extemporaneous speaking, informative public address, duet acting, informative speaking and interpretation of drama, prose and poetry. Critiques will be given of the talks so students can learn more about giving speeches during clinics and contests.

Speech club members at Wayne High will be taking part

MIKE SCHMIDT

in their first clinic later this month. The clinic will be held at the University of South Dakota at Vermillion on Oct. 20. Students from Nebraska, Iowa and South Dakota are expected to attend the clinic.

Veterans' Benefits

Questions, Answers

Q. I will be discharged from the armed forces in September, but would like to file an application for schooling now. How do I do this?
A. You should apply now to the school of your choice for acceptance. Following acceptance by the school and discharge from service, you and the school should complete all parts of VA Form 22-1990 and submit it to your local Veterans Administration office with a copy of your discharge (DD 214). VA will then authorize your educational benefits.

Children less than 12 years old must wear life preservers at all times while boating on Nebraska waters.

County Youth Is Among 4 Chosen To Attend Annual Dairy Conference

Four Nebraska 4-H'ers will learn about vocational and professional opportunities in the dairy industry at the 19th annual 4-H Dairy Conference to be held in Madison, Wis., today (Thursday) through Saturday.

Among the four is Raneë Kniesche, daughter of Mr. and Mrs. Victor Kniesche of rural Wayne. The other 4-H'ers come from Syracuse and Norfolk.

The conference is primarily educational. University of Nebraska-Lincoln extension dairy man Phil Cole said. Its purpose is to provide 4-H youth with a better understanding of the operations involved in the production, processing, marketing and use of dairy products, and to teach the 4-H'ers to cooperate to achieve objectives.

Raneë, an 18-year old NU freshman, has completed 4-H projects in sewing, foods, safety,

RANEË KNIESCHE

junior leader, home living and dairy.

She was elected as the District Dairy Princess this year, and competed at Ak-Sar Ben for the Nebraska 4-H queen of Ak-Sar-Ben title.

She has won five gold medals from the county, two trophies and two plaques for demonstrations on dairy foods.

One of the main events at the conference, held in conjunction with the seventh World Dairy

Expo, will be a 4-H Marketing Clinic where youths from different states will have the opportunity to discuss different marketing techniques and procedures. Cole said.

Participants will see exhibits and research facilities at the University of Wisconsin Dairy Cattle Research Center, and will be given guided tours of the

Expo by representatives from the different dairy breed associations.

The four Nebraska representatives, Cole explained, were selected by a two-step process.

Ten youths are initially chosen on the basis of their award and activities record," he said. "Applicants are then interviewed and tested on 4-H dairy material."

Highlights at Ak-Sar-Ben

DON KUBIK, district dairy specialist at the Northeast Station near Concord, judges animals in dairy showmanship during last year's Ak-Sar-Ben livestock show in Omaha (top photo). He was given the honor in recognition of his placing among the top two in showmanship at Ak-Sar-Ben 25 years ago. Handing out one of the showmanship ribbons during the competition (photo at right) is Linda Baier, daughter of Mr. and Mrs. Merrill Baier of Carroll. Linda is the state dairy princess.

Tax Burden Is Speech Subject For Realtors

The excessive burden that escalating property taxes are placing on property owners will be one of the topics to be discussed by J. D. Sawyer, president of the National Association of Realtors, at the 56th annual convention of the Nebraska Realtors Association in Norfolk next week.

President of the Nebraska organization is Lincoln realtor Lloyd Hinkley. One of five vice presidents of the group is Walter Moller, Wayne realtor.

Sawyer will speak at a Tuesday evening dinner on the first day of the convention. Sawyer, of Middletown, Ohio, is a past president of the Society of Industrial Realtors and headed the Ohio Realtors Association.

The convention starts Tuesday and is set to conclude with a Friday lunch. More than 400 are expected to attend.

Sawyer will also be discussing land use legislation before Congress as well as federal housing programs.

As head of the National Association of Realtors, Sawyer is spokesman for more than one half million realtors and their associates.

Farmers May Benefit By Permitting Grain To Dry in the Field

If field drying conditions are good this fall, it may be better for farmers to let grain dry down in the field before harvest, even if it means some field loss.

Dr. D. G. Hanway, chairman of the University of Nebraska, Lincoln Department of Agronomy, made the observation last week following a meeting of the Nebraska Grain Marketing and Utilization Committee.

The group agreed that with the looming shortage of fuel for drying grain, farmers should do everything possible to stretch the supply as far as possible.

The committee agreed that much of the record crop will have to be stored on the farm, challenging the Nebraska farmer's ability to manage it in storage to minimize damage from molds and insects.

If we have a normal fall, grain in the field could be down to the 18 to 22 per cent moisture range by Oct. 20, according to Dr. Thomas L. Thompson, UNL agricultural engineer.

At that moisture level, the grain could be harvested and dried further in a bin with natural air forced through it at proper rates, he said.

County agents will have information on forced air rates for natural air drying, he said.

Fans should be run continuously until the grain gets down to about 18 per cent moisture during winter months, he said, then the fan should be run two or three hours a day two or three days a week until spring

temperatures warm up.

Delbert E. "Red" Lane, extension agricultural engineer, said probably field losses can be computed according to the moisture content of corn in the field. Because of varying weather conditions from year to year, it is difficult to tie percentage field losses to a particular date in making harvest decisions, he explained.

On warm, windy September days, moisture content may drop as much as a point a day, Lane continued. However, in October, with shorter days, cooler daytime temperatures, possible frost and moisture on corn husks each morning, moisture content may drop only a half point or less each day.

With moisture content known, however, reliable estimates can be made of corn losses at harvest. These losses are total, Lane emphasized, including ear drop in the field, as well as all losses from ears knocked to the ground in harvesting, shelled corn losses with the picker or picker/sheller, and other machine losses.

He listed the following figures on total field and harvesting losses, tied to moisture content.

Per Cent of Moisture	Per Cent of Total Potential Yield
26	10
24	10 1/2
22	11
20	12
18	14
16	16
14	17

'Farmers Should Plan for Top Idle Acre Production'

Farmers should take important steps now to insure top production next year from what are now diverted or idle acres by getting soil samples from these fields this fall, advise University-of-Nebraska extension agronomists.

Samples should be taken if the diverted or idle acres are to be either cropped or pastured next year, they note.

Extension agronomist Del Knudsen and district extension agronomist George Rehm of the Northeast Station near Concord said that weeds and grasses can remove substantial amounts of plant nutrients in one year's time so top production requires that these nutrients be replaced with commercial fertilizers.

Rumors of a possible fertilizer

shortage next year prompted the agronomists to stress soil testing now so that fertilizer can be ordered early. "Avoid a last minute rush to order — it could insure your purchase," warned Rehm.

With fertilizer suppliers (especially nitrogen) expected to be tight, Knudsen said it's important to apply the right amount of fertilizer. Accurate nitrogen recommendations can be made when soil has been collected from two depths — from zero to eight inches and from eight to 24 inches at the same spot.

"Keep these samples separate. Samples from three or four feet are preferred from irrigated fields. If this sampling procedure is followed, excessive applications of nitrogen to both row crops and pasture can be avoided," the agronomist said.

"The cost is still low," they encouraged. "The Soil Testing Laboratory at the University of Nebraska charges from \$2 to \$6 per sample — depending on the type of test that is run. Since a soil sample should represent 20 acres, this cost amounts to \$10 to \$30 per acre. County extension offices have more details on taking soil samples correctly."

Rural-Urban Group To Meet Saturday

Next meeting of the Northeast Nebraska Rural-Urban Youth Organization will be Saturday at 8 p.m. at the Northeast Station east of Concord.

