Parties wishing to enter the print shop at this time of the year should be governed by the following rules. Advance to the door and give three distinct raps, or kick the door down. The doyl will attend your alarm. You will give him your name, postoffice address and the number of years you are owing to the paper. You will advance to the middle of the room and address the editor with the following countersign: Extend the right hand about two feet from the body with the thumb and fore finger clasping a ten dollar bill, which drops in the extended hand of the editor, at the same time saying, "Were you looking for me?" The editor will grasp your hand and say, "You bet!"—after giving him the news of your locality you will be permitted to retire with an obligation properly discharged.—Ex.

Tid-Bits tells of a man who went with his wife to visit her physician. The doctor placed a thermometer in the woman's mouth. After two or three minutes, just as the instrument was about to be removed, the man, who was not used to such a prolonged spell of brilliant silence on the part of his life's partner, said: "Say, doctor, what will you take for that thing?"

August 5 a spirited game of basket ball was played on the College grounds. The contesting teams being Wayne's first five and a picked five from the College, the latter having been organized just three weeks. The umpires were Mrs. Phillips and Miss Warnock, Rev. Weldon referee. The College girls won, score 22 to 15. The same teams participated in a game last Thursday evening. The score at the end of the first half being 14 to 7 in favor of the College. Upon renewing the game the Wayne girls decided, after playing five minutes of the last half, to quit, score 19 to 7 in favor of the College girls.

J. P. Gaertner has the largest and best selected stock of goods in northeast Nebraska and the prices can't be beat. Bring in your catalogues for comparison and see how much better you can do at home, besides saving freight. Some of the cheap department stuff is dear at any price and after one experience you would not give it houseroom.

"The weather has been so hot in this county" wails a Missouri paper, "that livery men have had to stand their horses in water an hour each day to keep their shoes from coming off, and wagons are going around with their tongues out. The catfish kicks up such a dust in the bed of the Gasconade River that it has to be sprinkled before you can go fishing. A spark from an engine set the big railroad pond on fire and burned up a wagon load of bull-frogs. The ground is so hard and dry that the crawfish holes in the low places are being pulled up and shipped off for gas pipes."

CHICKERING AGENTS IN BOSTON.

A Large Number of Trade Representatives of This Famous Piano Inspect the Factory and Place Fall Order.

(Special to the Music Trades)

Boston, July 28, 1902.

Among the large numbers of travelers from the South and West, who visit Boston on business or pleasure, or stop here on their way to some of the Maine, New Hampshire or Vermont summer resorts, not a few of them make their way to the factory of Chickering & Sons for the purpose of looking over a piano plant which has the reputation of being one of the largest and best appointed in the country.

One of the recent visitors was a western man, who said he wanted to see where the Chickering piano was made and to find out if some things he had heard were true. The man has been the owner of a Chickering for some time and of late attempts have been made to disturb the sale. Statements were made that Chickering & Sons were no longer making the piano they were; that, in fact, for some years they had not been making a strictly high-grade instrument such as their reputation credited them with. After going all over the factory the western man said to Mr. Eddy, treasurer of the company: "The situation reminds me of what my mother used to tell me: 'It's the best apple tree that gets the most chubbing.'"

An instance showing how widely known is the name of Chickering was the call of Rev. Mr. Greer, of the Universal Church, in San Antonio, Texas. Mr. Greer said it was his first trip to Boston, and he had planned to see, among other points of interest, the Chickering factory. He was shown through the establishment and expressed much admiration for the completeness of the institution.

Mr. Parker, vice president and manager of the Andrews Furniture and Music Co., of Charlotte, S. C., was one of the trade visitors at the Chickering factory last week. He made a selection of instruments for immediate and fall shipments.

Editor Shackelford went down to
Sioux City the other day and after
getting a nice \$1.40 hair cut has set
out to make Allen a nice warm
town to honor the Pioneers and
Old Settlers Picnic the 26th, and
not to be the typical wild west
editor of pioneer days, he proposes
to appear sleek and pretty.

That alleged earthquake shock
up in Madison county was due
entirely to the presence of Jack
McCarthy at Norfolk which set
John Robinson to shaking in his
boots. Unless the good people of
that county are prepared to endure
several worse shakings up later on
the tall congressman should be
kept carefully insulated from the
earth.—Stanton Picket.

The one man in the United States
who is more pitied by the demo-
cratic colonels than any other is
the Kentucky man who in 1900
vowed he would never take another
drink of whiskey until Bryan was
elected president. The poor fellow
is liable to die sober which will be
the greatest calamity possible to
befall a real colonel of Kentucky
breeding.

About ten years ago populist
conventions decreed against law-
yers who felt themselves "away back"
in the hall where the
reformers talked politics and
elected delegates. What happened
since? Why my dear fellow those
populists forgot their antipathy to
the "honest lawyer" and now he
presides at their conventions,
takes the whole push of the nomi-
nations and "honest John," the
farmer, doesn't seem to be in it.
Well not if knows it—honest John,
the farmer, has something else to
do, he has discovered that the
fusion gang are reformers for
revenue only.

Will any brother state in an un-
impassioned way the particular
qualifications, Mr. Mikey possess-
es for governor?—Madison Mail.

Certainly, Senator, glad to oblige
you. First of all he is honest and
honorable beyond dispute or ques-
tion. Being himself a farmer (not
merely an agriculturalist) who has
come up by hard labor he knows
the needs of an agricultural state
like Nebraska and is in close touch
with the people of the state. Much
closer than Mr. Thompson or any
other man can possibly be who
makes law a business and politics
a study and profession. He has
ability in an executive way which
comparatively few possess. He is
respected by his neighbors and ac-
quaintances everywhere. In short he
is an honest, honorable, level-head-
ed, conservative, Christian business
man, whose ability to pursue to a
successful termination anything
he undertakes is well established.
What then is lacking? What more
can any reasonable man ask? What
more have they ever asked or found
in a governor? They have certain-
ly put up with less for several
years.—Stanton Picket.

We supposed that Brother Gib-
son was a true friend of McCarthy
until we read that he was clamor-
ing for a joint debate between the
two candidates for congress. If
there is one thing on earth that
Mac's friends ought to avoid it is a
joint debate with smooth John
Robinson.—Winside Tribune.

