To expand the service end of the business, Charlie's Refriger-ation has opened The Laun-dramat at 923 Logan, located south of The Hair Studio on 10th Street.

The Laundramat opened its doors for business Sept. 6.

"We opened it because we were offered a deal on the building and so far, it's been profitable," said Charlie Kudrna, owner of the store. "It gives us something to do when things in Charlie's Refrigeration is in its rare slow period."

The Laundramat is open 8 a.m. to 9 p.m. for now, but those hours may change since business has been so good.

has done so well is because it's in a good, central location in Wayne, Charlie said. The location is not only convenient for college students but good for resident customers. Charlie said he's looking forward to expanding his laundramat service to the Wayne community.

The Laundramat has 10 washers, five commercial dryers and one large commercial washer. The Laundramat also uses soft water, which helps customers save soap.

"Because we use soft water, customers don't have to use as much soap," Charlie said. "When you use soft water, it requires lower detergent as well as softener quantities. It's also better for your clothes than washing them in hard water."

Charlie added that the commercial washer is a convenience to customers since it can wash large items like comforters, pillows and some quilts. He said the washer can handle loads up

to 25 pounds.
To use the large commercial washer, it's only \$1.25 and for the smaller washers, it's only 75 cents. As a benefit to his customers, dryer use is only 25 cents. As an added convenience, there is a coin changer in The Laundramat, as well as a soap dispenser.

ATTENTION FARMERS!

As most of you know, trying to control musk thistles in the spring can be very crratic, especially when you're working with chemicals that are noted for volitizing and injuring nearby sensitive crops. Fall is the only and the best time to control musk thistle with Tordon 22K at 8 ounce/acre rate. So we have taken the liberty of offering you this 1990 fall program-through Dale's Flying Service. Book over 100 acres pre-paid for only \$8.34/acre. Price includes application, 8 ounces of Tordon 22K X-77 spreader sticker and Li-700, which lowers the ph in water so that the plant will not tie up the chemical. Other rates will differ for the control of Canada thistle and leafy spurge, so give us a call today and book your acres.

NOTICE

Current Federal Regulations require all schools inventory asbestos containing materials (ACM) and develop a management plan identify, and control ACM in their buildings.

The presence of asbestos in a building does not mean that the health of building occupants is necessarily endangered. As long as asbestos-containing material (ACM) remains in good condition and is not disturbed, exposure is unlikely. When building maintenance, repair, renovation or other activities disturb. ACM, or If it is damaged, asbestos fibers are released creating a potential hazard to building occupants.

The plan is now available for inspection (without cost) to the general public, teacher, and other school personnel. The plan will be made available within 5 working days after receiving your request. For further information, contact Gene Lutt, phone (a02) 375-1686. The school may charge for copies of the plan. CARDS OF THANKS

A SIMPLE "Thank You" seem so inadquate but neither my family nor I will ever forget the compassion that was shown me following my accident and subsequent hospitalization. I am improving satisfactory, and my doctor assure me that with proper exercise and patience my recovery will continue.

Again — I thank you for the cards, flowers, gifts, prayers and visits from the very, very special people. Dr. Donald H. Vibka, Columbus, NE. O1