Last meeting of the organization, open to both rural and urban young people, was in the middle of September. Guest speaker was Dr. Ron Daly, extension family life specialist with the University of Nebraska. Dr. Daly will be guest speaker again Saturday.

4-H Club News

Do Bee's 4-H Club
Members of the Do Bee's 4-H Club enjoyed achievement night Sept. 24 in the Verl Carlson home with mothers as guests.

Mrs. Evert Johnson conducted games and led in the discussion of state fair activities. Record books were handed in.

Newly elected officers are Mary K. Nelson, president; Pam Johnson, vice president; Tammy Carlson, secretary; Kay Anderson, treasurer; and Cheryl Koch, news reporter.

Lunch was served by Mrs. Carlson.

News reporter, Tammy Carlson.

zenshi, and Shelly Luedtke and Alvina Anderson, callers.

News reporter, Diana Rhodes.

Teens and Tweens
The Teens and Tweens 4-H Club met Sept. 24 for achievement night in the Wallace Magnuson home with five members and two guests, Mrs. Winton Wallin and Mrs. Howard Gaunt, present.

Members were shown the places they received at the county and state fair and the comment sheets, followed by bingo and taffy pulling.

A potluck lunch was served.

Deer Creek Valley
Deer Creek Valley 4-H Club members held their achievement meeting Sept. 24 in the Wallace Anderson home. Twelve members answered roll call by showing the ribbons they earned during the year. Four guests were also present.

Joan Loberg joined the club. New officers were elected as follows: Steve Lee, president; Don Nelson, vice president; Amy Finn, secretary; Kay Anderson, treasurer; and Cheryl Koch, news reporter.

Members chose projects for the coming year.

Next meeting will be a hay ride Oct. 7 at the Merrill Baier farm. Each member is to bring wieners and buns and one guest.

Eileen Finn, news reporter.

Concordette 4-H Club
The Concordette 4-H Club met Sept. 24 at the Northeast Station, Concord, with 13 members attending.

Ribbons were passed out for judging. Record books were worked on and are to be completed by Oct. 1.

Newly elected officers are Kathi Stohler, president; Deanna Erwin, vice president; Darcy Harder, secretary; Julie Stohler, treasurer; Diana Rhodes, news reporter; Jill Hanson, cti-

State ASC Head Urging Efficient Fertilizer Use

Because of anticipated tight supplies, efficient use of fertilizers this fall and next spring is of vital importance to Nebraska farmers, according to Stanley Dodson, chairman of the State Agricultural Stabilization and Conservation (ASC) Committee.

Farmers should begin now to make every effort to conserve and make efficient use of plant nutrients, Dodson said, and they should use soil tests to determine crop nutrient requirements rather than just pouring fertilizer on.

Pointing out that the cooperative extension service is expanding its education activities in this area, Dodson said that ASCS is providing support in getting information to farmers.

In addition to soil testing, farmers also are being encouraged to plan fertilizer needs well in advance and to discuss them

with suppliers. Dodson noted. With a more accurate indication of local fertilizer needs, suppliers will hopefully be able to provide their customers with the plant foods they need, he explained.

Farmers should correct the PH, or acidity, level of their soil to gain optimum results from fertilizer materials, according to Dodson. Soil test results, along with guidance from the County Extension Agent or their supplier, will indicate the corrective application needed to adjust the PH level. Farmers also should make maximum use of manure and crop residues.

Dodson noted that a primary factor responsible for light fertilizer supplies is expanded crop production planned for 1974 in response to growing domestic and export requirements for farm commodities.

The Unround Grain Bin

Store Grain Safely Until the Price Is Right; Then Put Your Machinery in the Low-Cost, All-Steel Butler Farmstead® Building!

Why invest separately—and expensively—in both grain storage and machinery housing? The new low-cost Butler Farmstead building makes it so easy and economical to combine the two. Use an all-steel Farmstead to store your grain until the market price is right, or until you're ready to feed it out. Then, move your valuable machinery and equipment into post-free, weathertight, fireproof storage. For example, a 48' x 72' x 14' Farmstead will hold a lot of machinery, or you can store more than 22,000 bushels of grain. Other building sizes available.

NRD Board Discusses Subdividing

The monthly Lewis & Clark Natural Resources District meeting in Hartington in September included discussion of subdividing the district into smaller areas for the purpose of election of directors in 1974.

The board tentatively settled six subdistricts, with two representatives each and one representative at large. Ideas on where the subdistrict lines should be were discussed and tabled for the time being to allow the public an opportunity to voice opinions on both subdistrict lines and the number of representatives.

Other topics discussed included construction of a Flood Control structure on Greg Stefans farm north of Crofton. Several board representatives commented on the trip to the annual Nebraska Association of Resources District Convention in Kearney.

BRIAN BOWERS TODD PFEIFFER KEVIN NISSEN TIM THOMAS MITCH PFEIFFER VAL JOHNSON

Winside, Wakefield, Wayne Youths Top PP&K Contest

RUNNERS-UP in Sunday's Ford-sponsored Punt, Pass and Kick contest were these 12 local and area youngsters. Taking second place in their age divisions were, front row from left, Shaun Niemann, Mark Koch, Roger Echten-

kamp, Brian Fleming, Paul Roberts and Brad Emry. Coming in third were, back row from left, Steve Rethwisch, Tim Heier, Keith Turner, Jeff Sperry, Sean Wills and Dean Carroll.

Six youths from Winside, Wakefield and Wayne will travel to Fremont Sunday to try to climb one more step on the ladder leading to the Super Bowl.

They are the winners in Sunday's Ford sponsored Punt, Pass and Kick contest held at Wayne State's Memorial Stadium. The local contest was the first of six levels of competition in the national event held each year.

Scoring the most points in their age groups were eight year old Brian Bowers, son of Mr. and Mrs. Dennis Bowers of Winside, nine-year old Todd Pfeiffer, son of Mr. and Mrs. Don Pfeiffer of Wayne, 10-year old Kevin Nissen, son of Mr. and Mrs. Wayne Nissen of Wayne, 11-year old Tim Thomas, son of Mr. and Mrs. Jim Thomas of Wayne, 12-year old Mitch Pfeiffer, son of Mr. and Mrs. Clarence Pfeiffer of Winside, and 13 year old Val Johnson, son of Mr. and Mrs. Floyd Johnson of Wakefield.

The six will compete Sunday afternoon at 2 p.m. at Midland College in the zone contest, winners of which advance to the district level at Omaha. Top scorers at Omaha compete in the area contest, followed by divisional competition and national competition. The finals in the annual contest will be held in Miami in January during the Super Bowl pitting the two top professional football teams in the country.

Second and third place winners respectively in their age groups were Shaun Niemann, Carroll, and Steven Rethwisch, Wayne, eight, Mark Koch and Tim Heier, both of Wayne, nine, Roger Echtenkamp, Wakefield, and Keith Turner, Wayne, 10, Brian Fleming and Jeff Sperry, both of Wayne, 11, Paul Roberts, Carroll, and Sean Wills, Wayne, 12, and Brad Emry and Dean Carroll, both of Wayne, 13.

A total of 60 youths from around the area took part in the contest, conducted again this year by members of the Wayne Lions Club. Heading up the committee in charge of running off the competition in the three areas was Harold Maciejewski.

All 18 youths will be presented trophies by Worlman Auto Co. of Wayne during halftime ceremonies of the Wayne State Chadron State game Saturday afternoon at Memorial Stadium.

CREDIT CARD USE
How careful are you with the use of the credit card? Does it encourage impulse buying on your part? It could be a budget breaker - a convenient form of credit depending upon your use of it.