And Brother Ecker is concerned
for McCarthy and thinks his friends
ought not to put him up against
"smooth" John Robinson. And its
smooth he is, is he? Has all the
qualifications of the lightning rod
agent and politician combined to
gloss over the arguments to sup-
port dead issues? And McCarthy
think "smooth"? Well! Brother
Ecker is. Brother Ecker is real
"smooth," but it doesn't count in
this year of our Lord 1902 when the
people who vote have made up
their minds six months in advance
of the election just how the "X"
will be placed. If Robinson was
for Roosevelt policies and McCar-
thy would be elected, but as the
record shows Robinson was op-
posed to him and his policies along
with the "kicking minority," and
knowing McCarthy will support
Roosevelt, the most democratic
president since Lincoln and the

true representative of nine-tenths
of the voters of today, the
people of this district will vote for
McCarthy. They would do it if Mac
were a bumble bee and Robinson a
Roman god, but thanks to a dis-
pensing Providence over which
Bro. Ecker and John Robinson
have no monopoly, the clay and
wind of which these two congres-
sional candidates were made would
grow potatoes as well as fashion
an orator and the little heap named
democrat incorporated no more
air nor more potatoes growing
qualities than its republican neigh-
bor. To satisfy any who are curi-
ous to test the air spouting quali-
ties of their respective men a series
of meetings seem to be shaping
themselves. Not joint debates by
challenge, but as it were, a joint
debate in fact before the critical
voters who will hear each gentle-
man at the various meetings
around the country. If McCarthy
can not appear "smooth" enough
to suit Bro. Ecker, why go vote for
something "smooth," but if he
wants to display the judgment of a
good citizen and believes the ma-
jorities are more apt to discern
what is right than are minorities
he will vote for his Dixon county
friend. This "smooth" business
isn't in it with good "horse sense."

**At the Normal
College This Week**

To our reporter who dropped in
briefly this week the College was to
all appearance a busy place. The boys
and girls crowd several games of base
ball and basket ball into their outdoor
sports. The ball boys won from Dixon
Tuesday, 8 to 2. These are the good-
bye games. Indoors perfect system
and training perfect each one of these
farewell days with an auspicious event
—the graduation of some class or sec-
tion of a class. Commencing Friday
August 8th the Crescents and Philo-
mathians put on their annual contest
in an unusually uninteresting program.
The first named society won the favor
of the judges by a very close and tech-
nical percentage in the markings. Sat-
urday the first section of the Teach-
ers' class graduated by presenting to a
well filled chapel their well prepared
orations. These were:—Carrie Hoff-
man, Bessie Bingham, Conie Mack,
Grace Witzel, Ella Grier, Claude L.
Wright, Rose Heeny, Edith G Paul,
Delbert Paul and Lizzie Clausen.

On Monday evening the second sec-
tion of the same class presented their
orations, these were:—Mamie A. Bingham,
Axel E. Borg, Amelia V. Reeves,
Miriam Preston, Walter A. Spencer,
Jessie B. Bushfield, Mabel Griffith,
Thos. H. Nelson, Madge E. Bridenbain
and Lyman G. Lockwood.

On Tuesday evening the third and
last section of this large class gave
their graduating orations. These
were:—Effie B. Forbes, Rosetta P.
Armstrong, W. E. Sweeney, Emma E.
Richardson, Ollie P. Elliot, Edward
Gutschow, Bessie P. Luckey, Richard
P. Beauchemin and Blanche E. Paul.
Twenty-nine in all. A class in which
the College will be proud indeed, they
go to many schools to exercise their
training, some in the best of graded
schools, some will teach in the country
schools, some will not apply their
education in this way but adopt other
vocations, however, they are eminently
fitted to teach should they wish to do
so.

This evening the scientific class
presents their orations at the College
chapel, this class is as follows: Henry
Ruhach, Nora Caldwell, Grant A.
Hall, Robert Elliot, Johanna M.
Abern, John H. Wilson, Marion B.
Hopkins and F. H. Willis. Eight very
bright students, several will take
prominent parts in educational work
in adjacent towns.

Sunday the Rev. Newhall White
gave the baccalaureate sermon in the
spacious M. E. church. It was an
eloquent and masterly effort and decid-
edly a striking presentation of subject
matter in the christian students hypo-
thesis of right living.

Thursday evening the close of com-
mencement will be brought about by
the closing exercises at the M. E.
church. The Dr. L. B. Wickersham,
of Des Moines, will lecture on "Day
Dreams" and the diplomas to the forty-
seven graduates will be presented. A
fine program assisted in by the faculty,
students and resident ministers will be
presented.

This closes one of the very best
of the College's year's work. The atten-
dance has averaged higher, between
four hundred and five hundred at most
terms. This summer the pretty school
ma'ams have largely predominated,
last winter the young gentlemen ex-
ceeded the attendance of young ladies.
To see this work done and appreciate
the needs of more room for the better
conducting of it leads us to remark
right here—we hope to see a large new
addition to the College building such
as Prof. Pile wishes to erect. A col-
lege hall capable of accommodations
actually demanded, a testimonial of
our appreciation of this school in our
city and a hand mark to the peerless
educator whose reputation is rapidly
extending over the northwest. Try
once, we test our neighbors; try
twice, we test ourselves. Try twice!

The Wayne Bakery.
Mr. G. H. Darnell the pleasant
gentleman and par excellent baker
who came to Wayne last spring suc-
ceeding McVicker in the Wayne Bak-
ery, has made a most striking improve-
ment in the course of the few months.
All that soap, lye, paint and paper
could do to apply to the old building

cleanliness and brightness appro-

Senatorial Convention.
The republican electors of the eleven-
th senatorial district of Nebraska
are requested to send delegates to a
convention to be held at Norfolk,
Nebraska, on Tuesday September 2,
1902, at 1 o'clock p. m., for the purpose
of nominating a candidate for state
senator from said district, to select a
central committee and to transact such
other business as may properly come
before the convention. The basis of
representation shall be one delegate
for each county and one delegate for
each 100 votes, or major fraction there-
of, cast for W. W. Young for state
senator in 1900. The several counties
are entitled to representation as fol-
lows: Madison 18, Pierce 9, Stanton 9,
Wayne 12.
It is recommended that county con-
ventions empower the delegates in
attendance to cast the full vote of the
county at the senatorial convention,
and that no proxies be admitted.

A. F. ENOS,
Chairman.
P. F. SPRECHER,
Secretary.

The Republican's New Map.
A fine new map of Wayne county
will come from the printers in a few
days, compiled from the records of
Wayne county, up to date—a neat,
practical map. It will be on a scale of
1 1/2 inches to the mile, show streams,
highways, rural mail routes, churches,
cemeteries, school houses, location of
farm dwellings and towns. Each tract
of land will be given with the number
of acres and the owners name. Plat
books giving no more cost ten to fifteen
dollars. This map will be sold, mounted
on linen at five dollars, on heavy map
paper at two dollars, and to our adver-
tising patrons and subscribers an un-
usually attractive proposition will be
presented making the maps to them
at the nominal cost in consideration of
their patronage in other ways.