The typical credit card user has only three cards. These cards are used often and usually accepted in certain stores. Credit cards are more prevalent in suburban areas and least used in rural areas.

The credit card user can establish a credit rating that could be valuable when it comes to making a large purchase on time. It is also a convenience, particularly during shopping or traveling, and in some cases, cash can be advanced on them.

With consistent credit card usage, a person has only one check to write at the end of each month. And no interest is charged on this amount if it is paid in full before a specified due date.

Some drawbacks occur when:

1. The consumer loses or has the credit card stolen. He needs to inform card issuance company immediately.
2. The temptation to buy more than they can afford, banking on having enough money at the end of the month to pay the bill from the credit card corporation.
3. Keeping track of expenses.

since purchases during the month don't always appear on that month's statement.

4. Returning a purchase made with a credit card, since the credit card company pays the store for the purchase.

Reports Are On Agenda for School Board

Members of the Wayne Carroll school board will hear several reports by superintendent Francis Haun during Monday night's regular board meeting.

The school board meets at 8 p.m. at the high school.

Haun will report to the board on the school's special education program in grades five through 12; on the "special task" force which is being formed to study the school's extra-curricular activities and on the recent retro active increase in workman's compensation insurance rates.

Haun also will discuss the coming state school boards association's annual convention. The convention is scheduled for Nov. 8-9 in Lincoln.

Business Notes

Laurel Firm Has Open House

Open house was held Sept. 22 at the new Skovbo Cafe in Laurel, operated by Mr. and Mrs. Paul Skovbo.

Located on a Main Street corner, the restaurant will serve from 6 a.m. to 8 p.m. Monday through Saturday and from 7:30 a.m. to 1 p.m. Sundays.

Cash Dividends Coming

Dairy farmers in Northeast Nebraska area whose milk is processed at the Associated Milk Producers, Inc. (AMPI) Plainview plant will be receiving over \$81,300 in cash dividends.

The dividends are part of over \$4,598,000 in cash and deferred equities which will be distributed among the nearly 14,000 producer-owners of the North Central Region of AMPI, which includes dairy farmers from Missouri, North and South Dakota, Iowa, Minnesota, Wisconsin and Nebraska. The \$4 1/2 million breaks down to just over 14 cents per hundredweight for all the milk marketed this past year in the region.

Of the \$4 1/2 million, \$2,963,000, or over 9 cents per hundredweight, will be distributed in cash and the remaining will be part of the patron's equity reserve to be paid at a later date.

Doni Gregg, regional manager said, "We've had a very successful year in the North Central Region and, in keeping with AMPI policy, we are proud to be able to distribute this substantial dividend during a time when the cost-price squeeze is making it difficult for the family farm operation of stay in production."

Hoskins Garden Club Meets

Christine Leuker was hostess to the Hoskins Garden Club in the home of Mrs. Lena Ulrich Thursday afternoon. Guests were Mrs. Lena Ulrich, Lori Fenske and Mrs. Dale Coakley, who became a new member.

President Mrs. Walter Fenske, gave the welcome and led in prayer. She also read a poem, "Garden Parade."

The hostess' favorite hymn, "Little Brown Church in the Vale," was sung. Mrs. Lena Ulrich read a poem, "Never Borrow Sorrow." Cheer cards were sent to Mrs. Evelyn Krause and Mrs. Walter Petersen.

Miss Leuker gave the comprehensive on the "Hydrangea." She also conducted three contests on the flower basket, vegetables and flowers. Mrs. Bill Fenske gave the lesson, "Conversation About Chrysanthemums."

A dessert luncheon was served.

Next meeting will be Oct. 25 in the Walter Fenske home.

Mrs. Fred Bargstadt and Mrs. Harold Brudigan and Jill spent Monday in the home of Mrs. Bessie Kuder, Creighton.

Mrs. Willis Willis, Shelby, was a Thursday overnight guest in the home of Mrs. Katherine Asmus.

Mrs. Harlan Herbolzheimer and Mrs. Harold Wulf, Pierce, spent Monday in the Elphie Schellenberg home.

The Lester Koepkes spent the weekend in the Richard Phipps home, Lincoln.

Lewis Tiedkes, Mesa, Ariz., Lloyd Behmers, Winside, and Lonnie Behmers and Scott, Norfolk, were Saturday supper guests in the Harvey Anderson home.

Mrs. Harold Brudigan attended the Wigwag Beauticians Educational Beauty Show at the Civic Auditorium in Omaha Sunday.

Hoskins News

Mrs. Hans Asmus Phone 565-4412

Mr. and Mrs. Wilfred Peirce, Von Nuys, Calif., came Saturday to spend several days in the Clarence Schroeder home.

The Vernon Behmers and Mrs. Evelyn Krause were Friday visitors in the Bill Jacobs home, Howells.

Society -

Birthday Club

Mrs. Howard Morris, Wayne, entertained the Birthday Club Saturday afternoon in honor of her mother, Mrs. Ras Nielsen. Mrs. Pauline Marquardt was a guest.

Three tables of bunco were played. Mrs. H. C. Falk received high prize. Mrs. Paul Scheurich, second high, and Mrs. Mattie Voss, low.

Birthday Guests

Relatives and friends from Lincoln, Battle Creek, Norfolk, Winside and Hoskins helped Fred Marquardt celebrate his birthday Saturday evening.

Card prizes were won by Clarence Bauermeister, Mr. and Mrs. Jim Raabe and Mrs. Pauline Marquardt.

Marks 5th Birthday

Russell Puls, Michael Mumm, Michael Backstrom, Jim McCallison, Ronnie Hoferer and Billy Wagner were guests in the Seven Davids home Friday afternoon for Paul's fifth birthday.

Ice cream and cake were served.

The Iryl Svensons, Stanton, and Mr. and Mrs. Fred Davids, Norfolk, were Saturday evening

guests in the Steven Davids home for Paul's fifth birthday.

The Don Volwiler family, Carroll, and Mrs. Katherine Asmus were Sunday evening luncheon guests in the Gary Asmus home for Mrs. Volwiler's birthday.

Mrs. Wayne McDonald, Huron, S. D., was a Saturday and Sunday overnight guest in the Kathryn Rick home.

Mrs. Clarence Koepke spent from Monday until Wednesday in the Richard Hobson home, Lincoln.

Mrs. Meta Pingel attended funeral services for Mrs. John Kumm at Osmond Saturday.

Mrs. Wayne McDonald, Huron, S. D., and Mrs. Emma Goetsch, Omaha, were Sunday dinner guests in the Ernst Eckmann home.

Play Casting at WHS Underway

Casting is underway for the first all-school play scheduled this school year by Wayne High School's drama club.

Planned for Nov. 31-Dec. 1 is "Tell Me That You Love Me, Junie Moon," a humorous story centering on three handicapped persons and their attempts to adapt to society.

Ted Blendenman, club sponsor, said there are some problems involved in casting for the play, but if all the roles are filled rehearsals may begin next week.

Leadership of a mule deer herd is usually assumed by an old doe rather than a buck.

Sunday supper guests in the Glen Westadt home in honor of the host's birthday were Rev. and Mrs. Dale Westadt, Wymore, Mrs. Cleone Westadt, Jefferson, S. D., and the Jim Westadt family, Laurel.

Youth Treated After Accident

A 16 year old Laurel youth was taken to the Wayne Hospital with a bruised right side after the car he was traveling in was struck by another vehicle near Lincoln and W. Seventh at 3:15 p.m. Saturday, local police report.

Chris Suber, riding in a car driven by Nance Proett of 103 S. Maple, was treated and released after the collision with a pickup driven by Fred Hinrichs of Canistota, S. D., according to the Wayne police department.