The map will be a beauty; the best of
workmanship is embodied in it. It is
educational to young and old, and will
be welcomed into every office and
home in the county. It is useful to all
who would know all about our county,
to the man who would know at a glance
who owns such or such a piece of land,
or if so and so lives in a certain place.
To the business man it will pay its cost
many times over in the course of a
year.

Young Lady's Life Saved.
Dr. Chas. H. Utter, a prominent phy-
sician, of Panama, Colombia, in a re-
cent letter states: "Last March I had
as a patient a young lady sixteen years
of age, who had a very bad attack of
dysentery. Everything I prescribed
for her proved ineffectual and she was
growing worse every hour. Her par-
ents were sure she would die. She had
become so weak that she could not
turn over in bed. What to do at this
critical moment was a study for me, but
I thought of Chamberlain's Colic,
Cholera and Diarrhoea Remedy and as
a last resort prescribed it. The most
wonderful result was effected. Within
eight hours she was feeling much
better; inside of three days she was
upon her feet and at the end of one

A Cure for Cholera Infantum.
"Last May," says Mrs. Curtis Baker,
of Bookwiler, Ohio, "an infant child
of our neighbor's was suffering from
cholera infantum. The doctor had
given up all hopes of recovery. I took
a bottle of Chamberlain's Colic, Cholera
and Diarrhoea Remedy to the house,
telling them I felt sure it would do
good if used according to directions.
In two days time the child had fully
recovered and is now (nearly a year
since) a vigorous, healthy girl. I
have recommended this Remedy fre-
quently and have never known it to
fail in any single instance." For sale

Chauncey Childs was in town between trains Friday morning on his way home from Norfolk.

Conrad Welscher received a fine thoroughbred Shorthorn calf, last week from Demme Bros., of Emerson.

Art Savage went to Illinois Friday to return to the show business after a visit of a couple of weeks at home.

Barnhart & Son have constructed a fine new cement walk around the handsome residence of Hegman Henney.

Harvey Mason and wife came over from Stanton Saturday to spend Sunday with Mr. Mason's parents in this city.

We sell Lake City wagons, and have sold them for six years and they give satisfaction. Philleo & Son.

The two teams of the College will play their closing game Thursday, August 14, at 4 p. m. An admission of 10 cents will be charged. Everybody come.

Some way it seems quite true, that that the merchant who doesn't advertise and the fellow who doesn't take papers are the fish the grafter goes after, and gets them too.

The Real Estate team and the College played three innings of ball on Thursday. Trouble arose over a decision of the umpire in the beginning of the fourth and some of the boys refused to finish the game.

The Special Sale of Summer Goods at Red Tag prices will be continued one week more. On account of fall goods arriving every day we must make room for them. AHERN'S.

Chris Sydo, of Altoona, was in Wayne Friday a few hours and dropped into the REPUBLICAN office for a chat. Mr. Sydo tells us what will do well to average ten bushels to the acre on account of the weather having been too wet when the wheat was in blossom. It failed to set a good plump head. Oats, he says, are alright.

If you know of something you think would be news to the other fellow you will greatly oblige the editor by dropping in and telling him about it. We print the news if you will give it to us. If you have visitors from out of town or are thinking of going visiting yourself, tell us. We will do the rest.

A fellow named Porter with a half a dozen aliases is in jail at Sioux City. He worked a smooth deal with country town dealers who handle patterns and got \$27 down on all orders. The Racket store is listed as a victim and Mrs. J. Cavanaugh, of Winside, bit aale.

He was a great fellow with the ladies and mixed love and business in a way that the police will try and untangle so he can take a vacation trip to Anamosa for about five years.

A great many from here were in attendance at the Laurel picnic on last Thursday and Friday. We understand it was a good thing and most of those visiting that town enjoyed a nice time. Some, of course, had a "big" time. Those who had the big time had big heads for several days thereafter. Picnics are alright and should afford those taking part a pleasant recreation. They are, however, too often an occasion for a "d--l of a time," instead of a time of innocent enjoyment. He who mixes "forty-rod" whiskey and warm beer with his good time will some day wish that life had been one long continuous work day.

E. A. Lundburg went to Knott county Monday.

Wayne county will have plenty of cobs and potatoes.

Geo. Nangle was a passenger west Thursday evening.

League base ball is causing some very heated discussion among the newspapers of the towns to the north-west of us. The pen-pushers should keep their shirts on and let the spheroidal jugglers do the mouth work. They can do it.

The Special Sale of Summer Goods at Red Tag prices will be continued one week more. On account of fall goods arriving every day we must make room for them. AHERN'S.

A report was circulated at towns adjacent to Norfolk by certain parties that Mayor Koenigstein of that city had committed suicide by hanging, and inquiries came from several places in regard to the matter, but no one in Norfolk had learned of the occurrence. The mayor is as yet an exceedingly lively corpse.

More good rains the last of the week. Enough rain has now fallen, we believe, to insure the growing of an excellent crop of corn for this section. Last year at this time it was so dry that the ordinary well had to be run through a wringer in order to procure enough water for cooking purposes and many farmers in this vicinity found it necessary to soak up their hogs before they would hold swill. But we had no crop failure, even then.

Never run down your own town or your neighbors. Be a good fellow. You may have to lie now and then, but don't be a sore head for the sake of a personal grievance. Put up your hammer and wear a smile. It is just as cheap. If you are in the newspaper business blow your head off if need be in behalf of your town. Noise and hot air is about the best there is in the business anyway. If a man pays you an honest debt show your hearty appreciation, if he beats you be content with the thought of the punishment he will merit in the hereafter. Keep off of peoples' corns and your reward will be forthcoming.

Sumner's base ballists went over to Saturday to play a game with the team of that place and of course expected to come home with the scalp of the Dixon aggregation, having beaten them easily some time ago with a score of 7 to 1. But fate had decreed otherwise and the R-al Estates were doomed to disappointment. In the beginning of the eighth inning the score stood 7 to 1 in favor of our boys, and everything was lovely when the Dixon boys began chasing each other around the diamond and kept it up until fifteen more got them had crossed the home plate. The Dixonites allowed the first dealers to get one score after the seventh just for decency's sake and the game ended with a score of 16 to 8 in favor of the boys to the north. But they couldn't do it again. If George Sberbahn, who was pitching good ball until he was hit in the arm, had not been injured the score in all probability would have looked different.

W. E. Howard came home Friday evening, returning to Wankon Tuesday. He had business in South Dakota and took this run down to see his family by making close connections.

The work Mr. Howard has engaged in connected with the development of copper mining in Oregon by capitalists of Wankon and Dubuque, is very pleasant and Mr. Howard is quite interested in it.

L. O. Anderson, of Wakefield, ordered our artistic marble dealer, Prof. Durrie, five weeks ago, for Adolph Anderson and Heida C. Swanson who sleep side by side in the cemetery at Wakefield, a monument most beautiful and artistic. It rests on a heavy base inscribed with the family name which in turn is supported by the foundation stone of half a ton. Each side is a separate block inscribed to its respective personage of fleeting memories, and resting upon the lateral blocks is an arch supporting a cross and vase like ornaments. It is of the beautiful dark New York marble which shows up beautifully in relief by the application of artist's chisel.

Balanced So There is No Weight On Horses Necks.

The tremendous demand during the season just past for the Osborne Corn Harvester indicates two things: first, that thousands of farmers are realizing the great economy in the new methods of harvesting and preserving the corn crop, and second, that the Osborne machine has found splendid favor with the growers of corn in the United States. The latter conclusion is as natural as the first, for the Osborne Corn Harvester has proven itself so competent to harvest all kinds of corn in all conditions that it has an undisputed right to its place as King of the Corn Field. Its method of cutting, conveying, tying and discharging its corn is along correct principles, and it has been demonstrated in many fields that this machine has no equal.

STORM IN MISSOURI

WIND ALMOST REACHED PROPORTIONS OF A TORNAO.

Property Loss in Kansas City Is Estimated at \$100,000, and Several Persons Were Severely Injured—Telephone Service Prostrated.

Kansas City: A severe wind and rain storm, accompanied by excessive lightning, raged for half an hour early Sunday morning. In the business district numerous plants were broken, signs and awnings torn down and rickety structures partly demolished.

The local weather bureau reports that the wind blew at the rate of fifty-two miles an hour for seven minutes, and 45 of an inch of rain fell in fifteen minutes. The fire department had been busy all day repairing damage, and the fire chief estimates the damage at \$100,000.

A dead wall of the Metropolitan street railway's old engine house at Ninth and Wyoming streets, which was destroyed by fire one year ago, blew over and crushed a house occupied by two negro women, Jessie and Emma Parker.

Reports from Liberty, Mo., and Warrensburg, Mo., indicate that the storm did much damage at these places.

The telephone company suffered much loss. Two thousand telephones are out of order, and the service is prostrated all over the city.

A peculiar feature of the storm was the drowning of thousands of sparrows. The rain came down so suddenly that they were unable to find places of shelter after having been washed from their roosts.

Reports from Liberty, Mo., and Warrensburg, Mo., indicate that the storm did much damage at these places.

A MURDERER HANGED.

Carrie Larson's Slayer Pays Penalty on the Gallows.

Chicago: Louis G. Thoms was hung at 11:30 Friday for the murder of Carrie Larson.

The scene of the crime for which Thoms was hanged was the steamer Peacemaker, which lay in winter quarters at the docks of the Burlington ship on Dec. 31 last.

On Dec. 30 Thoms went to the West Side Free Employment Agency and, giving the name of Pratt, said he wished to hire a cook. Carrie Larson, a Swedish girl, 22, to the story told by kissing on the witness stand, Thoms brought the girl to the boat in the afternoon and after supper went away, saying that he would not be back that night.

Later, the body of the girl was found floating in the water. Thoms was arrested and the body of the murdered girl found.

In the first trial of the case the jury reported a disagreement, two brothers, Michael H. Kane and Francis J. Kane, Jr., standing out for acquittal against a readiness by the other ten men to vote out the extreme penalty.

On Dec. 30 Thoms went to the West Side Free Employment Agency and, giving the name of Pratt, said he wished to hire a cook. EXCITING SCENES IN FRANCE.

Further Disorders in Expulsion of Sisters from Schools.

Brest, France: Exciting scenes occurred Thursday at the expulsion of a number of sisters from their school at Lanester. A special train conveyed detachments of soldiers to Lanester, where a body of gendarmes had already been mobilized.

A large crowd assembled at the school and surrounded the soldiers in the square in front of the school.

The commissary of police arrived, accompanied by a locksmith, the people protested vigorously. Women threw themselves to the ground in front of the horses of the gendarmes.

The commissary ordered the sisters to open the school door. They refused, and the locksmith picked the lock and broke windows, amid the denunciations of the crowd.

EDWARD IS CROWNED

THE KING IS GIVEN THE SYMBOL OF MAJESTY.

Historic Service Loses Nothing of Ornateness by Its Diminution—Details of the Ceremony Show It to Be Harmonious at All Points.

The coronation of King Edward and the Queen Consort Alexandra has at last taken its place in history. In famous Westminster Abbey—like the national church and the national museum of Great Britain—where a long line of British sovereigns have been crowned and where repose the ashes of potentate and subject, of statesmen and warriors and scientists and men of letters the crown of Kingly jurisdiction has been placed

upon the head of England's seventh Edward.

NEWS OF THE WEEK IN A CONDENSED FORM.

Supposed Eight-Foot Vein of Iron Ore is Found on the Elkhorn—It Will be Analyzed—If Ore is Valuable, it Will be Mined.

A West Point special says: John Elzinger, town marshal at this place, has located an eight-foot vein of iron ore on the banks of the Elkhorn. The vein is a short distance from town and the railroad. Samples have been sent east for analysis. Meantime a thorough search is being made for similar outcroppings, and if the ore is common or paying a company will be formed.

Coal has been found in the northeast Nebraska in paying quantities, and it is being presented there is good reason to believe that some day this may be a manufacturing region.

There is a possibility that the ore may be iron ore of good quality. The geology of Nebraska has for a long time puzzled the most learned. Professors and scientists have searched the idea that coal could be found here. Nevertheless a shaft is being sunk near Jackson, coal having been discovered at various levels in different drillings. Natural gas and oil exist under the bluffs near Homer.

Farmers and residents will not sell their land for any price until they hear the results of the Elzinger test, and are speculating as to what might be expected if the stuff is worth mining.

Disappears and Searchers Find Body in Pond Near the House.

A Kearney special says: Joseph W. Shotton, a young and prosperous farmer of 32, was found drowned in his fish pond near his house Saturday forenoon about 11 o'clock. He had disrobed and fallen into the water, apparently by mistake, and was found by a neighbor a couple of hours after having been last seen.

He disappeared from his home about 7:30. The night before he had trouble with his head and neighbors were sent for, who spent the night with him. In the morning he was apparently recovered. When he disappeared a search was begun, continuing as stated, the body being found in three feet of water.

Workman at Beatrice Badly Injured by a Fall.