Later that day a car operated by Donald Nelson of rural Wayne struck an unidentified vehicle near Sixth and Main about 9 p.m., police said. Nelson told officers his car sustained front end damage.

About 11 p.m. Friday a parked car owned by Randall Johnson of rural Wayne was struck by a car driven by Larry Sievers, also of rural Wayne, police added.

Sievers said he was backing up and did not see the Johnson car, according to police.

There were 55,700 traffic deaths in 1972 and more than 4,850,000 injuries. This is up from 54,000 deaths and 4,700,000 injuries recorded last year.

Harland Pankratz took over as the new president of Wayne Kiwanis Monday in place of Bob Carhart, who becomes a member of the club's board of directors as past-president.

Joining Pankratz during the official installation ceremony by lieutenant governor Ray Schriener of Wayne were Don Koeber as secretary-treasurer and Dan Sherry as vice president.

Sherry took the place of Dale Gulshall while Koeber replaces Bob Jordan.

Two new board members also were installed. They are Cal

Cyclathon Postponed

The cyclathon, planned by Laurel band parents to raise money for their uniform fund, was not held Saturday because of weather conditions, and has been rescheduled for this coming Saturday.

David McElroy, band instructor, expects 130 band members to take part in the event. Cash prizes will be awarded riders with the most sponsors.

Goal for the cyclathon is \$1,300.

Ward and Leon Meyer, replacing George Phelps and Cal Comstock.

Carhart, in thanking club members and committee chairmen for their help through the past year, noted that it "was not a record setting year as far as activities were concerned but we did accomplish many things."

Perfect attendance awards were presented to four members before installation of the new officers. Dick Manley led the group with a 15 year pin while Orvid Owens was awarded a four year pin. Two new officers, Pankratz and Koeber, were honored with two and one year pins respectively.

During the board meeting, members voted to increase yearly dues by \$5 to \$25.

President Pankratz cited rising costs as the main factor for the increase.

Also, Pankratz appointed past presidents Carhart and Keith Mosley as the nominating committee for a new president elect to replace Dale Gulshall.

The members also approved dropping Irv Brandt from the club part of the year.

WAYNE KIWANIAN Harland Pankratz, left, took office as the club's new president Monday along with two other new officers and directors: Leon Meyer, second from the left, is a new director, as is Cal Ward, second from the right. Don Koeber, center, is the new secretary-treasurer. Dan Sherry, right, the new vice president.

BECAUSE THE PEOPLE MUST KNOW

CITY COUNCIL PROCEEDINGS

September 11, 1973
Wayne, Nebraska

The Mayor and City Council met in regular session in Council Chambers at the Wayne City Auditorium on September 11, 1973 at 7:30 P.M.

The Mayor called the meeting to order with the following present: Mayor Kent Hall, Councilmen Frank P. Prather, Darrel Fuetberth, Vernon Russell, Harvey Brasch, Pat Gross, Jimmie Thomas, City Attorney John Addison and City Clerk Dan Sherry.

Absent: Councilman Keith Mosley, Councilman Ivan Beeks.

The Mayor presided and the Clerk recorded the proceedings.

Notice of the meeting which was convened and open to the public was given in advance thereof by publication in the Wayne Herald on September 10, 1973, a copy of the proof of publication being attached to these minutes and by notification over Radio KTCH of Wayne, Nebraska. Notice of this meeting was simultaneously given to the Mayor and all members of the City Council and a copy of their acknowledgment of receipt of notice and a copy of the agenda is attached to these minutes.

Availability of the agenda was communicated in advance to the Mayor and City Council of this

meeting. All proceedings hereafter shown were taken while the Council convened meeting was open to the attendance of the public.

Motion by Councilman Prather and seconded by Councilman Russell that, whereas, the City Clerk has prepared copies of the minutes of the last regular Council meeting for each Councilman and that each Councilman has had an opportunity to read and study same that the reading of the minutes be dispensed with and the same be declared approved.

Absent: Councilman Russell requested some additional wording be included in the minutes, of his statement and Mayor Hall's reference notes, which was approved.

The Mayor stated the motion and directed the Clerk to call the roll. Roll call resulted as follows:
Yeas: Prather, Fuetberth, Russell, Brasch, Gross, Thomas.
Nays: None

The result of the vote being 6 Yeas and no Nays, the Mayor declared the motion carried.

A Radio Beacon for the Municipal Airport was discussed. Estimated costs at \$600.00 per year.

Councilman Gross stated that he had contacted two pilots that endorsed the proposal 100 per cent and that, in his opinion, may increase hangar leasing.

Attorney Addison indicated that such equipment would enable flyers to land at the Airport with 500 to 600 foot ceilings and would also enable flyers to more easily find the Airport.

Attorney Addison was authorized to obtain information an exact cost.

The Chicago and North Western Transportation Company license to construct a sanitary sewer under the tracks was presented and the Clerk was authorized to prepare copies of the proposal and distribute to all Councilmen for their study prior to the next Council meeting.

Letters were read by the Clerk and placed on file.

Mayor Hall presented the appointment of Mr. Fredric Brink to the office of City Administrator effective October 1, 1973 at a monthly salary of \$1,350.00.

Motion by Councilman Russell and seconded by Councilman Gross that

the appointment of Fredric Brink as City Administrator be approved.

The Mayor stated the motion and directed the Clerk to call the roll. Roll call resulted as follows:
Yeas: Prather, Fuetberth, Russell, Brasch, Gross, Thomas.
Nays: None

The result of the vote being 6 Yeas and no Nays, the Mayor declared the motion carried.

The proposed City Pension Plan was presented to Council at this time and as Council had no previous contact with the contents of the proposal, Mayor Hall requested an executive session on September 18, 1973 at 4:00 P.M. to discuss the proposal with the assistance of the City Attorney and Advisor, Tom McClain.

Motion by Councilman Gross and seconded by Councilman Fuetberth that the next item on the agenda be stricken from the agenda.

Upon roll call all voted Yea and the Mayor declared the motion carried.

Police Sergeant salary was the next agenda item and it was moved by Councilman Prather that the proposal on Police Sergeant salary be tabled.

Upon roll call the following vote was had:
Yeas: Prather, Russell, Gross, Thomas.
Nays: Fuetberth, Brasch.

The result of the vote being 4 Yeas and 2 Nays, the Mayor declared the motion carried.

Preliminary plans report on the Wayne Comprehensive Plan was

presented to Council at this time for their study.

Attorney Addison indicated the NPPD contract with the City was being held up as negotiations could not proceed as NPPD representative was not available at this time.

The Police Reserve Ordinance was discussed and it was moved by Councilman Russell and seconded by Councilman Prather that the Police Reserve Ordinance be referred to the Public Relations Committee for study and recommendation.

Upon roll call all voted Yea and the Mayor declared the motion carried.

Councilman Prather declared that he would like to see standards set for a training program for Police Reserve.

Councilman Gross suggested trainees should be paid minimum wage while in the training program.

Councilman Fuetberth stated that some consideration had been given to an allowance for police uniforms but would present at the next meeting.

Councilman Thomas stated that Consolidated Engineers should continue with those projects in progress such as water and sewer to the new Hospital, water and sewer on West 7th Street and Fuel Storage Tanks.

Motion by Councilman Gross and seconded by Councilman Brasch that Consolidated Engineers be authorized to complete the feasibility study of the Hospital.

The Mayor stated the motion and directed the Clerk to call the roll. Roll call resulted as follows:
Yeas: Prather, Fuetberth, Russell, Brasch, Gross, Thomas.
Nays: None

The result of the vote being 6 Yeas and no Nays, the Mayor declared the motion carried.

Mayor Hall stated that Consolidated Engineers stored much of the City's records, such as maps, plans, specifications, etc. and that arrangements should be made for the City to store these items.