A Beatrice special says: William Brennan, a cornice maker from Kansas City, while at work on the Masonic building Thursday fell a distance of forty feet and received internal injuries. The accident was caused by a fall from the end of the scaffold on which he was working.

Another workman who was on the scaffold with Brennan escaped by hanging on to the rope until he could be rescued by carpenters who were working on the third floor of the building. The full extent of Brennan's injuries cannot be ascertained until he recovers from the shock of the fall.

Fire at Dakota City.

Louis Rothford's General Store Destroyed.

A Dakota City special says: The general merchandise store of Louis Rothford was burned to the ground Monday night, and it was only by the most active efforts of the fire department that a part of the building was saved.

Found Hanging from Stirrup.

Boy Sent to Herd Cattle Near Ogallala Meets Death.

An Ogallala special says: Clarence, the 12-year-old son of Henry Most, who lives eight miles southeast of Ogallala, was found dead, hanging by the neck to the stirrup strap of his horse. He was found about half a mile from the house, where he had been sent to herd the cattle.

ROB EXPRESS TRAIN.

MASKED BANDITS TAKE \$2,000 FROM BURLINGTON LIMITED.

Torpedo Track, Near Savannah, Ill., and Hunt Player Northbound-Train Crew Forced to Remain Quiet While Safe is Blown Open-One Robber Shot.

Train No. 47 of the Chicago, Burlington and Quincy Railroad was held up by six masked robbers at 11:30 o'clock Tuesday night, the express car blown up with dynamite and the safe robbed of a sum estimated to be \$2,000.

The robbery took place about 125 miles from Chicago between Savannah, Ill., and Macon, a flag station eight miles north of that place. Torpedoes were placed on the track by the bandits and as the northbound train exploded them the engine shut off the steam and applied the brakes, thinking that there was danger ahead.

The moment the train came to a stop one of the masked robbers sprang aboard the engine and thrust a revolver into the face of the engineer and another at the head of the train.

Both members of the engine crew were threatened with death unless they obeyed the commands of the robbers.

Cut the Train in Two. Meanwhile another bandit stepped between the express car and the passenger coaches and cut the train in two.

When the engine had proceeded a short distance to a point far from any human habitation the robbers ordered a halt. The engineer, with a revolver muzzle pointed close to his ear, had nothing to do but obey.

The robbers were well equipped for the task before them. They drew sticks of dynamite from bulging pockets and went toward the express car, taking along the engineer and fireman.

Arriving at the door of the express car, the robbers set off the dynamite in their possession. The engineer and fireman were told to pull out as fast as possible with the train.

The money having been revealed when the safe was blown open, the robbers began to pick up the cash and throw it into a bag he took from a pocket.

Robbers Flee Into Woods. When the pile of money in sight had vanished inside the bag the "coin collector" gave the signal and his confederates marshaled the engine crew back to their posts. The engineer and fireman were told to pull out as fast as possible with the train.

The moment the locomotive began to move the robbers fled into the blackness of the night and the fog patch of woods that lined the railway track.

As they were disappearing in the brush Express Messenger Ehl fired and killed one of the robbers. The others have been unable to determine the identity of the dead man.

Mountain a flagman on the train of coaches that had been left a few miles back on the road, suspecting at once what had happened, started on the dead run for Savannah to give the alarm.

On the way he heard the sound of the double explosion that wrecked the express car and the safe.

After a run of several miles the flagman arrived at Savannah. He was then breathless, but he managed to tell a short story of the fate of the train.

Officers Start in Pursuit. Police and railway officials were hurriedly summoned by the station agent, to whom the flagman had reported. It was then 1 o'clock and some difficulty was encountered in getting engines and men together.

At 1:30 o'clock, however, an engine was attached to a coach and the latter, filled with heavily armed officers and railway employees, started from Savannah for the scene of the robbery.

It was the intention of the officers to beat the woods on both sides of the railway in an endeavor to catch the bandits.

Tracy Kills Himself. Outlaw, surrounded by posse, ends his life near Fellows, Wash.

Harry Tracy, the bandit, shot himself and died almost instantly in a wheat field near Fellows, Wash. He was surrounded by a posse which had been successfully held at bay for hours.

Armed men from miles around were on the outlaw's trail. The exchange of shots between the bandit and his pursuers was at long range.

News of Tracy's death spread rapidly within reach of Tracy's deadly weapons and he was the last bandit. The members of Sheriff Gardner's posse also escaped without injury.

Reports from Fort Croston, Wash., last night stated that Tracy was surrounded by a posse near the Eddy ranch, on the northeast of the town. Tracy had been shot in the chest and was lying on the ground, shortly before midnight. Matthews, left Vancouver, Wash., with twenty-five heavily armed men, in a wagon. Before they arrived Tracy had left the shelter of the swamp and taken to the open country.

It is thought he expected to overtake his enemies and come off with the successes that marked his career.

He had been heard pressed for many hours and the theory is that he found his strength leaving him. Disdaining to fall by any but his own hand, the worst "bad man" that ever killed his man in the "wild West" shot himself and prevented the distinction of being Tracy's slayer from falling to one of his pursuers.

COMMERCIAL FINANCIAL

Aside from heavy rains in Texas the week's crop news is encouraging.

Manufacturing plants are well occupied as a rule, iron and steel leading, followed by textiles and footwear.

Steel mills are still running, although some are suspending all production of iron, pig and bituminous mines are vigorously operated.

At most points retail trade is active and preparations continue for heavy fall sales, while spring lines are opened with good results.

With business in sight for at least a year, the leading departments of the iron and steel industry may properly be considered prosperous.

Notwithstanding the rapid increase in producing capacity, consumptive demand has grown still faster, and the recent official report of a new high record of pig iron production at 8,808,574 tons for the first half of 1902 is accompanied by the statement that unstocked at the end of that period were only 20,861 tons, compared with 372,590 tons a year previously.

The first half of 1902 has brought no diminution in inquiries, but some decrease in output owing to scarcity of fuel.

Supports are very large in order to keep the steel mills provided with material and offerings of foreign billets have checked the upward tendency of prices.

Of engines, machinery and heavy hardware there is a serious shortage, orders for delivery in 1902 being out of the question.

Steel rails and structural material contracts have been looked for ahead.

In textile manufacturing the feature was the opening of men's wear worsted fabrics for next year with a general advance of 10 to 15 per cent.

Cotton goods tend in favor of the purchasers owing to the prospect of a large cotton crop and the light export movement.

Shoe shops are active on spring samples, and buyers are numerous in the Boston market.

A very striking advance in leather this week has followed the upward movement of hides, stimulated by heavy purchases, a single sale of 100,000 hides of hemlock sole being reported.

Hides have made further sensational advances. Cattle, steers, reaching new high record prices.

Grain prices declined sharply as the month of speculative manipulation drew to a close and legitimate trading resumed a more normal volume.

Cotton fairly steady, more because of the large short interest than the floods in Texas. This feature is probably that rate have some more grain harvest.

Demands for consumption continue liberal. Meats have also shown a tendency to seek slightly lower quotations, but light receipts and higher quality do not promise any extensive relief in the immediate future.

Grain and Flour. Bradstreet's says: Wheat, including flour, exports for the week ending July 31 aggregate 4,388,534 bushels, against 3,980,069 last week and 5,473,391 in this week last year.

Wheat exports since July aggregate 18,158,840 bushels, against 26,291,038 last season. Corn exports aggregate 28,405 bushels, against 29,611 last week and 53,904 last year.

For the fiscal year corn exports are 187,810, against 1,727,047 last season. Business failures for the week ending July 31 number 168, as against 178 last week, 109 in this week last year, 173 in 1900, 155 in 1899 and 189 in 1898.

The outlook, viewing the country in its entirety, is better than last week, in that the generally favorable conditions are maintained, while the crops are a safe margin of maturity.

Heavy shipments of wool and cattle are giving the Western railroads enormous earnings. It looks now as if these roads will maintain their good showings on present tonnage, and break all records after the crop movement gets under way.

The Northwest holds a good volume of trade in the leading jobbing and manufacturing centers. The summer trade is active, while not as heavy as could be wished, showed improvement over the several weeks preceding. In lumber there is talk of further price advances. Wool is steady at a level several cents above prices at this time last year.

In the grain trade there is a feeling of satisfaction over the closing of the July contract. The prominent grain market had its tightening up in July, and with the lightest supplies for years in wheat, corn and oats there was opportunity for price manipulation to the close. With the nervous hesitation naturally attendant upon market conditions in some degree artificial, now gone, the grain markets will be on a basis where normal prices will be given more weight. As was quite to be expected, wheat prices declined. This in response to the extremely favorable spring wheat reports. Not anything of danger to the Northwest crop arose, and the sharpest price reaction may be expected.

Chicago. The outlook, viewing the country in its entirety, is better than last week, in that the generally favorable conditions are maintained, while the crops are a safe margin of maturity.

Heavy shipments of wool and cattle are giving the Western railroads enormous earnings. It looks now as if these roads will maintain their good showings on present tonnage, and break all records after the crop movement gets under way.

The Northwest holds a good volume of trade in the leading jobbing and manufacturing centers. The summer trade is active, while not as heavy as could be wished, showed improvement over the several weeks preceding. In lumber there is talk of further price advances. Wool is steady at a level several cents above prices at this time last year.

In the grain trade there is a feeling of satisfaction over the closing of the July contract. The prominent grain market had its tightening up in July, and with the lightest supplies for years in wheat, corn and oats there was opportunity for price manipulation to the close. With the nervous hesitation naturally attendant upon market conditions in some degree artificial, now gone, the grain markets will be on a basis where normal prices will be given more weight. As was quite to be expected, wheat prices declined. This in response to the extremely favorable spring wheat reports. Not anything of danger to the Northwest crop arose, and the sharpest price reaction may be expected.

WHERE A GREAT MOCK WAR WILL BE FOUGHT.

THE most important army and navy maneuvers ever participated in by the fighting forces of the United States will take place soon, when the navy will try to "capture" fortifications and towns along the north Atlantic seaboard by effecting a landing without being discovered.

The army, as represented in the forts, and a part of the navy will try to prevent the capture. It is not known what ships will take part, where they will come from, or when they will appear.

Every effort is being made to keep the movements of the opposing forces from each other, in order that the test may be of value in determining the question sought to be answered, namely, whether a hostile fleet can surprise and take a fort or town on the United States coast.

It is possible that ships of the European squadron will cross the ocean, leaving the other side secretly, to participate in the attack in addition to the north Atlantic squadron. Huge electric searchlights will aid the shore forces in their watch, and wireless telegraphy will be given a thorough test on water and land.

AMERICA'S DRINK BILL.

Liquor Product of the Country in 1900 Valued at \$340,615,469.

For the first time the census office has made the manufacture of alcoholic liquors the subject of special inquiry, and the report contains some interesting facts and statistics concerning that industry never before presented.

It embraces wine, malt and spirituous liquors, and finds the total consumption in the United States for 1900, the census year, to have been 1,227,368,001 gallons, or 17.3 gallons per capita of the population.

Of this 1,198,902,101 gallons were malt liquors, 103,330,422 distilled liquors and 23,425,567 wines. The totals show also 2,385 establishments with an output of \$900 value or more for the year; a capital of \$457,671,987 employed, which represents the value of land, buildings, machinery, tools and implements and the live capital utilized, but does not include the capital stock of any of the manufacturing corporations.

The value of the products is returned at \$540,615,466, to produce which involved an outlay of \$14,301,644 for salaries of officials, clerks, etc.; \$28,095,454 for wages; \$183,069,796 for miscellaneous expenses, including rent, taxes, internal revenue, etc., and \$70,512,042 for materials used, mill supplies, freight and fuel. It is not to be assumed, however, that the difference between the aggregate of these sums and the value of the products is in any sense indicative of the profits in the manufacture of the products during the census year.

The census schedule takes as cognizance of the cost of selling manufactured articles, or of interest on capital invested, or of the mercantile losses incurred in the business, or of depreciation in plant. The value of the product given is the value as obtained or fixed at the shop or factory.

The total value of the product is made up of \$5,547,310 wines, \$96,198,443 distilled liquors and \$237,269,713 malt liquors.

The production of malt liquors in the United States has increased in the most extraordinary manner during the last half century, closing with 1900, the number of establishments having increased from 431 in 1850, with a capital of \$4,072,550 to 8415 in 1900, with a capital of \$2,347,550,000, wages earned from 2,347 to 30,532, wages from \$564,144 to \$25,228,211 and value of product from \$5,728,558 to \$237,269,713.

The greatest jump was during the first ten years of the period named, from 1850 to 1860, when the increase was 272 per cent; during the next decade it was 161.4 per cent; the next \$1.4 per cent; from 1880 to 1890 it was 80.8 per cent, and from 1890 to 1900 29.8 per cent.

SWAMI VIVEKANANDA IS DEAD.

Hindu Philosopher Dies in a Monastery Near Calcutta.

Advices from Calcutta announce the death in a monastery near there of Swami Vivekananda, the Hindu monk and philosopher, who preached himself into New York's exclusive society.