There being no other business to come before Council at this time, it was moved by Councilman Russell and seconded by Councilman Prather that Council adjourn.

Upon roll call, all voted Yea and the Mayor declared the motion carried.

Mobile Van Rolls Toward Wayne

The Veterans Administration's "office on wheels" — a large red, white and blue mobile van — continued on its way toward Wayne this week with stops at Chadron, Valentine, O'Neill and South Sioux City.

The van will be in Wayne all day today (Thursday). It will be parked at 108 Main St. and will be open from 9 a.m. to 6 p.m. From Wayne, the van will go to Norfolk.

The van, whose purpose is to reach veterans and their families who have not made full use of their VA benefits, began its more than one-month's trek to 28 communities in the state with dedication ceremonies at Kearney.

In its two days at Kearney, VA benefits specialists aboard the van serviced almost 100 veterans and family members. From Kearney, the van traveled to Holdrege, Broken Bow and Lexington.

Speaking at the dedication, Congressman Dave Martin of Nebraska, said the purpose of the mobile van is to bring to the small communities of the nation information and programs that the VA has available for veterans.

He said the two VA counselors aboard the van can answer questions and provide advice and counsel similar to the services a veteran would receive if he went to the VA regional office in Lincoln.

Richard Roudebush, assistant deputy administrator of Veterans Affairs in Washington, D. C., described the mobile van program as an extension of the VA's "outreach" program which has included counseling servicemen in Vietnam and at military separation points, military hospitals and other locations.

"The success of all these efforts can be seen in past services rendered to Nebraska's 87,000 veterans, including 20,000 Vietnam-era veterans, of which

Mobile Van Rolls Toward Wayne

5,000 actually saw service in Vietnam," he noted.

Roudebush said over 9,000 of these veterans are currently taking advantage of their GI Bill benefits by attending colleges, training schools and other educational institutions in Nebraska. He said the VA disbursed over \$94.7 million in Nebraska last year to provide veterans with benefits and services.

Nebraska is the 38th state in the nation to get a VA mobile van since the program started more than one year ago. VA vans have logged over 154,000 miles and have assisted approximately 76,000 veterans and their family members in 1,400 communities since the program's inception, he said.

On Tuesday, Oct. 9 from 8p.m. to 11 p.m.

Here's What You Must Do to

Get Your Auto to Last Longer

With new car sales hovering around all-time record volumes this year, the pundits and prophets have offered a wide variety of reasons for the boom. Among the reasons most often cited was this: Cars in the near future may be higher in price due to emissions and safety systems mandated by the government.

Still it seems that many 1973 and 1974-model car buyers want to take advantage of lowest possible prices now and presumably want to keep these cars as long as they can. Certainly, new cars will continue to be attractive buys for millions of motorists annually. The thrill of new car ownership is a never-ending one.

Lamentable History of Neglect

While the theory is sound, the motoring public will have to do a lot better job than they have been doing if they want their new cars to last. For the lamentable history of car neglect that has been so evident in this country has always meant that vehicles are ready for the scrap heap well before their time.

There are more motor vehicles junked in this nation every year than there are vehicles registered in all of South America. Only five nations in the world have more cars than the number of cars relegated to scrap heaps here each year.

And a large proportion of our derelict vehicle population got that way because of neglect.

If you want to get your car that extra couple of years, you must pay more attention to car care.

The benefits of car care outweigh the costs considerably.

For example, the nationally-syndicated columnist Sylvia Porter recently noted, "Tune-ups pay for themselves in savings on fuel consumption and engine wear. And as gas prices climb, a tune-up will more than pay for itself."

Other instances of how caring for a car lengthens its lifespan and saves money in the meantime are many.

- Changing oil and oil filters and lubrication at

THE NEW TUNE-UP — The days when tune-up and other critical automotive services could be performed with tools that fit comfortably in the technician's back pocket are fading into history. Today, with demands of keeping emissions low and performance up to rigidly prescribed standards, the automotive service industry is utilizing space-age tools for accurate diagnosis. A chassis dynamometer under the car's rear wheels can simulate any condition a car is apt to encounter on the road. An electronic engine analyzer (upper left) can monitor everything that's going on under the hood including emission of hydrocarbons and carbon monoxide. A visit to a well-equipped shop and any needed adjustments can assure any driver that his car is ready for the tough fall and winter driving ahead. (Photo: Courtesy of Clayton Manufacturing Company)

recommended intervals helps prevent premature engine and chassis wear.

- Balancing and rotating tires and aligning wheels add 25 per cent or more to the life of a set of tires.

This does not even take into consideration the servicing of safety components that help prevent accidents. Certainly keeping brakes, lights, tires, windshield wipers in good operating condition are keys to safe driving. Maintaining the cooling system is another must for trouble-free driving.

Also, many cars are premature junkyard candidates because of body neglect. So, keeping a car clean, free of rust spots and dents can add years and value to your car.

Winter Especially Hard on Cars

In this fall and winter season approaching, the elements are particularly hard on a car. In colder climates, the ignition and cooling systems especially take a severe beating.

So, to make sure your car gets through the season in good shape and to add those extra years of life to your vehicle, bring it in to your favorite service outlet for a thorough check-up and for necessary services.

This Care For Your Car section is devoted to helping you know what it takes to keep your car young as the miles and months pile on.

Weight on Tires

If you will be using a trailer, camper or motor home be sure to check the weight you are putting on your tires. Surveys show about 20% of all recreation vehicles are exceeding the maximum loads their tires should carry.

You can check with your

tire dealer, your vehicle owner's manual or your dealer to determine maximum tire load. Then have your vehicle weighed, fully loaded, on a public scale.

A vehicle with overloaded tires will handle poorly and in case of a blowout control problems will greatly increase the chance of a serious accident.

Is Your Car Up To The Winter-Travel Miles Ahead?

Stop in or phone us for an appointment for our quality car care service.

Do-It-Yourself Safety—Check Belts, Hoses

Vital Operation of Car Affected; What's More: Special Training, Tools Aren't Required

Today's cars are more complicated than ever, but there are still some under-the-hood things you can do for yourself. Some, like checking your battery, radiator, and oil level, are things you probably already do. But you may not have realized that you can also check your own belts and hoses in a jiffy, without special tools or training.

In fact, more and more car owners are not only checking these vital parts, but are also discovering that it's not too difficult to install the replacements themselves.

These often-neglected belts and hoses can cause a lot of trouble if they're allowed to deteriorate. A loose V-belt can cause your motor to overheat, your gas consumption to rise, and your accessories to malfunction. And a burst hose can cause your engine to overheat to the point of total destruction.

BELTS

Most belts look fine on the top, even when they're in terrible condition. So, when you're checking your car's V-belts, be sure you look at the sides and bottoms. Here's what to look for:

- Cracks on the underside are rapidly made larger by flexing. Belt can break without warning.
- Glazing — slick hard sides cause low battery and overheating.
- Grease-softened underside and slick sides cause slipping — also rot rubber.
- Peeling — Undercore peels or frays at bottom corners so that belt runs rough — soon fails.
- Split belt — Top of belt may look good, but undercore may be split or sides badly worn.

And while you're checking the condition of your V-belts, you should also check to be sure that they're properly tensioned. A loose and slipping belt slows fan, pump and generator — causes poor cooling, overheating, battery failure. It is difficult to over tension a belt with ordinary tools.

Check belt tension and

tighten as necessary. As a rule of thumb, tension is proper when belts can be pushed down about 1/4" at midpoint between pulleys.

HOSSES

Many hose defects can be spotted just by looking, but it's always a good idea to check each hose for softening or hardening, by squeezing. Rubber hoses should be firm, but not brittle. Things to check for are the following:

- Cracks and breaks cause leaks that can't be stopped by tightening clamp. Squeeze. If cracks go to cords, replace hose.
- Hardened hose is stiff — transmits shock to radiator — fails without warning. You can't seal by tightening clamps.
- Swelling — Spongy ends or swelling indicate that hose has been ruined by oil or grease.
- Hidden failure—Hose may look good, but it may be deteriorated inside, clogging radiator with particles. Squeeze it, and replace if soft.

• Worn clamps—When checking hose, replace clamps that can't be tightened. If you replace hose, always replace clamps.

Car Air Conditioners Need Winter Action

In the wintertime, when a car's heater is in daily use, many motorists neglect to safeguard the cooling capabilities of their air conditioners. Even though the owner has paid \$250 to \$400 or more for an auto air conditioning unit, he cannot take its trouble-free operation for granted.

According to automotive manufacturers, the air conditioner should be turned on and allowed to run for at least five minutes each week in cold weather, or during periods when it is not in frequent use. These workouts allow the fluids to freely circulate and flush the system, thereby reducing hose clogging. A weekly circulation of the air conditioner fluid also lubricates the seals and other fittings vital to its efficient operation.

The fluid — or refrigerant — might be termed the life blood of the air conditioning system. If circulation of the fluid is impaired or if it becomes contaminated with air or water, the air conditioner will not cool sufficiently — or it may fail completely.

Based on the average of 10,000 miles of driving per

year, your car's air conditioning system should be checked and serviced once a year — or every 10,000 miles, whichever comes first. This inspection and service should include the following:

- Check cooling system coolant
- Clean intake filters
- Clean condenser fins
- Test the pressure of the system
- Check Freon supply
- Tighten all hardware (compressor mounts, condenser mounts, and evaporator mounts)
- Inspect system for leaks (compressor, hoses, couplings and valves)

The five-minute weekly workout during cold spells or periods of infrequent use, plus the annual inspection and preventive maintenance as suggested here, are normally all that's needed to keep an air conditioning system in good working order year after year.

The cost of an annual inspection and tune-up won't break your budget — but major repairs or full replacement resulting from improper attention could.

Its value and many benefits notwithstanding, the auto air conditioner probably needs less attention than any other automotive system. But the attention it does require is important to its continued efficiency and to the owner's pocketbook.

What You Can Do While . . .

Waiting for the Tow Truck to Come

Waiting for a tow truck to help your car get started in winter is not one of life's most enchanting pastimes. Chances are, you're late for work, an important appointment or anything preferable to waiting for the wrecker.

It's too cold to practice your putting on the front lawn and you don't dare risk a short nap for fear that the road service driver may come and go before you can spot him.

So, what do you do?

Here's a suggestion that can both help occupy your time and prove helpful in preventing future starting problems. Pay attention to the signals your car is giving you while you are attempting to start it. Analyze the sounds and the odors and try and figure out just what the problem is.

No, it's not as simple as "my battery is run down." Your battery may be run down, all right, but most likely any battery problem is caused by malfunction of some other component.

If while attempting to start the engine, you hear the starter cranking but nothing happens, suspect one or more of the following conditions, Champion Spark Plug Company suggests. (The strong odor of gasoline may be present, too.)

More than half of the 80 plus million road service calls made annually by tow trucks are for starting trouble. Hard-starting remains the No. 1 problem faced by motorists. Yet, according to Champion Spark Plug Company, proper engine maintenance virtually could eliminate most causes of starting problems.

- Worn spark plugs
- Cracked distributor cap
- Worn rotor
- Burnt, carbonized or "stuck" points
- Worn or cracked wiring leads
- Coil or condenser failure
- Fuel system malfunction
- Emission control system defects

In cases where you do not hear any "cranking" of the engine at all, possible causes are:

- Battery run down or dead
- Inoperative starting motor
- Defective ignition switch
- Stiff or seized engine

Assuming none of these factors apply, other possible causes include:

- Out of fuel
- Carburetor flooding

Ready Exhaust System Will Mean Safer Breathing

The motorist can keep right on driving a car with a faulty exhaust system, but he's risking his life to do so — especially in the winter.

Contrary to safety rules, many people drive with closed windows. Thus, without proper ventilation, a motorist would breathe poisonous fumes, which might seep into the passenger compartment — should an exhaust pipe or the muffler be defective.

Muffler manufacturers estimate that over 75 percent of cars over one year old should have some kind of

exhaust system parts replacement. It may be only a clamp, but a loose clamp near a joint can be crucial.

It takes only a few minutes to have the exhaust system checked, which can be done while a car is on the lift for lubrication or other winterizing service.

When a car is raised, ruptures or weak spots in the exhaust pipes can be seen — and your service man can check the muffler for clogging. Deterioration of the exhaust system is mainly caused by condensation of the noxious vapors within the pipes.

Unfortunately, few persons ask to have the system inspected until a rusted tail pipe starts rattling — or the noise of a ruptured muffler cannot be ignored.

Noise caused by holes in exhaust parts may be slight at first. The person who drives in heavy traffic with closed windows may not recognize that the sound is coming from his own car. Meanwhile, he is a candidate for CO poisoning.

Only by a thorough check of the exhaust system can the motorist be sure he is not being exposed to the deadly fumes. The great

danger is that carbon monoxide is colorless, odorless and tasteless. It creeps up on its victims. The body can collect it over a period of time — therefore, a fatal dose is not necessarily a single large dose.

Exhaust gases also cause poor engine performance. When not fully cleared from the manifold, these fumes tend to dilute the fresh charges of air and fuel, cutting down on engine efficiency and gas mileage.

The muffler handles a certain flow rate of exhaust gases. As these gases pass through a series of holes,

baffles and resonance chambers, the muffler reduces the pressure and cools the waste gases before they're passed into the atmosphere.

Any restriction in the exhaust system will cause the engine to perform poorly — and carbon and corrosive matter will accumulate. This clogging also hastens deterioration of the muffler and pipes.

The engine trouble caused by excessive exhaust gases, in addition to the possible harmful effects on the car's occupants, makes it easy to understand why one should keep the exhaust system in good condition.

Prepare Car for Winter

Getting your car ready for winter's severe temperatures and driving conditions should involve a lot more than just adding anti-freeze. The American Petroleum Institute has developed a check list that may help you get ready for the cold weather ahead.

But first, let's look at anti-freeze. Today's cars are designed to use the "permanent" or ethylene glycol type — not the older "alcohol" base variety. Although it is called permanent anti-freeze, it should be replaced at least once a year, or if your car is equipped with air conditioning, twice a year.

Change Anti-Freeze

Anti-freeze solutions also act as rust inhibitors and water-pump lubricants and contain additives that lose their effectiveness after a year's driving.

When changing anti-freeze, begin with a careful check of the condition of the radiator hoses, thermostat, and radiator. Have your mechanic "pressure test" your cooling system. Replace worn hoses before they leak.

If all systems check out, drain and flush the radiator. Replace the coolant liquid with a 50-50 mixture of water and ethylene glycol type anti-freeze. This will offer maximum protection. Do NOT use 100% anti-freeze, use the 50-50 mixture—it's cheaper and more efficient.

Do not overfill the radiator; fill only one or two inches from the top — if it is too full, the overflow that occurs when the engine heats up will spill the anti-freeze onto the street.

Check the tension and condition of your fan and generator belts. These are critical to proper cooling and battery charging. Check with your service station about the multi-grade oil suitable for winter use.

Remember Snow Tires

Get your snow tires put on early and avoid the long wait during the first snow fall.

Park your car in a garage, if possible, to keep the engine from getting cold.