Vivekananda's original mission in this country was as a delegate to the parliament of religions at the World's Fair. He remained long after the fair was over in response to invitations by prominent members of the "higher thought" movement in this country, who were greatly impressed by his teachings.

Then society took him up as a "fad" and lionized him. His professed converts in this country were numerous, especially among the women.

One of the most prominent was Miss Zimmerman of Cincinnati, who afterwards became the young Duchess of Manchester.

Under his advice and guidance Mme. Calve undertook a pilgrimage to India in 1900 for the sake of her health.

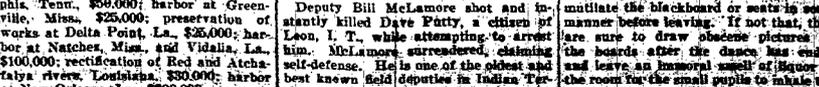

BIG SUM TO IMPROVE RIVER.

Mississippi Commission Has Received \$43,572,693 Since 1878.

The Mississippi river commission, having in charge the work of improvement of the river from the mouth of the Ohio to the head of the gulf, has submitted its annual report to the chief of engineers. The estimates for the fiscal year 1904 are as follows:

Continuing work under the commission, \$2,000,000; protection of banks at Caruthersville, \$30,000; harbor at Memphis, Tenn., \$36,000; harbor at Greenville, Miss., \$25,000; preservation of works at Delta Point, La., \$25,000; harbor at Natchez, Miss., and Vidalia, La., \$100,000; rectification of Red and Atchafalaya rivers, Louisiana, \$300,000; harbor at New Orleans, La., \$300,000.

MISS NEILSON, WHO IS TO WED A VANDERBILT.

The formal announcement of the engagement of Miss Kathleen Neilson and Reginald Vanderbilt has been made. According to the matrons of society she is the fairest of all the fair women who have married into the Vanderbilt family.

James E. Myers, one of the most prominent union men in Marion, is at the head of the movement and thus defines the objects of the proposed laboring men's church: "What the laboring men of this country need, and what we hope to have within a few months, is a church erected and supported entirely by men who earn their bread in the sweat of their faces. The time has come when we feel that we are not welcome in the big churches, no matter of what denomination."

The movement recently inaugurated at Marion, Ind., for the establishment of a church by the organized laborers of that city has now progressed so far that there seems to be no doubt but that it will be carried into successful execution, for the forty-eight unions have taken up the question, and there is said to be a decided preponderance of sentiment in favor of it.

The men who are interesting themselves in the movement are members of different denominations, and it was early settled that the new church should be un denominational and the preaching should be along the lines that would eschew doctrine entirely so far as it relates to the dogmas upon which the church is now divided. It will therefore be open to Baptists, Presbyterians, Methodists, Lutherans and all other religions, no matter what their beliefs, but it is necessary that every member must be a member of organized labor or of a family whose head is connected with some union.

Estimate as to Wheat. A conservative estimate of the wheat yield of the three States does not bring the aggregate much above the figures of a year ago. Had the conditions been right for planting last spring it is not too much to say that the combined yield would have been in the neighborhood of 225,000,000 bushels, another estimate of the crop and reporting on the prospects and conditions, while the big elevator lines have also had their experts in the fields. These reports have been submitted and compiled.

No Time to Lose

You cannot afford to disregard the warnings of a weak and diseased heart and put off taking the prescription of the world's greatest authority on heart and nervous disorders—

Dr. Miles' Heart Cure.

If your heart palpitates, flutters, or you are short of breath, in left side, shoulder or arm, you have heart trouble and are liable to drop dead any moment.

Major T. W. Woodcock, one of the best known oil operators in the country, died from heart disease recently at his home in Fortland, Ind., while mowing his lawn.—The Press.

Mrs. M. A. Birdsall, Watkins, N. Y., whose portrait heads this advertisement, says: "I write this through great pain for benefit I received from Dr. Miles' Heart Cure. I had palpitation of the heart, severe pains under the left shoulder, and my general health was miserable. A few bottles of Dr. Miles' Heart Cure cured me entirely. Sold by all Druggists. Dr. Miles Medical Co., Elkhart, Ind."

Notes From Our Neighboring Towns

Pierce county Old Settlers hold their reunion August 23. The Lutherans of Wausa are soon to erect an \$8,000 church. The Newcastle Times says they have a coal mine in that vicinity. The Catholic people are building an addition to their church at Dixon.

The Pioneers and Old Settlers' of Dakota county hold their picnic August 28. Miss Pearl Stinson, of Wayne, is the guest of Mr. and Mrs. W. W. Allison.—Lyons Mirror.

Miss Ethel Edgerton, of Wayne, has been the guest of Miss Ethel Edgar this week.—Emerson Enterprise.

Miss Viola Murray went to Wayne this morning to take part in a literary program at the Normal.—Pender Times.

Mrs. Jacob Soden went to her home at Wayne Wednesday after a visit here with Mr. Soden's folks.—Wiener Chronicle.

Five hundred dollars has been offered by the citizens of Battle Creek for a race meet to be held at that town on August 29 and 30.

P. T. Nelson, a student of the Wayne normal, has been elected to the position of principal of our schools for the coming year.—Allen News.

Mark Stringer, of Wayne, is in town this week. He was an old settler here, and had a blacksmith shop between here and Iowa.—Newcastle Times.

Mrs. George McLeod went to Wayne Wednesday for a visit with friends. Her son H. B. McLeod and his aunt will drive over Saturday.—Stanton Picket.

Miss Nellie Craig came home from the Wayne Normal Saturday evening and remained with her parents at this place until yesterday noon.—Battle-Creek Enterprise.

An electric trolley line is now being talked of by eastern capitalists. The proposed line would pass through South Sioux City, Homer, the Agencies, Decatur and on south to Omaha.

The proprietor of a merry-go-round will now sue the city of Emerson. It seems the merry-go-round people had trouble with some of the town toughs and the mayor ordered them out of town. Hence the suit.

Harvest hands have been mighty scarce this week and farmers have offered big wages. We heard of one agreeing to pay \$3 a day for a few days' work. Another offered \$2 a day for a week or two.—Randolph Times.

John A. Wachter and N. H. Nye left Wednesday for a month's trip through California, Oregon, Utah and other western states with a view of investing in some real estate. They were joined at Omaha by George Harris and another gentleman from Hooper who accompanied them. Before returning they will visit Louis Wachter at New Plymouth, Idaho.—Pender Republic.