Drive on the "top half" of the tank. This prevents water condensation from forming in your tank which can freeze and plug your fuel lines. In other words, don't wait until the tank is almost empty to fill it up.

Warm-Up Vital

Be sure to give your car a moment or two to warm up properly, but don't let it idle for long periods of time.

Power Steering Maintenance Simple

If your car has power steering, you may be under the impression that this device is extremely complex, and can be serviced only by a highly trained specialist using special tools.

Actually, this is not the case. A power steering system is considerably more complicated than a non-power system. But most power steering maintenance work can be done by the average automotive service technician.

At the heart of your car's power steering system is the hydraulic pump that supplies the pressure to turn your car's wheels when you turn the steering wheel. This pump rarely breaks down, however, provided you make sure its supply of hydraulic fluid does not get too low.

So the most important thing to do to keep your car's power steering system out of trouble is to have the fluid level checked periodically. And when you have the fluid checked, you should also have the serviceman check the hoses that connect the pump to the other elements in the power steering system. Because leakage here is the main cause of fluid loss, which in turn is the main cause of power steering troubles.

One other item that should be checked periodically is the belt that connects the hydraulic pump to your car's engine. If this belt breaks, your whole power steering system will conk out instantly.

How can you tell if your power steering system needs attention? Usually, the first sign is either an unusual noise (squealing, chattering, or knocking sound) or a change in the "feel" of your steering (sluggishness, jerkiness, or a tendency to pull to one side).

If any of these symptoms occur, you should waste no time in getting your system checked; early attention can prevent big problems later. Better still, you should have your fluid, hoses and pump-drive belt checked every month or two even if you don't notice any signs of trouble. The best time to stop trouble is before it starts.

CHARGE

If you've ever had to decide between the inconvenience of a car that won't start and the potential complications of using battery booster cables, here's some advice. Once you learn the proper way of using the life-giving cables, the risk of botching the job is minimal. A word of caution before you even begin: Buy the best cables available. Poor quality cables won't last long and can do damage to the car's electrical system.

When using cables make sure the vehicles are not touching one another to avoid creating a dangerous electric circuit. Then make sure all battery-operated accessories like lights, radios and heater are turned off. Set your parking brakes and have transmission in neutral or park.

Locate on both batteries the Positive and Negative terminals. These may either be indicated by the letter POS for Positive and NEG for Negative, or by the plus sign (+) for Positive and minus sign (-) for Negative. It may be necessary to use a rag to wipe off grime to locate the markings. The rag becomes further useful as

a cover for the vent holes, since removing the vent caps on both batteries and covering with a cloth is a safety precaution. Not removing the caps creates the danger of an explosion. Now with the engines still turned off it is time to connect the cables themselves in the following manner:

Connect one cable to the Positive terminal of the booster battery and the other end of the same cable to the Positive terminal of the weak battery. Take the other cable and connect to the Negative terminal of the booster battery and to a ground connection of the disabled vehicle (such as the engine block). Start the engine of the booster car and then the engine of the weak car. Once the engine is started disconnect in the reverse order.

If you still have qualms about doing it, then by all means call a professional service outlet. But better yet, get your car's ignition system in shape and avoid the need of ever having to use the cables.

HINTS FOR TRANSMISSION MAINTENANCE	YOU NOTICE ...	THIS MAY MEAN ...	CAUSED BY ...	YOU SHOULD ...
<p>Avoid quick starts. Give your gears a chance to shift gradually. A smooth take-off is easier on the passengers, too.)</p> <p>If your car has a manual transmission, avoid riding the clutch. When your foot rests on the clutch pedal, often the clutch won't engage properly. Also additional frictional heat is built up between clutch pressure plate and lining, causing both to wear out prematurely.</p> <p>Periodically, check transmission fluid level and differential fluid level. Change the transmission fluid at recommended intervals and whenever fluid becomes contaminated. If necessary, have all parts cleaned at this time.</p> <p>Replace transmission filter or clean fluid-screen when fluid is changed and as otherwise required. Check and/or change transmission modulator if your car is so equipped. Also adjust bands (if your transmission has them) at intervals recommended by the manufacturer or more often as necessary.</p>	a chattering sound when car first begins to move with a manual transmission.	the clutch is not engaging properly.	oil on the clutch, or you may have worn parts	have a qualified mechanic check out the problem
	same as above with an automatic transmission	the clutch is not engaging properly	a worn clutch or bands	have a qualified mechanic check out the problem
	your car doesn't respond to engine speedups	your clutch is slipping	a worn clutch or one out of adjustment	have a qualified mechanic check out the problem
	<p>NOTE: There are a number of other transmission problems too complicated for discussion here. If your transmission does things or makes noises that seem strange, don't ignore these symptoms of malfunction. You'll find it more convenient and more economical to correct transmission problems as early as possible.</p>			

The transmission system of the average car is something most motorists take for granted. While transmission usually will run efficiently for many miles

with a minimum of maintenance, there are still critical adjustments and services that must be performed. The Fram Corporation offers some tips on

transmission care in a new booklet it has prepared for the car owner. For information on receiving it, write Fram Corporation, Providence, R. I. 02916.

Saving Two Gallons Per Car Is Goal

"If everyone in this country used one less gallon of gasoline a week, there wouldn't be a shortage."

That dramatic statement was contained in a newspaper advertisement run by one of the nation's leading oil companies. It seems like an enormous task to cut down on gasoline consumption by more than 200 million gallons a week or 10 plus billion gallons a year. But when the problem is examined on an individual vehicle-by-vehicle basis, the task is not as overwhelming as it first appears.

Consider this. There is about one motor vehicle in this country for every two persons. Thus, if every vehicle would use two fewer gallons of gasoline a week, there would be no shortage.

Tune-up is Key

According to Champion Spark Plug Company, saving this amount of fuel can be achieved, even without reducing the amount of driving done.

The major part of that savings can be achieved by making sure the car's engine is in tune. Tests conducted by Champion in the United States, Canada and Mexico showed what a fuel waster an untuned engine can be.

Other Assets

There are a variety of ways to help make up the rest of the gallonage to bring weekly savings to over two gallons a week.

- Make sure your tires are properly inflated. Underinflated tires are gas wasters.
- Accelerate smoothly. "Hot rod" type starts consume enormous amounts of fuel.
- "Play" the traffic lights and avoid stop and start driving as much as possible. If you have to spend long periods of time idling, it's better to shut off the engine.
- Watch your speed. You use over 25 per cent more fuel traveling at 70 miles per hour than you do at 50.

Also, don't overfill your gas tank to avoid possible fuel spillage. Avoid unnecessary use of air conditioning and other power consuming options.

More Vehicles Boosting Need For Mechanics

Five years from now there will be a need for at least

100,000 more mechanics beyond the approximately 600,000 we have now. With more than 120,000,000 cars expected on the roads in 5 years, that is a conservative estimate.

With car population

growing at the rate of 3.4 million a year, there is now only one mechanic for each 170 vehicles. The ideal is one for each 80 cars.

Young people apparently do not understand the earnings and opportunities in

the job. Average hourly earnings of mechanics in Detroit are now \$6.13, with some making much more. \$25,000 a year is not unusual.

No auto mechanic will ever be out of work, says the

industry, and when "young people" are urged to get in, the ladies are not excluded.

Space Between Cars

Always remember to allow plenty of room between you and the car ahead during the slippery season.

Three timely reasons why your car should be tuned regularly.

To save gasoline.

During the current gasoline shortage, it's important for us all to conserve the amount of gas we use.

Yet tests have shown an untuned car uses 8.2% more gasoline than a tuned car on the average. And that's more than a gallon in every tankful.

To save our environment.

In recent tests and talk about auto emissions, it's become clear that the pollution controls on our late-model cars are working. And it's been made just as clear that the pollution devices must be maintained and the cars tuned regularly. To keep harmful emissions down.

To save yourself from winter weather worries.

Other tests by Champion Spark Plug Company have shown that an untuned car is especially troublesome during winter. Cars needing tune-ups had twice as many "won't starts" as tuned cars. And the untuned cars took an average of 15% longer to start.

More gasoline. Cleaner air. Trouble-free driving. They all can be yours if you take your car in for a tune-up. Once each year or every 10,000 miles. With the spark plug brand 22 million people have switched to. Champion.

CORYELL DERBY SERVICE

Low Mileage Cars Require Very Special Attention

Owners of low-mileage cars — those driven on the average of 7,000 miles or less annually — may believe their cars stay in "mint" condition because of the low mileage. In fact, unless the owner takes extra care of these vehicles, their "prized" possessions may be

turning into prize headaches.

The low-mileage car owner may believe he should get recommended service at normally suggested mileage intervals. But, maintenance schedules are planned for automobiles driven the average of 10,000 or 12,000

miles per year.

The engine, especially, suffers as a result of short-distance driving — often, because it does not have time to warm up properly. Vital lubrication of the engine's moving parts is restricted.

It is this proper lubrication that minimizes wear within the engine. With normal usage, dust and the wear particles are carried to the drip pan by the oil

But an engine must be allowed to run after it has warmed up — in order for the (warm) oil to flow freely, and carry away all or most of the damaging particles. When moving parts are thus lubricated, they're cushioned by the oil from vibration and shock — caused by the firing of combustion charges when starting the engine or accelerating.

A fast-deteriorating exhaust system is another

common problem with older low-mileage cars. Condensation settles in the pipes causing rust from the inside. The poor fuel consumption of the little-used engine further contributes to a faulty exhaust system — due to excessive residue, which clogs the muffler and increases emulsions.

If your car goes into a skid on a wet or icy street, turn the steering wheel in the direction of the skid.

Put Car on 'I-C-E,' Canadian Council Advises

Experts List Three Major Factors Affecting Auto Performance When Temperature Drops

If you've put off having your car serviced for cold weather, let the word ICE serve as a reminder. I, C and F are the initials for the Ignition, Cooling and Electrical systems, the three main factors affecting your car's dependability when temperatures drop.

According to Car Care Council of Canada, these are the points that should get attention:

IGNITION SYSTEM — You may be well advised to invest in a tune-up if you're nearing the 10,000 mile mark since the last time that work was done. This usually involves replacement of distributor points, condenser, and rotor, plus spark plugs (and sometimes wiring). The service includes adjustment of ignition timing, idle speed and automatic choke. Your mechanic also will check on the condition of the various filters and pollution control devices so essential to efficient engine operation.

COOLING SYSTEM — There's more to cooling system maintenance than flushing the radiator and replacing the anti-freeze. The system should be pressure tested for potential leaks. Hoses and belts should be examined and replaced as necessary.

The thermostat, which maintains engine temperature within specified limits, should be checked, too. If it's not working properly you could have either an overheating engine or reduced engine efficiency. A faulty thermostat also can cause your car's heater to lose its effectiveness.

ELECTRICAL SYSTEM — That sickening "click-click" that signifies a dead battery may be nothing more than a cor-

roded connection creating an abnormal resistance in your starting circuit. Or it could be a problem in your car's alternator or voltage regulator.

Then again, it could be the battery itself. A battery's average life is from 26 to 36 months. To play it safe, have your car's charging circuit, battery and connections checked while you are in command of the situation.

Ask your mechanic for a safety check, too, including tires, exhaust system, lights, brakes, windshield wipers and washers, shock absorbers and steering mechanism.

Car in Condition?

Compulsory car checks are turning up interesting facts about the cars we drive.

Headlights are out of adjustment on 38% of all cars. 40% have improper tire pressure.

20% have contaminated transmission fluid.

49% have some form of ignition system breakdown. 28% have carburetor malfunctions and 35% have incorrect timing.

These are the areas your service outlet should look at the next time you put your car in for a check. In at least three of these areas the fix is fast, simple and costs very little.

IN A BLIND — A windshield splashed with winter road slush can provide a moment of terror to any motorist. For a fraction of a moment he is practically blind. It takes good wipers to clear away the obstruction as quickly as possible and restore safe visibility. Replace those worn wipers before poor winter weather sets in.

Worn Windshield Wipers Can Endanger Safety of Driver

Like so many other crucial devices, your car's windshield wipers are most likely to fail just when you need them most. During the winter months, windshield wipers have to fight snow, ice, slush, and road salt, as well as the usual rain.

And that is when clear vision is extra important, due to hazardous road conditions. So now is the time to check your wiper blades carefully, and to replace them if they're not in perfect condition.

How should they be checked? And what are the signs that a wiper blade isn't up to par?

The best time to check your blades is during a rainstorm, or just afterwards, when there's dirty water on the roads. Or you can check them by using your windshield washer or as you go through a car wash. Or even by having someone spray water on your windshield with a hose.

Whenever you choose to test your wipers, you should be sure to check them at all wiper-speed rates they can be set for. And also be sure to check for all of the following signs of malfunctioning.

Streaking — arcs of unwiped moisture within the wiping area.

Hazing — a thin, hard-to-see-through film covering most or all of the wiping area even after the blade has just wiped.

Hopping — a jumpy motion, accompanied by a "chattering" noise as the blade sweeps across the windshield, with some areas left unwiped.

Scalloping — a ragged outer edge in the wiping pattern.

Rattling — no visible signs of problems, but the wiper blade assemblies sound as if they're very loose.

If any of these symptoms

are present, you should replace as much of your wiper assemblies as is necessary to eliminate the problem. In many cases, all that's needed is new squeegees (the rubber strips that actually wipe the windshield). Try replacing the squeegees first, and if this doesn't solve the problem, replace the entire wiper-blade assemblies.

When you do replace all or part of your wiper blades, replace both at the same time; if one is "shot," the other is usually about to give up, as well. And good vision is too important to risk for a few dollars.

One final tip. If you are replacing your wiper blades, consider the new, molded polycarbonate variety. They last longer than the old metal type, and cut down on glare and rattle, as well.

More Tire Mileage

Let your wife do the driving.

According to Goodyear Tire and Rubber Company, women average 30,000 miles on tires while men average only 20,000, with some men getting as little as 12,000 miles.

Of course the area of the country, road condition, and driving speeds influence tire wear.

Lengthy Stretch at Wheel Shortens Trip - Too Soon

Tests conducted in the U.S. have come out with some facts on how a motorist's ability to drive is impaired by long stretches behind the wheel.

On the average, after four hours of driving, a motorist takes 20 per cent longer between corrections of the steering wheel.

The automobile with a fatigued driver drifts more than twice as far from the center of the lane.

If there is a blow-out before the driver regains control, the car will swerve three times as far as when he is fresh and alert.

Tests were made in a Cornell Aeronautical Laboratory (CAL) Inc. simulator in Buffalo, and are being followed up by over-the-road driving in actual

vehicles. Both set of tests are for the U.S. Department of Transportation.

The simulator puts the "driver" into conditions he'd actually find on the road with these conditions being controlled and set up by a computer. He "drives" by means of a steering wheel and accelerator and brake pedals.

The value of rest pauses in long distance driving also acquired some support from the tests, says CAL's magazine, Research Trends. Each driver, after completing the four-hour stint, took a four-minute break, then returned to the driving simulator for a brief additional run.

After the rest, drivers had accuracy equal to that at the end of their first hour of driving.