A. H. Carter and wife, of Winside, Woods Hallman and wife, of Dakota City, and J. E. Crosby, of Hoskins, were all Bloomfield visitors over Sunday at Mr. and Mrs. Wm. Crosby's home in West Bloomfield. Mrs. Carter is a sister of Mr. Crosby and Mrs. Hallman a sister of Mrs. Crosby. Mr. Carter brought his water spaniel, one of the finest and most intelligent specimens of the canine tribe in Nebraska. Mr. and Mrs. L. G. Crosby and family of this city were present and a happy family reunion the result.—Bloomfield Monitor.

Mr. and Mrs. E. E. Mason returned Saturday night from their two months pleasure trip to California. Part of the time they spent visiting a brother of Mrs. Mason at Gilroy, California, and the rest at sight-seeing. Mr. Mason says he enjoyed the trip very much but thinks the Elkhorn valley far exceeds that country as a place to reside. At no place did he see crops that equal ours, and as a place of investment we lead them all. California is a great fruit country but there is little money to be made as fruit sells at a very low price there. Prunes sell at \$12 per ton and other fruit in proportion.—Stanton Register.

*W. C. Martin, proprietor of the Occidental hotel in Wakefield, is probably the only living man in Dixon county who has had his obituary notice published, and Mr. Martin has not only had this done once, but two or three times. Something over a year ago he suffered a very severe accident and it was reported in Ponce that he was dead. The Journal, accordingly, wrote up such a notice as the occasion seemed to demand. Mr. Martin, who is a regular reader of this paper, was able by the time the paper reached him, to read his obituary and no doubt enjoyed it not a little. For the past week or so he has been very low with typhoid fever and it was at one time reported that he was dead. The Dixon Herald and Wayne Herald, accordingly, wrote a nice little obituary notice and had him buried with all the proper ceremony. The Journal also heard that he was dead, but resolved not to be caught napping again, and it now develops that the landlord is on the road to recovery. We are glad that Mr. Martin is a stayer and we are resolved never to publish another obituary notice for him until we have official notice from St. Peter himself that he has duly entered the celestial gates and that they have been securely fastened behind him.—Ponce Journal.

Allen is preparing for a big time the 8th of August—the annual picnic of the old settlers and members of Dixon county. Over 2000 have been talked by

her citizens to entertain her guests that day. Among the many attractions for the day already secured are two ball games by fast clubs, the pretty bloomer girls of Wakefield and Allen will play a game of basket ball. Prof. Winterfinger will make a balloon ascension and thrilling parachute leap, a fine steam merry-go-round, shows, miscellaneous sports of every kind especially for the old settlers of the county; there will be two well-organized bands—the Ladies' Cornet Band of Ponce, having silver instruments and fifteen members engaged, and the Allen band of over twenty pieces—each will give concerts. Hon. Edward Rosewater, editor of the Omaha Bee and a Nebraska pioneer, the most cussed and discussed man in the west, will deliver the principle oration of the day. Hon. J. H. Mickey and W. H. Thompson, republican and fusion candidates for governor, will be present and make addresses, also Hon. John S. Robinson, our present congressman, and fusion candidate for re-election, and Hon. J. J. McCarthy, the republican candidate for congress, besides many other speakers of note. A rate of one and one-third fare for round trip has been secured on the Great Northern. A fine, shady park in the business part of town will be appreciated by those who want a basket dinner. The management reports that the hotel and stable accommodations will be ample, water plenty, and everything done to protect the visitors and show them a good time from early morning until late at night. It is not a Sunday school picnic, but vicious gambling devices have positively been prohibited. Allen cordially invites the whole world to be present and do honor to the sturdy pioneers and old settlers of one of the best county in the state.

A Missouri exchange says that a subscriber about seven years in arrears was dying. "How do you feel?" asked the editor. "All looks bright before me," gasped the subscriber. "I thought so, remarked the editor, 'you will feel the blaze in about ten minutes."

Here is a good one. We won't vouch for its truthfulness as it comes second-hand, but its too delicious to keep. A young lady of about seventeen summers travelling from Chicago, happened to see the many windmills in this vicinity when viewing the country from the car window, and from a lady traveler who was going to Madison to visit innocently questioned whether those great things were electric fans to keep the flies off the cattle.

We want a comb for the head of a fountain, a mit for the hand of fate, a boot for the foot of a mountain, a link from the chain of debate; a spoke from the wheel of fortune, a strap for the trunk of a tree, a tongue for the mouth of a river, a lock that will fit any quays; a drink from the breaker of sorrow, a look from the face of the storm, a stroke from the arm of justice, a ring for the finger of scorn; a knock at the door of repentance, a throb from the ocean's heart, a glance from the eye of a needle, and from Cupid's bow a dart.—Ex.

A Michigan minister is receiving considerable attention through the newspapers because he preached what is said to be the shortest sermon on record. Upon entering his church a couple of members remarked that it was pretty hot and they hoped he would cut it short. He announced as his text Luke, 18-24. "And he cried and said: Father have mercy on me and send Lazarus that he may dip the tip of his finger in water and cool my tongue, for I am tormented in this flame." Three persons—Abraham, Dives, Lazarus. It was hot where Dives was. He did not like it. He wanted to get out. So do we. Let us pray." That was the entire sermon.

If the business man sees fit to daub his note heads and envelopes with a rubber stamp and thus lead outsiders to think there are no printers in town, he ought to be saluted: Such a man as that when he comes to die, should have his obituary and the usual resolutions of his lodge printed on a board fence with a rubber stamp. When he has a baby at his house, or a party, or a son or daughter married, a full account of the important event might be printed on a sheet of wrapping paper and tacked on his front door, and when he is a candidate for office he might stamp a label to that effect that he wants to be constable or road overseer or justice of the peace, as the case may be, and pin it to the bosom of his pants. And when the opposition jumps onto him he might just stamp another label saying it is a blamed lie and pin that on top. Come to think of it, there is no end of uses a rubber stamp might be put to in the hands of enterprising and economical man.—Ex.

Let loose all your giggles, wear dimples, sweetness and light. You'll catch more flies with saccharine paper than you will with a threshing machine. Don't be a disgruntled old porcupine or a bat or a weeping jackal or a howling hyena. Be a daisy and everybody will like you and bless you. You'll be better than a doctor around. People with bad spells on them and the demons will cheer up, be chirk and get well. They'll think they have paid ten dollars to a scientist healer to make them believe there never was such a thing on earth as rheumatism or orygia or witch in the side or neuralgia. You'll drive away the hypos and the grippe. A merry heart does good like a pleasant medicine at a dollar a bottle. Your home will go thundering down the ages. Victor Hugo wrote a grand novel on "The Man Who Laughs." May he truly improve. The New Englander no longer in love. Let us
